TAMPA, FLORIDA, WORKSHOP

HOW TO USE THE FEDERAL REGISTER

FOR: Any person who must use the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register in cooperation with the University of South Florida Library and Department of Library, Media, and Information Studies, the University of Tampa Library, Hillsborough Community College Library and the Tampa Public Library.

WHAT: Free public workshop (approximately 2½ hours) to present:

1. Brief history of the Federal Register system.
2. Difference between legislation and regulations.
3. Relationship of Federal Register and the Code of Federal Regulations.
4. Important elements of a typical Federal Register document.
5. An introduction to the finding aids of the FR/CFR system.

WHEN: October 23, 1978, at 2:00 p.m.

WHERE: University of South Florida Tampa Campus, 4202 Fowler Avenue, College of Education Building, Room 302.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them, as part of the General Services Administration's efforts to encourage public participation in Government actions. There will be no discussion of specific agency regulations.

RESERVATIONS: Call 813-974-2100, Ext. 301 or 813-974-2557.

federal register

A 1 Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Tokay Grape Regulation 14, Amendment 1]

PART 926—TOKAY GRAPES GROWN IN SAN JOAQUIN COUNTY, CALIFORNIA

Extension of Effective Period for Regulation of Grade and Container Markings

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This amendment continues through November 30, 1978, the currently effective minimum grade and container marking requirements for Tokay grapes. These requirements are necessary to insure that the grapes shipped will be of suitable quality in the interest of consumers and producers.

EFFECTIVE DATE: October 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202–447–6393.

SUPPLEMENTARY INFORMATION: This regulation is issued under the provisions of the marketing agreement and Order No. 926 (7 CFR Part 926) which regulates the handling of Tokay grapes grown in San Joaquin County, Calif., and is effective under the Agricultural Marketing Agreement Act of 1937, as amended, (7 U.S.C. 601–674).

On August 28, 1978, a notice was published in the FEDERAL REGISTER (43 FR 38412) that the Department was considering amendment of § 926.315, Tokay grape regulation 14 (43 FR 35259), to continue the effective date of the regulation through November 30, 1978. The notice provided interested persons the opportunity to submit written comments relative to the proposal until September 16, 1978. None was received.

Under the regulation, which is a minimum standard, Tokay grapes must meet the grade and size specifications of U.S. No. 1 table grapes and at least 30 percent of the berries in the lower 25 percent of each bunch shall show characteristic color; and each container must bear a Federal-State inspection service lot stamp number.

After consideration of all relevant matter presented, including that contained in the notice and other available information, it is hereby found that extension of the effective period of § 926.315, Tokay grape regulation 14, as hereinafter set forth, will tend to effectuate the declared policy of the act and be in the public interest.

It is further found that good cause exists for not postponing the effective date of this amendment until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that; (1) shipments of Tokay grapes are currently in progress and to effectuate the declared policy of the act, the regulation currently in effect should be extended without interruption for the remainder of the season; (2) the amendment is the same as that specified in the notice to which no exceptions were filed; and (3) compliance with the regulation will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time hereof.

Therefore, the provisions of § 926.315(a) of Tokay grape regulation 14 are hereby amended to read as follows:

§ 926.315 Tokay Grape Regulation 14.

(a) During the period August 10, 1978, through November 30, 1978, no handler shall ship:

* * * * * *

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.)

Dated: September 22, 1978.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 78–27218 Filed 9–26–78; 8:45 am]

[3410–02]

PART 906—ORANGES AND GRAPEFRUIT GROWN IN TEXAS

Expenses and Rate of Assessment

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation authorizes expenses and a rate of assessment for the 1978–79 fiscal period, to be collected from handlers to support activities of the Texas Valley Citrus Committee which locally administers the Federal marketing order covering oranges and grapefruit grown in Texas.

DATES: Effective August 1, 1978, through July 31, 1979.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202–447–6393.

SUPPLEMENTARY INFORMATION: *Findings.* Pursuant to Marketing Order No. 906, as amended (7 CFR Part 906), regulating the handling of oranges and grapefruit grown in Texas, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendation and information submitted by the committee, established under this marketing order, and upon other information, it is found that the expenses and rate of assessment, as hereafter provided, will tend to effectuate the declared policy of the act.

§ 906.218 Expenses, rate of assessment, and carryover of unexpended funds.

(a) Expenses that are reasonable and likely to be incurred by the Texas Valley Citrus Committee during the period August 1, 1978, through July 31, 1979, will amount to $988,200.

(b) The rate of assessment for said period payable by each handler in accordance with § 906.34 is fixed at

V 4 3 / 1 8 8

$0.045 per 7/10-bushel carton of oranges and grapefruit.

(c) Unexpended assessment funds in excess of expenses incurred during the fiscal period ended July 31, 1978, shall be carried over as a reserve in accordance with § 906.35.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), as the order requires that the rate of asessment for a particular fiscal period shall apply to all assessable oranges and grapefruit handled from the beginning of such period which began August 1, 1978. To enable the committee to meet fiscal obligations which are now accruing, approval of the expenses and assessment rate is necessary without delay. Handlers and other interested persons were given an opportunity to submit information and views on the expenses and assessment rate at an open meeting of the committee. It is necessary to effectuate the declared purposes of the act to make these provisions effective as specified.

(Secs. 1-19, 48 Stat. 31, as amended (7 U.S.C. 601-674).)

Dated: September 21, 1978.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[3410-02]

PART 932—OLIVES GROWN IN CALIFORNIA

Expenses and Rate of Assessment

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation authorizes expenses and the rate of assessment for the 1978-79 fiscal year for the functioning of the Olive Administrative Committee which locally administers a Federal marketing order regulating the handling of olives grown in California. The regulation enables the committee to collect assessments from olive handlers and use the funds for its expenses.

DATES: Effective September 1, 1978, through August 31, 1979.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202-447-6393.

SUPPLEMENTARY INFORMATION: Pursuant to the marketing agreement and order No. 932, effective under the Agricultural Marketing Agreement Act of 1937, as amended, a notice of proposed rulemaking was published on August 30, 1978, in the FEDERAL REGISTER (43 FR 38706) regarding proposed expenses of $1,170,000 and rate of assessment of $15 per ton of olives handled. This notice allowed interested persons to submit written comments pertaining to the proposal until September 15, 1978.

An exception to the proposed amount of expenses and assessment rate was filed by Lindsay Olive Growers on the basis that its pro rata share of such expenses, together with inspection costs and that organization's own brand advertising program, would impose a substantial financial burden on the organization's financial resources in the current fiscal year. The exception asked that consideration be given to the establishment of an amount of expenses which could be supported by a $10 per ton assessment rate. The exception was carefully and fully considered. The proposed expenses and rate of assessment contained in the notice were recommended by the Olive Administrative Committee after opportunity for full discussion thereof at an open meeting. A lesser amount of expenses and assessment rate were considered at the meeting and rejected. Appropriate justification was submitted by the committee in support of its recommendation. No such justification was submitted in support of a lesser amount of expenses and a lesser assessment rate. The proposed expenses and rate of assessment would affect all olive handlers in a like manner, and the benefits derived therefrom would be equally available to all such handlers. The exception is therefore denied.

After consideration of all relevant matter presented, including that in the notice, the written comments submitted on the proposal and the information and recommendations submitted by the Olive Administration Committee, it is found that the expenses and rate of assessment, as hereinafter provided, will tend to effectuate the declared policy of the act.

Therefore, a new section is added which reads as follows:

§ 932.213 Expenses and rate of assessment.

(a) *Expenses.* Expenses that are reasonable and likely to be incurred by the Olive Administrative Committee during the period September 1, 1978, through August 31, 1979, will amount to $1,170,000.

(b) *Rate of assessment.* The rate of assessment for that period, payable by each first handler in accordance with § 932.39, is fixed at $15 per ton of olives.

It is further found that good cause exists for not postponing the effective date of this action until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that: (1) The relevant provisions of the marketing order require that the rate of assessment fixed for a particular fiscal year shall be applicable to all assessable olives from the beginning of that year; and (2) the current fiscal year began on September 1, 1978, and the rate of assessment herein fixed will automatically apply to all assessable olives beginning with that date.

(Secs. 1-19, 48 Stat. 31, as amended (7 U.S.C. 601-674))

Dated: September 21, 1978.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

Title 16—Commerical Practices

CHAPTER II—CONSUMER PRODUCT SAFETY COMMISSION

SUBCHAPTER B—CONSUMER PRODUCT SAFETY ACT REGULATIONS

PART 1201—SAFETY STANDARD FOR ARCHITECTURAL GLAZING MATERIALS

Amendment to Standard Clarifying Definitions, Description of Test Apparatus and Test Procedures

AGENCY: Consumer Product Safety Commission.

ACTION: Final amendment to rule.

SUMMARY: In this document, the Commission amends the safety standard for architectural glazing materials to clarify the definition of one type of "glazed panel" which is subject to the standard, and to modify the description of certain items of test apparatus and certain test procedures specified by the standard in order to clarify those descriptions and procedures. The proposed change to the accelerated environmental testing to increase the period of exposure in the xenon arc Weather-Ometer is not being issued at this time in order to await results of interlaboratory testing on the appropriate exposure period.

DATES: The amendments issued below shall become effective on October 27, 1978.

FOR FURTHER INFORMATION CONTACT:

Allen F. Brauninger, Directorate of Compliance and Enforcement, Consumer Product Safety Commission, Washington, D.C. 20207, 301-492-6629.

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of January 6, 1977 (42 FR 1427), the Consumer Product Safety Commission issued the safety standard for architectural glazing materials (16 CFR part 1201) with an effective date of July 6, 1977. This standard was issued under provisions of the Consumer Product Safety Act to reduce or eliminate risks of injuries associated with walking, running, or falling through or against glazing materials in storm doors, doors (both exterior and interior), shower and bathtub doors and enclosures, certain glazed panels, and sliding or patio-type doors.

The standard prescribes safety requirements for glazing materials manufactured on or after July 6, 1977, for use in storm doors, doors (both exterior and interior), shower and bathtub doors and enclosures, certain glazed panels, and sliding or patio-type doors. The standard also requires that the architectural products enumerated above which are manufactured on or after July 6, 1977, must be constructed or assembled using glazing materials that meet the requirements of the standard.

In the FEDERAL REGISTER of June 20, 1977 (42 FR 31164), the Commission amended the standard to exempt from its requirements any architectural product which would otherwise be subject to the standard if that product is manufactured between July 6, 1977, and July 5, 1978, using glazing materials manufactured before July 6, 1977, which are marked or certified to comply with ANSI standard Z97.1-1972 or -1975, "Performance Specifications and Methods of Test for Safety Glazing Material Used in Buildings," published by American National Standards Institute, Inc., 1430 Broadway, New York, N.Y. 10018.

The standard issued by the Commission is designed to reduce or eliminate unreasonable risks of injury associated with architectural glazing materials by ensuring that the glazing materials used in the products enumerated above either will not break when impacted with a certain energy, or will break so that they are less likely than other glazing materials to present the unreasonable risks of injury detailed above.

To determine the breakage characteristics of glazing materials used or intended for use in the products which are subject to the standard, an impact test is prescribed by the standard. The impact test consists of striking the glazing material to be tested with a punching bag filled with lead shot by dropping the bag from a height of 18 or 48 inches, depending on the architectural products in which the glazing material is used.

The standard also prescribes accelerated environmental durability tests for laminated glass, organic-coated glass, and plastics which are subject to the standard to demonstrate that those glazing materials will withstand exposure to sunlight, heat, water, and other factors which, over an extended period of time, may affect their breakage characteristics.

Additionally, the standard lists and defines the architectural products incorporating glazing materials which are subject to and must comply with the standard.

In the FEDERAL REGISTER of October 3, 1977 (42 FR 53798), the Commission proposed amendments to the standard to clarify the definition of one type of "glazed panel" which is subject to the standard. The notice of October 3, 1977, also proposed amendments to modify the description of certain items of test equipment and certain test procedures prescribed by the standard. Written comments on the proposed amendments were solicited for a period of 30 days.

In response to the amendments proposed on October 3, 1977, comments were received from two manufacturers of glazing materials, two suppliers of chemicals to manufacturers of plastic glazing materials, and the Safety Glazing Certification Council (SGCC).

The issues raised by these comments, and the response of the Commission follows below.

GLAZED PANELS

Among the risks of injury which the standard is intended to reduce or eliminate are those which may result when a person walks or runs into glazing material which is mistaken for open space rather than solid matter.

To address this risk of injury, the products which are subject to the standard include any piece of glazing material in a nonresidential building which has its bottom edge within 18 inches of a floor or walking surface; an exposed surface greater than nine square feet; and walking surfaces on both sides of the glazing material. This type of "glazed panel" is described and defined in § 1201.2(a)(10)(iii).

As issued on January 6, 1977, § 1201.2(a)(10)(iii) describes the location of the walking surfaces with relation to the glazing material in the following language:

> There are walking surfaces on both sides, either of which is within 36 inches (92 centimeters) of such panel * * *.

Thus, the language of the standard which defines this type of glazed panel states that if walking surfaces are present on both sides of a piece of glazing material in a nonresidential building, and one of those walking surfaces is within 36 inches of the glazing material, the glazing material is subject to the standard no matter how far away from the glazing material the other walking surface may be located, if all other conditions described in § 1201.2(a)(10)(iii) are present.

The purpose of the amendment proposed on October 3, 1977, was to limit the applicability of the standard to pieces of glazing material with walking surfaces on both sides to those instances where each of the walking surfaces is located within 36 inches of the glazing material and all other conditions described in § 1201.2(a)(10)(iii) are present. In proposing the amendment, the Commission expressed the belief that the present language of § 1201.2(a)(10)(iii) may include some glazed panels which do not present an unreasonable risk of injury because one of the two walking surfaces is sufficiently far away from the glazing material to prevent the misperception of the glazing material as open space.

A comment from a manufacturer of glazing materials favors the proposed change to this definition of "glazed panel," but suggests the addition of language which would further restrict applicability of the standard to those pieces of glazing material which have walking surfaces "intended for public use" on both sides of the glazing material. This comment states that the additional language would clearly state that pieces of glazing material located near floors and walking surfaces intended solely for the use of the owner, occupant, or employees of the owner or occupant of a nonresidential building are not subject to the requirements of the standard.

The Commission observes that the term "walking surface" is not defined in the standard as it was issued on January 6, 1977, nor in the proposed amendment published on October 3, 1977. The Commission has received several inquiries about the meaning of the term "walking surface," and agrees that some clarification of that term is needed.

However the Commission believes that the additional language suggested in this comment may exclude some areas which should be "walking surfaces" for purposes of the definition of glazed panel which is the subject of the proposed amendment.

The comment under consideration would revise the proposed amendment by limiting the term "walking surface" to those areas which are used by the public, as distinguished from those areas which are used exclusively by the owner, occupant, or employees of the owner or occupant of a nonresidential building.

SE 27 78 UMI

V 4 3 / 1 8 8

As stated above, the risks of injury which § 1201.2(a)(10)(iii) is intended to reduce or eliminate are those which may result from the misperception of glazing material as open space rather than solid matter because walking surfaces are present on both sides of the glazing material. Whether the walking surfaces are used by the general public, or exclusively by the owner, occupant, or employees of the owner or occupant of the building is not likely to affect the misperception of glazing material as open space. Rather, it is the perception of the walking surface as a place which is obviously intended and prepared to accommodate pedestrian traffic that contributes to the risks of injury associated with pieces of glazing material having walking surfaces on both sides. In the process of attempting to cross from one walking surface to another, many persons seemingly have been unable to recognize the glazing material as solid matter, with serious injuries occuring when the glazing material is broken by human impact.

After consideration of this comment, the Commission concludes that § 1201.2(a)(10)(iii) should be amended so that the standard is applicable to pieces of glazing material in nonresidential buildings which have walking surfaces on both sides when both of the walking surfaces are within 36 inches of the glazing material and all conditions described in that section are present. In response to the request in this comment for clarification of the term "walking surface," the Commission has added language to the amendment issued below stating that the term "walking surface" includes any floor, sidewalk, pathway or similar surface which has been paved or prepared to accommodate pedestrian traffic.

The view is expressed in the comment under consideration that glazing materials located near walking surfaces not intended for public use should not be subject to the standard. The Commission observes that § 1201.1(b) of the standard limits the applicability of the standard to the glazing materials and products incorporating glazing materials listed in § 1201.1(a) of the standard, when those materials or products are produced or distributed "for the personal use, consumption, or enjoyment of consumers in or around a permanent or temporary household or residence, in recreational, school, public, or other buildings or parts thereof." The terms "residential building," "recreational building," "school building," and "public building" are defined in § 1201.2(a) of the standard. The term "other buildings or parts thereof" is also defined in § 1201.2(a)(19) and includes any building other than a residential, recreational, school, or public building "in which all or part of the building is open to the public with or without specific invitation." Thus, if glazing materials are used in a building which does not fall within any of the types of buildings described in § 1201.1(b), as defined in § 1201.2(a), the glazing material is not subject to the standard.

The Commission believes that existing §§ 1201.1(b) and 1201.2(a) preclude the applicability of the standard to glazing materials in nonresidential buildings which are used exclusively by the owners, occupants, or employees of the owners or occupants of those buildings. For this reason, the Commission declines to add the specific language to modify the term "walking surface" requested in this comment.

Test Frame

As stated above, the standard prescribes an impact test in which a specimen of glazing material is struck by an impactor to determine whether it will break, and if so, if its breakage characteristics are acceptable. The glazing material to be tested is clamped inside a subframe which is held in position by an upright steel frame. This equipment is illustrated in figures 1, 2, 3, 4, and 5 of the standard, and is described in § 1201.4(b).

As issued on January 6, 1977, § 1201.4(b)(1)(iii) states: "The subframe * * * shall be reinforced at each corner." The illustration of the subframe in figure 4 of the standard depicts a subframe whose members are not reinforced at each corner.

To improve the clarity of § 1201.4(b)(1)(iii) and its consistency with figure 4, the Commission proposed to amend that section to state that the "inner subframe * * * shall be reinforced at each corner."

No comment was received on the proposed amendment of § 1201.4(b)(1)(iii). Consequently, the Commission issues the amendment of that section, below, as proposed on October 3, 1977.

As described in § 1201.4(b)(1) and illustrated in figure 3, the subframe is constructed with neoprene strips at all points where the test specimen contacts the subframe. Figure 3 states that the neoprene strips shall have a shore A, durometer hardness ranging from 30 to 45.

At the suggestion of a manufacturer of glazing materials, the Commission proposed to amend the standard by revising figure 3 to specify neoprene of a shore A durometer hardness of 30 to 50 in the amendments proposed on October 3, 1977. No comment was received on the proposed revision of figure 3. In the amendments issued below, figure 3 has been revised as proposed on October 3, 1977.

Comments from one manufacturer of glazing materials and SGCC request amendment of the standard to allow use of the test frame described in "Performance Specifications and Methods of Test for Safety Glazing Material Used in Buildings," issued by American National Standards Institute, ANSI standard Z97.1 These comments state that many manufacturers of glazing materials and testing laboratories have test equipment designed in accordance with ANSI standard Z97.1, and urge the Commission to modify § 1201.4 of the standard so that this existing equipment may be used by those manufacturers and laboratories without modification.

The Commission's purpose in proposing amendments to § 1201.4 of the standard on October 3, 1977, was to modify the description of the equipment and procedure used by the Commission's laboratory to determine if glazing materials meet the requirements of the standard.

The comments under consideration are concerned primarily with the testing which must be performed by manufacturers to assure that their products meet the requirements of the standard. For that reason, these comments go beyond the scope of the proposed amendment to the standard. Accordingly, the Commission declines to make the changes suggested in these comments.

Section 14(a) of the Consumer Product Safety Act requires the manufacturer of a consumer product which is subject to a consumer product safety standard to issue a certificate that the product complies with all applicable standards, and to base that certificate on either a test of each product, or on a "reasonable testing program."

In the FEDERAL REGISTER of December 16, 1977 (42 FR 63588), the Commission proposed regulations to establish requirements for a reasonable testing program to support certification of compliance with the standard for architectural glazing materials. The proposed regulations contain provisions to allow the use of some items of test apparatus and some procedures other than those prescribed by the standard in manufacturers' testing programs for purposes of certifying compliance with the standard. See proposed §§ 1201.32(a)(7), 1201.33(c)(2)(iv), 1201.33(d), and 1201.33(e)(1) at 42 FR 63593-63596. The Commission will consider these comments requiring modification of the equipment to be used to perform the impact test as part of the record of the proposed certification regulations.

The same comments also urge amendment of the standard to modify the tolerance for compression of the neoprene strips of the subframe which appears in § 1201.4(b)(1) and in figure 3. For the reasons set forth above, the Commission declines to modify the specifications for the neoprene strips set forth in the standard, but will consider whether a different tolerance should be allowed for the neoprene in the apparatus used by manufacturers for testing to support certificates of compliance with the standard.

Impactor

As stated above, the impact test is performed by striking the test specimen with a leather bag which has been filled with lead shot and covered with tape. The impactor is dropped from a height of either 18 or 48 inches (depending on the intended use of the glazing material) in order to subject the test specimen to an energy of either 150 or 400 foot-pounds.

As issued on January 6, 1977, § 1201.4(b) (2)(i) of the standard states:

> The impactor shall be a leather punching bag as shown in figure 5 of this section. The bag shall be filled with 7½ chilled lead shot to a total weight of completed assembly before taping, as shown in figure 5, of 100 pounds ±4 ounces (45.36±0.11 kilograms). [Emphasis added.]

Because the purpose of the test apparatus and procedure is to generate an energy of 150 or 400 foot pounds, the description of the impactor in § 1201.4(b)(2)(i) is slightly inaccurate in that it states that the punching bag shall weigh 100 pounds after it has been filled with lead shot but before it is taped. To correct this inaccuracy, the Commission proposed to amend this section to provide that the impactor shall weigh 100 pounds ±4 ounces after taping.

A comment from SGCC favors the proposed amendment, but suggests further revision of § 1201.4(b)(2)(i) to provide that any lifting or release bridle attached to the impactor shall be included when calculating the weight of the impactor.

The Commission observes that the impactor described in § 1201.4(b)(2) and illustrated in figure 5 of the standard does not have a lifting or release bridle, because the Commission does not use one. For this reason, the additional revision of § 1201.4(b)(2)(i) requested by this comment has not been made, even though the Commission agrees with the comment that persons employing such a lifting or release bridle should include its weight as a part of the total 100 pounds required. Section 1201.4(b)(2)(i) is amended below, as proposed on October 3, 1977.

To have the impactor descend smoothly without wobbling or oscillating, § 1201.4(b)(ii) of the standard, as issued on January 6, 1977, states:

> The impactor shall be supported as shown in figure 2. Provisions shall be made for raising the impactor to drop heights of up to 48 inches (1.22 meters). At its release it shall have been supported so that the pin going through its center was in line with the steel cable. The impactor shall not wobble or oscillate after its release.

In the notice published on October 3, 1977, the Commission stated that the first sentence of this section may be unduly restrictive because it permits no deviation from the support system depicted in figure 2 of the standard. The Commission proposed to amend § 1201.4(b)(2)(ii) by deleting the first sentence of that section.

In the notice of October 3, 1977, the Commission also observed that the fourth sentence of § 1201.4(b)(2)(ii) may present unnecessary difficulty to persons conducting the impact test because it absolutely prohibits the presence of any wobble or oscillation after the impactor is released. Wobble or oscillation of the impactor could occur, but to such a limited degree that its detection by the unassisted human eye would be difficult or impossible, without affecting the results of the impact test. For these reasons, the Commission proposed to amend the fourth sentence to indicate that the impactor shall be supported in a manner designed to minimize wobble or oscillation after its release.

No comment was received concerning either of the proposed amendments to § 1201.4(b)(2)(ii). Accordingly, the Commission amends that section below, as proposed on October 3, 1977.

A comment from SGCC requests further revision of § 1201.4(b)(2)(ii) to permit the use of a chain or cable instead of the threaded metal rod which passes through the center of the impactor. Additionally, this comment requests amendment of § 1201.4(d)(1) to allow a terrycloth towel to be draped in front of the impact test specimen.

The apparent purpose of the changes requested in this comment is not to modify the equipment and procedures used by the Commission laboratory for tests to determine compliance with the standard, but rather to permit manufacturers and independent laboratories to use equipment and procedures which vary in some respects from the description of the test equipment and procedure described in the standard.

Because this comment goes beyond the scope of the proposed amendment to the standard, the Commission declines to make the change requested in this comment. However, the Commission will consider the suggestions in this comment before issuing final regulations to prescribe a reasonable testing program to support certification of compliance with the standard.

Environmental Durability Tests

In addition to the impact test, the standard also requires that some glazing materials must be subjected to accelerated environmental durability tests. The materials which must be subject to environmental testing and the tests required for each such material are summarized in § 1201.4(a)(2) and Table 1 of the standard.

Table 1 states that plastics must be subjected to a simulated weathering test. This test requires exposure of specimens in a xenon arc Weather-Ometer for a period of 1,200 hours, as specified by § 1201.4(d)(2)(ii) of the standard.

When the Commission issued the final standard on January 6, 1977 (42 FR 1427), it stated that an exposure of 1,200 hours in a xenon arc Weather-Ometer had been estimated to represent the equivalent ultraviolet exposure of 2,000 hours in the twin enclosed carbon arc Weather-Ometer used by many testers, and of 375,000 langleys of solar irradiation.

On October 3, 1977, the Commission proposed an amendment of § 1201.4(d)(2)(ii) of the standard to increase the period of exposure in the xenon arc Weather-Ometer from 1,200 hours to 3,480 hours (42 FR 53798 at 53800).

The amendment was proposed in response to a petition from the Plastic Safety Glazing Committee which requested the Commission to change the environmental durability tests for plastic either by specifying use of the carbon arc Weather-Ometer, or by extending the period of exposure in the xenon arc Weather-Ometer to 3,480 hours.

At the time the Commission proposed this amendment, preliminary results of an interlaboratory testing program sponsored by the American National Standards Institute (ANSI) indicated that an exposure period of 1,200 hours in the xenon arc Weather-Ometer does not simulate 375,000 langleys of solar irradiation or produce the equivalent of 2,000 hours in the twin enclosed carbon arc Weather-Ometer.

A comment from a manufacturer of plastic glazing materials states that while an exposure period of 3,480 hours is more realistic than 1,200 hours, definitive test results are not yet available to establish that exposure of specimens for 3,480 hours in a xenon arc Weather-Ometer is the equivalent of 2,000 hours exposure in the twin enclosed carbon arc Weather-Ometer.

At this time, some work remains to be completed in the ANSI interlaboratory test program. The Commission staff is unaware of any other test results or data to establish the precise period of exposure in a xenon arc

Weather-Ometer which is equivalent to 2,000 hours exposure in the twin enclosed carbon arc Weather-Ometer.

Although information currently available to the Commission indicates that increasing the period of exposure in the xenon arc Weather-Ometer will make that exposure more nearly equivalent to 2,000 hours in a twin enclosed carbon arc Weather-Ometer, the Commission has decided not to finalize the proposed amendment to § 1201.4(d)(2)(ii) at this time.

While the Commission is not obligated to refrain from taking action on the proposal to extend the period of exposure in the xenon arc Weather-Ometer until completion of the ANSI interlaboratory test program, the Commission is concerned that the results of that study may support some period of exposure in the xenon arc Weather-Ometer other than 3,480 hours. Additionally, the Commission now has under consideration two other petitions requesting changes to the environmental durability test procedures for plastics.

Any change to the requirements of the standard will result in some cost to industries affected by that change as they determine whether products subject to the standard comply with the revised requirements; modify products to meet revised requirements; or remove products from the market which cannot meet the revised requirements. In order to avoid a series of amendments to the environmental durability test procedures for plastics, the Commission desires to act at one time on all of the changes to those provisions which have been proposed or requested. Consequently, the proposed amendment to § 1201.4(d)(2)(ii) is not included in the amendments to the standard issued below.

The Commission has not withdrawn the amendment to § 1201.4(d)(2)(ii) proposed on October 3, 1977, but rather has deferred any final action on that proposal until a later date. All comments addressed to that proposal will be considered before the Commission takes any final action on the proposed amendment of § 1201.4(d)(2)(ii).

Other Issues

Included in the comments received in response to the proposal of October 3, 1977, were suggestions for changes to provisions of the standard other than those specific sections which were the subject of the proposed amendments. Because these suggestions concern matters outside the scope of the proposed amendments, they have not been discussed in this document.

Conclusion

After consideration of the amendments proposed on October 3, 1977, and the comments received in response to the proposed amendments, the Commission concludes that the Safety Standard for Architectural Glazing Materials should be amended as set forth below. Therefore, pursuant to provisions of the Consumer Product Safety Act (sec. 9(e), Pub.L. 92-573; 15 U.S.C. 2058(e)) and the Administrative Procedure Act (5 U.S.C. 553), the Commission amends the Safety Standard for Architectural Glazing Materials by revising 16 CFR § 1201.2(a)(10)(iii), 1201.4(b)(1)(iii), 1201.4(b)(2)(i), 1201.4(b)(2)(ii) 1201.4(d)(2)(ii) and figure 3, as follows:

§ 1201.2 Definitions.

(a) As used in this Part 1201:

* * * * * *

(10) "Glazed panel" means a glazing material used in any building listed in § 1201.1(b) that is:

* * * * * *

(iii) In all buildings other than residential buildings, all panels, not described in paragraph (a)(10)(ii) of this section where:

(A) The lowest edge of the glazing material is less than 18 inches (46 centimeters) above any floor or any walking surface; and

(B) The exposed glazing material in such panel exceeds 9 square feet (0.3 square meters); and

(C) There is a walking surface on both sides, each of which is within 36 inches (92 centimeters) of such panel and the horizontal planes of such walking surfaces are within 12 inches (31 centimeters) of each other. For purposes of this § 1201.2(a)(10)(iii), the term "walking surface" shall include any floor, sidewalk, pathway, or similar surface which has been paved or prepared to accommodate pedestrian traffic.

* * * * * *

§ 1201.4 Test procedures.

* * * * * *

(b) *Test equipment*—(1) *Impact test frame and subframe.* * * *

(iii) The inner subframe (see figures 2, 3, and 4) for securing the test specimen on all four edges shall be reinforced at each corner. The material is shown as wood in figure 3, but other materials may be used provided the test specimen will contact only the neoprene strips.

* * * * * *

(2) *Impactor.* (i) The impactor shall be a leather punching bag as shown in figure 5 on this section. The bag shall be filled with No. 7½ chilled lead shot to a total weight of completed assembly as shown in figure 5, of 100 pounds ±4 ounces (45.36±0.11 kilograms). The rubber bladder shall be left in place and filled through a hole cut into the upper part. After filling the rubber bladder, the top should be either twisted around the threaded metal rod below the metal sleeve or pulled over the metal sleeve and tied with a cord or leather thong. Note that the hanging strap must be removed. The bag should be laced in the normal manner. The exterior of the bag shall be completely covered by ½ inch (1.3 centimeters) wide glass filament reinforced pressure sensitive tape. (Figure 5.)

(ii) Provisions shall be made for raising the impactor to drop heights of up to 48 inches (1.22 meters). At its release it shall have been supported so that the rod going through its center was in line with the steel support cable in a manner designed to minimize wobble or oscillation after its release.

(Sec. 9(e), Pub. L. 92-573, 86 Stat. 1215; (15 U.S.C. 2058(e)); (5 U.S.C. 553).)

Effective date. The amendments issued herein shall become effective on October 27, 1978.

Dated: September 22, 1978.

SADYE E. DUNN,
Acting Secretary, Consumer Product Safety Commission.

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release Nos. 33-5973, 34-15135, 35-20699, IC-10389, AS 254]

PART 210—FORM AND CONTENT OF FINANCIAL STATEMENTS, SECURITIES ACT OF 1933, SECURITIES EXCHANGE ACT OF 1934, PUBLIC UTILITY HOLDING COMPANY ACT OF 1935, INVESTMENT COMPANY ACT OF 1940, AND ENERGY POLICY AND CONSERVATION ACT OF 1975

Requirements for Form and Content of Financial Statements of Bank Holding Companies and Banks

Correction

In FR Doc. 78-25887, appearing at page 41022, in the issue for Thursday, September 14, 1978, make the following changes:

(1) On page 41024, first column, under the heading "Investment Securities", the sixth line now reading "• • • been changed by revising the definition • • •", should have read "• • • been deleted entirely. The requirement for disclosure of concentration in the securities of an issuer has been changed by revising the definition • • •".

(2) In the provisions set forth under § 210.9-02, in the middle column of page 41025, paragraph (e), change the footnote and its reference now reading "4" to "1".

(3) In the provisions set forth for § 210.9-03, in the first column of page 41027, in paragraph 14, change the footnote and its reference now reading "5" to "2".

(4) In § 210.9-05, in *Schedule I*, change the footnote and its reference now reading "6" to "3".

[8010-01]

[Release No. 33-5979]

PART 230—GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933

Resales of Securities

AGENCY: Securities and Exchange Commission.

ACTION: Final rules.

SUMMARY: The Commission is amending two rules which provide safe harbors for the resale of securities to the public. The amendments will: (1) Relax the limitations on the amount of securities that can be sold under the rules; (2) permit persons selling securities under the rules to deal directly with a market maker in lieu of engaging a broker; and (3) exempt estates and beneficiaries thereof who are not affiliates of the issuer of the securities from the requirement that all sales transactions under the rules be conducted through a broker or directly with a market maker. The amendments are being adopted in order to relax certain requirements of the rules which appear to be more burdensome than necessary.

EFFECTIVE DATE: September 25, 1978.

FOR FURTHER INFORMATION CONTACT:

Peter J. Romeo, Division of Corporation Finance, Securities and Exchange Commission, Washington, D.C. 20549, 202-755-1240.

SUPPLEMENTARY INFORMATION: The Commission today announced the adoption of various amendments to rule 144 (17 CFR 230.144) and rule 148 (17 CFR 230.148) under the Securities Act of 1933 ("1933 Act") (15 U.S.C. 77a et seq.). The amendments are intended to reduce the burdens imposed by the above rules in a manner that is consistent with the purpose and underlying policy of the 1933 Act to protect investors. In a related action, the Commission has determined to publish a separate release in the near future inviting public comments on certain proposed amendments to rules 144 and 148 which also are designed to limit the burdensome effects of those rules.

Background

Rule 144 prescribes standards which, if met, permit holders of restricted securities [1] as well as affiliates [2] of an issuer to sell their securities publicly without registration and without being deemed underwriters [3] under the 1933 Act. Rule 148 similarly provides a safe harbor for the resale of securities acquired in bankuptcy proceedings.

At the time rule 144 was adopted, it was considered to be an experiment whose operation would be monitored by the Commission.[4] The rule now has been in existence for over 6 years and appears generally to have operated well insofar as achieving its intended purposes under the 1933 Act is concerned. It has, however, been subject in recent years to the criticism that its requirements, particularly those limiting the amount of securities that can be sold under it, are more stringent than necessary.[5]

The Commission has not been unmindful of the critical comments concerning rule 144, as evidenced by certain of its actions in recent years. for example, in release No. 33-5613 (September 11, 1975) (40 FR 44541) it relaxed somewhat the volume limits applicable to sales of exchange-traded securities under the rule. This was accomplished by permitting NASDAQ [6] volume figures to be aggregated with exchange volume figures in determining the maximum amount of such securities that could be sold under the rule. In release No. 33-5717 (June 8, 1976) (41 FR 24701) it further relaxed the volume limitations of rule 144 by permitting trading data appearing on the consolidated transaction reporting system contemplated by rule 17a-15 (17 CFR 240.17a-15) under the Securities Exchange Act of 1934 ("1934 Act") (15 U.S.C. 78a et seq.) to be used in determining the amount of exchange-listed securities which may be sold under the rule. In addition, the Commission invited public comments in that release on the need for further modifying the volume limitations of the rule. Finally, it authorized its Directorate of Economic and Policy Research ("EPR") to conduct a study of sales under the rule to assess the market impact of the rule's volume limitations.

EPR recently completed its study and submitted its findings to the Commission.[7] The study encompassed a sample of 155 large transactions in exchange-listed securities only.[8] The study concluded that: "In the aggregate, there did not appear to be any significant adverse price impacts associated with rule 144 transactions." [9] It further stated that "• • • if the quantity limitation were relaxed, potential adverse price effects might be observed • • • [b]ut there is evidence which mutes this concern." [10]

The EPR study suggests that the volume limitations of rule 144 can be relaxed on an experimental basis. In light of that study, as well as its concern that the rule may be more restrictive than necessary in its present form, the Commission has determined to relax rule 144 in certain significant respects. Similar changes also are being made in rule 148 in line with the Commission's statement at the time it adopted the rule that if the rule 144 volume limitations were relaxed as a

---

[1] The term "restricted securities" includes securities acquired in nonpublic offerings, such as those under sec. 4(2) of the 1933 Act, as well as securities acquired in offerings made in reliance upon rule 240 (17 CFR 230.240) under the Act.

[2] An "affiliate" of an entity is defined in rule 405 (17 CFR 230.405) under the 1933 Act as "a person that directly, or indirectly through one or more intermediaries, controls, or is controlled by, or is under common control with, the (entity)."

[3] The term "underwriter" is broadly defined in sec. 2(11) of the 1933 Act and includes persons who acquire securities "with a view to • • • distribution."

[4] See in this regard the portion of release No. 33-5223 (Jan. 11, 1972) (37 FR 591) entitled "Operation of the Rule."

[5] For example, the report of the SBA Task Force on Venture and Equity Capital for Small Business, U.S. Small Business Administration (January 1977) recommends that the requirements of the rule be relaxed somewhat. In addition, serveral persons testified at the Commission's recent hearings on small business that the rule should be modified in various respects.

[6] NASDAQ is the name of the automated quotation service of the NASD, Inc.

[7] The study is entitled "An Analysis of the Rule 144 Volume Limitations" (hereinafter the "EPR study") and is available for public inspection at the Commission's public reference room located at 1100 L Street NW., Washington, D.C.

[8] A study of the volume limitation provisions of rule 144 with respect to over-the-counter securities is currently in progress but will likely neither be as timely nor as reliable as the already completed study due to data limitations.

[9] EPR study, 21.

LIMI

result of the EPR study it anticipated making corresponding changes in rule 148.[11] In addition to the changes being adopted today, which are described in the next section of this release, certain additional revisions to rules 144 and 148 will, as previously noted, be proposed for public comment in a separate release.

DISCUSSION OF THE CHANGES

The provisions of rules 144 and 148 that are being revised involve the volume limitation and brokerage transaction requirements of those rules.

A. VOLUME LIMITATIONS

Prior to the amendments announced today, paragraph (e) of rule 144 provided that the amount of securities that could be sold under the rule during any 6-month period could not exceed the following: (a) For securities listed on a national securities exchange ("listed securities"), the lesser of either 1 percent of the shares or other units of the class outstanding or the average weekly trading volume during the 4-week period immediately preceding the sale; and (b) for securities not listed on an exchange ("unlisted securities"), 1 percent of the outstanding securities of the class. Rule 148 provided in paragraph (b)(1) thereof that the volume limit during any 6-month period shall be 1 percent of the sum of those securities of the class which are outstanding and those which are reserved for future issuance to settle claims and interests arising from bankruptcy proceedings.

The amendments to the above provisions announced today involve two major changes. First, the 6-month period for measuring sales under the rules has been reduced to 3 months. Second, the standard used in rule 144 to determine the amount of securities that may be sold during the measuring period has been revised to permit, for both listed and unlisted securities, the sale of the greater of 1 percent of the outstanding securities of the class or the average weekly trading volume during the 4 calendar weeks preceding the sale. A similar change also has been made in rule 148.[12] These revisions will more than double the amount of securities that formerly could be sold under the rules.[13] In addition, the changes will have the effect of eliminating the disparity that formerly existed in rule 144 between the volume standards for listed securities and those for unlisted securities.

It should be noted that in computing the average weekly trading volume for purposes of the revised volume standards, both exchange volume and NASDAQ volume will continue to be included in such computations. And, to the extent that volume figures are available through the consolidated transaction reporting system contemplated by rule 17a-15 under the 1934 Act, such figures also will continue to be considered in determining the volume limits. Of course, if volume figures are not available through an exchange, NASDAQ, or the consolidated transaction reporting system, the amount limitation for purposes of rule 144 will have to be based solely on 1 percent of the outstanding securities of the class.

In adopting the changes described above, the Commission wishes to emphasize that they are experimental in nature and are subject to review as to their effect on the marketplace. Because no one can predict in advance the point at which market disruptions due to excessive sales under rules 144 and 148 may occur, it is necessary to be somewhat arbitrary in selecting the limits for sales under the rules. While the changes announced today represent the Commission's best estimate at this time as to acceptable volume limits, the possibility exists that they may prove to be unsatisfactory. For that reason, the Commission intends to monitor their effects and may consider further amendments to the volume limits at some future date.

B. BROKERS' TRANSACTION REQUIREMENT

Rule 144 until now has required persons relying on the rule for the sale of securities to effect all such sales in brokers' transactions. The broker in turn has been prohibited by the rule from soliciting orders to buy the securities, and the seller has not been permitted to make payments in connection with the sale of the securities to any person other than the broker. Rule 148 has contained a similar requirement.

The Commission has determined to make two changes in the brokers' transaction requirement, as explained in the paragraphs which follow: (1) Transactions directly with a market maker will be permitted in lieu of brokers' transactions; and (2) estates and beneficiaries thereof who are not affiliates of the issuer will be exempted from the brokers' transaction requirement. The prohibitions against the solicitation of buy orders and making payments to any person other than the broker, however, have not been changed and therefore will continue to apply.

1. TRANSACTIONS WITH A MARKET MAKER

The brokers' transaction requirement of rules 144 and 148 was included to insure that persons selling under those rules did not solicit orders to buy the securities in connection with such transactions. Such solicitations not only are inconsistent with the effort in those rules to limit sales to "routine trading transactions" but also raise the corresponding concern whether such persons are participating in a distribution of the securities being sold. The brokers' transaction requirement appears, however, to impose unnecessary expense by requiring the interpositioning of a broker in those situations where a seller could trade directly with a market maker,[14] absent the brokers' transaction requirement. Because a market maker, by definition, holds himself out as willing to buy that particular security on a regular or continuous basis, a seller should not, for purposes of rules 144 and 148, be considered to have solicited a trade directly with a market maker. The Commission finds no policy reason why a seller should not be able to trade directly with a market maker under essentially the same circumstances that he could trade indirectly with that market maker through a broker and, accordingly, has revised rules 144 and 148 to eliminate the brokers' transaction requirement in such situations.

2. EXEMPTION FOR NONAFFILIATED ESTATES AND BENEFICIARIES

The brokers' transaction requirements of rules 144 and 148 presently apply to all securities sold under those rules, regardless of the nature of the seller. The rule has been criticized on the ground that it is not always possible for estates or beneficiaries thereof who are not affiliates of the issuer to sell blocks of restricted securities in brokers' transactions in those circumstances where the issuer is small and there is no ready market for its securities. In view of the special circumstances attendant to securities acquired by or from an estate, as well as the fact that nonaffiliated estates and beneficiaries are exempted from the holding period[15] and volume limitation[16] requirements of rule 144, the Commission has determined to provide a similar exemption from the brokers' transaction requirement as well. A corresponding change is also being made in rule 148.

TEXT OF THE AMENDMENT

I. 17 CFR 230.144 is amended to read as follows:

§ 230.144 Persons deemed not to be engaged in a distribution and therefore not underwriters.

* * * * *

(e) *Limitation on amount of securities sold.* Except as hereinafter provided, the amount of securities which may be sold in reliance upon this rule shall be determined as follows:

(1) *Sales by affiliates.* If restricted or other securities are sold for the account of an affiliate of the issuer, the amount of securities sold, together with all sales of restricted and other securities of the same class for the account of such person within the preceding 3 months, shall not exceed the greater of (i) 1 percent of the shares or other units of the class outstanding as shown by the most recent report or statement published by the issuer, or (ii) the average weekly reported volume of trading in such securities on all national securities exchanges and reported through the automated quotation system of a registered securities association during the 4 calendar weeks preceding the filing of notice required by paragraph (h), or if no such notice is required, the date of receipt of the order to execute the transaction by the broker or the date of execution of the transaction directly with a market maker, or (iii) the average weekly volume of trading in such securities reported through the consolidated transaction reporting system contemplated by rule 17a-15 under the Securities Exchange Act of 1934 during the 4-week period specified in subdivision (ii) of this subparagraph.

(2) *Sales by persons other than affiliates.* The amount of restricted securities sold for the account of any person other than an affiliate of the issuer, together with all other sales of restricted securities of the same class for the account of such person within the preceding 3 months, shall not exceed the amount specified in paragraph (e)(1)(i), (1)(ii), or (1)(iii) of this section, whichever is applicable.

* * * * *

(f) *Manner of sale.* The securities shall be sold in "brokers' transactions" within the meaning of section 4(4) of the Act or in transactions directly with a "market maker," as that term is defined in section 3(a)(38) of the Securities Exchange Act of 1934, and the person selling the securities shall not (1) solicit or arrange for the solicitation of orders to buy the securities in anticipation of or in connection with such transactions, or (2) make any payment in connection with the offer or sale of the securities to any person other than the broker who executes the order to sell the securities. The requirements of this paragraph, however, shall not apply to securities sold for the account of the estate of a deceased person or for the account of a beneficiary of such estate: *Provided,* The estate or beneficiary thereof is not an affiliate of the issuer.

* * * * *

II. 17 CFR 230.148 is amended to read as follows:

§ 230.148 Persons deemed not to be underwriters of securities issued or sold in connection with bankruptcy proceedings.

* * * * *

(b) *Securities issued under a plan.* A person or entity who acquires securities issued under a plan in a transaction exempt from the registration requirements of the Securities Act of 1933 shall not be deemed an underwriter within the meaning of section 2(11) of the Act with respect to resales of such securities if all of the following conditions are met:

(1) *Volume limitation.* The amount of securities sold for the account of such person or entity during any 3-month period shall not exceed the greater of (i) 1 percent of the sum of the number of shares or other units of the class issued and outstanding and the number of shares or units of the class reserved for future issuance in respect of claims and interests filed and allowed under the plan, as shown by the most recent report or statement published by the issuer, or (ii) the average weekly reported volume of trading in such securities on all national securities exchanges and reported through the automated quotation system of a registered securities association during the 4 calendar weeks preceding the date of receipt of the order to execute the transaction by the broker or the date of execution of the transaction directly with a market maker, or (iii) the average weekly volume of trading in such securities reported through the consolidated transaction reporting system contemplated by rule 17a-15 under the Securities Exchange Act of 1934 during the 4-week period specified in subdivision (ii) of this subparagraph. For the purpose of determining the limitation on the amount of securities sold, all securities of the same class sold under this rule by persons or entities acting in concert shall be aggregated.

* * * * *

(3) *Manner of sale.* The securities shall be sold in "brokers' transactions" within the meaning of section 4(4) of the Securities Act or in the transactions directly with a "market maker," as that term is defined in section 3(a)(38) of the Securities Exchange Act of 1934, and the person selling the securities shall not (i) solicit or arrange for the solicitation of orders to buy the securities in anticipation of or in connection with such transactions, or (ii) make any payment in connection with the offer or sale of the securities to any person other than the broker who executes the order to sell the securities. The requirements of this paragraph, however, shall not apply to securities sold for the account of a deceased person or for the account of a beneficiary of such estate, provided the estate or beneficiary thereof is not an affiliate of the issuer. For the purposes of this rule, the term "brokers' transactions" shall be deemed to include transactions of the type described in rule 144(g) (§ 230.144(g)) under the Securities Act.

* * * * *

(Secs. 2(11), 4(1), 4(4), 19(a), 48 Stat. 74, 77, 85; secs. 201, 203, 209, 210, 48 Stat. 904, 906, 908; secs. 1-4, 6, 68 Stat. 683, 684; sec. 12, 78 Stat. 580 (15 U.S.C. 77b(11), 77d(1), 77d(4), 77s(a)).)

STATUTORY BASIS AND EFFECTIVE DATE

The amendments to rules 144 and 148 have been adopted by the Commission pursuant to the Securities Act of 1933, particularly sections 2(11), 4(1), 4(4), and 19(a) thereof. The amendments will become effective on September 25, 1978.

Because all of the amendments adopted today represent a relaxation of existing requirements that were previously published for comment pursuant to the Administrative Procedure Act (5 U.S.C. 533), the Commission finds that prior notice and public comment under the Act are not necessary.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

SEPTEMBER 19, 1978.

[FR Doc. 27194 Filed 9-26-78; 8:45 am]

[11] Release No. 33-5918 (Mar. 29, 1978) (43 FR 14445).

[12] For purposes of rule 148, the base upon which the 1-percent standard will be computed will include, in addition to the outstanding securities of the class, the securities reserved for future issuance in settlement of claims or interests.

[13] In view of the substantial increase in the amount of securities that will now be permitted to be sold under rules 144 and 148, consideration should be given by persons who may be subject to rule 10b-6 (17 CFR 240.10b-6) under the 1934 Act to whether sales under the liberalized volume limitations of rules 144 and 148, under certain circumstances, may involve distributions for purposes of rule 10b-6.

[14] Sec. 3(a)(38) of the 1934 Act defines the term "market maker" to mean "any specialist permitted to act as a dealer, any dealer acting in the capacity of block positioner, and any dealer who, with respect to a security, holds himself out (by entering quotations in an interdealer communications system or otherwise) as being willing to buy and sell such security for his own account on a regular or continuous basis.

[15] See par. (d)(4)(vii) of rule 144.

[16] See par. (e)(3)(v) of rule 144.

Title 23—Highways

CHAPTER I—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

SUBCHAPTER G—ENGINEERING AND TRAFFIC OPERATIONS

[FHWA Docket No. 78-14]

PART 660—SPECIAL PROGRAMS (DIRECT FEDERAL)

Subpart E—Highways for National Defense

AGENCY: Federal Highway Administration, DOT.

ACTION: Final rule.

SUMMARY: This rule is intended to prescribe the policies and procedures of the Federal Highway Administration (FHWA) governing the evaluation of access-road needs and the administration of related projects funded by the Department of Defense (DOD). The defense access-roads program provides a means by which the Federal Government can pay its fair share of the cost of improvements needed for adequate highway service to defense installations, replacement of highways closed by the establishment or expansion of defense installations, and repair of highways damaged by major military maneuvers or defense construction. The FHWA will serve as an independent evaluator of access-road needs and administer defense access-road projects in accordance with Federal-aid procedures.

EFFECTIVE DATE: October 2, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles L. Kolsky, Office of Highway Operations, 202-426-0466; or Lee J. Burstyn, Office of the Chief Counsel, 202-426-0799, Federal Highway Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m. e.t., Monday through Friday.

SUPPLEMENTARY INFORMATION: This rule defines the policies and procedures governing access-road needs evaluations and/or projects financed by the DOD and administered by FHWA under authority of 23 U.S.C. 210. All changes have been made in accordance with the objectives mandated by 23 U.S.C. 101(e).

The FHWA will serve as an independent evaluator of access-road needs while the responsibility for determining eligibility remains with the DOD or other funding agency.

The promulgation of this rule is necessary so that FHWA's responsibility in regard to roads funded with defense access funds can be clearly understood by highway officers and other concerned parties. The implemention of this regulation will assist the Washington office in resolving highway matters having defense implications. Determination of the highway agency which will accomplish the location, design, and construction of the projects covered will be made by the FHWA Division Administrator.

Anyone wishing to submit written comments related to this regulation is advised to submit them to FHWA docket No. 78-14, room 4205, Federal Highway Administration, 400 Seventh Street SW., Washington, D.C. 20590. These comments will be considered in processing future revisions to this regulation. All comments will be available for examination between the hours of 7:45 a.m. and 4:15 p.m. in Room 4205 at the above address.

This regulation codifies the policies and procedures contained in the Federal-Aid Highway Program Manual, volume 6, chapter 9, section 5,[1] formerly Policy and Procedure Memorandum (PPM) 22-1.

NOTE.—The Federal Highway Administration has determined that this document does not contain a major proposal according to the criteria established by the Department of Transportation pursuant to E.O. 12044.

Issued on September 18, 1978.

KARL S. BOWERS,
Federal Highway Administrator.

In consideration of the foregoing, the Federal Highway Administration is amending chapter I of Title 23, Code of Federal Regulations, Part 660 by adding a new subpart E as set forth below.

Subpart E—Highways for National Defense

Sec.
660.501 Purpose.
660.503 Objectives.
660.505 Definitions.
660.507 Missile installations and facilities.
660.509 Project administration.
660.511 Standards.

AUTHORITY: 23 U.S.C. 210, 315; 49 CFR 1.48(b).

Subpart E—Highways for National Defense

§ 660.501 Purpose.

To prescribe policies and procedures governing access-road needs evaluations and administration of projects financed under the defense access roads and other defense related special highway programs.

§ 660.503 Objectives.

The defense access-roads program provides a means by which the Federal Government may pay its fair share of the cost of:

(a) Highway improvements needed for adequate highway service to defense and defense-related installations.

(b) New highways to replace those which must be closed to permit establishment or expansion of defense installations.

(c) Repair of damages to highways caused by major military maneuvers.

(d) Repair of damages due to the activities of contractors engaged in the construction of missile sites.

§ 660.505 Definitions.

(a) *Defense installation.* A military reservation or installation, defense-related industry, or source of raw materials.

(b) *Military Traffic Management Command (MTMC).* The military transportation agency with responsibilities assigned by the Secretary of Defense for maintaining liaison with the Federal Highway Administration (FHWA) and other agencies in the integration of defense needs into the Nation's highway program.

(c) *Certification.* The statement to the Secretary of Transportation by the Secretary of Defense (or such other official as the President may designate) that certain roads are important to the national defense.

(d) *Access road.* An existing or proposed public highway which is needed to provide essential highway transportation services to a defense installation. (This definition may include public highways through military installations only when right-of-way for such roads is dedicated to public use and the roads are maintained by civil authority.)

(e) *Replacement road.* A public road constructed to replace one closed by establishment of a new or the expansion of an old defense installation.

(f) *Maneuver area road.* A public road in an area delineated by official orders for field maneuvers or exercises of military forces.

§ 660.507 Missile installations and facilities.

Damage to public highways. Should damage occur to public highways as a result of construction activities, the contractor would normally be held responsible for restoring the damages. However, should the contractor deny responsibility, restoration is provided for under Section 210(h), Title 23, United States Code.

(a) *Restoration under the contract.* (1) The highway agency having jurisdiction over the road shall take appropriate actions, such as load and speed restrictions, to protect the highway. When extensive damages is anticipated and the contractor under the terms of the contract is responsible, it may be necessary to require a performance bond to assure restoration.

(2) If the contractor does not properly maintain the roads when requested in writing, the highway agency having jurisdiction over the road shall perform extraordinary maintenance as necessary to keep the roads serviceable and maintain adequate supporting records of the work performed. Claims shall be presented to the contractor for this extraordinary maintenance and any other work required to restore the roads. If the contractor denies responsibility, the claim with the required supporting document shall be presented to the contracting officer.

(b) *Restoration under section 210(h).* (1) To implement section 210(h), the Department of Defense (DOD) must make the determination that a contractor for a missile installation or facility did not include in the bid the cost of repairing damage caused to public highways by the operation of contractor vehicles and equipment. The FHWA must then make the determination that the State highway agency is or has been unable to prevent such damage by restrictions upon the use of the highways without interference with or delay in the completion of the contract. If these determinations are made, the Division Administrator will be authorized by the Washington headquarters to reimburse the highway agency for the cost of the work necessary to keep the roads in a serviceable condition.

(2) Upon receipt of a damage claim, division office representatives accompanied by representatives of the agencies that made the original condition survey will inspect the roads on which damage is claimed. The Division Administrator shall then prepare an estimate of the cost of restoring the roads to original condition as well as any documented cost for extraordinary maintenance for which reimbursement has not been received. No allowance for upgrading the roads shall be included.

§ 660.509 Project administration.

(a) Defense access-road projects shall be administered in accordance with Federal-aid procedures. No project revision may be approved by a FHWA field office which would result in exceeding the amount of defense access-road funds allocated for that project without prior authorization. Prior authorization shall also be obtained before approving any project revisions which entail substantial deviations from the design, location, or length of the project as described in the project papers upon which the certification was based.

(b) Defense access-road funds shall not be substituted for the State's matching share of the Federal-aid portion of a project.

(c) A firm commitment from the State or local highway agency, within whose jurisdiction the access-road lies, that it will accept the responsibility for maintenance of the completed facility shall be furnished before authorization of acquisition of right-of-way or construction of a project can proceed.

§ 660.511 Standards.

Access-roads to permanent defense installations and all replacement roads shall be designed to conform to the same standards as the agency having jurisdiction is currently using for other comparable highways under similar conditions in the area. In general, the design shall conform to the American Association of State Highway Transportation officials' standards. Should local agencies desire higher standards than are currently being used for other comparable highways under similar conditions in the area, they shall finance the increases in cost.

Implementation of Program To Increase Contracting Participation of Minority Business Enterprises

Correction

In FR Doc. 78-260-24 appearing at page 41207 in the issue for Friday, September 15, 1978, paragraph (c) in the second column of page 41212 is part of the introduction rather than part of the required clauses and therefore should not have been printed in small type.

[4110-83]

Title 42—Public Health Service

CHAPTER I—PUBLIC HEALTH SERVICE, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 62—NATIONAL HEALTH SERVICE CORPS SCHOLARSHIP PROGRAM

AGENCY: Public Health Service, HEW.

ACTION: Interim—Final regulations.

SUMMARY: The regulations in this part are applicable to the award of scholarships under the National Health Service Corps Scholarship Program to students receiving academic training in medicine, osteopathy, dentistry, and other health professions in order to assure an adequate supply of trained health professionals for the National Health Service Corps. The National Health Service Corps is used by the Secretary to improve the delivery of health services in health manpower shortage areas.

DATES: These regulations are effective immediately. As discussed below, comments on the regulations are invited. Comments must be received on or before November 27, 1978.

ADDRESSES: Written comments should be addressed to the Director, Bureau of Health Manpower, Health Resources Administration, 3700 East-West Highway, Center Building, fourth floor, Hyattsville, Md., 20782. All comments received will be available for public inspection and copying at the Office of Program Operations, Bureau of Health Manpower, at the

above address, weekdays (Federal holidays excepted) between the hours of 8:30 a.m. and 5 p.m.

FOR FURTHER INFORMATION CONTACT:

Gary J. Wold, Chief, National Health Service Corps Scholarship Program, Bureau of Health Manpower, Health Resources Administration, Center Building, room 5-44, 3700 East-West Highway, Hyattsville, Md. 20782, 301-436-6443.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Health, Department of Health, Education, and Welfare, with the approval of the Secretary of Health, Education, and Welfare, is revoking the existing Part 62 and adding a new Part 62 entitled "National Health Service Corps Scholarship Program."

The purpose of the new part is to establish regulations implementing the National Health Service Corps Scholarship Program ("Scholarship Program") authorized by section 751 of the Public Health Service Act ("Act") (42 U.S.C. 294t). Under this authority, the Secretary enters into contracts with students who are enrolled in courses of study leading to degrees in medicine, osteopathy, dentistry, or other health professions. Students who enter into the contracts agree to serve 1 year for each year of scholarship support they receive or 2 years, whichever is greater, as members of the National Health Service Corps providing full-time clinical service in federally designated health manpower shortage areas.

The following is a brief summary of the major features of the regulations:

(a) Section 62.6 sets forth the procedures for selecting individuals to participate in the Scholarship Program. First, applications will be placed in priority categories as described in § 62.6(b). First priority will be given to individuals who (1) had previously received scholarships under the Public Health and National Health Service Corps Scholarship Training Program ("PH/NHSC Scholarship Training Program") which has since been repealed, (2) receive scholarships under the current Scholarship Program, or (3) receive scholarships under section 758 of the Act for first-year students of exceptional financial need. Second priority will relate to the class year of students and will vary from school year to school year as set forth in § 62.6(b)(2). After applications are placed within categories based upon these priorities, the Secretary will evaluate the applicants in each category by applying the five criteria listed in § 62.6(c) of the regulations. These criteria express variables that indicate the potential for an applicant's successful performance as a member of the National Health Service Corps. The five criteria are:

1. Work Experience: The extent to which the applicant's work background has included salaried or volunteer experience (preferably health-related) in medically underserved urban settings;

2. Community Background: The extent to which the applicant has resided in medically underserved urban or rural areas;

3. Career Goals: The expressed intent of the applicant to enter into a primary care practice in a medically underserved urban or rural area following the completion of the period of obligated service;

4. Faculty Recommendation; and,

5. Academic Performance.

Special consideration for selection of Scholarship Program participants will be given to (1) medical and osteopathic students who intend to enter family practice, internal medicine, pediatrics, or osteopathic general practice residencies, and to (2) dental applicants who intend to undertake general practice training following graduation or who have no plans for postgraduate training. This special consideration will be given because the Secretary believes that these practitioners will be able to provide the broadest spectrum of patient care in health manpower shortage areas.

(b) Section 62.9(a) of the regulations specifies that, if a participant receives a degree from a school of medicine, osteopathy or dentistry, the Secretary will, upon request of the participant, defer the beginning date of the obligated service for a period not to exceed three years for the purpose of completing an approved graduate training program. To assure that physicians who begin their service obligations will be qualified to engage in the delivery of primary care in the National Health Service Corps, the regulations require medical and osteopathic participants who do not intend to enter training which can be completed within the maximum three year period to enter and complete at least one year of approved graduate training relating to primary care before serving the period of obligated service. The regulations further provide that if participants fail to begin or complete this graduate training, they will be subject to the § 62.10(c) default penalty.

(c) Section 62.10(c) of the regulations contains a statement of the basic payment obligation which a Scholarship Program participant must satisfy if the participant fails to begin or complete the service obligation incurred under § 62.8. Section 754(c) of the Act sets forth the formula for calculating this payment obligation. Under this formula, a Scholarship Program participant who fails to begin or complete the service obligation must pay the United States an amount equal to three times the amount of the scholarship award made to on on behalf of the participant, plus interest, at the maximum legal prevailing rate. If the participant performs a portion of the period of obligated service before the default occurs, the formula allows the participant to credit that portion toward the total period of obligated service incurred under § 62.8, thus reducing the amount of money owed. Payment of the amount must be made within 1 year of the date on which the participant failed to begin or complete the period of obligated service.

(d) Section 62.8(g) of the regulations addresses the requirement in section 753 of the Act that the Secretary release a participant from all or part of the service obligation to engage in the full-time private, clinical practice of the participant's health profession in a health manpower shortage area. Regulations implementing this private practice option are currently being prepared and will be published in the FEDERAL REGISTER as soon as possible.

(e) On October 1, 1977, the predecessor authority to the present Scholarship Program, section 225 of the Act establishing the PH/NHSC Scholarship Training Program, was repealed. Section 62.14 addresses the relationship between the PH/NHSC Scholarship Training Program and the new Scholarship Program as it pertains to individuals who received awards under the old program and who will receive awards under the new Scholarship Program. As a rule, if individuals received scholarships under the PH/NHSC Scholarship Training Program and also receive scholarship support under the new Scholarship Program, they will be subject to all of the provisions of the new Scholarship Program (see § 62.14(a) of the regulations). A number of exceptions to this general rule, however, are included in § 62.14(b) relating to carry-over of periods of obligated service, internship/residency training creditability, and default penalties.

Timely implementation is essential if students are to have adequate leadtime to make informed decisions regarding participation in the Program so that scholarships can be awarded in August for school year 1978-79. Therefore, the Secretary has determined under 5 U.S.C. 553 and Department policy that it would be impractical and contrary to the public interest to follow proposed rulemaking procedures or to delay the effective date of these regulations.

Notwithstanding the omission of the proposed rulemaking procedures, interested persons are invited to submit written comments or data relating to these regulations to the Director of the Bureau of Health Manpower at the address given above. All relevant materials received not later than November 27, 1978, will be considered, and following the close of the comment period, the regulations will be revised as warranted by the public comments received. It is intended that any revision of these regulations arising from these comments will be published within 90 days of the close of the comment period.

The regulations as set forth below will be effective September 27, 1978.

Accordingly, the existing Part 62 of 42 CFR is revoked and a new Part 62 is adopted to read as set forth below.

Dated: July 24, 1978.

JULIUS B. RICHMOND,
Assistant Secretary for Health.

Approved: September 19, 1978.

JOSEPH A. CALIFANO, Jr.,
Secretary.

Sec.

AUTHORITY: Sec. 215 of the Public Health Service Act, 58 Stat. 690, as amended, 63 Stat. 35 (42 U.S.C. 216); Sec. 751 of the Public Health Service Act, 90 Stat. 2281 (42 U.S.C. 294t).

§ 62.1 What is the scope and purpose of the National Health Service Corps Scholarship Program?

The regulations of this part are applicable to the award of scholarships under the National Health Service Corps Scholarship Program authorized by section 751 of the Public Health Service Act (42 U.S.C. 294t) to students receiving academic training in medicine, osteopathy, dentistry, and other health professions. The purpose of the National Health Service Corps Scholarship Program is to assure an adequate supply of trained health professionals for the National Health Service Corps. The National Health Service Corps is used by the Secretary to improve the delivery of health services in health manpower shortage areas.

§ 62.2 Definitions.

As used in this part:

"Acceptable level of academic standing" means the level at which a full-time student retains eligibility to continue in attendance in school in accordance with the school's standards and practices.

"Act" means the Public Health Service Act, as amended.

"Approved graduate training" means those programs of graduate training in medicine, osteopathy, and dentistry which lead to eligibility for board certification or which provide other evidence of completion and which have been approved by the Liaison Committee on Graduate Medical Education, the American Osteopathic Association, or the Commission on Accreditation of Dental and Dental Auxiliary Education Programs.

"Full-time student" means a student who is pursuing a course of study leading to a degree in medicine, osteopathy, dentistry, or other health profession and who is enrolled for a sufficient number of credit hours in any semester or other academic term to enable the completion of the course of study within not more than the number of semesters or other academic terms normally required at the school. If an individual is enrolled in a school and is pursing a course of study which is designed to be completed in more than 4 years, the individual will be considered a full-time student for only the last 4 years of the course of study.

"Health manpower shortage area" means a geographic area, population group, public or nonprofit private medical facility, or other public facility which the Secretary determines has a shortage of health manpower in accordance with section 332 of the Act.

"National of the United States" means a citizen of the United States or a person who, though not a citizen of the United States, owes permanent allegiance to the United States.

"Public Health and National Health Service Corps Scholarship Traninng Program", or "PH/NHSC Scholarship Training Program", means the program authorized by section 225 of the Act as in effect on September 30, 1977, and repealed on October 1, 1977.

"Scholarship Program" means the National Health Service Corps Scholarship Program authorized under section 751 of the Act (42 U.S.C. 294t).

"Scholarship Program participant" or "participant" means an individual whose application to the Scholarship Program has been approved and whose contract has been accepted and signed by the Secretary.

"School" means a school of medicine, osteopathy, dentistry, or other health profession which provides training leading to a degree of doctor of medicine, doctor of osteopathy, doctor of dentistry, or an appropriate degree for a particular health profession, and which is accredited by a recognized body or bodies approved for acceditation purposes by the Commissioner of Education. If a school is not eligible for accreditation when an application for a scholarship award is submitted under this part, the accreditation requirement will be considered satisfied if the Commissioner finds, after consultation with the appropriate accreditation body or bodies, that there is reasonable assurance that the school will meet the accreditation requirement no later than the beginning of the school year in which the applicant will graduate.

"School year" means all or part of the 12-month period from July 1 through June 30 during which an applicant is enrolled in a school as a full-time student.

"Service", means the United States Public Health Service.

"Secretary" means the Secretary of Health, Education, and Welfare and any other officer or employee of the Department of Health, Education, and Welfare to whom the authority involved has been delegated.

"State" means one of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Northern Mariana Islands, the Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific Islands.

§ 62.3 Who is eligible to apply for a Scholarship Program award?

(a) To be eligible for a scholarship under this part an applicant must:

(1) Be accepted for enrollment, or be enrolled, as a full-time student in a school located in a State;

(2) Be pursing a course of study or program offered by the school leading

UMI
V 4 3 / 1 8 8
S E 2 7 7 8
UMI

to a degree in medicine, osteopathy, dentistry, or other health profession;

(3) Be eligible for, or hold, an appointment as a commissioned officer in the Regular or Reserve Corps of the Service or be eligible for selection for civilian service in the National Health Service Corps;

(4) Be a National of the United States; and,

(5) Submit an application to participate in the Scholarship Program together with a signed contract as described in section 751(f) of the Act.

(b) Any applicant who owes an obligation for professional practice to a State or other entity under an agreement entered into before filing an application under this part, is ineligible to apply for an award unless a written statement satisfactory to the Secretary is submitted from the State or entity that (1) there is no potential conflict in fulfilling the service obligation to the State or entity and the Scholarship Program, and that (2) the Scholarship Program service obligation will be served before the service obligation for professional practice owed to the State or entity.

§ 62.4 To whom will Scholarship Program awards be available in addition to individuals pursuing courses of study leading to degrees in medicine, osteopathy, or dentistry?

The Secretary will, from time-to-time, publish in the FEDERAL REGISTER a list of those health professions in addition to medicine, osteopathy, and dentistry for which the National Health Service Corps has need and for which support is available. The Secretary will also publish any other eligibility criteria, in addition to those in § 62.3, that may be required to assure that participants can be utilized during their periods of obligated service in a manner that will best meet the needs of the National Health Service Corps.

§ 62.5 How is application made for a Scholarship Program award?

Each applicant desiring a scholarship under this part must submit an application in the form and at the time prescribed by the Secretary. When submitting the application, the applicant must sign and submit the contract required under section 751(f) of the Act.[1]

§ 62.6 How will individuals be selected to participate in the Scholarship Program?

(a) *General.* In deciding which applications for participation in the Scholarship Program will be approved, the Secretary will place the applications into categories based upon the selection priorities described in paragraph (b) of this section. The Secretary will then evaluate each applicant on the basis of the selection criteria listed in paragraph (c) of this section, giving special consideration to (1) medical and osteopathic students who indicate their intention to enter family practice, internal medicine, pediatrics, or osteopathic general practice residencies, and to (2) dental students who indicate their intention to undertake general practice training following graduation or who plan no postgraduate training.

(b) *Priorities.* (1) First priority will be given to individuals who have previously received a scholarship under the PH/NHSC Scholarship Training Program, a scholarship under this Scholarship Program, or a scholarship under section 758 of the Act, authorizing scholarships for first-year students of exceptional financial need.

(2) Second priority will be given to applications submitted by applicants who (i) for the school year beginning in calendar year 1978, are entering their first, second, or third years of study; (ii) for the school year beginning in calendar year 1979, are entering their first or second years of study; and, (iii) for each school year beginning in calendar years after 1979, are entering their first year of study.

(c) *Selection criteria.* Selection of participants will be made on the basis of the following criteria: (1) Work experience; (2) community background; (3) career goals; (4) faculty recommendation; and, (5) academic performance.

(d) *Duration of scholarship award.* Subject to the availability of funds for the Scholarship Program and the National Health Service Corps, the Secretary will award a Scholarship Program participant a scholarship under this part for a period of 1 school year. The Secretary will award a continuation scholarship if (1) the participant requests a continuation, (2) the award will not extend the total period of Scholarship Program support beyond 4 years, and (3) the participant is eligible for continued participation in the Scholarship Program.

§ 62.7 What will an individual be awarded for participating in the Scholarship Program?

(a) *Amount of scholarship.* (1) A scholarship award under this part for each school year will consist of (i) tuition, (ii) reasonable educational expenses, including required fees, books, supplies, and required educational equipment, and (iii) a monthly stipend for the 12-month perod beginning with the first month of each school year in which the individual is a Scholarship Program participant. For purposes of this section "required fees" means those fees which are charged by the school to all students pursuing a similar curriculum and "required educational equipment" means educational equipment which must be rented or purchased by all students pursuing a similar curriculum at that school.

(2) The Secretary may enter into a contract with the school in which the Scholarship Program participant is enrolled for the direct payment of tuition and reasonable educational expenses in the Scholarship Program participant's behalf.

(b) *Payment of scholarship: leave-of-absence; repeated coursework.* The Secretary will suspend scholarship payments to or on behalf of a Scholarship Program participant if the school in which the participant is enrolled (1) approves a leave-of-absence for health, personal, or other reasons, or (2) requires the participant to repeat course work for which the Secretary has previously made scholarship payments under § 62.7. However, if the repeated coursework does not delay the participant's graduation date, scholarship payments will continue except for any additional costs relating to the repeated coursework. Any scholarship payments suspended under this paragraph will be resumed by the Secretary upon notification by the school that the participant has returned from the leave-of-absence or has completed the repeated coursework and is pursuing as a full-time student the course of study for which the scholarship was awarded.

§ 62.8 What does an individual have to do in return for the Scholarship Program award?

(a) *General.* Except as provided in paragraphs (d), (f), and (g) of this section, each Scholarship Program participant is obligated to serve in the full-time clinical practice of the participant's profession as a Commissioned Officer in the Regular or Reserve Corps of the Service or as a civilian member of the National Health Service Corps in the health manpower shortage area to which the participant is assigned.

(b) *Beginning of service.* Except as provided in § 62.9(d), the period of obligated service will begin as soon as possible following (1) the completion of the Scholarship Program participant's course of study leading to a degree in medicine, osteopathy, dentistry, or other health profession, and (2) appointment of the participant as a Commissioned Officer in the Regular or Reserve Corps of the Service or as a civilian member of the National Health Service Corps. For purposes of this paragraph, "appointment" means only those appointments as a Commissioned Officer in the Regular or Reserve Corps of the Service or as a civilian member of the National Health Service Corps made specifically for the purpose of serving the participant's period of obligated service.

(c) *Duration of service.* Except as provided in § 62.14(b)(1), the period for which the Scholarship Program participant is obligated to serve is equal to 1 year for each school year for which the participant receives a scholarship award under this part, or 2 years, whichever is greater.

(d) *Service by detail.* If the Secretary determines that there is no need in a health manpower shortage area for a member of the profession in which the Scholarship Program participant is obligated to provide service, the Scholarship Program participant may be detailed to serve the period of obligated service as a full-time member of the profession for which the participant has been trained, in any of the Department of Health, Education, and Welfare as the Secretary may determine.

(e) *Creditability of approved graduate training.* Except as provided in § 62.14(b)(2), no period of approved graduate training will be credited toward satisfying the period of obligated service incurred under the Scholarship Program.

(f) *Service under the National Research Service Award Program.* A Scholarship Program participant who demonstrates exceptional promise for medical research may perform the period of obligated service owed under this section by participating in the National Research Service Award Program for Individual Postdoctoral Fellows authorized under section 472 of the Act. Exceptional promise for medical research will be demonstrated if the participant applies for a National Research Service Award for Individual Postdoctoral Fellows, is selected to participate in this research program, and accepts the offer of participation. A Scholarship Program participant in the National Research Service Award Program will receive credit toward satisfying the period of obligated service incurred under this section for any period of time he or she is engaged in activities which meet the service requirements of the National Research Service Award Program. If the time served under the National Research Service Award Program is less than the total period of obligated service owed under the Scholarship Program, the participant will serve the remainder of the period of obligated service as a member of the National Health Service Corps. A participant who fails to begin or complete the service requirements under the National Research Service Award Program may be subject to the default penalty under § 62.10(c) of this Part and the default penalties under the National Research Service Award Program.

(g) *Release from service obligation to engage in private practice.* The Secretary will release a participant from all or part of the service obligation if the participant applies for a release under section 753 of the Act and enters into a written agreement to engage for a period equal to the remaining period of the participant's service obligation in the full-time private clinical practice of the participant's health profession, in accordance with the requirements of section 753 of the Act.

§ 62.9 Under what circumstances can the period of obligated service be deferred to complete approved graduate training?

(a) If a Scholarship Program participant receives a degree from a school of medicine, osteopathy, or dentistry, the Secretary will, upon request of the participant, defer the beginning date of the obligated service for a period not to exceed three years for the purpose of completing an approved graduate training program. Each Scholarship Program participant receiving a degree in medicine or osteopathy who does not intend to enter training which can be completed within the maximum three-year period must complete at least one year of approved graduate training before the period of obligated service. This one year of training must be in (1) an allopathic flexible first-year program whose sponsorship includes approved residencies in family practice, internal medicine or pediatrics or a categorical first-year program in family practice, internal medicine, or pediatrics, or (2) a rotating internship in osteopathic medicine. Any Scholarship Program participant receiving a degree in medicine or osteopathy who fails to complete the one year of required training or an approved graduate training program will be subject to the default penalties of § 62.10(c). Participants graduating from a dental school not seeking deferment may begin the obligated service upon their graduation.

(b) If the Scholarship Program participant anticipates changing or altering the type of approved graduate training for which the deferment was granted under paragraph (a) of this section, the participant must submit a request for approval of the change or alteration to the Secretary.

(c) The Secretary may, from time to time, prescribe additional terms and conditions for deferment under paragraphs (a) and (b) of this section when in his or her judgment these additional terms and conditions are necessary to carry out the purposes of the Scholarship Program.

(d) Any Scholarship Program participant whose period of obligated service has been deferred under paragraph (a) of this section, must begin the obligated service after completing the requested or required graduate training for which the deferment was granted, and upon being appointed as a Commissioned Officer in the Regular or Reserve Corps of the Service, or as a civilian member of the National Health Service Corps.

§ 62.10 What will happen if an individual does not comply with the terms and conditions of participating in the Scholarship Program?

(a) If a Scholarship Program participant, other than one described in paragraph (b) of this section, fails to accept payment or instructs the school not to accept payment of the scholarship provided by the Secretary, the participant must, in addition to any service or other obligation incurred under the contract, pay to the United States the amount of $1,500.00 liquidated damages. Payment of this amount must be made within 30 days of the date on which the participant fails to accept payment of the scholarship award or instructs the school not to accept payment.

(b) When a Scholarship Program participant fails to maintain an acceptable level of academic standing, is dismissed from the school for disciplinary reasons, or voluntarily terminates the course of study or program for which the scholarship was awarded before completing the course of study or program, the participant must, instead of performing any service obligation, pay to the United States an amount equal to all scholarship funds awarded under § 62.7. Payment of this amount must be made within 2 years of the date the participant becomes liable to make payment under this paragraph.

(c) If a Scholarship Program participant fails to begin or complete the period of obligated service incurred under § 62.8, including failing to comply with the applicable terms and conditions of a deferment granted by the Secretary, the participant must pay to the United States an amount determined by the formula set forth in section 754(c) of the Act. Payment of this amount shall be made within 1 year of the date that the participant failed to begin or complete the period of obligated service, as determined by the Secretary.

§ 62.11 When can a Scholarship Program payment obligation be discharged in bankruptcy?

In accordance with section 754(d)(3) of the Act, any payment obligation incurred under § 62.10 may not be discharged in bankruptcy until 5 years

[1] Applications, contracts, and instructions may be obtained from the Bureau of Health Manpower, Division of Manpower Training Support, Center Building, Room 5-44, 3700 East-West Highway, Hyattsville, Md. 20782.

V 4 3 / 1 8 8 S E 2 7 7 8 LIMI

after the date on which the payment obligation is due.

§ 62.12 Under what circumstances can the service or payment obligation be canceled, waived, or suspended?

(a) Any obligation of a Scholarship Program participant for service or payment will be canceled upon the death of the participant.

(b)(1) A Scholarship Program participant may seek a waiver or suspension of the service or payment obligations incurred under this part by written request to the Secretary setting forth the bases, circumstances, and causes which support the requested action. The Secretary may approve a request for a suspension for a period of 1 year. A renewal of this suspension may also be granted.

(2) The Secretary may waive or suspend any service or payment obligation incurred by a participant whenever compliance by the participant (i) is impossible, or (ii) would involve extreme hardship to the participant and if enforcement of the service or payment obligation would be against equity and good conscience.

(c) For the purpose of paragraph (b)(2)(i) of this section, compliance by a participant with a service or payment obligation will be deemed impossible if the Secretary determines, on the basis of information and documentation as may be required, that the participant suffers from a physical or mental disability that results in the permanent inability of the participant to perform the service or other activities which would be necessary to comply with the obligation.

(d) For the purpose of paragraph (b)(2)(ii) of this section, in determining whether to waive or suspend any or all of the service or payment obligations of a participant as imposing an undue hardship and being against equity and good conscience, the Secretary, on the basis of information and documentation as may be required, will take into consideration the following:

(1) the participant's present financial resources and obligatons;

(2) the participant's estimated future financial resources and obligations; and

(3) the extent to which the participant has problems of a personal nature, such as physical or mental disability, terminal illness in the immediate family, which so intrude on the participant's present and future ability to perform as to raise a presumption that the individual will be unable to perform the obligation incurred.

§ 62.13 What are the limitations on the receipt of concurrent benefits?

Under section 741(f) or 836(h) of the Act, the Secretary may agree to repay a portion of an individual's educational loans in return for the individual's agreement to practice his or her profession in an area in need of health manpower. However, a Scholarship Program participant may not enter into an agreement with the Secretary under section 741(f) or 836(h) of the Act, until either (1) the participant has completed the service obligation under the Scholarship Program, (2) the Secretary has recovered from the participant an amount determined in accordance with § 62.10, or (3) any service or payment obligation has been waived in accordance with § 62.12. In no case shall a scholarship received under this part be considered an educational loan for the purposes of section 741(f) or 836(h) of the Act.

§ 62.14 What are the special provisions relating to recipients of awards under the PH/NHSC Scholarship Training Program and who will also receive awards under the Scholarship Program?

(a) Except as provided in paragraph (b) of this section, if a participant has previously received an award under the PH/NHSC Scholarship Training Program and also receives an award under the Scholarship Program, the terms and conditions of this part will apply to the participant's entire obligation incurred under both the PH/NHSC Scholarship Training Program and the Scholarship Program.

(b) If a participant has previously received an award under the PH/NHSC Scholarship Training Program and also receives an award under the Scholarship Program, the following conditions apply:

(1) *Period of obligated service—carry over.* The period of obligated service owed by the participant is equal to the total number of school years for which scholarship support was awarded under both the PH/NHSC Scholarship Training Program and the Scholarship Program without regard to each Program's minimum support requirement under 42 CFR § 62.7(a) (1976) as adopted on May 22, 1974 (see 39 FR 17962), and under § 62.8(c) of this part.

(2) *Creditability for internship and residency training.* (i) If a Scholarship Program participant received a scholarship under the PH/NHSC Scholarship Training Program for any school year beginning before October 12, 1976, the participant will receive credit toward satisfying the periods of obligated service incurred under the PH/NHSC Scholarship Training Program and under § 62.8 of this part for any periods of internship or residency training served in a Service or National Health Service Corps facility.

(ii) If a Scholarship Program participant received a scholarship for the first time during the 1977-78 school year under the PH/NHSC Scholarship Training Program, the participant will only receive 1 year of credit toward satisfying the period of obligated service incurred under the PH/NHSC Scholarship Training Program for internship or residency training served in a Service or National Health Service Corps facility.

(3) *Default penalties.* The PH/NHSC Scholarship Training Program default penalty will apply to a participant who fails to begin or complete the active duty service obligation incurred under that Program, and the § 62.10 default penalties will apply to a participant who fails to begin or complete the service obligation incurred under § 62.8 of this part. For purposes of determining which default penalty to apply when an individual who has received a scholarship award under both the PH/NHSC Scholarship Training Program and the Scholarship Program fails to begin or complete his service obligation, the service obligations will be deemed to have been served in the order in which they were incurred.

CHAPTER II—BUREAU OF LAND MANAGEMENT, DEPARTMENT OF THE INTERIOR

APPENDIX—PUBLIC LAND ORDERS

[Public Land Order 5647]

[CA-1]

CALIFORNIA

Partial Revocation of Executive Order No. 6009

AGENCY: Bureau of Land Management (Interior).

ACTION: Final rule.

Summary: This order partially revokes an Executive order which reserved public lands for navigation purposes on San Nicholas Island for use by the Coast Guard, Department of Commerce. The lands will continue to remain withdrawn under the administrative jurisdiction of the Navy Department.

EFFECTIVE DATE: September 27, 1978.

FOR FURTHER INFORMATION CONTACT:

Keith Corrigall, 202-343-8731.

By virtue of the authority contained in section 204 of the Act of October 21, 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Executive Order No. 6009 of January 31, 1933, which reserved public lands for use of the Coast Guard, Department of Commerce, for lighthouse purposes, is hereby revoked so far as it affects the following described lands:

SAN BERNARDINO MERIDIAN

Four plots of approximately 40 acres each and access thereto reserved for lighthouse purposes on San Nicholas Island, Calif., as shown on topographic sheet number 1523 in the archives of the U.S. Coast and Geodetic Survey. No metes and bounds description is available.

2. The revocation made by this order does not alter the jurisdiction of the Navy Department over the lands excepted in paragraph 1 above for naval purposes as provided for by Executive Order No. 6009 of January 31, 1933.

GUY R. MARTIN,
Assistant Secretary of the Interior.

SEPTEMBER 20, 1978.

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 116d—GRANTS TO STATE EDUCATIONAL AGENCIES TO MEET THE SPECIAL EDUCATIONAL NEEDS OF MIGRATORY CHILDREN

Availability of Draft Final Regulations

AGENCY: Office of Education, HEW.

ACTION: Notice of availability of draft final regulations.

SUMMARY: Notice is given that a draft of the final regulations to implement the program authorized by section 122 of title I of the Elementary and Secondary Education Act of 1965, as amended (20 U.S.C. 241c-2), is now available to the public. Section 122 provides for grants to State educational agencies to meet the special educational needs of migratory children of migratory agricultural workers or migratory fishers. The draft final regulations now available have not been adopted as official views of either the U.S. Office of Education or the Department of Health, Education, and Welfare, and have no legal effect.

The title I migrant education program is currently governed by interim final regulations published in the FEDERAL REGISTER on July 13, 1977, at 42 FR 36076. The preamble to the interim final regulations stated that interested persons would have opportunities to comment before final regulations were issued. The public responded with a large number of written comments and by participating at eight public hearings. The comment period, as announced in a notice with the interim final regulations (42 FR 36076), ran through August 29, 1977. A separate notice, extending the comment period through December 9, 1977, was published in the FEDERAL REGISTER on October 27, 1977 (42 FR 56608). The draft final regulations have been prepared in response to those public comments and are now available for informational purposes only. There is no extension to the comment period, however.

ADDRESS: Copies of these draft final regulations may be obtained by writing to: Mr. Vidal A. Rivera, Jr., Chief, Migrant Branch, Division of Education for the Disadvantaged, U.S. Office of Education, 400 Maryland Avenue SW., (Room 3642G, ROB-3), Washington, D.C. 20202.

FOR FURTHER INFORMATION CONTACT:

Mr. Vidal A. Rivera, Jr., telephone 202-245-2427.

Dated: September 21, 1978.

ERNEST L. BOYER,
U.S. Commissioner of Education.

(Catalog of Federal Domestic Assistance No. 13.429, Educationally Deprived Children-Migrants.)

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[S.O. 1335]

PART 1033—CAR SERVICE

Repair and Retirement of Freight Cars; Order to Show Cause

AGENCY: Interstate Commerce Commission.

ACTION: Emergency order.

SUMMARY: The AAR requested that the date replies were due be extended 30 days from date of publication in the FEDERAL REGISTER. Replies are now due October 13, 1978.

EFFECTIVE DATE: September 20, 1978.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, Telex 89-2742.

SUPPLEMENTARY INFORMATION: The order is printed in full below.

Decided September 20, 1978.

On September 7, 1978, the Commission ordered all railroads owning plain 40-foot boxcars to show cause why they should not be required to repair and restore such cars to service within specified time periods and why certain restrictions should not be placed on the retirement of these cars. Each railroad was requested to furnish detailed information in response to 10 questions propounded by the Commission. Replies are due on September 23, 1978.

On September 13, 1978, the Association of American Railroads, on behalf of its member railroads, requested an extension of the time for the filing of replies for a minimum of thirty (30) days from the date of publication in the FEDERAL REGISTER.

The Association cites, as justification for an extension of time in which to file replies, the time required to assemble the data requested to be furnished and the necessity for certain carriers physically to examine cars set aside for repairs before meaningful replies can be submitted.

It is ordered, The time for filing replies to this order is extended until October 13, 1978.

By the Commission, Chairman O'Neal.

H. G. HOMME, Jr.,
Acting Secretary.

[S.O. No. 1339]

PART 1033—CAR SERVICE

Chicago, Milwaukee, St. Paul and Pacific Railroad Co. Authorized To Operate Over Tracks of Union Pacific Railroad Co.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order (Service Order No. 1339).

SUMMARY: Due to deteriorated track conditions between Maytown, and Helsing Junction, Wash., the Chicago, Milwaukee, St. Paul and Pacific Railroad Co. is unable to continue service over that line. Service Order No. 1339 authorizes that railroad to operate over tracks of the Union Pacific Railroad Co. between Blakeslee Junction Interlocker, and Helsing Junction, Wash.

V 43/188 SE 27 78 UMI

DATES: Effective 11:59 p.m., September 22, 1978; expires 11:59 p.m., January 15, 1979.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, Telex 89-2742.

SUPPLEMENTARY INFORMATION: The Order is printed in full below.

Decided September 22, 1978.

The line of the Chicago, Milwaukee, St. Paul and Pacific Railroad Co. (MILW) between Maytown, and Helsing Junction, Wash., is inoperable because of deteriorated track conditions. MILW operations can be accomplished by use of tracks of Union Pacific Railroad Co. (UP), between Blakeslee Junction Interlocker and Helsing Junction, Wash. Operation by the MILW over these tracks of the UP is necessary in the interest of the public and the commerce of the people. The UP has consented to use of its tracks by the MILW.

It is the opinion of the Commission that an emergency exists requiring operation of MILW trains over these tracks of the UP in the interest of the public; that notice and public procedure are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than 30 days' notice.

It is ordered,

§ 1033.1339 Service Order No. 1339.

(a) Chicago, Milwaukee, St. Paul and Pacific Railroad Company authorized to operate over tracks of Union Pacific Railroad Co. The Chicago, Milwaukee, St. Paul and Pacific Railroad Co. (MILW) is authorized to operate over tracks of Union Pacific Railroad Co. (UP) between Blakeslee Junction Interlocker, and Helsing Junction, Wash.

(b) *Application.* The provisions of this order shall apply to intrastate, interstate and foreign traffic.

(c) *Rates applicable.* Inasmuch as this operation by the MILW over tracks of the UP is deemed to be due to carrier's disability, the rates applicable to traffic moved by the MILW over the tracks of the UP shall be the rates which were applicable on the shipments at the time of shipments as originally routed.

(d) *Effective date.* This order shall become effective at 11:59 p.m., September 22, 1978.

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., January 15, 1979, unless otherwise modified, changed or suspended by order of this Commission.

(49 U.S.C. 1(10-17).)

A copy of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement and upon the American Short Line Railroad Association. Notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael.

H. G. HOMME, Jr.,
Acting Secretary.

[FR Doc. 78-27195 Filed 9-26-78; 8:45 am]

[4310-55]

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Opening of Mingo National Wildlife Refuge, Mo., to Public Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulations.

SUMMARY: The Director has determined that the opening to waterfowl hunting of Mingo National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: November 14, 1978 through January 2, 1979.

FOR FURTHER INFORMATION CONTACT:

Gerald L. Clawson, Refuge Manager, Mingo National Wildlife Refuge, P.O. Box V, Puxico, Mo. 63960, 314-222-3589.

SUPPLEMENTARY INFORMATION:

§ 32.12 Special Regulations; Migratory Game Birds; for individual wildlife refuges.

Waterfowl hunting is permitted on the Mingo National Wildlife Refuge, Mo., only on the areas designated by signs as being open to hunting. These areas comprising 2,000 acres are delineated on maps available at the refuge headquarters, the Duck Creek Wildlife Management Area, Puxico, Mo., and from the office of the Area Manager, United States Department of the Interior, Fish and Wildlife Service, Suite 106, Rockcreek Office Building, 2701 Rockcreek Parkway, North Kansas City, Mo. 64116. Waterfowl hunting shall be in accordance with all applicable Federal and State regulations subject to the following conditions:

1. Hunting hours are from one-half hour before sunrise until 1 p.m. daily.
2. All waterfowl hunters must use steel shot. Possession of lead shot in the hunting area is prohibited.
3. Each hunter must obtain a State hunting tag and enter the hunting area at designated access points.
4. Dogs may be used to retrieve downed waterfowl within the hunting area.
5. Hunting in or entering any cultivated field, pasture or diked area adjacent to the hunting area is prohibited.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge area generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The United States Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: September 18, 1978.

GERALD L. CLAWSON,
Refuge Manager.

[FR Doc. 78-27103 Filed 9-26-78; 8:45 am]

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

[3410-02]

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 906]

ORANGES AND GRAPEFRUIT GROWN IN TEXAS

Proposed Container Requirements

AGENCY: Agricultural Marketing Service.

ACTION: Proposed rule.

SUMMARY: This notice invites written comments on a proposal to delete 1⅗ bushel wirebound boxes and 8-pound bags as containers authorized for handling oranges and grapefruit grown in Texas. Information indicates that a very small volume of citrus fruit is currently packaged in such containers. The proposed action is designed to effect a reduction in the number of shipping containers and therby reduce inventory costs.

DATES: Comments must be received on or before October 13, 1978. Proposed effective date: December 4, 1978.

ADDRESSES: Send two copies of comments to the Hearing Cleark, U.S. Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250, where they will be available for public inspection during business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, (202)'447-6393.

SUPPLEMENTARY INFORMATION: The proposals under consideration were submitted by the committee, established under marketing Order No. 906, as amended (7 CFR part 906), regulating the handling of organges and grapefruit grown in the Lower Rio Grande Valley in Tex., effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), as the agency to administer its terms and provisions.

§ 906.340 [Amended]

The proposal is to delete in § 906.340 *Container, pack, and container marking regulations,* paragraph (a)(1)(v) closed wirebound wooden box with inside dimensions of 24⅛×11⅜×11⅜ inches, described in Freight Container Tariff 2G as container No. 3680; and the language referring to the 8-pound bag in paragraphs (a)(1)(v), (a)(1)(vi), and (a)(3), while authorizing handlers to use prior to July 31, 1979, existing supplies of these 2 containers in their inventories as of September 1, 1978.

Dated: September 22, 1978.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 78-27219 Filed 9-26-78; 8:45 am]

[4410-10]

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

[8 CFR Parts 235, 236, 242, 287, and 292a]

ALIENS; AVAILABILITY OF FREE LEGAL SERVICES PROGRAMS

Proposed Rules

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Proposed rule.

SUMMARY: This is a notice of proposed rulemaking proposing amendments to the regulations of the Immigration and Naturalization Service which will provide that aliens under exclusion and deportation proceedings must be advised of the availability of free legal services programs, and organizations recognized pursuant to 8 CFR 292.2. The proposal also establishes procedures and criteria under which organizations offering free legal services may qualify for appearance on the Service listing of such organizations which is to be furnished to the aliens. Proposed regulations will also provide that the alien be furnished with a Notice advising him of his appeal rights.

These proposals are necessary and intended to establish procedures for informing aliens of the availability of free legal services programs to afford them full opportunity to obtain legal representation when involved in deportation or exclusion proceedings before this Service.

DATES: Representations must be received on or before November 27, 1978.

ADDRESSES: Please submit written representations, in duplicate, to the Commissioner of Immigration and Naturalization, room 7100, 425 I Street NW., Washington, D.C. 20536.

FOR FURTHER INFORMATION CONTACT:

James G. Hoofnagle, Jr., Instructions Officer, Immigration and Naturalization Service, 425 I Street, NW., Washington, D.C. 20536. Telephone: 202-376-8373.

SUPPLEMENTARY INFORMATION: This notice of proposed rulemaking proposes amendments to several sections of the Service's regulations (8 CFR 235.6(a); 236.2(a); 242.1(c); 242.2(a); 242.2(b); 242.16(a); 287.3) to provide that aliens involved in exclusion and deportation proceedings will be advised of the availability of free legal services programs and be furnished with a list of such free legal services programs and organizations recognized under 8 CFR 292.2. These proposed regulations will also provide that aliens be furnished with Form I-618, Written Notice of Appeal Rights.

The proposal also sets forth proposed rules in new 8 CFR Part 292a under which free legal services programs may qualify to appear on the listing which must be provided to the aliens under these regulations.

These proposed regulations are needed and intended to provide aliens with advice and listings of available free legal services programs and recognized organizations under 8 CFR 292.2 to enable them to fully exercise their privilege of having legal representation in exclusion and deportation proceedings, and to provide a procedure and criteria under which free legal services programs may qualify for appearance on the Service listing.

In the light of the foregoing, it is proposed to amend Chapter I of Title 8 of the Code of Federal Regulations as set forth below.

PART 235—INSPECTION OF PERSONS APPLYING FOR ADMISSION

1. It is proposed to revise the title of § 235.6 and to revise § 235.6(a) as set forth below:

235.6 Referral to immigration judge.

(a) *Notice.* If, in accordance with the provisions of section 235(b) of the Act, the examining immigration officer detains an alien for further inquiry before an immigration judge, he shall immediately sign and deliver to the alien a Notice to Alien Detained for Hearing by an Immigration Judge (Form I-122). If the alien is unable to read or understand the notice, it shall

V 43/188 SE 27 78 UMI

be read and explained to him by an employee of the Service, through an interpreter, if necessary, prior to such further inquiry. In addition the alien shall be advised of his right to representation by counsel of his own choice at no expense to the Government, and of the availability of free legal services programs qualified under Part 292a of this chapter and organizations recognized pursuant to § 292.2 of this chapter, located in the district where the alien is being detained. He shall also be furnished with a list of such programs.

* * * * *

PART 236—EXCLUSION OF ALIENS

2. It is proposed to amend § 236.2(a) by revising the third sentence to read as follows:

§ 236.2 Hearing.

(a) *Opening.* * * * The immigration judge shall ascertain whether the applicant for admission is the person to whom Form I-122 was previously delivered by the examining immigration officer as provided in Part 235 of this chapter; enter a copy of such form in evidence as an exhibit in the case; inform the applicant of the nature and purpose of the hearing; advise him of the privilege of being represented by an attorney of his own choice at no expense to the Government, and of the availability of free legal services programs qualified under Part 292a of this chapter and organizations recognized pursuant to § 292.2, of this chapter located in the district where his exclusion is to be held; and shall ascertain that the applicant has received a list of such programs; and request to ascertain then and there whether he desires representation; advise him that he will have a reasonable opportunity to present evidence in his own behalf, to examine and object to evidence against him, and to cross-examine witnesses presented by the Government; and place the applicant under oath.

* * * * *

PART 242—PROCEEDINGS TO DETERMINE DEPORTABILITY OF ALIENS IN THE UNITED STATES: APPREHENSION, CUSTODY, HEARING, AND APPEAL

3. It is proposed to revise § 242.1(c) by adding three new sentences to the end thereof. As revised, § 242.1(c) reads as follows:

§ 242.1 Order to show cause and notice of hearing.

* * * * *

(c) *Service.* Service of the order to show cause may be accomplished either by personal service or by routine service; however, when routine service is used and the respondent does not appear for hearing or acknowledge in writing that he has received the order to show cause, it shall be re-served by personal service. When personal delivery of an order to show cause is made by an immigration officer, the contents of the order to show cause shall be explained and the respondent shall be advised that any statement he makes may be used against him. He shall also be advised of his right to representation by counsel of his own choice at no expense to the Government. He shall also be advised of the availability of free legal services programs qualified under Part 292a of this chapter and organizations recognized pursuant to § 292.2 of this chapter, located in the district where his deportation hearing will be held. He shall be furnished with a list of such programs, and a copy of Form I-618, Written Notice of Appeal Rights, regardless of the manner in which the service of the order to show cause was accomplished. Service of these documents shall be noted on Form I-213.

* * * * *

4. It is proposed to amend § 242.2(a) by changing the term "special inquiry officer" to "immigration judge" wherever it appears. It is proposed to further amend § 242.2(a) by adding three new sentences between the existing fourth and fifth sentences a respecting advice to aliens concerning free legal services programs. The three sentences to be added read as follows:

§ 242.2 Apprehension, custody, and detention.

(a) *Warrant of arrest.* * * * He shall also be advised of the availability of free legal services programs qualified under Part 292a of this chapter and organizations recognized pursuant to § 292.2 of this chapter, located in the district where his deportation hearing will be held. He shall be furnished with a list of such programs, and a copy of Form I-618, Written Notice of Appeal Rights. Service of these documents shall be noted on Form I-213. * * *

* * * * *

5. It is proposed to amend § 242.2(b) by amending the title as set forth below and by changing the term "special inquiry officer" to "immigration judge" wherever it appears. It is proposed to further amend § 242.2(b) by adding four new sentences between the existing fifth and sixth sentences pertaining to notificaiton of aliens of the availability of free legal services and appeal rights. The four sentences to be added read as follows:

(b) *Authority of immigration judge; appeals.* * * * In connection with such application the immigration judge shall advise the respondent of his right to be represented by counsel of his own choice at no expense to the Government. He shall also be advised of the availability of free legal services programs qualified under Part 292a of this chapter and organizations recognized pursuant to § 292.2 of this chapter, located in the district where his application is to be heard. The immigration judge shall ascertain that the respondent has received a list of such programs, and the receipt by the respondent of a copy of Form I-618, Written Notice of Appeal Rights. Upon rendering a decision on an application under this section, the immigration judge (or district director if he renders the decision) shall advise the alien of his appeal rights under this section. * * *

* * * * *

6. It is proposed to revise § 242.16(a) to read as follows:

§ 242.16 Hearing.

(a) *Opening.* The immigration judge shall advise the respondent of his right to representation, at no expense to the Government, by counsel of his own choice authorized to practice in the proceedings and require him to state then and there whether he desires representation; advise the respondent of the availability of free legal services programs qualified under Part 292a of this chapter and organizations recognized pursuant to § 292.2 of this chapter, located in the district where the deportation hearing is being held; ascertain that the respondent has received a list of such programs, and a copy of Form I-618, Written Notice of Appeal Rights; advise the respondent that he will have a reasonable opportunity to examine and object to the evidence against him, to present evidence in his own behalf and to cross-examine witnesses presented by the Government; place the respondent under oath; read the factual allegations and the charges in the order to show cause to the respondent and explain them in nontechnical language, and enter the order to show cause as an exhibit in the record. Deportation hearings shall be open to the public, except that the immigration judge may, in his discretion and for the purpose of protecting witnesses, respondents, or the public interest, direct that the general public or particular individuals shall be excluded from the hearing in any specific case. Depending upon physical facilities, reasonable limitation may be placed upon the number in attendance at any one time, with priority being given to the press over the general public.

* * * * *

PART 287—FIELD OFFICERS; POWERS AND DUTIES

7. It is proposed to amend § 287.3 by changing the term "special inquiry officer" to "immigration judge" wherever it appears. It is proposed to further amend § 287.3 by revising the fourth sentence and adding two new sentences, immediately preceding the existing fifth sentence. The proposed amendments read as follows:

§ 287.3 Disposition of aliens arrested without warrant.

* * * After the examining officer has determined that formal proceedings will be instituted, an alien arrested without warrant of arrest shall be advised of the reason for his arrest and his right to be represented by counsel of his own choice, at no expense to the Government. He shall also be provided with a list of the available free legal services programs qualified under Part 292a of this chapter and organizations recognized pursuant to § 292.2 of this chapter, located in the district where his deportation hearing will be held. It shall be noted on Form I-213 that such a list was provided to the alien. * * *

* * * * *

8. It is proposed to add a new Part 292a which is proposed to read as follows:

PART 292c—LISTING OF FREE LEGAL SERVICES PROGRAMS

Sec.
292a.1 Listing.
292a.2 Qualifications.
292a.3 Applications.
292a.4 Approval and denial of applications.
292a.5 Removal of an organization from list.

AUTHORITY: (Sec. 103; 8 U.S.C. 1103.)

§ 292a.1 Listing.

District directors and officers-in-charge shall maintain a current list of organizations qualified under this part and organizations accredited under § 292.2 of this chapter within their respective jurisdictions for the purpose of providing aliens in deportation or exclusion proceedings with a list of such organizations as prescribed in this chapter.

§ 292a.2 Qualifications.

An organization which seeks to have its name appear on the Service list described in § 292a.1 must show that it is established in the United States, provides free legal services to indigent aliens, and has on its staff, attorneys as defined in § 1.1(f) of this chapter who are available to render such free legal services by representation in deportation or exclusion proceedings. Bar associations which provide a referral service of attorneys who render pro bono assistance to aliens in deportation or exclusion proceedings may also qualify to have their names appear on the Service list. Listing of an organization qualified under this Part is not equivalent to recognition under § 292.2 of this chapter.

§ 292a.3 Applications.

Applications by organizations to qualify for listing under this part shall be submitted to the district director or officer-in-charge having jurisdiction over each area in which free legal services are being provided by the organization. The application shall be supported by a declaration signed by an authorized officer of the organization that the organization complies with all the qualifications set out in § 292a.2.

§ 292a.4 Approval and denial of applications.

District directors or officers-in-charge shall have the sole authority to grant or deny an application submitted by an organization under this Part, within their respective jurisdiction. If an application is denied, the applicant shall be notified of the decision in writing giving the grounds for such denial. The decision denying the application shall be final.

§ 292a.5 Removal of an organization from list.

If the district director or officer-in-charge is satisfied that an organization listed under § 292a.1 does not meet the qualifications as set out in § 292a.2, he shall notify the organization concerned, in writing, of his intention to remove its name from the Service list. The organization may submit an answer within 30 days from the date the notice was served. If, after considering the answer by the organization, in the event an answer is submitted, the district director or officer-in-charge determines that the organization does not qualify under § 292a.2, he shall remove its name from the list, and his decision shall be final.

PUBLIC COMMENTS INVITED

In accordance with 5 U.S.C. 553 the Service invites representations of interested parties on this proposed rule. All relevant data, views, or arguments submitted on or before November 27, 1978, will be considered. Representations should be submitted in writing, in duplicate, to the Commissioner of Immigration and Naturalization at the address shown at the beginning of this notice.

Dated: September 21, 1978.

LEONEL J. CASTILLO,
Commissioner of Immigration and Naturalization.

APPENDIX

UNITED STATES DEPARTMENT OF JUSTICE
IMMIGRATION AND NATURALIZATION SERVICE

WRITTEN NOTICE OF APPEAL RIGHTS

YOUR APPEAL RIGHTS

READ THIS NOTICE CAREFULLY

1. You will have a hearing by an immigration judge who will enter a decision after the hearing is completed. If you are not satisfied with that decision, you have a right to appeal to the Board of Immigration Appeals, unless you waive your right to appeal.
2. A notice that you wish to appeal your case must be filed with the immigration judge within 10 days after the immigration judge announces his decision in your case. If the immigration judge mails his decision to you, you must file a notice that you wish to appeal your case within 13 days after the immigration judge has mailed his decision.
3. You must complete and file a Form I-290A, in triplicate, in order to appeal your case. These forms can be obtained from the immigration judge or an immigration officer.
4. You must pay a $50.00 fee when filing the Form I-290A unless you cannot afford this fee. Then you may apply for a fee-waiver under 8 C.F.R. Sections 3.3(b) and 103.7(c). In order to get a fee waiver you must file an affidavit asking for permission to file your appeal without a fee payment and stating why you believe you are entitled to this waiver and the reasons for your inability to pay the fee. This affidavit may be filed with the Form I-290A.
5. You may consult with an attorney in order to assist with your appeal, or you may seek legal assistance from any of the legal services programs included on the list which you have been furnished.
6. Unless you have waived your right to appeal from the immigration judge's decision to the Board of Immigration Appeals, you will not be required to depart from the United States during the time allowed for the filing of an appeal; further, you will not be required to depart from the United States while an appeal is pending before the Board or while your case is pending before the Board by way of certification.
7. If you have decided to waive your right to appeal the immigration judge's decision in your case, you may execute the following waiver:

The immigration judge has rendered a decision in my deportation case on 5————. He has explained that decision to me and has advised me of my right to appeal his decision to the Board of Immigration Appeals.

I hereby accept the immigration judge's decision and waive my right to appeal.

NUCLEAR REGULATORY COMMISSION

[10 CFR Part 51]

LICENSING AND REGULATORY POLICY AND PROCEDURES FOR ENVIRONMENTAL PROTECTION

Environmental Survey of the Uranium Fuel Cycle; correction

AGENCY: Nuclear Regulatory Commission.

ACTION: Advance notice of intent to update WASH-1248 (supporting document for table S-3, 10 CFR 51.20).

SUMMARY: The expiration date for comments which appears in the last paragraph of the Supplementary Information of the FEDERAL REGISTER notice FR Doc. 78-25075, published September 7, 1978, Vo. 43, No. 174, page 39802, should be changed from October 1, 1978, to October 20, 1978.

FOR FURTHER INFORMATION CONTACT:

John K. Lerohl, Chief, Technology Assessment Branch 301-427-4138.

Dated at Washington, D.C., this 21st day of September 1978.

For the Nuclear Regulatory Commission.

JOHN K. LEROHL,
Chief, Technology Assessment Branch Division of Fuel Cycle and Material Safety.

DEPARTMENT OF COMMERCE

Bureau of Economic Analysis

[15 CFR Part 806]

DIRECT INVESTMENT SURVEYS

Proposed Rulemaking

AGENCY: Bureau of Economic Analysis, Commerce.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document proposes to amend the rules regarding the treatment of trusts in determining the existence and reporting of direct investment and to more specifically provide that information may be required to be reported by an intermediary. The present definition of trust has proved unsatisfactory because certain investments for which survey coverage is desired are technically not covered based on the present definition, and the change regarding intermediaries is to explicitly note in the subsection on intermediaries that they may be required to file reports. The effect of these changes is that certain investments not previously required to file reports will have to file.

DATE: Comments are due on or before October 27, 1978.

ADDRESS: Send comments to: U.S. Department of Commerce, Bureau of Economic Analysis, International Investment Division (BE-50), Washington, D.C. 20230. All comments, material, questions, etc., in response to this proposal will be available for public inspection during normal business hours, 8 a.m. to 4:30 p.m., in Room 608, 1401 K Street NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

George R. Kruer, Chief, International Investment Division, Bureau of Economic Analysis, U.S. Department of Commerce Washington, D.C. 20230, 202-523-0657.

SUPPLEMENTARY INFORMATION: This document proposes to amend the rules regarding the treatment of trusts in determining the existence and reporting of direct investment and to more specifically provide that information may be required to be reported by an intermediary.

The treatment of trusts under the present rules (see 15 CFR 806.11(b) and (c)) primarily depends on whether the trust is revocable or irrevocable. Revocable trusts are treated as intermediaries and the existence of direct investment is determined in reference to the creator(s) and/or beneficiary(ies) of the trusts as the person(s) ultimately having ownership and control of the trust investments. As concerns irrevocable trusts, the existence of direct investment is determined by reference to the trust instrument and the trust is considered the owner as concerns any direct investment activity. This has proved to be unsatisfactory, primarily because irrevocable trusts may be short-term, and certain investments for which coverage is desired technically are not covered by the present regulations.

The proposed amendment would provide for the treatment of all trusts as intermediaries, not just revocable trusts, and contains clarifying language concerning the application of the rules to certain trusts which have been created by corporations or other organizations.

Under "Reporting requirements" (§ 806.3) it is stated that reports may be required from intermediaries.

This proposed amendment would add similar language to § 806.11(c) intermediary, to make it clear that when information required is available only to an intermediary, the intermediary may be required to report the information.

NOTE.—The department of Commerce has determined that this proposal is not a significant regulation requiring preparation of a regulatory analysis under Executive Order 12044.

It is therefore proposed to modify part 806, 15 CFR, as set forth below.

JUANITA M. KREPS,
Secretary of Commerce.

1. In § 806.7, paragraph (n) is revised to read as follows:

§ 806.7 General definitions.

* * * * * *

(n) "Intermediary" means an agent, nominee, manager, custodian, trust, or any person acting in a similar capacity.

2. In § 806.11, paragraphs (b) and (c) are revised to read as follows:

§ 806.11 Estates, trusts, and intermediaries.

* * * * * *

(b) A trust, either U.S. or foreign, is a person, but is not a business enterprise. The trust shall be considered the same as an intermediary and reporting should be as outlined in paragraph (c) of this section. For reporting purposes, the beneficiary(ies) of the trusts, or the creator(s) of the trust in the situation detailed below or if there is, or may be, a reversionary interest, shall be considered to be the owner(s) of the investments of the trust for determining the existence of direct investment. Where a corporation or other organization creates a trust designating its shareholders or members as beneficiaries, the creating corporation or organization shall be deemed to be the owner of the investments of the trust, or succeeding trusts where the presently existing trust has evolved out of a prior trust, for the purposes of determining the existence and reporting of direct investment. This procedure is adopted in order to fulfill the statistical purposes of this part and does not imply that control over an enterprise owned or controlled by a trust is, or can be, exercised by the beneficiary(ies) or creator(s).

(c) *Intermediary.* (1) If a particular U.S. direct investment abroad is held, exercised, administered, or managed by a U.S. intermediary, such intermediary shall be responsible for reporting the required information for, and in the name of, its principal or shall instruct the principal to submit the required information. Upon instructing the prinicpal, the intermediary shall be released from further liability to report provided it has informed this bureau of the date such instructions were given and the name and address of the principal, and has supplied the principal with any information in the possession of, or which can be secured by, the intermediary, that is necessary to permit the principal to complete the required reports. When acting in the capacity of an intermediary, the accounts or transactions of the U.S. intermediary with the foreign affiliate shall be considered as accounts or transactions of the U.S. principal with the foreign affiliate. To the extent such transactions or accounts are unavailable to the principal, they may be required to be reported by the intermediary.

(2) If a U.S. person holds a foreign affiliate through a foreign intermediary, the U.S. person will be considered to own the foreign affiliate directly and all accounts or transactions of the U.S. person with the intermediary will be considered to be with the foreign affiliate.

(3) If a particular foreign direct investment in the United States is held, exercised, administered, or managed by a U.S. intermediary for the foreign beneficial owner, such intermediary shall be responsible for reporting the required information for, and in the name of, the U.S. affiliate, and shall report on behalf of the U.S. affiliate or shall instruct the U.S. affiliate to submit the required information. Upon so instructing the U.S. affiliate, the intermediary shall be released from further liability to report provided it has informed this Bureau of the date such instructions were given and the name and address of the U.S. affiliate, and has supplied the U.S. affiliate with any information in the possession of, or which can be secured by, the intermediary that is necessary to permit the U.S. affiliate to complete the required reports. When acting in the capacity of an intermediary, the accounts or transactions of the U.S. intermediary with a foreign beneficial owner shall be considered as accounts or transactions of the U.S. affiliate with the foreign beneficial owner. To the extent such transactions or accounts are unavailable to the U.S. affiliate, they may be required to be reported by the intermediary.

(4) If a foreign beneficial owner holds a U.S. affiliate through a foreign intermediary, the U.S. affiliate may report the intermediary as its foreign parent but, when requested, must also indentify and furnish information concerning the foreign beneficial owner, if known, or if such information can be secured. Accounts or transactions of the U.S. affiliate with the foreign intermediary shall be considered as accounts or transactions of the U.S. affiliate with the foreign beneficial owner.

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 230]

[Release No. 33-5978]

EFFECTIVE DATE OF AMENDMENTS TO REGISTRATION STATEMENT AND EXPANSION OF DEFINITIONAL RULE

Withdrawal of Notice of Proposed Rulemaking

AGENCY: Securities and Exchange Commission.

ACTION: Withdrawal of notice of proposed rulemaking.

SUMMARY: The Commission is withdrawing rule proposals which would have provided a means by which certain post-effective amendments to registration statements filed on form S-8 under the Securities Act of 1933 might become effective automatically, without affirmative action on the part of the Commission or its staff. This action is taken because it appears that the proposals would not provide any significant advantage over current practice and would not be utilized by a significant number of issuers. The Commission is also deferring the possible expansion of a definitional rule which would have permitted delivery of prospectuses relating to securities registered on form S-8 which are traded in unsolicited transactions on the automated quotation system of a registered national securities association.

EFFECTIVE DATE: September 18, 1978.

FOR FURTHER INFORMATION CONTACT:

John A. Granda (202-755-1750), Office of Disclosure Policy and Proceedings, Division of Corporation Finance, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Commission announced the withdrawal of proposed rule 480 and a conforming amendment to rule 459 which were published for comment in Securities Act release No. 33-5768 (November 22, 1976) (41 FR 52701). These proposals would have provided a means by which post-effective amendments on form S-8 could be made effective automatically under certain conditions without affirmative action by the Commission or staff. Under the present procedure, section 8(c) of the Securities Act of 1933 ("Act") (15 U.S.C. 77a et seq.) requires that all amendments filed after the effective date of a registration statement shall become effective on such date as the Commission may determine.[1] Thus, affirmative action by the Commission currently is always required for a post-effective amendment to become effective.

The conditions required to be satisfied by an issuer in order for its amendment to become automatically effective were set forth in paragraph (a) of the proposed rule. They include the following: (1) Preparation of the post-effective amendment in accordance with Form S-8 under the Act; (2) selection by the issuer of any effective date not less than twenty days following the date the amendment was filed; and (3) presentation of a legend on the facing page of the amendment and compliance with the conditions described therein.

Under paragraph (b) of proposed rule 480, the post-effective amendment would not become effective if a second post-effective amendment were filed prior to the effective date specified on the first such amendment. Proposed rule 480(c) simply provided that the post-effective amendments not filed pursuant to rule 480(a) would become effective pursuant to section 8(c) of the Act.

The proposed amendment to rule 459 merely indicated the manner in which the twenty day period of proposed rule 480(a) would be computed.

While intended to eliminate the need for affirmative Commission or staff action in post-effective amendments to form S-8 becoming effective, the proposed rule, in operation, would not have altered the present process of staff review of such amendments. Moreover, the present procedures of issuing an order confirming that the amendment has become effective as well as transmittal by mail and telegram of a copy of the order to the registrant and inclusion of such order in the Commission's files would have been continued if the proposed rule had been adopted. However, any failure or delay in issuing an order to the registrant would not have prevented the amendment from becoming effective pursuant to proposed rule 480 if the registrant had met all of its conditions.

The majority of the letters of comment indicated that proposed rule 480 would not provide any significant advantage over current practice. The

[1] Section 8(c) states that: "An amendment filed after the effective date of the registration statement, if such amendment, upon its face, appears to the Commission not to be incomplete or inaccurate in any material respect, shall become effective on such date as the Commission may determine, having due regard to the public interest and the protection of investors.

view also expressed that issuers would not utilize proposed rule 480(a) unless assurance could be obtained prior to the scheduled effective date that the staff had reviewed the amendment and had no comments. The reluctance of issuers to rely on the rule without such assurance appears to be attributable to their concern over the possibility that the staff would have comments after an amendment became effective, thereby creating the prospect of reprinting and redistributing prospectuses as well as the issuance of a stop order.

The Commission believes that if the staff is to review the amendment, communicate to the issuer that it has no comments, and prepare an order confirming that the amendment has become effective pursuant to rule 480(a), there will be little substantive difference between rule 480(a) and the existing procedure for making post-effective amendments on form S-8 effective. Moreover, the issuer's ability to determine the date of effectiveness of the post-effective amendments to registration statements on form S-8 was considered by certain commentators to be of marginal benefit because of the minimum waiting period of 20 days. The Commission also notes that its staff typically is able to adhere to any reasonable schedule set forth by the registrant and that proposed rule 480 would impose the additional burden of filing and monitoring delaying amendments.

In view of the lack of any significant advantages which would be derived from proposed rule 480 and the conforming amendment to rule 459, the Commission has determined to withdraw them.

Possible Amendments to Rule 153

Comment was also specifically invited on possible amendments to expand rule 153 (17 CFR 230.153) to permit delivery of prospectuses relating to securities registered on form S-8 which are traded in unsolicited transactions on the automated quotation system of a national securities association registered under section 15A of the Securities Exchange Act of 1934 ("Exchange Act") (15 U.S.C. 78a et seq., as amended by Pub. L. 94-29 (June 4, 1975)).[2] Only one letter of comment addressed the possible expansion of the rule. In view of the lack of public interest and input, the Commission has decided to defer further consideration of the concept and not to propose specific amendments to rule 153 at this time.

By the Commission.

GEORGE A. FITZSIMMONS
Secretary.

SEPTEMBER 18, 1978.

[FR Doc. 78-27203 Filed 9-26-78; 8:45 am]

[2] Rule 153 provides generally that the requirements of section 5(b)(2) of the Act that a transaction be "preceded by a prospectus" may be satisfied constructively through the actual delivery of prospectuses to the national securities exchange on which the transaction is effected. The rule contemplates that such prospectuses then may be redelivered to members of such exchange upon their request.

[8010-01]

[17 CFR Part 230]

[Release No. 33-5980, File No. S7-755]

RESALES OF SECURITIES

Proposed Rulemaking

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rulemaking.

SUMMARY: The Commission is publishing for comment a proposal to amend two rules which provides safe harbors for the resale of securities to the public. The proposed amendments would permit persons who have held securities covered by the rules for a period of 5 years or more to sell such securities without any amount limitation, provided such persons are not affiliates of the issuer of the securities. The purpose of the amendments is to relax certain requirements of the rules which may be more burdensome than necessary.

DATE: Comments must be received on or before November 20, 1978.

ADDRESS: Comments should be submitted in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Comment letters should refer to file No. S7-755 and will be available for public inspection.

FOR FURTHER INFORMATION CONTACT:

Peter J. Romeo, Division of Corporation Finance, Securities and Exchange Commission, Washington, D.C. 20549, 202-755-1240.

SUPPLEMENTARY INFORMATION: The Commission today published for comment proposed amendments to rule 144 (17 CFR 230.144) and rule 148 (17 CFR 230.148) under the Securities Act of 1933 ("1933 Act") (15 U.S.C. 77a et seq.) The amendments are being proposed for the purpose of relaxing certain requirements of the rule which may be unnecessarily burdensome. In a related action, the Commission previously announced in a separate release [1] the adoption of other amendments to rules 144 and 148 which similarly are designed to reduce the burdens of those rules.

[1] Release No. 33-5979 (September 19, 1978) (43 FR 43726).

Background

Both rule 144 and rule 148 provide a safe harbor for the public resale of certain types of securities. Rule 144 applies to the resale of "restricted securities" [2] and securities held by affiliates [3] of an issuer, while rule 148 is applicable to the resale of securities acquired in bankruptcy proceedings. Both of these rules prescribe standards which, if met, permit persons who hold such securities to sell them publicly without the need for registration and without being deemed underwriters [4] under the 1933 Act.

Rule 144 was considered to be an experiment at the time of its adoption.[5] Accordingly, the Commission has monitored its operation to determine how well it is working and what changes, if any, are necessary to improve it. Generally, it is the Commission's view that the rule has operated well insofar as achieving its primary purpose, the protection of investors, is concerned. It has, however, been subject in recent years to the criticism that several of the requirements, particularly those limiting the amount of securities that can be sold under it, are more restrictive than necessary to achieve the purposes of the 1933 Act.

The Commission has given consideration to the critical comments concerning rule 144 and in the past several years has taken various steps to relax some of the rule's requirements.[6] It now proposes to take a further step in that direction by publishing for comment an amendment that would permit sales under the rule to be made without any volume restrictions: *Provided,* The seller is not an affiliate of the issuer and has held his securities for at least 5 years. A similar amendment to rule 148 also is being proposed for comment.

Discussion of the Proposal

Under the existing provisions of rule 144, a nonaffiliate who has held restricted securities for at least 2 years

[2] The term "restricted securities" includes securities acquired in nonpublic offerings, such as those under section 4(2) of the 1933 Act, as well as securities acquired in offerings made in reliance upon rule 240 (17 CFR 230.240) under the Act.

[3] An "affiliate" of an entity is defined in rule 405 (17 CFR 230.405) under the 1933 Act as "a person that directly, or indirectly through one or more intermediaries, controls, or is controlled by, or is under common control with, the (entity)."

[4] The term "underwriter" is broadly defined in section 2(11) of the 1933 Act and includes persons who acquire securities "with a view to • • • distribution" or who participate directly or indirectly in the distribution of a security.

[5] See in this regard the portion of Release No. 33-5223 (January 11, 1972) (37 FR 591) entitled "Operation of the Rule."

[6] For more information in this regard, see the release cited in footnote 1, infra.

may commence selling specified amounts of those securities during periods of 3 months each.[7] If, however, such a person does not sell any securities during a particular 3-month period, he is not permited to cumulate the amount that could have been sold during the period with the amount permitted to be sold during a later 3-month period. Thus, for example, a person who has held restricted securities for 5 years without making any prior sales could not sell any greater number of securities during a 3-month period than a person who has held similar securities for only 2 years.

The inability to cumulate under the rule has fostered complaints that the rule is unnecessarily restrictive. For instance, it has been urged that a person who has held his securities for 5 years has demonstrated by his lengthy holding period that he is not an underwriter within the meaning of section 2(11) of the 1933 Act. According to this line of reasoning, the lenghty holding period is an ample indication that the person did not acquire his securities "with a view to distribution." Thus, under this rationale the person with the 5-year holding period should be free to resell his securities without restriction under section 4(1) of the 1933 Act, which exempts from registration sales of securities by any person who is not an "issuer, underwriter, or dealer." Adherents of this point of view therefore argue that rule 144 should not place limits on sales of securities which have been held for lengthy periods of time.[8]

While the Commission agrees that the length of one's holding period is a major consideration in determining whether a person is an underwriter, it is not the only one which bears upon that issue. As the Commission pointed out in the release [9] which announced the adoption of rule 144, the definition of "underwriter" in section 2(11) also includes any person who participates in a distribution and this requires that other factors also be examined. Included among these other factors, which all bear upon whether a person may be engaged in a distribution, are the availability of adequate current information about the issuer and the impact on the trading market of the sale transaction.

In an effort to take into consideration all of the factors that should be considered in determining whether a person is an underwriter, while at the same time attempting to provide appropriate relief to those who have held their securities for periods of considerable length, the Commission has decided to invite public comment on the proposal briefly referred to in the preceding section. As stated therein, the proposal would permit nonaffiliates of an issuer to sell their securities under rule 144 without any volume restrictions after they have held the securities for a period of 5 or more years. This proposal not only would give major recognition to the length of one's holding period, but also would continue to take into consideration the other elements involved in section 2(11) by applying certain other provisions of rule 144, such as the public information and manner of sale requirements, to transactions covered by the proposal.

The effect of the proposal outlined above would be to exempt nonaffiliates from the volume limitations of the rule after they have held their securities for at least 5 years. All other provisions of the rule would continue to apply to such persons. In this regard, however, the Commission is interested in receiving comments on whether the notice of sale requirement of paragraph (h) of the rule should continue to be applied to nonaffiliates who might wish to avail themselves of the provision.

With respect to the holding period of 5 years contained in the proposal, the Commission also invites comments on whether it would be appropriate to consider reducing the time period requirement, depending on whether the issuer files periodic reports with the Commission under sections 13 or 15(d) of the Securities Exchange Act of 1934 [15 U.S.C. 78a, et seq.] (in which case the holding period might be reduced to 4 years) or whether the issuer's securities are listed on a national stock exchange (in which case the holding period might be reduced to 3 years).

The Commission wishes to emphasize that persons who are deemed to be affiliates of an issuer would not be able to avail themselves of the new provision. The control relationship which such persons have with the issuer of the securities would appear to increase the likelihood that they might attempt to utilize the provision for distributions rather than routine trading transactions. Accordingly, the Commission does not believe it would be appropriate to make the new provision available to persons who have such a relationship with the issuer.

Text of the Proposed Amendments

(Attention: Arrows are used to indicate additions. There are no deletions.)

I. It is proposed to amend 17 CFR Chapter II by revising § 230.144 to read as follows:

§ 230.144 Persons deemed not to be engaged in a distribution and therefore not underwriters.

• • • • • • •

(e) • • •

(1) • • •

(2) *Sales by persons other than affiliates.* The amount of restricted securities sold for the account of any person other than an affiliate of the issuer, together with all other sales of restricted securities of the same class for the account of such person within the preceding 3 months, shall not exceed the amount specified in paragraphs (e)(1)(i), (1)(ii), or (1)(iii) of this section, whichever is applicable. ►The limitation in this paragraph (e)(2), however, shall not apply to restricted securities sold for the account of a person who is not an affiliate of the issuer: *Provided* The securities have been beneficially owned by the person for a period of at least 5 years prior to the sale of such securities, except that in the event such securities were purchased, the full purchase price or other consideration shall have been paid or given at least 5 years prior to the sale.◄

• • • • • •

II. It is proposed to amend 17 CFR Chapter II by revising § 230.148 to read as follows:

§ 230.148 Persons deemed not to be underwriters of securities issued or sold in connection with bankruptcy proceeding.

• • • • • •

(b) *Securities issued under a plan.* A person or entity who acquires securities issued under a plan in a transaction exempt from the registration requirements of the Securities Act of 1933 shall not be deemed an underwriter within the meaning of section 2(11) of the Act with respect to resales of such securities if all of the following conditions are met:

(1) *Volume limitation.* The amount of securities sold for the account of such person or entity during any 3 month period shall not exceed the greater of (i) 1 percent of the sum of the number of shares or other units of the class issued and outstanding and the number of shares or units of the

[7] In general, a person may sell during any 3-month period an amount equal to the greater of the average weekly trading volume (if available) or 1 percent of the outstanding securities of the class. See, in this regard, paragraph (e) of rule 144, as recently amended in the release cited in footnote 1, infra.

[8] It should be noted that rule 144 is not the exclusive means for selling restricted securities without registration under the Act. The rule is intended simply to be a safe harbor for establishing the availability of the exemption provided by section 4(1). Thus, sales of restricted securities which do not constitute a distribution may be made by nonaffiliates directly under section 4(1), provided they are in accordance with current interpretations of that section.

[9] Release No. 33-5223 (January 11, 1972) (37 FR 591).

V 43/188 SEP 27 78 UMI

V 43/188 SE 27 78 UMI

class reserved for future issuance in respect of claims and interests filed and allowed under the plan, as shown by the most recent report or statement published by the issuer, or (ii) the average weekly reported volume of trading in such securities on all national securities exchanges and reported through the automated quotation system of a registered securities association during the 4 calendar weeks preceding the date of receipt of the order to execute the transaction by the broker or the date of execution of the transaction directly with a market maker, or (iii) the average weekly volume of trading in such securities reported through the consolidated transaction reporting system contemplated by rule 17a-15 under the Securities Exchange Act of 1934 during the 4-week period specified in paragraph (b)(1)(ii) of this section. For the purpose of determining the limitation on the amount of securities sold, all securities of the same class sold under this rule by persons or entities acting in concert shall be aggregated. ►The limitation in this paragraph (b)(1) on the amount of securities that may be sold, however, shall not apply to securities sold for the account of a person who is not an affiliate of the issuer, provided the securities have been beneficially owned by the person for a period of at least 5 years prior to the sale of such securities, except that in the event such securities were purchased, the full purchase price or other consideration shall have been paid or given at least 5 years prior to the sale.◄

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[18 CFR Ch. I]

[Docket No. RM78-2; Formerly ICC Docket Ex Parte No. 308]

VALUATION OF COMMON CARRIER PIPELINES

Oral Argument; Public Hearing

AGENCY: Federal Energy Regulatory Commission.

ACTION: Oral argument—public hearing.

SUMMARY: The Federal Energy Regulatory Commission will hold a public hearing on oil pipeline regulation for the purpose of receiving comments from and exchanging views with persons interested in that subject. The issues in the particular proceeding relate to rate base and rate of return. However, the discussion will not be limited to those areas. Participants are free to discuss other topics that they deem relevant to the Commission's oil pipeline responsibilities.

DATES: The hearing will begin at 10 a.m. on October 16, 1978, and will continue on October 17, 1978. Requests to participate must be submitted on or before October 2, 1978.

FOR FURTHER INFORMATION CONTACT:

Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, 202-275-4166.

Lois D. Cashell, Assistant Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, 202-275-4166.

On August 30, 1978, the Association of Oil Pipe Lines filed a request for oral argument on the issues presented in docket No. RM78-2 (formerly ICC Docket Ex Parte No. 308).

The Commission, because of the significance and complexity of the matters in question, will hold a public hearing for the purpose of receiving comments from and exchanging views with persons interested in this rulemaking proceeding and in oil pipeline regulation generally. It is not the intention of the Commission to limit the discussion to rate base and rate of return. Participants in this public hearing are free to discuss other topics that they deem relevant to the Commission's oil pipeline responsibilities. However, participants should bear in mind that the Commission's action herein will be based solely on the record in this proceeding on those extra-record materials of which it can properly take administrative notice.

The Commission is aware of and has given some thought to the legal questions with respect to construction of the Valuation Act of 1913 raised in this proceeding and dealt with in *Farmers Union Central Exchange* v. *FERC*, —— F. 2d —— (D.C. Cir., June 27, 1978). However, a petition for certiorari in that case is now pending in the Supreme Court. Hence this is an inappropriate forum in which to argue the issues of statutory construction there involved.

Accordingly, participants in this hearing are asked to refrain from seeking to relitigate *Farmers* before the Commission. They should assume that the law does not preclude the Commission from making innovations in this area and should, therefore, address themselves in the main to the basic policy questions presented. Special attention should be given to the actual and potential impact of oil pipeline regulation on consumers, on competition in the oil industry, and on the Nation's energy needs and goals.

Different groups of participants in this hearing may have similar interests. In order to avoid repetitive presentations, the Commission reserves the right to limit participation in the oral argument. Parties having similar positions on issues should consolidate their efforts, to the extent possible, and make a collective appearance through a single spokesman.

To expedite the oral argument, the Commission will not require a formal brief or a position paper from the participants. If the participants wish to provide such documents, or courtesy copies of prepared texts which they plan to present at the public hearing, they may submit these materials to the Secretary prior to the hearing.

The hearing will be held in Hearing Room A on the second floor of the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C., at 10 a.m. on October 16 and October 17, 1978. Requests to make statements at this hearing should be submitted by mail or telephone on or before October 2, 1978, to Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington,D.C. 20426, 202-275-4166. Each such request should state the amount of time desired.

The Secretary will then prepare a schedule prescribing the order in which participants shall appear and the amount of time allocated to each of them.

The Commission finds: It is in the public interest to hold oral argument in this proceeding.

The Commission orders: (A) Oral argument in this proceeding shall be held in Hearing Room A, 825 North Capitol Street NE., Washington, D.C., at 10 a.m. on October 16 and 17, 1978.

(B) Requests to participate in the oral argument shall be filed on or before close of business October 2, 1978.

By the Commission.

KENNETH F. PLUMB,
Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

[FRL 975-6]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Revisions to the South Coast Air Quality Management District's Rules and Regulations in the State of California

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed rulemaking.

SUMMARY: Revisions to the South Coast Air Quality Management District's rules and regulations have been submitted to the Environmental Protection Agency (EPA) by the California Air Resources Board for the purpose of revising the California State implementation plan (SIP). The intended effect of these revisions is to update the rules and regulations and to correct deficiencies in the SIP. The EPA invites public comments on these rules, especially as to their consistency with the Clean Air Act.

DATE: Comments may be submitted up to October 27, 1978.

ADDRESSES: Comments may be sent to: Regional Administrator, Attn: Air and Hazardous Materials Division, Air Programs Branch, California SIP Section (A-4), Environmental Protection Agency, Region IX, 215 Fremont Street, San Francisco, Calif. 94105. Copies of the proposed revisions are available for public inspection during normal business hours at the EPA region IX office at the above address and at the following locations: South Coast Air Quality Management District, 9420 Telstar Avenue, El Monte, Calif. 91731; California Air Resources Board, 1102 Q Street, P.O. Box 2815, Sacramento, Calif. 95814; and Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

Wally Woo, Chief, California SIP Section, EPA, Region IX, 415-556-7288.

SUPPLEMENTARY INFORMATION: The California Air Resources Board submitted the following rules and regulations on June 22, 1978, and July 13, 1978:

District	Date	Rule changes
South Coast Air Quality Management District (South Coast Air Basin)	June 22, 1978.....	Rule 102 Definition of terms.
		Rule 501.1 Assistance to small business.
		Rule 503 Content of petitions.
	July 13, 1978	Rule 301 Permit fees.
		Rule 302, Fees for technical reports.
		Rule 303 Hearing board fees.
		Rule 442 Usage of solvent.s
		Rule 461 Gasoline transfer and dispensing.
		Rule 465 Vacuum producing devices or systems.
		Rule 1102 Petroleum solvent dry cleaners.
		Rule 1113 Architectural coatings.

In addition, regulations were submitted concerning new source reviews. These regulations will be considered in separate FEDERAL REGISTER actions.

The State also submitted regulations concerning new source performance standards (NSPS) and national emission standards for hazardous air pollutants (NESHAPS) on June 22, 1978. These NSPS and NESHAPS regulations implement sections 111 and 112 of the Clean Air Act, and are not appropriate for inclusion in a State implementation plan under section 110 of the Act. Therefore, these regulations will be neither approved nor disapproved by EPA as part of an applicable implementation plan. They will, however, be reviewed in determining whether to delegate authority to implement and enforce the NSPS and NESHAPS regulations in the South Coast Air Quality Management District under the appropriate provisions of sections 111 and 112. Announcement of such delegation would appear in a separate FEDERAL REGISTER notice.

Pursuant to section 110 of the Clean Air Act as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations submitted as revisions to the SIP. The Regional Administrator hereby issues this notice setting forth these revisions, including rule deletions caused thereby, as proposed rulemaking and advises the public that interested persons may participate by submitting written comments to the Region IX Office. Comments received on or before October 27, 1978, will be considered. Comments received will be available for public inspection at the EPA Region IX Office and the EPA Public Information Reference Unit.

(Sec. 110, 301(a) of the Clean Air Act as amended (42 U.S.C. 7410) and 7601 (a)).

Dated: September 21, 1978.

SHEILA M. PRINDIVILLE,
Acting Regional Administrator.

OHIO

Approval and Promulgation of Implementation Plans

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: This proposed rule is an amendment to the federally promulgated Ohio State implementation plan for sulfur dioxide. The regulation is being amended for three reasons: First, the Agency committed to the U.S. Court of Appeals for the Sixth Circuit that it would reanalyze emission limitations for sources in Summit and Butler Counties; second, 12 sources in the State of Ohio have independently petitioned the Agency to revise their emission limitations; and finally, a number of typographical errors in the regulation are being corrected here. Most of the changes in emission limitations represent relaxations, however, some of the emission limitations for sources in Summit and Butler Counties have become more stringent. Comments are being solicited on this amendment.

DATE: Comments must be received on or before November 27, 1978. A public hearing will be held on the Summit and Butler Countys emission limitations from 9 a.m. to 4 p.m. on October 25, 1978, at the Christopher Inn, 300 East Broad Street, Columbus, Ohio. The record will be held open for a 30-day period following the hearing for the purpose of submitting rebuttal or additional information. Requests for a public hearing on any of the 12 individual source revisions must be received no later than October 12, 1978. A time and place for any additional

V 4 3 / 1 8 8 SE 27 78 UMI

hearings will be published at a later date.

ADDRESSES: Comments, requests to make an oral presentation at the Columbus hearing and requests for a hearing should be submitted to: Chief, Air Programs Branch, U.S. Environmental Protection agency, Region V, 230 South Dearborn Street, Chicago, Ill. 60604. The technical support documents and dockets for these revisions (5A-78-1 and 5A-78-2) are on file at the above address and at: Public Information Reference Unit, Room 2922, U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460. They may be inspected and copied during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Patricia Springer, Ohio State Specialist, Air Programs Branch, U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Ill. 60604, 312-353-2205.

SUPPLEMENTARY INFORMATION: On August 27, 1976, the Environmental Protection Agency (the Agency) promulgated regulations establishing the State implementation plan (SIP) for the control of sulfur dioxide (SO) for the State of Ohio (41 FR 36324, amended November 10, 1976, 41 FR 52455, and on May 31, 1977, 42 FR 27588). Following promulgation, 33 corporations and all of the investor-owned utilities in Ohio filed petitions for review with the U.S. Court of Appeals for the Sixth Circuit. See *Cleveland Electric Illuminating* v. *EPA*, 572 F. 2d 1150; *Cincinnati Gas and Electric* v. *EPA*, slip opinion issued June 29, 1978. In order to resolve some of the individual issues in that case, the Agency agreed to correct the data base for several petitioners and reanalyze emission limitations in Summit and Butler Counties. Other petitioners in that case agreed to pursue individual SIP revisions in order to resolve their issues and dismissed their challenges. Still other sources in Ohio have pursued SIP revisions in order to reflect changes in operation or different control strategies which are more economical for the source.

The amendment to the regulation proposed today includes the Agency's reanalyzed regulation for Butler and Summit Counties, the tentatively approved revisions for 12 other sources, and the correction of several typographical errors. The 12 sources which requested the SIP revisions proposed here are as follows: Aluminum Co. of America; the Hoover Co.; Wheeling-Pittsburgh Steel Corp.; Ashland Oil, Inc.; The Sun Oil Co.; The Standard Oil Co.; Koppers Co., Inc.; Bowling Green University; Oberlin College; city of Napoleon, Ohio; Erie Coke & Chemical Co.; and Republic Steel.

The Agency's reanalysis of Butler and Summit Counties is described in a technical support document (August 1978 TSD) which is included in the official docket (docket 5A-78-1). The TSD reflects the Agency's technical basis for the regulation and is incorporated herein by reference. The August 1978 TSD is available at region V's Air Programs Branch as well as at the Public Information Reference Unit in Washington.

A technical support document has also been prepared for each of the 12 individual source SIP revisions. These are also available at region V or the Public Information Reference Unit. The dockets for the 12 SIP revisions have been consolidated and designated docket 5A-78-2.

The Agency has reconsidered the appropriate attainment date and compliance schedules for those sources in Butler and Summit Counties whose emission limitations are changed by this amendment and is proposing to start the original compliance schedule over for these sources. Comments are solicited from the sources affected by this amendment as to the appropriate compliance schedule and attainment date.

Final promulgation of this amendment will follow analysis of the comments and the public hearing statements and will depend on consistency with section 110 of the Clean Air Act and the requirements of 40 CFR Part 51.

NOTE.—The Environmental Protection Agency had determined that this document is not a significant regulation and does not require preparation of a regulatory analysis under Executive Order 12044.

(42 U.S.C. 7410.)

Dated: September 19, 1978.

JOHN MCGUIRE,
Regional Administrator.

Part 52 of chapter I, title 40 of the Code of Federal Regulations is amended as follows:

Subpart KKK—Ohio

1. In § 52.1875, the attainment date for sulfur dioxide in the table is revised for several sources in Summit and Butler Counties. This revision is reflected in footnote "f" to the table.

§ 52.1875 Attainment dates for national standards.

• • • • •

f. August 27, 1979 except for the companies listed in (1) which are subject to an attainment date of June 17, 1980, and the companies in Summit and Butler Counties listed in (2) which are subject to an attainment date of (3 years from final promulgation).

(1) Ashland Oil, Inc.; Youngstown Sheet & Tube Co.; PPG Industries, Inc.; Wheeling-Pittsburgh Steel Corp.; Pittsburgh-Canfield Corp.; the Timken Co.; The Sun Oil Co.; Sheller-Globe Corp.; the B. F. Goodrich Co.; Phillips Petroleum Co.; Shell Oil Co.; Federal Paper Board Co., Inc.; the Firestone Tire & Rubber Co.; Republic Steel Corp.; Chase Bag Co.; White-Westinghouse Corp.; U.S. Steel Corp.; Interlake, Inc.; Austin Powder Co.; Diamond Crystal Salt Co.; the Goodyear Tire & Rubber Co.; the Gulf Oil Co.; the Standard Oil Co.; Champion International Corp.; Koppers Co., Inc.; General Motors Corp.; E. I. duPont de Nemours & Co.; Coulton Chemical Corp.; Allied Chemical Corp., Specialty Chemicals Division; the Hoover Co.; Aluminum Co. of America; Ohio Greenhouse Association; Armco Steel Corp.; Buckeye Power, Inc.; Cincinnati Gas & Electric; Cleveland Electric Illuminating Light Co.; Columbus & Southern Ohio Electric; Dayton Power & Light Co.; Dusquesne Light Co.; Ohio Edison Co.; Ohio Electric Co.; Ohio Power Co.; Pennsylvania Power Co.; Toledo Edison Co.

(2) In Summit County: Diamond Crystal Salt; Firestone Tire & Rubber Co.; General Tire & Rubber; B. F. Goodrich, Co.; Goodyear Aerospace Corp.; Goodyear Tire & Rubber Co.; Ohio Edison Co.; RCA Rubber Co.; Chrysler Corp.; PPG Industries, Inc.; Sieberling Tire & Rubber; Terex Division of General Motors Corp.; Midwest Rubber Reclaiming; Kittinger Supply Co. In Butler County: Fisher Body Division of General Motors Corp.; Champion International Corp.; MIddletown Paperboard; Cincinnati Gas & Electric, Inc.; Crystal Tissue; Diamond International; city of Hamilton Municipal Power Plant; Inland Container Corp.; Sorg Paper; Mercy Hospital; Beckett Paper; St. Regis Paper; Armco Steel Corp.; American Cyanamid Co.

2. Section 52.1881 is amended by revising paragraph (b) as follows:

§ 52.1881 Control Strategy: Sulfur oxides (sulfur dioxide).

• • • • •

(b) Regulations for the control of sulfur dioxide in the State of Ohio.

• • • • •

(12) In Allen County:

• • • • •

(iv) The Standard Oil Co. or any subsequent owner or operator of the Standard Oil Co. facilities at Allen County, Ohio, shall not cause or permit the emission of sulfur dioxide in excess of the rates specified below:

(A) 0.92 pounds of sulfur dioxide per 1,000 pounds of total feed at the stack common to the fluid catalytic cracker and the carbon monoxide boiler. The total feed is the crude input to the fluid catalytic cracker.

(B) 1.00 pound of sulfur dioxide per million Btu actual heat input at the following:

(*1*) ISO stabilizer and split heaters (OEPA B002);

(*2*) Crude II heater (OEPA B004);

(*3*) Detailer (OEPA B005)

(*4*) Crude I heater (OEPA B010);

(*5*) Coker furnace (OEPA B011);

(*6*) Vac I heater (OEPA B012);

(*7*) MEK Dewaxing Sec heater (OEPA B013);

(*8*) Furfural ErtSec heater (OEPA B014);

(*9*) BH boilers (OEPA B020).

(C) 0.15 pound of sulfur dioxide per million Btu for all other boilers and process heaters.

(v) The Clark Equipment Co. or any subsequent owner or operator of the Clark Equipment Co. facilities at Allen County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 2.54 pounds of sulfur dioxide per million Btu actual heat input.

• • • • •

(16) In Belmont County:

(i) The Wheeling Pittsburgh Steel Co. or any subsequent owner or operator of the Martins Ferry steel plant in Belmont County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at the Martins Ferry facility in excess of 5.78 pounds of sulfur dioxide per million Btu actual heat input.

(17) In Butler County:

(i) No present or any subsequent owner or operator, unless otherwise specified in this subparagraph, of a by-product coke oven located in Butler County, Ohio, shall cause or permit the combustion of by-product coke oven gas containing a total sulfur content expressed as hydrogen sulfide in excess of 50 grains of hydrogen sulfide per 100 dry standard cubic feet of coke oven gas or the emission of sulfur dioxide from any stack at this facility in excess of 0.27 pound of sulfur dioxide per million Btu actual heat input.

(ii) The present or any subsequent owner or operator of the Fisher Body Division of the General Motors Corp. in Butler County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 3.25 pounds of sulfur dioxide per million Btu of actual heat input.

(iii) The present or any subsequent owner or operator of the Champion International Corp. in Butler County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of the rates specified below.

(A) 2.12 pounds of sulfur dioxide per million Btu of actual heat input from the stack common to coal-fired boilers numbered B010 and B020.

(B) 1.02 pounds of sulfur dioxide per million Btu of actual heat input for all remaining boilers.

(iv) The present or any subsequent owner or operator of the Middletown Paperboard Corp. in Butler County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 1.47 pounds of sulfur dioxide per million Btu of actual heat input.

(v) The present or any subsequent owner or operator of the Cincinnati Gas & Electric Co.-Dick's Creek Station, in Butler County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 1.00 pound of sulfur dioxide per million Btu of actual heat input.

(vi) The present or any subsequent owner or operator of the Diamond International Corp. in Butler County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of the rates specified below.

(A) 1.37 pounds of sulfur dioxide per million Btu of actual heat input for boiler No. 205.

(B) 0.40 pound of sulfur dioxide per million Btu of actual heat input for boiler No. 109.

(vii) The present or any subsequent owner or operator of the city of Hamilton, Ohio Municipal Power Plant in Butler County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of the rates specified below.

(A) 0.31 pound of sulfur dioxide per million Btu of actual heat input for boiler No. 1.

(B) 2.59 pounds of sulfur dioxide per million Btu of actual heat input for boiler No. 6.

(C) 0.30 pound of sulfur dioxide per million Btu of actual heat input for boiler No. 7.

(D) 1.91 pounds of sulfur dioxide per million Btu of actual heat input for boiler No. 8.

(E) Boiler No. 9 is subject to new source performance standards and is limited to 1.20 pounds of sulfur dioxide per million Btu actual heat input.

(viii) The present or any subsequent owner or operator of the Inland Container Co. in Butler County, Ohio, shall not cause or permt the emission of sulfur dioxide from any stack at this facility in excess of 3.38 pounds of sulfur dioxide per million Btu of actual heat input.

(ix) The present or any subsequent owner or operator of Mercy Hospital in Butler County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 2.19 pounds of sulfur dioxide per million Btu of actual heat input.

(x) The present or any subsequent owner or operator of the American Cyanamid Co. in Butler County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of the rates specified below.

(A) 1.28 pounds of sulfur dioxide per million Btu of actual heat input for the boiler.

(B) 67.9 pounds of sulfur dioxide per ton of 100 percent sulfuric acid produced.

(xi) The present or any subsequent owner or operator of the Crystal Tissue Co. in Butler County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of the rates specified below.

(A) 1.89 pounds of sulfur dioxide per million Btu of actual heat input for boiler No. 4.

(B) 1.18 pounds of sulfur dioxide per million Btu of actual heat input for boiler No. 3.

(xii) The present or any subseuqent owner or operator of the Sorg Paper Co. in Butler County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of the rates specified below.

(A) 1.90 pounds of sulfur dioxide per million Btu of actual heat input for boilers No. 1 and 2.

(B) 1.31 pounds of sulfur dioxide per million Btu of actual heat input for boilers No. 3 and 4.

(xiii) The present or any subsequent owner or operator of the Beckett Paper Co. in Butler County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of the rates specified below.

(A) 0.67 pounds of sulfur dioxide per million Btu of actual heat input for boiler No. 3.

(B) 0.52 pounds of sulfur dioxide per million Btu of actual heat input for boiler No. 4.

(C) 0.63 pounds of sulfur dioxide per million Btu of actual heat input for boiler No. 5.

(xiv) The present or any subsequent owner or operator of the St. Regis Paper Co. in Butler County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of the rates specified below.

(A) 0.41 pounds of sulfur dioxide per million Btu of actual heat input for boiler No. 5.

(B) 0.74 pounds of sulfur dioxide per million Btu of actual heat input for all other boilers.

(xv) The present or any subsequent owner or operator of the Armco steel Co., Hamilton plant, in Butler County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of the rates specified below.

(A) 0.94 pounds of sulfur dioxide per million Btu of actual heat input for all boilers and process units.

(B) The Armco Steel Co. or any subsequent owner or operator of the Armco Steel-Hamilton plant, located

V 4 3 / 1 8 8

S E 2 7 7 8

LIMI

in Butler County, Ohio, shall not cause or permit the combustion of by-product coke oven gas containing a total sulfur content expressed as hydrogen sulfide in excess of 280 grains of hydrogen sulfide per 100 dry standard cubic feet of coke oven gas or the emission of sulfur dioxide from any stack at this facility in excess of 1.51 pounds of sulfur dioxide per million Btu actual heat input.

(xvi) The present or any subsequent owner or operator of the Armco Steel Co., Middletown plant, in Butler County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of the rates specified below.

(A) 0.54 pounds of sulfur dioxide per million Btu of actual heat input for stack common to boiler Nos. 15 and 16.

(B) 0.63 pounds of sulfur dioxide per million Btu of actual heat input for soaking pits of batteries numbered 1 through 8.

(C) 0.72 pounds of sulfur dioxide per ton of process weight at the open hearths.

(D) 0.60 pounds of sulfur dioxide per ton of process weight at the recycle plant.

(E) 0.94 pounds of sulfur dioxide per million Btu of actual heat input for all boilers and process units unless otherwise specified in this subparagraph.

(F) The Armco Steel Co. or any subsequent owner or operator of the Armco Steel-Middletown plant located in Butler County, Ohio, shall not cause or permit the combustion of by-product coke oven gas containing a total sulfur content expressed as hydrogen sulfide in excess of 280 grains of hydrogen sulfide per 100 dry standard cubic feet or coke oven gas or the emission of sulfur dioxide from any stack at this facility in excess 1.51 pounds of sulfur dioxide per million Btu actual heat input.

• • • • • •

(23) In Cuyahoga County • • •

• • • • • •

(xxi) The Aluminum Co. of America (ALCOA) or any subsequent owner or operator of ALCOA's Cleveland works in Cuyahoga County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack in excess of 5.20 pounds of sulfur dioxide per million Btu actual heat input.

• • • • • •

(32) In Henry County:

• • • • • •

(ii) The present or subsequent owner or operator of the city of Napoleon power plant in Henry County, Ohio shall not cause or permit the emission of sulfur dioxide from any state at the Napoleon Power Plant in excess of 5.88 pounds of sulfur dioxide per million Btu actual heat input.

• • • • • •

(34) In Jefferson County • • •

• • • • • •

(xii) No owner or operator of a by-product coke oven shall cause or permit the combustion of by-product coke oven gas containing hydrogen sulfide in excess of 50 grains per 100 dry standard cubic feet of coke oven gas.

(xiii) The Wheeling Pittsburgh Steel Co. or any subsequent owner or operator of the Yorkville steel plant facility in Jefferson County, Ohio shall not cause or permit the emission of sulfur dioxide from any fossil fuel-fired steam generating unit stack at the Yorkville facility in excess of 5.62 pounds of sulfur dioxide per million Btu actual heat input.

• • • • • •

(35) In Lake County • • •

• • • • • •

(v) The present or any subsequent owner or operator of the Erie Coke & Chemical Co. facility in Lake County, Ohio shall not cause or permit the combustion of by-product coke oven gas for coke oven underfiring containing a total sulfur content expressed as hydrogen sulfide in excess of 450 grains of hydrogen sulfide per 100 dry standard cubic feet of coke oven gas. All existing boilers previously owned by Diamond Shamrock will remain at 0.0 pounds of sulfur dioxide per million Btu actual heat input.

• • • • • •

(38) In Lorain County • • •

• • • • • •

(ix) Oberlin College or any subsequent owner or operator of the Oberlin College facility in Lorain County, Ohio shall not cause or permit the emission of sulfur dioxide in excess of the rates specified below:

(A) 6.92 pounds of sulfur dioxide per million Btu of actual heat input for oil-fired boilers No. 1 and 2.

(B) 0.35 pounds of sulfur dioxide per million Btu of actual heat input for oil-fired boiler No. 3.

(39) In Lucas County • • •

• • • • • •

(iv) Standard Oil Co. • • •

• • • • • •

(D) 0.57 pounds of sulfur dioxide per million Btu actual heat input for process heaters or fossil fuel-fired steam-generating units numbered B009, B010, B018, B020, B023, and B025.

• • • • • •

(viii) Gulf Oil • • •

• • • • • •

(F) 200 pounds of sulfur dioxide per 2,000 pounds of sulfur processed for sulfur recovery plant.

• • • • • •

(xiv) Sun Petroleum Products Co. or any subsequent owner or operator of the Sun Petroleum Products Co. facility in Lucas County, Ohio shall not cause or permit sulfur dioxide emission from any stack at the Sun facility in excess of the rates specified below:

(A) Unless otherwise specified in this subparagraph, the combustion of refinery fuel gas containing a total sulfur content expressed as hydrogen sulfide in excess of 10 grains of hydrogen sulfide per 100 dry standard cubic feet of refinery fuel gas or the emission of sulfur dioxide from any stack at this facility in excess of 0.04 pounds of sulfur dioxide per million Btu actual heat input.

(B) 0.0 pounds of sulfur dioxide per million Btu actual heat input for fossil fuel-fires steam-generating units or process operation heaters numbered 502, 1901, 1902, 1903, 1904, 1905, and 1906.

(C) 3.00 pounds of sulfur dioxide per 1,000 pounds of charging stock for catalytic cracking units and CO boilers connected to the same stack.

(D) 1.80 pounds of sulfur dioxide per million Btu actual heat input for fossil fuel-fired steam-generating unit numbered 1910.

(E) 1.60 pounds of sulfur dioxide per million Btu actual heat input for fossil fuel-fired process heater units numbered 507 and 508.

(F) 1.50 pounds of sulfur dioxide per million Btu actual heat input for fossil fuel-fired process heater unit numbered 301.

(G) 1.40 pounds of sulfur dioxide per million Btu actual heat input for fossil fuel-fired process heater unit numbered 9401.

(H) 1.10 pounds of sulfur dioxide per million Btu actual heat input for fossil fuel-fired process heater units numbered 501 and 503.

(I) 0.90 pounds of sulfur dioxide per million Btu actual heat input for fossil fuel-fired process heater unit numbered 304.

(J) 70 pounds of sulfur dioxide per 1,000 pounds of sulfur processed for sulfur recovery plants.

(K) Fossil fuel-fired process heater units numbered 501 and 503 will not

be operated simultaneously with fossil fuel-fired process heater unit No. 507.

• • • • • •

(xvi) Bowling Green University or any subsequent owner or operator of the Bowling Green University facility in Lucas County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 5.5 pounds of sulfur dioxide per million Btu actual heat input.

(40) In Mahoning County • • •

• • • • • •

(vii) The Koppers Co. or any subsequent owner or operator of the Koppers Co. facilities located in Mahoning County, Ohio, shall not cause or permit the emission of sulfur dioxide from the stack connected to boiler No. 3 in excess of 4.0 pounds of sulfur dioxide per million Btu actual heat input.

• • • • • •

(58) In Stark County:

• • • • • •

(vi) The present or any subsequent owner or operator of the Timken Co. facilities in Stark County, Ohio shall not cause or permit the emission of sulfur dioxide from any fossil fuel-fired steam-generating unit(s) stack at this facility in excess of the rates specified below:

(A) 3.08 pounds of sulfur dioxide per million Btu actual heat input for the stack common to the fossil fuel-fired steam-generating units B001 and B002 at the Canton plant.

(B) 0.93 pounds of sulfur dioxide per million Btu actual heat input for the fossil fuel-fired steam-generating unit B003 at the Canton plant.

(C) 0.0 pounds of sulfur dioxide per million Btu actual heat input for the fossil fuel-fired steam-generating units B003 and B004 at the Gambrinus plant.

(D) 0.67 pounds of sulfur dioxide per million Btu actual heat input for fossil fuel-fired steam-generating units at the Gambrinus plant unless other wise specified in this subparagraph.

• • • • • •

(ix) The Ashland Oil Co., or any subsequent owner or operator of the Ashland Oil Co. facilities in Stark County, Ohio shall not cause or permit sulfur dioxide emissions from any stack at this facility in excess of the emission limitations listed below:

(A) 0.025 pounds of sulfur dioxide per million Btu actual heat input for units 4-0-B-3, 4-2-B-1, 4-2-B-2, and 4-27-B-1.

(B) 1.00 pounds of sulfur dioxide per million Btu actual heat input for all process heaters and fossil fuel-fired steam-generating units unless otherwise specified in this subparagraph.

(C) 0.62 pounds of sulfur dioxide per 1,000 pounds of charging stack for catalytic cracking units.

(D) 2.00 pounds of sulfur dioxide per 100 pounds of sulfur processed for sulfur recovery plants.

(E) Only two of the following three units may be operated simultaneously: 4-16-B-1, 4-16-B-2, and 4-16-B-12.

(x) The present or any subsequent owner or operator of the Hoover Co. in Stark County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 4.2 pounds of sulfur dioxide per million Btu actual heat input.

• • • • • •

(59) In Summit County • • •

• • • • • •

(iii) The present or any subsequent owner or operator of the Diamond Crystal facility in Summit County, Ohio, shall not cause or permit the emission of sulfur dioxide from coal-fired boilers at this facility in excess of 4.72 pound of sulfur dioxide per million Btu of actual heat input or the emission of sulfur dioxide from oil-fired boilers at this facility in excess of 0.30 pounds of sulfur dioxide per million Btu of actual heat input.

(iv) The present or any subsequent owner or operator of the Kittinger Supply Co. (formerly known as Akwell Industries) facility in Summit County, Ohio, shall not cause or permit the emission of sulfur dioxide from oil-fired boilers at this facility in excess of 0.80 pound of sulfur dioxide per million Btu of actual heat input or the emission of sulfur dioxide from coal-fired boilers at this facility in excess of 2.38 pounds of sulfur dioxide per million Btu of actual heat input.

• • • • • •

(vi) The present or subsequent owner or operator of the Sieberling Rubber Co. facilities in Summit County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 1.46 pounds of sulfur dioxide per million Btu actual heat input.

(vii) The present or subsequent owner or operator of the Firestone Tire & Rubber Co. facilities in Summit County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of the rates specified below:

(A) 1.76 pounds of sulfur dioxide per million Btu of actual heat input from oil-fired boiler 21.

(B) 2.87 pounds of sulfur dioxide per million Btu of actual heat input from coal-fired boilers 22 and 23.

(C) Firestone Tire & Rubber Co. or any subsequent owner or operator of the Firestone Tire & Rubber facilities located in Summit County, Ohio, shall operate no more than two of the boilers, 21, 22, or 23 simultaneously.

(viii) The present or subsequent owner or operator of the B. F. Goodrich Co. facilities in Summit County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of the rates specified below:

(A) 0.51 pound of sulfur dioxide per million Btu actual heat input for oil-fired boiler 31.

(B) 5.54 pounds of sulfur dioxide per million Btu actual heat input for coal-fired boilers 27 and 32.

(C) The B. F. Goodrich Co. or any subsequent owner or operator of the B. F. Goodrich facilities in Summit County, Ohio, shall not operate boiler 27 simultaneously with either boiler 31 or boiler 32.

(ix) The Goodyear Tire & Rubber Co. or any subsequent owner or operator of the Goodyear facilities in Summit County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack in excess of the rates specified below:

(A) 4.47 pounds of sulfur dioxide per million Btu actual heat input for fossil fuel-fired steam-generating unit B001 located at plant I.

(B) 0.50 pound of sulfur dioxide per million Btu actual heat input for fossil fuel-fired steam-generated units B002 and B003 located at plant I.

(C) 2.24 pounds of sulfur dioxide per million Btu actual heat input for all fossil fuel-fired steam-generating units located at plant II.

(D) 160 pounds of sulfur dioxide per 1,000 pounds of sulfur processed for the sulfur recovery unit(s).

• • • • • •

(xi) The Ohio Edison or any subsequent owner or operator of the Ohio Edison Co.'s Beech Street power station in Summit County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at the Beech Street plant in excess of 2.79 pounds of sulfur dioxide per million Btu actual heat input.

(xii) The Ohio Edison Co. or any subsequent owner or operator of the Ohio Edison Co.'s Gorge plant in Summit County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at the Gorge plant in excess of 4.07 pounds of sulfur dioxide per million Btu actual heat input.

• • • • • •

(xiv) PPG Industries or any subsequent owner or operator of the PPG Industries facilities in Summit County, Ohio, shall not cause or

permit the emission of sulfur dioxide from any stack at this facility in excess of the rates specified below:

(A) 3.80 pounds of sulfur dioxide per million Btu of actual heat input.

(B) PPG Industries, Inc., or any subsequent owner or operator of the PPG facility located in Summit County, Ohio, shall be permitted to operate in only one of the following three configurations at any given time:

(*1*) Boilers No. 11, 12 and one stoker on; the remaining five stokers off.

(*2*) Boiler No. 12 and two stokers on; boiler No. 11 and the remaining four stokers off.

(*3*) Boiler No. 11 and three stokers on; boiler No. 12 and the remaining three stokers off.

(C) In lieu of meeting subparagraph (59)(xiv) (A) or (B) of this paragraph, PPG Industries, Inc. in Summit County, Ohio, may elect, with in sixty (60) days of proposal of this regulation, to comply with the alternate emission limitations and operating conditions specified below:

(*1*) PPG Industries, or any subsequent owner or operator of the PPG facility in Summit County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack in excess of 3.96 pounds of sulfur dioxide per million Btu of actual heat input.

(*2*) PPG Industries, Inc., or any subsequent owner or operator of the PPG facility located in Summit County, Ohio, shall be permitted to operate in only one of the following three configurations at any given time:

(*i*) Boilers No. 11 and No 12 on; and all six stokers off.

(*ii*) Boiler No. 12 and two stokers on; boiler No. 11 and the remaining four stokers off.

(*iii*) Boiler No. 11 and three stokers on; boiler No. 12 and the remaining three stokers off.

(xv) PPG Industries, or any subsequent owner or operator of the PPG Industries, Inc., Columbia Cement Plant, located in Summit County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack in excess of 0.0 pounds of sulfur dioxide per ton actual process weight input for the kilns.

(xvi) The present or any subsequent owner or operator of the Midwest Rubber Co. in Summit County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess 1.80 pounds of sulfur dioxide per million Btu actual heat input.

(xvii) The present or any subsequent owner or operator of the Terex Division of General Motors Corp. in Summit County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 0.49 pound of sulfur dioxide per million Btu actual heat input.

(xviii) The present or any subsequent owner or operator of the General Tire & Rubber Co. in Summit County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 0.46 pound of sulfur dioxide per million Btu actual heat input.

(xix) The present or any subsequent owner or operator of the Goodyear Aerospace Co. in Summit County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at AB boilerhouse of this facility in excess of 0.92 pounds of sulfur dioxide per million Btu of actual hear input or the emission of sulfur dioxide from any stack at D boilerhouse of this facility in excess of 1.53 pounds of sulfur dioxide per million Btu of actual heat input.

(xx) The present or any subsequent owner of operator or the B.F. Goodrich Chemical Co. in Summit County, Ohio, shall not cause the emission of sulfur dioxide from any stack at this facility in excess of 5.22 pounds of sulfur dioxide per million Btu actual heat input.

(xxi) The present or any subsequent owner or operator of the Chrysler Corp. in Summit County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of the rates specified below:

(A) 0.86 pound of sulfur dioxide per million Btu actual heat input for boiler No. B001.

(B) 1.19 pounds of sulfur dioxide per million Btu actual heat input for boilers Nos. B002 and B003.

(60) In Trumbull County:

* * * * *

(iii) The Republic Steel Corp. or any subsequent owner or operator of the Republic Steel facilities in Trumbull County, Ohio, shall not cause or permit sulfur dioxide emissions from any stack at this facility in excess of the rates specified below:

(A) 2.30 and 1.00 pounds of sulfur dioxide per million Btu actual heat input from fossil fuel-fired steam-generating units Nos. B001 and B002, respectively. Boiler B003 is subject to the prevention of significant deterioration regulations and will receive an emission limit consistent with best available control technology requirements that will be specified as a condition in its pending construction permit. All other fossil-fueled steam generator units are limited to 0.00 pounds of sulfur dioxide per million Btu.

(B) 1.44 pounds of sulfur dioxide per ton of product at the Sinter plant.

(C) 0.00 grains of hydrogen sulfide per 100 dry standard cubic feet of coke oven gas from coke ovens Nos. 1 and 2. Coke oven No. 4 is subject to the prevention of significant deterioration regulation and an emission limitation of 35 grains of sulfur dioxide per 100 dry standard cubic feet.

(iv) [Reserved]

* * * * *

3. Section 52.1882 is amended as follows:

§ 52.1882 Compliance Schedules.

* * * * *

(b) * * *

(1) Except as provided in paragraph (b)(5) of this section, the owner or operator of any process equipment subject to applicable subparagraphs of § 52.1881(b) shall comply with the compliance schedule in paragraph (b)(2) of this section.

* * * * *

(3) Except as provided in subparagraph (5) of this paragraph, the owner or operator of any stack venting any fossil fuel-fired steam-generating unit(s) subject to § 52.1881(b) of this chapter shall comply with the applicable compliance schedule in paragraph (b)(4) of this section.

* * * * *

(6) Nothing in this paragraph shall preclude the Adminstrator from promulgating a separate schedule for any source to which the application of the compliance schedules in paragraphs (b) (2) or (4) of this section fails to satisfy the requirements of § 51.15 (b) and (c) of this chapter.

(c) Federal compliance schedules for sources in Summit and Butler Counties identified in § 52.1875, footnote f.

(1) Except as provided in subparagraph (5) of this paragraph, the owner or operator of any process equipment subject to applicable subparagraphs of § 52.1881(b) shall comply with the compliance schedule in paragraph (c)(2) of this section.

(2) Any owner or operator of any process equipment subject to applicable paragraphs of § 52.1881(b) of this chapter shall take the following actions to comply with the requirements of said regulation with respect to that source no later than the date specified.

(*i*) 8 weeks from promulgation: Submit preliminary control plans to the Administrator.

(ii) 25 weeks from promulgation: Submit final control plan to the Administrator.

(iii) 34 weeks from promulgation: Award contracts for emissions control systems or process modification, or issue orders for purchase of component parts to accomplish emission control or process modification and notify

the Administrator in writing that such action was taken.

(iv) 52 weeks from promulgation: Initiate onsite construction or installation of emission control equipment or process change and notify the Administrator in writing that such action was taken.

(v) 139 weeks from promulgation: Complete construction or installation of emission control equipment or process change and notify the Administrator in writing that such action was taken.

(vi) 154 weeks from promulgation: Complete shakedown operations and performance test on source, submit performance test results to the Administrator and achieve final compliance with § 52.1881(b) of this chapter, as applicable.

(3) Except as provided in subparagraph (5) of this paragraph, the owner or operator of any stack venting any fossil fuel-fired steam-generating unit(s) subject to § 52.1881(b) of this chapter shall comply with the applicable compliance schedule in paragraph (c)(4) of this section.

(4)(i) The owner or operator of any stack venting any fossil fuel-fired steam-generating unit(s) or process subject to § 52.1881(b) of this chapter who elects to comply with an applicable optional emission limitation specified in § 52.1881(b) of this chapter, shall notify the Administrator no later than 17 weeks after promulgation of the specific emission limitations selected. Failure to select applicable optional emission limitations shall result in the facility being subject to the single uniform emission limitation for all stacks at that facility specified in § 52.1881(b). Notice received later than 17 weeks after promulgation shall be invalid.

(ii) The owner or operator of any fossil fuel-fired steam-generating unit(s) subject to applicable subparagraphs of § 52.1881(b) of this chapter shall notify the Administrator no later than 17 weeks after promulgation of his intent to utilize either low sulfur fuel including blended or washed coal or flue gas desulfurization to comply with the requirement of said regulation.

(iii) Any owner or operator of any stack venting any fossil fuel-fired steam-generating unit(s) subject to applicable subparagraphs of § 52.1881(b) of this chapter who elects to utilize low sulfur fuel including blended or washed coal to comply with the requirements of said regulation shall take the following actions with respect to that source no later than the date specified:

(*a*) 17 weeks after promulgation: Submit to the Administrator a projection for 10 years of the amount of fuel by types that will be substantially adequate to enable compliance with § 52.1881(b) of this chapter, as applicable.

(*b*) 32 weeks from promulgation: Submit data demonstrating the availability of the fuel meeting the requirements projected in subparagraph (a) to the Administrator.

(*c*) 36 weeks after promulgation: Submit a statement to the Administrator as to whether boiler modifications will or will not be required. If modifications will be required, submit plans for such modification.

(*d*) 50 weeks from promulgation: Let contracts for necessary boiler modification, if applicable, and notify the Administrator in writing that such action was taken.

(*e*) 60 weeks after promulgation: Initiate onsite modifications, if applicable, and notify the Administrator in writing that such action was taken.

(*f*) 118 weeks from promulgation: Complete onsite modification, if applicable, and notify the Administrator in writing that such action was taken.

(*g*) 122 weeks from promulgation: Achieve final compliance with the emission limitation of § 52.1881(b) of this chapter, as applicable, and notify the Administrator in writing that such action was taken.

(iv) Any owner or operator of any stack venting any fossil fuel-fired steam-generating unit(s) subject to applicable subparagraphs of § 52.1881(b) of this chapter who elects to utilize flue gas desulfurization to comply with the requirements of said regulations shall take the following actions with respect to the source no later than the date specified.

(*a*) 17 weeks from promulgation: Let necessary contracts for construction and notify the Administrator in writing that such action was taken.

(*b*) 61 weeks from promulgation: Initiate onsite construction and notify the Administrator in writing that such action was taken.

(*c*) 145 weeks from promulgation: Complete onsite construction and notify the Administrator in writing that such action was taken.

(*d*) 156 weeks from promulgation: Complete shakedown operations and performance test on source, submit performance test results to the Administrator and achieve final compliance with § 52.1881(b) of this chapter, as applicable.

(5)(i) None of the preceding subparagraphs of this paragraph shall apply to any owner or operator of a source which is presently in compliance with the applicable subparagraphs of § 52.1881(b) of this chapter.

(ii) Any owner or operator of a source capable of emitting 100 tons of sulfur dioxide per year from all stacks at any facility who is presently in compliance with the applicable subparagraphs of § 52.1881(b) of this chapter shall so certify to the Administrator by 4 weeks from promulgation.

(iii) Any owner or operator subject to a compliance schedule in this paragraph who elects to achieve compliance by means not covered by this paragraph may submit to the Administrator no later than 6 weeks from promulgation, a proposed alternative compliance schedule. For process equipment subject to applicable subparagraph of § 52.1881(b) of this chapter no such compliance schedule may provide for final compliance after the final compliance date in subparagraph (2) of this paragraph. For any stack venting any fossil fuel-fired steam-generating unit(s) subject to applicable subparagraphs of § 52.1881(b) of this chapter, which will utilize low-sulfur fuel including blended or washed coal to comply with the requirements of said regulations, no such compliance schedule may provide for final compliance after final compliance date in subparagraph (4)(iii) of this paragraph. For any stack venting any fossil fuel-fired steam-generating unit(s) subject to applicable subparagraph of § 52.1881(b) of this chapter, which will utilize flue gas desulfurization to comply with the requirement of said regulations, no such compliance schedule may provide for final compliance after the final compliance date in subparagraph (4)(iv) of this paragraph.

(iv) Any owner or operator of any process equipment subject to applicable subparagraphs of § 52.1881(b) of this chapter who submits an alternative compliance schedule pursuant to § 52.1882(c)(c)(iii) of this chapter shall remain subject to the provisions of § 52.1882(c)(2) of this chapter until the alternative schedule is approved by the Administrator.

(v) Any owner or operator of any stack venting any fossil fuel-fired steam-generating unit(s) subject to applicable subparagraphs of § 52.1881(b) of this chapter who submits an alternative compliance schedule pursuant to § 52.1882(c)(5)(iii) of this chapter shall remain subject to the provision of § 52.1882(c)(4) of this chapter until the alternative schedule is approved by the Administrator.

(6) Nothing in this paragraph shall preclude the Administrator from promulgating a separate schedule for any source to which the application of the compliance schedules in paragraphs (c) (2) or (4) of this section fails to satisfy the requirements of § 51.15 (b) and (c) of this chapter.

(d) Monitoring and reporting requirement for nonsimultaneous operation.

(1) Any owner or operator of any source of sulfur dioxide subject to a provision of § 52.1881 of this chapter which limits the combination of point

V 4 3 / 1 8 8 S E 2 7 7 8 UMI

V 4 3 / 1 8 8 S E 2 7 7 8 UMI

sources which the source may operate at any time shall, in addition to any other reporting requirements of this chapter, comply with the following:

(1) Install not later than the date by which compliance with the applicable emission limitation of § 52.1881 is required a device(s) to determine and record the time of operation of each such point source:

(2) Retain such records for at least 2 years; and

(3) Report to the Administrator within 30 days of each such occurrence any period during which point sources are operated in any combination not allowed by an applicable requirement of § 52.1881.

[FRL 975-8]

STATE AND FEDERAL ADMINISTRATIVE ORDERS PERMITTING A DELAY IN COMPLIANCE WITH STATE IMPLEMENTATION PLAN REQUIREMENTS

Proposed Approval of an Administrative Order Issued by Ohio Environmental Protection Agency to Longview State Hospital and Ohio Department of Mental Health and Mental Retardation

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA proposes to approve an administrative order issued by the Ohio Environmental Protection Agency to Longview State Hospital and Ohio Department of Mental Health and Mental Retardation. The order requires the hospital to bring air emissions from its coal-fired boilers in Cincinnati, Ohio, into compliance with certain regulations contained in the federally approved Ohio State implementation plan (SIP) by July 1, 1979. Because the order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order under the Clean Air Act (the Act). If approved by EPA, the order will constitute an addition to the SIP. In addition, a source in compliance with an approved order may not be sued under the Federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the order. The purpose of this notice is to invite public comment on EPA's proposed approval of the order as a delayed compliance order.

DATE: Written comments must be received on or before October 27, 1978.

ADDRESSES: Comments should be submitted to Director, Enforcement Division, EPA, Region V, 230 South Dearborn Street, Chicago, Ill. 60604. The State order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT: Deborah Garber, Attorney, Enforcement Division, EPA, Region V, Chicago, Ill. 60604, 312-353-2082.

SUPPLEMENTARY INFORMATION: Ohio Department of Mental Health and Mental Retardation operates a hospital at Cincinnati, Ohio. The order under consideration addresses emissions from three coal-fired boilers at the facility, which are subject to OAC 3745-17-10 (formerly AP-3-11). The regulation limits the emissions of particulate matter, and is part of the federally approved Ohio State implementation plan. The order requires final compliance with the regulation by July 1, 1979, through installation of an electrostatic precipitator or fabric filter on the boilers, and control of quality of coal to be burned. The source has consented to the terms of the order and has waived any and all rights to seek judicial review of the order, or to seek a stay of enforcement of the order in connection with any judicial review of the Ohio implementation plan, or portion therof. Because this order has been issued to a major source of particulate matter emissions and permits a delay in compliance with the applicable regulation, it must be approved by EPA before it becomes effective as a delayed compliance order under section 113(d) of the clean Air Act (the Act). EPA may approve the order only if it satisfies the appropriate requirements of this subsection.

If the order is approved by EPA, source compliance with its terms would preclude Federal enforcement action under section 113 of the act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source under the citizen suit provision of the act (section 304) would be similarly precluded. If approved, the order would also constitute an addition to the Ohio SIP.

All interested persons are invited to submit written comments on the proposed order. Written comments received by the date specified above will be considered in determining whether EPA may approve the order. After the public comment priod, the Administrator of EPA will publish in the FEDERAL REGISTER the Agency's final action on the order in 40 CFR part 65.

The provisions of 40 CFR part 65 will be promulgated by EPA soon, and will contain the procedure for EPA's issuance, approval, and disapproval of orders under section 113(d) of the Act. In addition, part 65 will contain sections summarizing orders issued, approved, and disapproved by EPA. A prior notice proposing regulations for part 65, published at 40 FR 14876 (April 2, 1975), will be withdrawn, and replaced by a notice promulgating these new regulations.

(42 U.S.C. 7413, 7601.)

Dated: September 15, 1978.

VALDAS V. ADAMKUS,
Acting Regional Administrator, Region V.

BEFORE THE OHIO ENVIRONMENTAL PROTECTION AGENCY

ORDER

In the Matter of: Longview State Hospital.

Pursuant to section 3704.03(S) of the Ohio Revised Code and in accordance with section 113(d) of the Clean Air Act, as amended, 42 U.S.C. 7401 et seq., the Director of Environmental Protection (hereinafter "Director") hereby makes the following Findings of Fact and issues the following Orders, which will not take effect until the Administrator of the United States Environmental Protection Agency has approved their issuance under the Clean Air Act.

FINDINGS OF FACT

1. Longview State Hospital (hereinafter "Longview") is a mental health facility located at 6600 Paddock Rd., Cincinnati, Ohio 45216.

2. Longview owns and operates three (3) coal-fired boilers at its facility. These boilers are identified as follows:

Boiler No. 1—Application No. 1431140591 B001; Wickes, 80 MMBtu (60,000 pounds of steam per hour) chain grate stoker.
Boiler No. 2—Application No. 1431140591 B002; Wickes, 120 MMBtu (90,000 pounds of steam per hour) chain grate stoker.
Boiler No. 3—Application No. 1431140591 B003; Keeler, 80 MMBtu (60,000 pounds of steam per hour) chain grate stoker.

3. On May 11, 1977, Longview submitted applications for permits to operate the coal-fired boilers.

4. In the course of operation of said boilers, air contaminants are emitted in violation of OAC 3745-17-10.

5. Longview is unable to comply with OAC 3745-17-10.

6. On December 15, 1977, the Director proposed to deny the applications for permits to operate.

7. Potential emissions of air pollutants from the boilers are equal to or more than one hundred tons per year, and therefore these sources constitute a major stationary source as defined insection 302(j) of the Clean Air Act, as amended.

8. Longview is using and will continue to use coal of sufficiently low sulfur content to maintain its existing status of compliance with federally promulgated sulfur oxide standards (U.S. Environmental Protection Agency Sulfur Oxide Plan for Ohio, 41 FR 36324 (August 27, 1976)).

9. Implementation by Longview of interim control measures contained in the Orders below will fulfill the requirements of section 113 (d) (7) of the Clean Air Act, as amended.

10. The compliance schedule set forth in the orders below requires compliance with applicable emission regulations as expeditiously as practicable.

11. The Director's determination to issue the orders set forth below is based on his consideration of reliable, probative, and substantial evidence relating to the technical feasibility and economic reasonableness of compliance with such Orders, and their relation to benefits to the people of the State to be derived from such compliance.

ORDERS

Whereupon, after due consideration of the above findings of fact, the Director hereby issues the following orders pursuant to section 3704.03(S) of the Ohio Revised Code and in accordance with section 113(d) of the Clean Air Act, as amended, 42 U.S.C. 7401 et seq., which will not take effect until the Administrator of the United States Environmental Protection Agency has approved their issuance under the Clean Air Act.

1. Compliance with OAC 3745-17-10 shall be achieved no later than July 1, 1979, by the installation of a baghouse or electrostatic precipitator on the boilers, sufficient to control emissions of particulate matter from Longview to a rate of 0.15 pounds per million Btu input. This emission restriction is based upon a maximum total heat input of 280 million Btu (210,000 pounds of steam per hour).

2. Compliance with order (1) above, shall be achieved in accordance with the following schedule:

Complete engineering and submit final control plans—June 1, 1978.
Award bids—July 1, 1978.
Commence construction—August 1, 1978.
Complete construction; test equipment—June 1, 1979.
Achieve compliance with all applicable state and Federal statutes and regulations—July 1, 1979.

3. The maximum steam load for the boilers shall be 75,000 pounds of steam per hour.

4. The baghouse or electrostatic precipitator shall maintain compliance with the emission limit specified in order (1) above, from the minimum load through the range of the maximum load specified in order (3) above.

5. If Longview desires to operate the boilers at a steam load greater than 75,000 pounds of steam per hour, Longview shall apply for and obtain a permit to install from the Ohio Environmental Protection Agency (hereinafter "OEPA") in accordance with OAC 3745-31-02. Included in such application shall be the results of a stack test, conducted in accordance with procedures approved by the Director, which show that the boilers operated at the increased steam loan are in compliance with OAC 3745-17-07 and OAC 3745-17-10 (a particulate emission rate of 0.15 pounds per million Btu input). Written notification of intent to test shall be provided to the city of Cincinnati Division of Air Pollution Control thirty (30) days prior to the testing date.

6. The boilers may be operated in any combination, but the boiler turn down ratios should be considered so as to ensure compliance with OAC 3745-17-07.

7. The boilers shall be operated in compliance with OAC 3745-17-07. This shall be accomplished by operation at turn down ratios compatible with boiler design limits and sulfur dioxide dew points.

8. The boilers shall each be provided with opacity instrumentation and recorders. Oxygen analyzers and recorders shall also be provided for each of the boilers for the control of excess air for the coal-fired units. On a quarterly basis, Longview shall report to the city of Cincinnati Division of Air Pollution Control any excursions above the 20 percent opacity limitation set out in OAC 3745-17-07. Longview shall keep on file all stack monitoring data for a minimum of two years.

9. Coal analysis for boiler fuel shall be as follows: less than or equal to eight (8) percent ash; less than or equal to one (1) percent sulfur; greater than or equal to 13,500 Btu per pound of coal, as specified by the Ohio Department of Mental Health and Mental Retardation. The Ohio Department of Mental Health and Mental Retardation shall note this fuel quality requirement in any bidding document for the purchase of fuel.

10. Pending achievement of compliance with order (1) above, Longview shall use the best practicable systems of emission reduction for the period during which this order is in effect in accordance with section 113(d)(7) of the Clean Air Act, as amended. Such interim measures shall include:

a. The use of coal with an analysis of: less than or equal to eight (8) percent ash; less than or equal to one (1) percent sulfur; greter than or equal to 13,500 Btu per pound of coal.

b. Continued operation of the boiler in compliance with OAC 3745-17-07.

c. Regular maintenance of the boilers.

11. Within five (5) days after the scheduled achievement date of each of the increments of progress specified in the compliance schedule in Order (2) above, Longview shall submit a progress report to the city of Cincinnati Division of Air Pollution Control. The person submitting these reports shall certify whether each increment of progress has been achieved.

12. Longview shall submit to the city of Cincinnati Division of Air Pollution Control an analysis of each shipment of coal burned at Longview on an as received basis.

13. Longview shall comply with any other emission monitoring and reporting required by chapter 3704 of the Ohio Revised Code and the regulations promulgated thereunder.

14. Emission tests shall be conducted upon the boilers to verify compliance with order (1) above. Such tests shall be conducted no later than the date specified in the compliance schedule in order (2) above, in accordance with procedures approved by the Director. Writtent notification of intent to test shall be provided to the city of Cincinnati Division of Air Pollution Control thirty (30) days prior to the testing date. The specific boiler or boilers to be tested will be determined at the pre-test meeting by the OEPA.

15. Longview shall apply for and obtain permits to operate the boilers in accordance with OAC 3745-35-02.

16. Longview is hereby notified that unless it is exempted under section 120(a)(2)(B) or (C) of the Clean Air Act, as amended, failure to achieve final compliance with order (1) above by July 1, 1979 will result in a requirement to pay a noncompliance penalty under section 120 of the Clean Air Act, as amended.

NED. E. WILLIAMS,
Director of Environmental Protection.

WAIVER

The Ohio Department of Mental Health and Mental Retardation agrees that the attached findings and orders are lawful and reasonable and agrees to comply with the attached orders. The Ohio Department of Mental Health and Mental Retardation hereby waives the right to appeal the issuance or terms of the attached findings and orders to the Environmental Board of Review, and it hereby waives any and all rights it might have to seek judicial review of said findings and orders either in law or equity. The Ohio Department of Mental Health and Mental Retardation also waives any and all rights it might have to seek such judicial review of any approval by U.S. EPA of the attached Findings and orders or to seek a stay of enforcement of said findigs and orders in connection with any judicial review of Ohio's air implementation plan (or portion thereof).

JAMES F. MALLORY,
Authorized Representative of Ohio Department of Mental Health and Mental Retardation.

STATE AND FEDERAL ADMINISTRATIVE ORDERS PERMITTING A DELAY IN COMPLIANCE WITH STATE IMPLEMENTATION PLAN REQUIREMENTS

Proposed Delayed Compliance Order for Cargill, Inc., Aurora, Nebr.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Withdrawal of notice of proposed rulemaking.

SUMMARY: The purpose of this notice is to withdraw a prior FEDERAL REGISTER notice proposing approval of a delayed compliance order for Cargill, Inc., at Aurora, Nebr. This action is being taken because Cargill, Inc., is no longer in violation of the Nebraska State implementation plan provisions covered by the proposed order.

DATE: This withdrawal is immediately effective.

FOR FURTHER INFORMATION CONTACT:

Michael J. Sanderson or Peter J. Culver, Environmental Protection Agency, Region VII, 1735 Baltimore, Kansas City, Mo. 64108, 816-374-2576.

LIMI

SUPPLEMENTARY INFORMATION: A FEDERAL REGISTER notice published at 43 FR 31044, July 19, 1978, solicited public comments on a proposed EPA approval of an administrative order issued by the Nebraska Department of Environmental Control to Cargill, Inc., at Aurora, Nebr. Cargill, Inc., has subsequently achieved compliance with the Nebraska State implementation plan regulations covered by the order. This was determined by an inspection on August 7, 1978, by the Nebraska Department of Environmental Control.

In consideration of the foregoing, the proposal published in the FEDERAL REGISTER 43 FR 31044 on July 19, 1978, entitled "Proposed Approval of an administrative order by Nebraska Department of Environmental Control to Cargill, Inc.," is hereby withdrawn.

Dated: September 18, 1978.

DAVID R. ALEXANDER,
Acting Regional Administrator, Region VII.

[FR Doc. 78-27068 Filed 9-26-78; 8:45 am]

[40 CFR Part 65]

[FRL 938-6]

ENFORCEMENT AUTHORITY

State and Federal Enforcement of Implementation Plan Requirements After Statutory Deadlines

AGENCY: Environmental Protection Agency.

ACTION: Withdrawal of notice of proposed rulemaking.

SUMMARY: The purpose of this proposal is to withdraw a prior FEDERAL REGISTER notice proposing regulations applicable to State and Federal administrative orders which require stationary sources to comply with provisions of State implementation plans after applicable attainment dates. Because the administrative enforcement authority of EPA and the States has been amended from that reflected in the proposed regulations, EPA has determined that the proposal is no longer appropriate.

DATES: This withdrawal is immediately effective.

ADDRESSES: Questions concerning this withdrawal should be directed to Edward E. Reich, Director, Division of Stationary Source Enforcement (EN-341), Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

Charles Hungerford, Attorney-Advisor, division of Stationary Source Enforcement, Environmental Protection Agency, at 202-755-2570.

SUPPLEMENTARY INFORMATION: A FEDERAL REGISTER notice published at 40 FR 14876 (April 2, 1975) solicited comments on a new part 65 containing proposed regulations EPA would observe when ordering a source to comply with provisions in a State implementation plan after the applicable attainment date under part 52. Proposed guidance under this new part also set forth the minimum conditions under which the Agency would defer to similar enforcement action taken by a State. The proposed regulations were designed to implement EPA's enforcement authority, as it then existed, under section 113 of the Clean Air Act, 42 U.S.C. 1857c-8.

This statutory authority was substantially altered upon enactment of the Clean Air Act Amendments of 1977 (Pub. L. 95-95, 91 Stat. 705). Substitute regulations are promulgated in today's FEDERAL REGISTER establishing the procedures to be followed by the Agency when exercising its administrative enforcement authority, as modified by these amendments, in issuing, approving, or disapproving administrative orders which permit a delay in compliance with a State implementation plan.

In consideration of the foregoing, the proposal published in the FEDERAL REGISTER (40 FR 14876) on April 2, 1975, entitled "Enforcement Authority", is hereby withdrawn.

Dated: September 19, 1978.

DOUGLAS M. COSTLE,
Administrator.

[FRL 975-5; Docket No. DCO-78-11]

STATE AND FEDERAL ADMINISTRATIVE ORDERS PERMITTING A DELAY IN COMPLIANCE WITH STATE IMPLEMENTATION PLAN REQUIREMENTS

Proposed Delayed Compliance Order For Owensboro Municipal Utilities, Owensboro, Ky.

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA proposes to issue a delayed compliance order (DCO) to Owensboro Municipal Utilities (OMU) located in Owensboro, Ky. The DCO requires OMU to bring air emissions from its coal-fired steam generating units at its Elmer Smith facility in Owensboro, Ky., into compliance with certain regulations contained in the federally approved Kentucky State implementation plan (SIP). Because OMU is unable to comply with these regulations at this time, the proposed DCO would establish an expeditious schedule requiring final compliance for (1) unit 1 at the Elmer Smith facility by December 31, 1978, and (2) unit 2 at the Elmer Smith facility by September 15, 1978. If issued by EPA, the DCO would alter the rights of persons to bring judicial actions against the source for violations of the SIP. The purpose of this notice is to invite public comment and to offer an opportunity to request a public hearing on this proposed DCO.

DATES: Written comments and requests for a public hearing must be received on or before October 27, 1978. All requests for a public hearing should be accompanied by a statement as to why the hearing would be beneficial and a text or summary or any proposed testimony to be offered at the hearing. If there is significant public interest in a hearing, it will be held after 21 days prior notice of the date, time and place of the hearing has been given in this publication.

ADDRESSES: Comments and requests for a public hearing should be submitted to Paul J. Traina, Director, Enforcement Division, EPA, Region IV, 345 Courtland Street, Atlanta, Ga. 30308. Materials supporting the delayed compliance order and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Richard S. DuBose, Air Enforcement Branch, Enforcement Division, EPA, Region IV, 345 Courtland Street NE., Atlanta, Ga. 30308, telephone number 404-881-4298.

SUPPLEMENTARY INFORMATION: OMU is located in Owensboro, Ky., and operates two coal-fired steam generating units at its Elmer Smith facility. On March 10, 1977, pursuant to section 113(a)(1) of the Act, 42 U.S.C. 7413(a)(1), the U.S. Environmental Protection Agency issued a notice of violation to OMU of the finding that units 1 and 2 at its Elmer Smith facility were operating in violation of Kentucky air pollution control regulation 401 KAR 3:060, section 3(3)(e), dealing with the control of particulate emissions from indirect heat exchangers. This regulation is part of the federally approved State implementation plan. Said violations continued beyond the 30th day after receipt of the Regional Administrator's notification to OMU, and EPA issued administrative order AO-77-253(a) on April 22, 1977. The facility is unable to comply fully with the terms of the administrative order which requires demonstration of final compliance for both units by September 15, 1978.

The proposed delayed compliance order satisfies the applicable requirements of Section 113(d) of the Act. The delayed compliance order requires final compliance with Kentucky air pollution control regulation 401 KAR 3:060, section 3(3)(e), for (1) unit 1 at the Elmer Smith facility by December 31, 1978, and (2) unit 2 at the Elmer Smith facility by September 15, 1978. The source has consented to its terms and has agreed to meet the delayed compliance order's increments during the period of this informal rulemaking. If the delayed compliance order is issued, source compliance with its terms would preclude further EPA enforcement action under section 113 of the Act against this source for violations of the regulation covered by the delayed compliance order during the period the delayed compliance order is in effect. Enforcement against the source under the citizen suit provision of the Act (section 304) would be similarly precluded. In the event of an emergency episode the delayed compliance order shall not act to preclude the source from complying with all of the provisions of section 303 of the Act. Comments received by the date specified above will be considered in determining whether EPA should issue the delayed compliance order. Testimony given at any public hearing concerning the delayed compliance order will also be considered. After the public comment period, and after EPA has reviewed any comments received in response to this notice, the Administrator of EPA will publish in the FEDERAL REGISTER the Agency's final action on the order in 40 CFR part 65.

The provisions of 40 CFR part 65 will be promulgated by EPA soon, and will contain the procedures for EPA's issuance, approval, or disapproval of a delayed compliance order under section 113(d) of the Act. In addition, part 65 will contain sections listing or including orders issued, approved, or disapproved by EPA. A prior notice proposing regulations for part 65, published at 40 FR 14876 (April 2, 1975), will be withdrawn, and replaced by a notice promulgating these new regulations.

Dated: September 19, 1978.

JOHN C. WHITE,
Regional Administrator.

In consideration of the foregoing, it is proposed to amend part 65 of chapter 1, Title 40, Code of Federal Regulations as follows:

PART 65—DELAYED COMPLIANCE ORDERS

1. By adding § 65.220 to read as follows:

§ 65.220 Federal delayed compliance orders issued under Section 113(d) (1), (3), and (4) of the Act.

U.S. ENVIRONMENTAL PROTECTION AGENCY

In the matter of Owensboro Municipal Utilities, Owensboro, Ky.; proceeding under § 113(d) Clean Air Act, as amended. Docket No. DCO-78-11.

DELAYED COMPLIANCE ORDER

This delayed compliance order is issued this date pursuant to section 113(d) of the Clean Air Act, as amended, 42 U.S.C. 7413(d) (hereinafter referred to as the "Act"). This delayed compliance order contains a schedule and timetable for compliance, interim requirements, and monitoring and reporting requirements. Public notice, opportunity for a public hearing, and 30 days notice to the State of Kentucky have been provided pursuant to section 113(d)(1) of the Act.

FINDINGS

On March 10, 1977, Mr. Jack E. Ravan, regional administrator, Region IV, U.S. Environmental Protection Agency (EPA), pursuant to authority delegated to him by the Administrator, issued a notice to Owensboro Municipal Utilities (hereinafter referred to as the "Company"), that units 1 and 2 at its Elmer Smith facility were found to be in violation of the Kentucky Air Pollution Control Regulation 401 KAR 3:060, section 3(3)(e), dealing with the control of particulate emissions from indirect heat exchangers. Said violations continued beyond the 30th day after receipt of the Regional Administrator's notification to the Company, and EPA issued Administrative Order AO-77-253(a) on April 22, 1977. The facility is unable to comply fully with the terms of the administrative order which requires demonstration of final compliance for both units by September 15, 1978. The Company will be able to achieve and demonstrate final compliance of unit 2 by September 15, 1978, but final compliance of unit 1 cannot be achieved and demonstrated until September 31, 1978.

The requirements of this delayed compliance order preempt and supersede the requirements of Administrative Order AO-77-253(a) only where such requirements are inconsistent and Administrative Order AO-77-253(a) remains in full force and effect except as to requirements which are inconsistent with the provisions of this order.

After a thorough investigation and analysis of all relevant facts including the fact that the Company could not comply immediately and installation of control equipment is necessary to facilitate compliance with the applicable Kentucky air pollution regulation, EPA has determined that compliance in accordance with schedule hereinafter set forth is reasonable and as expeditious as practicable.

ORDERED

I

ABATEMENT PROGRAM

That the attached appendices governing an abatement program are incorporated into and made a part of this delayed compliance order for the control of particulate emissions at Owensboro Municipal Utilities located in Owensboro, Ky.

The appendices are designated as follows:

Appendix A: Unit 1 at Elmer Smith facility.

Appendix B: Unit 2 at Elmer Smith facility.

II

REPORTING—ADDRESSES

That all submissions of source performance test results, reports and other items required by this delayed compliance order be made to Paul J. Traina, Director, Enforcement Division, U.S. Environmental Protection Agency, 345 Courtland Street, Atlanta, Ga. 30308 (hereinafter referred to as the "Director"), with copies to John T. Smither, Director, Division of Air Pollution Control, Department for Natural Resources and Environmental Protection, Commonwealth of Kentucky, Capital Plaza Tower, Frankfort, Ky. 40601 (hereinafter referred to as the "Kentucky Director").

III

PROGRESS REPORTS AND MILESTONE CERTIFICATION

That the Company submit, no later than five (5) days after the end of each month, commencing with August 1, 1978, a monthly progress report for the emission points specified in part I. These reports shall contain specific information on the progress toward achieving each milestone in part I. If any delay is anticipated in meeting said milestones, the Company shall immediately notify the Director in writing of the anticipated delay and reasons therefor. Notification to EPA of any anticipated delay shall not excuse the delay. In addition, the Company shall submit, no later than five (5) days after the deadline for completing each milestone required by part I, certification to the Director and the Kentucky Director whether such milestone has been met.

IV

NOTICE OF TESTS

That the Company provide the Director and the Kentucky Director with (20) days notice prior to the conducting of any performance tests as required by part I in order to afford an opportunity to evaluate the test procedure and to have an observer present at such testing.

The Company shall submit to the Director and the Kentucky Director a written report of the results of said performance testing within thirty (30) days after the completion of said testing.

V

MALFUNCTIONS AND BREAKDOWNS

That the Company shall perform operation and maintenance practices on all sources as necessary to prevent malfunctions or breakdowns and to reduce emissions in excess of regulations to the maximum extent practicable. When emissions due to sudden and unforeseen malfunction of the affected facility are or may be in excess of the maximum allowable as set forth in this delayed compliance order, for greater than four (4) hours, the owner or operator shall notify the appropriate State or local agency and EPA by telephone or telegram as promptly as possible, and in no event later than twelve (12) hours following the start of such malfunction, and shall cause written notice to be sent to the Director and the

Kentucky Director no later than the end of the next working day following the start of such malfunction. Such notices shall specify the name of the affected facility, its location, the address and telephone number of the person responsible for the affected facility, the nature and cause of the malfunction, the date and time when such malfunction was first observed, the expected duration, and an estimate of the physical and chemical composition, rate, and concentration of the emission. The Company shall remedy the malfunction or breakdown as soon as possible thereafter and shall take reasonable steps to reduce emissions in excess of the interim emission limits during the malfunction or breakdown.

The Regional Administrator of EPA shall have the authority during a malfunction of breakdown to require the Company to take specific steps to reduce emissions, including process equipment modifications and/or reductions, or termination if necessary. Within ten (10) days after the termination of a malfunction or breakdown requiring the above notification, the owner shall submit:

(1) The time the excess emission began and ended;

(2) The time of the beginning and end of the breakdown or malfunction which is asserted to be the cause of the excess emission;

(3) An estimate of the physical and chemical composition, rate, and concentration of emissions which occurred, and where continuous monitoring is required or is in effect (including visible emission detector), the strip charts with plots of all emissions monitored versus time, including a summary of the monitoring instruments' written record expressed in units of the applicable standard;

(4) An explanation and, where appropriate, an engineeering analysis of the cause of the malfunction or breakdown;

(5) A description of those operating and/or maintenance procedures and practices in use prior to and during the occurrence, which were designed to prevent or minimize the extent and duration of the malfunction or breakdown;

(6) Any other steps taken to minimize the extent or duration of the malfunction or breakdown;

(7) An analysis of what steps will be taken to prevent or minimize similar occurrences in the future; and

(8) Such additional information as the Director or the Kentucky Director may require.

VI

INTERIM LIMITS

At no time shall the visible emissions from units 1 and 2 at the Elmer Smith facility, while operating singly or simultaneously, exceed 50 percent opacity prior to attainment of the last milestone. This interim emission limitation shall be effective immediately. The Company shall take all necessary precautions to assure that its emissions will not cause or contribute to a violation or violations of ambient air quality standards. The applicable State emission limitation shall apply after attainment of the last milestone.

VII

CONTINUOUS MONITORING

That the Company, as part of the control strategy and pursuant to section 113(a) of the Act, shall complete the installation of all continuous monitoring equipment as required by, and described in, part V of Administrative Order AO-77-253(a) on or before August 1, 1978.

Until the above mentioned continuous monitors are installed and functioning properly, the Company shall continue to submit on a monthly basis the 24-hour fuel sampling and analysis results for each day of operation of the Elmer Smith facility, as required by and described in part VIII of Administrative Order AO-77-253(a).

VIII

COMPLIANCE RESPONSIBILITY

Nothing herein shall relieve the source from complying with all other applicable Federal, State or local regulations.

IX

TERMINATION OF ORDER

This delayed compliance order shall be terminated in accordance with section 113(d)(8) of the Act if the Administrator determines on the record after notice and hearing, that an inability to comply with Kentucky Air Pollution Control Regulation 401 KAR 3:060, section 3(3)(e) no longer exists.

X

VIOLATION OF REQUIREMENTS

Violation of any requirement of parts I through XII of this delayed compliance order shall result in one or more of the following actions:

(a) Enforcement of such requirement through the commencement of a civil action for injunctive relief and the assessment of civil penalties pursuant to section 113(b) of the Act, or a criminal prosecution pursuant to section 113(c) of the Act, or both:

(b) Revocation of this delayed compliance order, after notice and opportunity for a public hearing, and subsequent enforcement of Kentucky Air Pollution Control Regulation 401 KAR 3:060, section 3(3)(e) in accordance with sections 113 (b) and/or (c) of the Act.

XI

NONCOMPLIANCE PENALTY

Failure by the Company to achieve and certify compliance by September 15, 1978, for unit 2 and December 31, 1978, for unit 1, and maintain compliance thereafter, shall result in one or more of the actions identified in part X(a). In addition, noncompliance beyond July 1, 1979, will subject the Company to an administratively assessed noncompliance penalty pursuant to the requirements of section 120 of the Act and any rules and regulations promulgated pursuant thereto, unless the Company is exempted by section 120(a)(2) (B) or (C) of the Act. In the event of noncompliance after July 1, 1979, the Company will be formally notified of its noncompliance pursuant to section 120(b)(3) of the Act.

XII

WAIVER OF RIGHTS

That by consenting to the terms and conditions of this delayed compliance order, the Company waives any and all rights it may have to seek a stay of enforcement of this delayed compliance order in connection with any judicial review of the Kentucky State implementation plan or portion thereof.

XIII

EFFECTIVE DATE

This delayed compliance order will have full force and effect upon execution.

APPENDIX A.—*U.S. Environmental Protection Agency Delayed Compliance Order* [1]

Owensboro Municipal Utilities shall complete the following acts with respect to control of particulate emissions from unit 1 at its Elmer Smith facility located in Owensboro, Ky., on or before the dates specified:

(1) August 15, 1978—Negotiate and sign all necessary contracts for particulate emission control systems.

(2) September 1, 1978—Initiate on-site construction or modification of particulate control equipment.

(3) November 15, 1978—Complete installation or necessary modification of particulate emission control equipment.

(4) December 31, 1978—Complete shakedown operations and performance tests, also achieve compliance with Kentucky Air Pollution Control Regulation 401 KAR 3:060, Section 3(3)(e) and certify such compliance to the Director and the Kentucky Director.

APPENDIX B.—*U.S. Environmental Protection Agency Delayed Compliance Order* [2]

Owensboro Municipal Utilities shall complete the following acts with respect to control of particulate emissions from unit 2 at its Elmer Smith facility located in Owensboro, Ky., on or before the dates specified:

(1) March 31, 1978—Negotiate and sign all necessary contracts for particulate emission control systems.

(2) April 15, 1978—Initiate on-site construction or modification of particulate control equipment.

(3) July 31, 1978—Complete installation or necessary modification of particulate emission control equipment.

(4) September 15, 1978—Complete shakedown operations and performance tests, also achieve compliance with Kentucky Air Pollution Control Regulation 401 KAR 3:060, Section 3(3)(e) and certify such compliance to the Director and the Kentucky Director.

CONSENT [3]

Owensboro Municipal Utilities acknowledges that the particulate emissions from

units 1 and 2 located at its Elmer Smith facility in Owensboro, Ky., are in violation of the applicable emission limitations contained in the federally approved Kentucky State implementation plan. Owensboro Municipal Utilities has reviewed this delayed compliance order, believes it to be a reasonable and expeditious means to achieve compliance with the applicable particulate emission limiting regulations as contained in the federally approved Kentucky State implementation plan, and consents to all of the requirements and terms of this delayed compliance order.

Furthermore, Owensboro Municipal Utilities acknowledges the necessity of complying with the interim emission limitation and abatement procedures contained herein which are designed to ensure the attainment and maintenance of national ambient air quality standards for the specified pollutants and consents to said interim emission limitation and abatement procedures in order to protect the public health and welfare.

Owensboro Municipal Utilities hereby represents that it has full corporate authority and the necessary corporate approval to enter into and perform in accordance with the terms and provisions of this delayed compliance order. The signatory below represents that he has the requisite corporate authority to execute this consent on behalf of Owensboro Municipal Utilities.

Dated: July 25, 1978.

JOHN P. PACE,
Owensboro Municipal Utilities.

WATER QUALITY STANDARDS

Navigable Waters of the State of Alabama

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: This action proposes water quality standards to reestablish former use designations for 14 navigable waterways for which the State provided inadequate downgraded use designation justification and to establish use designations for 9 stream segments previously classified for lesser uses.

DATES: All written comments received on or before November 27, 1978, will be considered in the preparation of the final rule. Hearing to be held in Auburn, Ala., Oct. 18, 1978, at 7 p.m. See address below.

ADDRESSES: Written comments should be addressed to Charles W. Ferst, Water Quality Standards Coordinator, EPA, 345 Courtland Street NE., Atlanta, Ga. 30308, 404-881-3012. Hearing address: Room 208, Foy Union Bldg., Auburn University, Auburn, Ala.

FOR FURTHER INFORMATION CONTACT:

Charles W. Ferst, Water Quality Standards Coordinator, EPA, 345 Courtland Street NE., Atlanta, Ga. 30308, 404-881-3012.

SUPPLEMENTAL INFORMATION:

Statutory Requirement: Section 303(c) of the Clean Water Act, as amended (Pub. L. 92-500 (33 U.S.C. 1251 et seq.)) (hereinafter, the Act) provides that each State shall, at least once every three years, hold public hearings for the purpose of reviewing water quality standards and the adoption of revisions as appropriate. Whenever a State revises its water quality standards or adopts new standards, such standards must be submitted to EPA for approval. If EPA determines that the revised standards are not consistent with the applicable requirements of the Act, it must notify the State within ninety days and specify the changes necessary to comply with the requirements of the Act. If the State's water quality standards are not brought into compliance with the Act within ninety days after the date of notification, the EPA must promulgate water quality standards consistent with the Act after proposal and public comment.

The Agency's regulations for implementing section 303(c) of the Act are codified at 40 CFR 130.17. These regulations have been explained in Chapter 5 of EPA's "Guidelines for State and Areawide Water Quality Management Program Development" (November 5, 1976; 41 FR 48777; hereinafter the Guidelines), and in a recent FEDERAL REGISTER notice (43 FR 29588; July 10, 1978).

Background.

On October 15, 1976, and March 17, 1977, the Alabama Water Improvement Commission (hereinafter AWIC) held public hearings to receive comments on Alabama's water quality standards. At the hearings, EPA presented recommendations on water quality standards relative to the requirements of the Act, the 40 CFR 130.17 regulations and the Guidelines.

On May 30, 1977, the AWIC adopted substantive revisions to the Alabama water quality standards including changes in the antidegredation policy, mixing zone criteria, waste treatment requirements, temperature criteria, use classifications and their associated criteria, and 175 beneficial use classification assignments.

On August 29, 1977, in accordance with section 303(c)(3) of the Act, the EPA Regional Administrator, Region IV, approved the revised water quality standards adopted on May 30, 1977 except for specific use designations for 57 stream segments, and for Section V, Waste Treatment Requirements, providing further evaluation.

On September 17 and 20, 1977, EPA, Region IV, held public meetings to provide information to interested persons on the Agency's action of August 29, 1977 and to receive public comments on the sections of the water quality standards which were excepted from EPA's approval.

On September 28, 1977, the Regional Administrator approved seven stream beneficial use designations for which he had previously withheld approval. Additionally, 50 beneficial use designations were disapproved because information demonstrated that uses consistent with the national water quality goal are attainable or the State did not make a satisfactory demonstration, or made no demonstration at all, to justify downgrading waters previously classified for more restrictive beneficial uses in accordance with 40 CFR 130.17(c)(3). Section V, Waste Treatment Requirements, was also disapproved based on the Regional Administrator's determination that the revised Section V was inconsistent with the applicable requirements of the Act.

In response to EPA's September 28, 1977, disapproval, the AWIC held a public hearing on November 17, 1977, in Montgomery, Ala., to receive comments on necessary revisions specified in EPA's previous objections.

On December 19, 1977, the AWIC adopted revised beneficial use classifications for 23 stream segments to make them consistent with the Act; assigned the Agricultural and Industrial Water Supply use to Mill Creek near Oneonta, Ala.; modified Section V, Waste Treatment Requirements; and modified Section IV, Minimum Conditions Applicable to all State Waters. The AWIC also revised criteria applicable to the Agricultural and Industrial Water Supply use to provide for fish survival.

On January 5, 1978, the AWIC submitted to the Regional Administrator the revised water quality standards adopted on December 19, 1977. The AWIC also submitted justifications to EPA for 30 downgraded stream segments previously disapproved on September 28, 1977.

On February 15, 1978, the Regional Administrator approved water quality standards adopted by the AWIC on December 19, 1977, with the exception of 23 stream beneficial use classification assignments. Because of EPA's February 15, 1978 determination and because the State has failed to take appropriate action respecting the 23 stream beneficial use designations remaining disapproved, the Administrator of EPA is proposing a rule assign-

compliance order issued to Owensboro Municipal Utilities on ——— pursuant to section 113(d) of the Clean Air Act, 42 U.S.C. 7413(d).

V 4 3 / 1 8 8
SE 27 78
LIMI

ing the Fish and Wildlife use to the stream segments listed herein in accordance with section 303(c)(4) of the Act.

The Agricultural and Industrial Water Supply classification for Pond Creek in the Tennessee River Basin was among the 23 use classifications assignments disapproved by EPA on September 28. The EPA is herewith proposing to promulgate a Fish and Wildlife use classification for this creek. On April 11, 1978, Region IV staff met with representatives of Reynolds Metals Co., Associated Industries of Alabama, and Ford Motor Co., during which information was presented to EPA regarding Pond Creek. EPA agreed to study the information submitted while continuing with the statutory proposal process.

Within ninety days of this notice the State may: (a) Submit an adequate justification, as provided by 40 CFR 130.17(c), for the use classifications disapproved by the Regional Administrator; or (b) adopt appropriate use classifications for the waters listed in this proposed rule. If the State fails to act in either manner (a) or (b), the Administrator in accordance with section 303(c)(4) of the Act and Administrative Procedure Act (5 U.S.C. 553), will promulgate the water quality standards proposed herein, or other standards which EPA determines are consistent with the requirements of the act after considering public comment.

Basis and Purpose

Section 303(c)(2) of the Act requires that State water quality standards, "• • • be such as to protect the public health or welfare, enhance the quality of water and serve the purposes of this Act." The purpose of water quality standards, as with the other sections of the Act, is to achieve, wherever attainable, the national goal of protecting and propagating fish, shellfish, and wildlife, and providing for recreation in and on the waters by 1983 (section 101(a)(2)).

The EPA's regulations for review and revision of water quality standards are found at 40 CFR 130.17(c) (40 FR 55321; November 28, 1975). Under the authority of section 303(c) EPA requires that:

(1) The State shall establish water quality standards which will result in the achievement of the national water quality goal specified in section 101(a)(2) of the Act, wherever attainable. In determining whether such standards are attainable for any particular segment, the State should take into consideration environmental, technological, social, economic and institutional factors.

(2) The State shall maintain those water uses which are currently being attained. Where existing water quality standards specify designated water uses less than those which presently are being achieved, the State shall upgrade its standards to reflect the uses actually being attained.

(3) At a minimum, the State shall maintain those water uses which currently are designated in water quality standards, effective as of the date of these regulations or as subsequently modified in accordance with § 130.17(c) (1) and (2). The State may establish less restrictive uses than those contained in existing water quality standards, however, only where the State can demonstrate that:

(i) The existing designated use is not attainable because of natural background;

(ii) The existing designated use is not attainable because of irretrievable man-induced conditions; or

(iii) Application of effluent limitations for existing sources more stringent than those required pursuant to section 301(b)(2) (A) and (B) of the Act in order to attain the existing designated use would result in substantial and widespread adverse economic and social impact.

EPA's judgement with regard to the Alabama use classifications was to disapprove the State's action in 23 cases. This proposed rule establishes beneficial uses consistent with the national water quality goal and 40 CFR 130.17(c)(1) for nine stream segments previously classified for less restrictive uses, and fourteen stream segments for which State demonstrations do not adequately justify the establishment of less restrictive uses as required by 40 CFR 130.17(c)(3).

The Agency's Proposed Rule

The Agency's proposed rule would establish a designated use classification of Fish and Wildlife for 23 stream segments. A significant difference exists between the water quality criteria associated with the Alabama Fish and Wildlife use classification and those associated with the Agricultural and Industrial Water Supply use. For example the dissolved oxygen (D.O.) criteria supporting the Alabama Fish and Wildlife use classification requires that:

For a diversified warm water biota, including game fish, daily dissolved oxygen concentrations shall not be less than 5 mg/l at all times • • •

The Alabama Agricultural and Industrial Water Supply use classification provides that:

Sewage, industrial wastes, or other wastes shall not cause the dissolved oxygen to be less than 3.0 parts per million • • •

EPA's proposed rule also would result in the application of a more stringent toxic substances provision than the one assigned by Alabama for the Agricultural and Industrial Water Supply use classification. For example, the Alabama toxic and deleterious substances criteria associated with the Fish and Wildlife use classification require toxic substances attributable to sewage, industrial wastes or other wastes will not be:

• • • injurious to fish and aquatic life including shrimp and crabs in estuarine or salt waters or the propagation thereof; not to exceed one-tenth of the 96-hour median tolerance limit for fish and aquatic life • • • except that other limiting concentrations may be used when factually justified and approved.

The Agricultural and Industrial designated use requires that color, odor, and taste-producing substances, toxic substances, and other deleterious substances be restricted to:

• • • only such amounts as will not render the waters unsuitable for agricultural irrigation, livestock watering, industrial cooling, and industrial process water supply purposes, and fish survival, nor interfere with downstream water uses.

These two examples illustrate that the fish and wildlife designated use requires more stringent water quality criteria and therefore more closely approaches the goals of the Act, which should be achieved where attainable in compliance with EPA's regulations.

In practice the water quality standards will be achieved by the installation of point source abatement controls; by the application of more effective operation of existing point source facilities; or by the application of best management practices for non-point pollution sources. Point source controls are regulated through the National Pollutant Discharge Elimination System permit program established in section 402 of the Act. The Act requires dischargers to reduce point source pollution loadings so as to achieve water quality standards (section 301(b)(1)(C)). Allowable discharges can be quantified by a waste-load allocation process which determines allowable loadings which will met water quality standards. For example, the Alabama Agricultural and Industrial Water Supply designated use would provide for wasteload allocations based on 3.0 mg/l D.O.; the proposed rule herein would provide for wasteload allocations based on 5.0 mg/l D.O.

Economic Impacts

The State's assessment of the economic impact of projected sewage improvements necessary to achieve water quality standards primarily was based on a comparison of the median family income for the affected communities with the estimated costs of the improvements. The State also used existing EPA guidance regarding less costly wastewater facilities for small communities.

The Region's analyses of Alabama's justifications for its proposed downgradings are contained in two disapproval letters dated September 28, 1977, and February 15, 1978. For the 23 stream segments where proposed downgradings were disapproved by Region IV, the State's justifications were found to be unacceptable for one of two reasons: (1) the plant design criteria and basin plan information were incorrectly documented by the State; or (2) the State used "1970 dollars" to represent the yearly median family income and compared them to 1977 municipal construction costs. For this proposed rulemaking, EPA used construction grants program economic data and adjusted median income figures to be comparable with current cost estimates, where necessary.

Based upon the available information, EPA determined that, of the 24 publicly owned treatment works (POTW's) potentially affected by this proposed rulemaking, eleven may be forced to resort to more sophisticated sewage treatment technology or some other cost effective treatment in order to meet water quality standards. If the State seeks funding support under section 201 of the Act, the Federal and municipal shares of the increased costs would amount to approximately $5.88 million and $1.96 million, respectively. The municipalities' share, amortized over 20 years at seven percent interest, plus "operation and maintenance" costs would amount to approximately $0.764 million per year.

Region IV found that four of the 23 stream segments listed in this proposed rulemaking received industrial discharges: Snow Creek, Conecuh River, Piney Creek, and Pond Creek. Industrial dischargers on the Conecuh River and Piney Creek will contribute dairy and poultry processing wastes to the POTW's. Thus increased treatment costs would be incurred by the municipalities. A portion of these costs may be passed on to the industrial dischargers; however, this is not expected to be significant. EPA's stream survey information on Pond and Snow Creeks indicates that the two other stream segments receiving industrial discharges are currently suitable for the maintenance and propagation of fish and wildlife. A viable community of aquatic life now exists in those streams even with present discharge levels from numerous point sources. Therefore, no additional costs to industrial dischargers on those stream segments will result from this proposed rulemaking.

Therefore, this proposed rulemaking does not trigger any of the criteria in Executive Order 12044 for performing a regulatory analysis (43 FR 12661; March 24, 1978). That order states that a regulatory analysis is not necessary if the proposed regulations will not have an effect on the economy of $100 million or more per year, nor cause a major increase in costs or prices for individual industries, State or local government or geographic regions.

Public Hearings

The Agency plans to hold a public hearing in Auburn, Ala. The hearing will be held from 7 p.m. until 10 p.m. on October 18, 1978 in room 208 of the Foy Union Building on the Auburn University campus.

Requests to make oral statements should be forwarded to Charles W. Ferst, Water Quality Standards Coordinator, EPA, 345 Courtland Street NW., Atlanta, Ga. 30308. Both oral and written comments will be accepted at the hearing. The hearing officer reserves the right to fix reasonable limits on the time allowed for oral presentations.

Availability of the Record

The entire administrative record concerning the Alabama water quality standards described in this preamble is available for public inspection and copying at the Environmental Protection Agency, Region IV office, Water Division, 345 Courtland Street NE., Atlanta, Ga. 30308, during normal business hours of 8 a.m. to 4:30 p.m. The water quality standards for Alabama, detailed analyses on each stream segment mentioned herein, the correspondence between the AWIC and Region IV, EPA, the proposed standards, and other supporting technical information are available for inspection and copying at the U.S. Environmental Protection Agency Public Information Reference Unit (room 2922), 401 M Street SW., Washington, D.C. 20460, during normal business hours of 8 a.m. to 4:30 p.m.

(Secs. 101(a)(2), 303(c), and 501, Clean Water Act, as amended Pub. L. 92-500 (33 U.S.C. 1251(a)(2)(c), 1313(c), and 1361).)

Dated: September 15, 1978.

Douglas M. Costle,
Administrator.

Part 120 of Chapter I, Title 40 of the Code of Federal Regulations is proposed to be amended by adding a new § 120.10. This section changes the use classification for 23 streams in the Alabama water quality standards Appendices B and C to a Fish and Wildlife use from Agricultural and Industrial Water Supply use. The Agricultural and Industrial Water Supply use for these streams was adopted by the State of Alabama on December 19, 1977. The result of this change in designated use is to require more stringent water quality criteria and to upgrade the use designation. Section 120.10 would read as follows:

§ 120.10 Alabama

(a) Water quality standards revisions adopted by the Alabama Water Improvement Commission on May 30, 1977, and amended on December 19, 1977, are contained in the documents entitled, "State of Alabama Water Improvement Commission Water Quality Criteria" and "Water Use Classifications for Interstate and Intrastate Waters of the State of Alabama." These documents will be the water quality standards for the State of Alabama except as amended in the following table. The criteria necessary to support the designated beneficial uses for these water segments are those found in Part D of the "State of Alabama Water Improvement Commission Water Quality Criteria".

Basin	Stream	From	To	Classification
Coosa	Snow Creek	Choccolocco	Its source	Fish and wildlife
Lower Tombigbee	Sycamore Creek	Chickasaw Bogue	do	Do.
Tallapoosa	Christian Creek	Oaktasasis Creek	do	Do.
	Dobbs Creek	Oaktasasis Creek	do	Do.
	Parkerson Mill Creek	Chewacle Creek	do	Do.
Tennessee	Mud Creek	Cedar Creek	Town branch.	Do.
	Pond Creek	Tennessee River	Its source	Do.
Tallapoosa	Calebee Creek	Highway 80	Persimmon Creek.	Do.
Tennessee	Flint Creek	Ala. Highway 36	Its source	Do.
	Piney Creek	County road vicinity of Woodley Springs.	do	Do.
	Swan Creek	Highway 26 crossing	Town Creek.	Do.
Warrior	Mill Creek	Chitwood Creek	Its source	Do.
Warrior	Burnt Cane Creek	County road 81	do	Do.
	Indian Creek	Lost Creek	do	Do.
Choctawhatchee	Beaver Creek	Newton Creek	do	Do.
Coosa	Buxahatchee Creek	Chilton County line	do	Do.
	Walnut Creek	Hog Creek	do	Do.
	Waxahatchee Creek	Camp Branch	Southern RR. crossing.	Do.
Lower Tombigbee	Bassett's Creek	Orphan's Creek	Its source	Do.
	Wahalak Creek	Tishiarka Creek	do	Do.

Basin	Stream	From	To	Classification
Perdido Escambia	Conecuh River	Bullock-Pike County line.	Its source	Fish and wildlife
	Indian Creek	County road crossing near Horn Hill.	...do	Do.
	Rocky Creek	Persimmon Creek	County road crossing north of Chapman.	Do.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[Docket No. 11279; FCC 78-663]

SUBSCRIPTION TELEVISION SERVICE

Proceeding Terminated

AGENCY: Federal Communications Commission.

ACTION: Order terminating proceeding in docket 11279.

SUMMARY: In docket 11279 the Commission proposed rules to regulate cable television systems carriage of the signals of broadcast subscription television stations. This order terminates the proceeding without the adoption of rules due to the staleness of the comments received in response to the original notice and because other rulemaking changes had occurred while the proceeding was pending.

EFFECTIVE DATE: Nonapplicable.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

William H. Johnson, Cable Television Bureau, 202-632-6468.

SUPPLEMENTARY INFORMATION:

Adopted: September 19, 1978.

Released: September 21, 1978.

Order. In the matter amendment of part 73 of the commission rules and regulations (Radio Broadcast Services) to provide for subscription television service, docket No. 11279.[1]

1. This proceeding, relating to cable television carriage of the signals of broadcast subscription television stations, was commenced by the issuance of the Third Further Notice of Proposed Rulemaking in Docket 11279, FCC 68-1175, 15 FCC 2d 601, 33 FR 19085 (1968). By this order we are terminating this proceeding without the adoption of rules.

2. The comments filed in this docket are now stale and a number of changes in the nature of our regulations have been made since the proceeding was commenced so that the record does not provide an adequate basis for the adoption of rules. Of particular importance is the lack of a record concerning the technical details involved in cable television carriage of broadcast STV programing. Moreover, we now have in progress our inquiry in docket 21284 (65 FCC 2d 9 (1977)) in which we are gathering information concerning the overall economic relationship between cable television and broadcast television. Although that proceeding is concerned with the relationship between conventional stations and cable systems, it may also provide some additional insight into the policies that should be applied to cable STV carriage. We are aware that there are parties interested in an expedited resolution of this proceeding through the adoption of rules.[2] However, the lack of adequate comment in the record presents a procedural barrier to that action. At this point we believe the most efficacious procedure for those desiring further action would be the filing of petitions for rulemaking setting forth the rule changes requested and the public interest justification therefore. Our decision terminating this proceeding is not intended to foreclose the possibility of a new proceeding being commenced if that appears warranted.

Authority for this action is contained in section 4(i), 301, 303, and 307 of the Communications Act of 1934, as amended.

[1] See 36 FR 9519, May 26, 1971.

[2] A petition for expedited action was filed by Blonder-Tongue Broadcasting Corp. on Apr. 1, 1977.

Accordingly, *it is ordered,* That the proceeding in Docket 11279 is terminated.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

INTERSTATE COMMERCE COMMISSION

[49 CFR Part 1033]

[No. 36700]

CAR SERVICE

Petition Seeking Institution of Rulemaking Proceeding

AGENCY: Interstate Commerce Commission.

ACTION: Time for filing comments.

SUMMARY: On September 12, 1978, the United States Court of Appeals for the District of Columbia granted the Commission's request for a remand of the record in this proceeding and ordered that the petition which sought the institution of a rulemaking to investigate the need for regulations governing the use of automatic car identification systems, and all pertinent documents, and comments from other interested persons should be submitted to the Commission within 30 days.

DATES: The time for filing the petition seeking the institution of a rulemaking, along with all pertinent documents upon which petitioner relies, and comments of interested persons should be submitted by October 12, 1978.

ADDRESSES: Petition, with accompanying documents, and comments should be sent to: Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

Janice M. Rosenak, Deputy Director, or Harvey Gobetz, Assistant Deputy Director, Section of Rates, Office of Proceedings, Washington, D.C. 20423, 202-275-7693.

This notice is issued pursuant to 49 U.S.C. § 13(6)(a).

Dated: September 19, 1978.

By the Commission, J. Patterson King, Acting Director, Office of Proceedings.

H.G. HOMME, Jr.
Acting Secretary.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

COMMITTEE ON GRANTS, BENEFITS AND CONTRACTS

Notice of Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Committee on Grants, Benefits and Contracts of the Administrative Conference of the United States, to be held at 1:45 p.m., Wednesday, October 25, 1978, in the Conference's library, 2120 L Street, NW., Suite 500, Washington, D.C.

The Committee will meet to consider the comments on the report by Professor Peter W. Martin entitled "Procedures Used in Forming and Carrying out Federal-State Agreements under the Supplemental Security Income Program," and to put its proposed recommendations into final form.

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify this office at least 2 days in advance. The Committee Chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting; any member of the public may file a written statement with the Committee before, during or after the meeting.

For further information concerning this meeting contact David B. H. Martin (202-254-7065). Minutes of the meeting will be available on request.

RICHARD K. BERG,
Executive Secretary.

DEPARTMENT OF AGRICULTURE

Soil Conservation Service

LAUREL RIVER PARK WATER-BASED RECREATION RC&D MEASURE, DELAWARE

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Laurel River Park Water-Based Recreation RC&D Measure, Sussex County, Del.

The environmental assessment of this Federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Otis D. Fincher, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for water-based recreation. The planned works of improvement include the installation of a boat launching area, a paved parking area and entrance road, riverfront bulkheading, and fencing along the riverfront and around Laurel River Park. The location of the boat launching area and parking lot abuts Park Street at the western edge of the park and is adjacent to the river.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Otis D. Fincher, State Conservationist, Soil Conservation Service, Treadway Towers, Suite 204, 9 East Loockerman Street, Dover, Del. 19901, telephone 302-678-0750. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until October 27, 1978.

(Catalog of Federal Domestic Assistance Program No. 10.901, Resource Conservation and Development Program—Pub. L. 87-703, 16 U.S.C. 590a-f, q.)

Dated: September 21, 1978.

EDWARD E. THOMAS,
Assistant Administrator for Land Resources, Soil Conservation Service.

[3410-16]

MYSTIC SEAPORT CRITICAL AREA TREATMENT RC&D MEASURE, CONNECTICUT

Intent Not To Prepare an Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Mystic Seaport Critical Area Treatment RC&D Measure, New London County, Conn.

The environmental assessment of this Federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. John W. Tipple, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for critical area treatment. The planned works of improvement include driven sheet steel piling and placed rock bulkheads. This action is considered repair and replacement and will be done in five phases.

The notice of intent not to prepare an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. John W. Tippie, State Conservationist, Soil Conservation Service, Mansfield Professional Park, Route 44A, Storrs, Conn. 06268, telephone 203-429-9361. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

V 43/188

No administrative action on implementation of the proposal will be taken until October 27, 1978.

(Catalog of Federal Domestic Assistance Program No. 10.901, Resource Conservation and Development Program—Pub. L. 87-703, 16 U.S.C. 590a-f, q.)

[6320-01]

CIVIL AERONAUTICS BOARD

[Order 78-9-60; Docket 31447]

PIEDMONT AVIATION, INC.

Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 13th day of September 1978.

On September 29, 1977, Piedmont Aviation filed an application and motion for hearing to amend its certificate for Route 87 so as to add two new segments authorizing nonstop service between Dallas/Fort Worth and Greensboro/High Point (Greensboro and between Dallas/Fort Worth and Raleigh/Durham (Raleigh). Simultaneously, it moved for a hearing and requested the issuance of a show cause order why this authority should not be granted.

Piedmont proposes to operate two daily nonstop round trips in each new market, with Boeing 737 aircraft. The morning flights from Greensboro would be extensions of existing Piedmont flights from New York/Newark (with stops at Richmond); the morning flights from Raleigh would be extensions of existing flights from Norfolk; the afternoon flights from Greensboro and Raleigh would be extensions of existing flights from Washington, D.C. (with stops at Norfolk and Richmond, respectively).

In support of its application, Piedmont states that approval will produce the following service benefits: First single-plane service in four markets (Dallas/Fort Worth-Greensboro/Norfolk/Raleigh/Richmond), benefiting 120,900 passengers a year; improved single-plane service in 12 markets; and first direct on-line connecting service in 11 other markets.[1] It also contends that approval will improve connecting service between Greensboro, Norfolk, Raleigh, and Richmond and 36 cities west of Dallas/Fort Worth. It states that access to the Dallas/Fort Worth hub will contribute to its operating efficiency, since the length of hop of this extension is almost three times that of its current system, and the passenger haul is almost double. It anticipates that its new service will be profitable, permit subsidy reduction, and strengthen its route structure. It argues that its proposal will help alleviate the congestion that many Dallas/Fort Worth passengers experience at the Atlanta airport, and will not significantly harm other carriers.

Answers in support of Piedmont's application were filed by the Norfolk Port and Industrial Authority, the Commonwealth of Virginia, the Dallas/Fort Worth civic parties,[2] the North Carolina Department of Transportation, and the Greensboro-High Point Airport Authority.

American Airlines, Delta Air Lines, and Eastern Airlines answered in opposition. American urges us to require Piedmont to make at least two intermediate stops in the Dallas/Fort Worth-New York[3] and Baltimore/Washington markets, if we decide to proceed with its application. American also argues that show cause procedures are not the proper method for the grant of new route authority to an off-line point.

Delta contends that we should defer our consideration of Piedmont's application until we have acted on its own application for improved authority in the Raleigh/Greensboro-Atlanta markets[4] and on its route realignment application.[5]

Eastern answers that Piedmont is not entitled to priority of hearing under the Board's standards. It states that, with one exception,[6] Eastern provides single carrier one-stop service in all the Dallas/Fort Worth markets that Piedmont wants to serve; that the markets are not large enough to support additional service; that Piedmont's rapidly growing route system does not need any more route strenghtening; and that Piedmont would divert heavily from Eastern's existing services. Eastern also alleges that Piedmont has grossly exaggerated the traffic it would carry in order to show a profit, contending that, under more realistic assumptions, it would incur heavy losses on its Dallas/Fort Worth extension. Finally, Eastern cites the pendency of its route realignment application,[7] as another reason for us to refuse to consider this request.

On November 18, 1977, Piedmont filed a reply accompanied by a motion for permission to file. We will grant the motion.

We have tentatively concluded, on the basis of the tentative findings below, that the public convenience and necessity require the amendment of Piedmont's certificate for Route 87 so as to authorize nonstop Dallas/Fort Worth-Raleigh and Dallas/Fort Worth-Greensboro service,[8] and the removal of Eastern's stop restrictions in the Dallas/Fort Worth-Greensboro/Raleigh markets.[9]

Piedmont's application falls within the class of cases that can be handled by show-cause procedures due to the absence of any material, determinative

---

[1] These are set forth in the appendix. Appendix filed as part of original document.

[2] The city of Dallas, Dallas Chamber of Commerce, City of Fort Worth, Fort Worth Chamber of Commerce, and the North Texas Commission.

[3] New York is hyphenated with Newark on Piedmont's Route 87.

[4] Application of Delta Air Lines, Inc., Docket 31259.

[5] Docket 29774.

[6] Dallas/Fort Worth-Norfolk.

[7] Docket 29983, requesting nonstop authority in the Dallas/Fort Worth-Richmond/Greensboro/Raleigh markets, among others.

[8] We tentatively find that Piedmont and Eastern are fit, willing, and able to perform the air transportation they propose and to conform to the provisions of the Act and the applicable Board rules.

On the basis of the environmental evaluation submitted by Piedmont, we tentatively find that our proposed action would not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969. Piedmont estimated the annual fuel usage required to implement its Dallas/Fort Worth entry at 8,065,969 gallons. Since this is below the 10 million (10,000,000) gallon threshold which we adopted in our Procedural Regulations as a measure of a "major regulatory action," we tentatively find that our proposed action does not require an energy statement pursuant to § 313.4.

[9] This latter conclusion constitutes an exception to our general policy against processing restriction removals while a carrier's route realignment application is pending. We are making this exception on the grounds of equity and fairness. In Eastern's route realignment application (Docket 29983), it requested nonstop authority in these markets; since no one objected to this request, we would give it this authority when we process its realignment proposal. It would, therefore be inequitable to grant Piedmont nonstop authority in these markets while refusing to award Eastern similar authority at the same time.

In Eastern's route realignment application, it requested a waiver under Part 312 of the Board's Procedural Regulations from filing an environmental evaluation. Eastern supports its request by stating that the grant of the realignment is not likely to affect the environment because it will improve scheduling flexibility, equipment utilization, and operating efficiency. We would waive the requirements of 312 if we had Eastern's realignment before us and we will not require an environmental filing here. We tentatively agree that removal of the stop restrictions in the Dallas/Fort Worth-Greensboro/Raleigh markets will not significantly affect the environment; it will produce greater opportunities for reduction in fuel consumption, air pollution, and ambient noise levels.

issue of fact requiring resolution in a formal evidentiary proceeding. In that respect, this application is similar to Piedmont's recent Boston entry proposal and Eastern's recent Albany proposal.[10]

We find that the implementation of Piedmont's service proposal will offer significant benefits to the traveling public in many Dallas/Fort Worth markets, such as first nonstop service between Dallas/Fort Worth, on the one hand, and Greensboro and Raleigh, on the other, first single-plane service in the Dallas/Fort Worth-Norfolk and Dallas/Fort Worth-Richmond markets, and substantial first single-carrier benefits in other markets.[11] In addition, many travelers will be able to avoid making connections in Atlanta, a very congested terminal.

Further, the extension to Dallas/Fort Worth will enable Piedmont to provide additional flights in markets it already serves and will strengthen it by increasing the length of its average aircraft hop and passenger haul.

Piedmont estimates that its net operating profit as a result of implementation of operations on the Dallas/Fort Worth extension will be $3.6 million. We find that there is sufficient traffic in the markets it proposes to serve to sustain profitable operations, if not under its proposal, than then under a variation.[12a] We need not find that its precise proposal before us, or any other specific service pattern, can in fact be profitably operated.[13] If Piedmont's proposal or a variation can be operated on a profitable basis, service is likely to be provided, and we are persuaded that this has been plausibly shown here.[12b] However, even if the service is or becomes unprofitable the carrier is free, under permissive authority, to cease serving the markets. We are satisfied that nothing developed in an oral evidentiary hearing would reverse these conclusions.[13,14]

Eastern claims revenue diversion of $4.7 million.[15] This represents such a small fraction of Eastern's gross annual revenues of $2 billion that it should not threaten its ability to perform its certificate obligations, or necessarily result in termination of essential services which will not be replaced by another carrier.[15a]

As to American's request that we require Piedmont to make at least two intermediate stops between Dallas/Fort Worth, on the one hand, and New York, Washington and Baltimore, on the other, the nature of Piedmont's routes will dictate this result automatically. Its authority in the New York-Greensboro/Raleigh, Washington-Greensboro/Raleigh and Baltimore-Raleigh markets is already one-stop restricted. Since flights on Piedmont's Dallas/Fort Worth authority will be required to stop in Raleigh or Greensboro in any event, it follows that those flights going on to New York, Washington or Baltimore will have to make at least two stops between Dallas/Fort Worth and those cities.

Delta desires that we defer consideration of Piedmont's request until we have acted on its Raleigh/Greensboro-Atlanta application and its realignment application. We recently issued an order to show cause dealing with Delta's realignment;[16] we see no reason to delay action on Piedmont's request until the Raleigh/Greensboro-Atlanta application is acted upon.

Our tentative decision to remove Eastern's stop restriction in the Dallas/Fort Worth-Greensboro/Raleigh markets conforms with our general policy of eliminating or modifying certificate conditions which serve no useful purpose, impair market development, and inhibit significant improvement in the carrier's economic performance.[17] Removal of Eastern's stop restrictions will benefit the traveling public by decreasing travel time and will help to alleviate the congestion at the Atlanta airport. It is in accordance with our route realignment policy set forth in the Western Route Realignment Order 76-5101, made final by Order 77-11-74, November 17, 1977.

Interested persons will be given 30 days from the date of service of this order to show cause why these tentative findings and conclusions should not be made final. We expect their objections to be supported by detailed economic or legal arguments. If an oral evidentiary hearing is requested, the objector should state, in detail, why such a hearing is necessary, and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained. Answers shall be filed 10 days after the date for filing objections.

Accordingly:

1. We direct all interested persons to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending Piedmont's certificate for Route 87 so as to add a new segment, which is permissive and Category II subsidy ineligible, authorizing the nonstop scheduled air transportation of persons, property, and mail between the terminal point Dallas/Fort Worth, on the one hand, and the coterminal points Greensboro/High Point and Raleigh/Durham, on the other,[18] and amending Eastern's certificates for Routes 5 and 10 so that, notwithstanding the linear description of the routes in those certificates, Eastern be authorized to provide nonstop scheduled air transportation of persons, property, and mail between the terminal point Dallas/Fort Worth, on the one hand, and the terminal points Greensboro/High Point and Raleigh/Durham, on the other;

2. Any interested person objecting to the issuance of an order making final the proposed findings, conclusions, and certificate amendments set forth here shall, no later than October 23, 1978, file with the Board and serve upon all persons listed in paragraph 6 a statement of objections together with a summary of testimony, statistical data, and evidence expected to be relied upon to support its objections; answers to objections shall be filed no later than November 2, 1978;

3. If timely and properly supported objections are filed, we will fully consider the issues raised before we take further action;[19]

4. In the event no objections are filed, all further procedural steps will be deemed to have been waived and the Board may proceed to enter an order in accordance with the tentative

---

[10] By Order 78-8-97, August 17, 1978, we granted Piedmont's Boston entry; by Order 76-7-168, July 31, 1978, we granted Eastern's Albany entry.

[11] See the Appendix.

[12a] For the year ended September 30, 1977, there were 21,520 true O&D plus connecting passengers in the Dallas/Fort Worth-Greensboro market and 22,880 in the Dallas/Fort Worth-Raleigh market. Source: CAB's O&D Survey Tables 8 and 10.

[12b] See *Piedmont Boston Entry Application*, Order 78-4-69 (order to show cause): Order 78-8-97 (final order), at pp. 6-7.

[13] As noted in Order 78-4-69, our conclusion that Piedmont has made a plausible showing that service can be profitable provided is not an element of our tentative findings of public convenience and necessity, but rather of our determination to give this application priority of processing.

[14] Eastern argues that Piedmont's stimulation factors are too high in a number of respects. Even if all of Eastern's criticisms are well taken, our conclusion that proposal, or some plausible variation, could be operated on an economic basis would not be undermined.

[15] The public convenience and necessity require that Piedmont's authority be Category II subsidy-ineligible and permissive to enable it to respond to the forces of the marketplace. If its operations prove to be uneconomic it can reduce or eliminate them.

[15a] EA-7, based on its one-stop operations in the market.

[15b] To the extent that Eastern institutes nonstop service, in direct competition with Piedmont, its case for diversion is that much weaker.

[16] Order 78-4-109, April 19, 1978.

[17] See e.g., Order 78-4-67, April 14, 1978, Order 77-11-41, November 10, 1977, and orders cited in n. 9 of the latter.

[18] In view of the fact that Piedmont currently has operating authority between Greensboro/High Point and Raleigh/Durham, we propose to place those points on a single new segment as coterminals.

[19] Since we have provided for the filing of objections, we will not entertain petitions for reconsideration.

[6320-01]

[Ordered 78-9-94; Docket 33359]

TEXAS INTERNATIONAL AIRLINES, INC.

Order Providing for Further Proceedings Under Subpart M

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 20th day of September 1978.

On September 6, 1978, Texas International Airways filed an application, pursuant to Subpart M of the Board's Procedural Regulations, for amendment of its certificate of public convenience and necessity for Route 82 to eliminate the stop requirement in condition (4) for services between Midland/Odessa, Lubbock, and Amarillo, Tex., on the one hand, and Los Angeles, Calif., on the other.

Continental holds nonstop authority in the Midland/Odessa market and one-stop authority in Lubbock-Los Angeles. TWA holds nonstop authority between Amarillo and Los Angeles. Continental's and TWA's nonstop authority remains unused. However, Amarillo and Lubbock receive one-stop Los Angeles service from TWA and Continental, respectively, and Midland/Odessa two-stop Los Anageles service from Continental.[1]

We find that the application is in compliance with and is suitable for processing under the provisions of Subpart M. Accordingly, we order further proceedings on it under §§ 302.1306-1310 of the Board's Procedural Regulations.

Accordingly,

1. We order that the application of Texas International Airlines, Inc. be set for further proceedings pursuant to §§ 302.1306-1310 of the Board's Procedural Regulations; and

2. We will serve a copy of this order on all parties served by Texas International in its application.

We shall publish this order in the FEDERAL REGISTER.

By the Civil Aeronautics Board: [2]

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc. 78-27179 Filed 9-26-78; 8:45 am]

[6320-01]

[Order 78-9-89; Docket 32873]

AMERICAN AIRLINES, INC.

Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 20th day of September 1978.

On June 16, 1978, American filed an application and motion for hearing to amend its certificate for Route 4 so as to add a new segment authorizing nonstop service between Reno, Nevada, and Chicago, Ill. It proposes to operate three daily round trips in the Reno-Chicago market, each of which would be an extension of an existing flight (Boston-Detroit-Chicago, New York-Chicago, and Washington-Chicago). In support of its application, American alleges that the Reno-Chicago/East markets are underdeveloped compared to Las Vegas and Palm Springs; Reno has become a de facto monopoly point for United; that the market requires and can support another carrier; that American will also offer first single-plane service in the Reno-Detroit/Washington markets and improved service in the Reno-New York/Boston markets; that the broad range of its fares, including a Super Saver fare specifically modified for this market, would be available to Reno travelers for the first time; and that its proposal would result in a net operating profit of over $1 million, with diversion insufficient to impair United's certificate obligations.

An answer in support of American's motion was filed by the Reno parties (the City of Reno and the Greater Reno Chamber of Commerce). No answers were filed in opposition.

We have tentatively concluded, on the basis of the findings below, that the public convenience and necessity require the amendment of American's certificate for Route 4 so as to authorize nonstop Reno-Chicago service. We also tentatively find that American is fit, willing and able properly to perform the air transportation it proposes and to conform to the provisions of the Act and the Board's rules, and that, based on the environmental evaluation submitted by American, our proposed action would not be a major Federal action significantly affecting the quality of the environment within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969.

American's application falls within the class of cases that can be handled by show-cause procedures, because of the absence of any material issue of law, fact or policy requiring resolution in a formal evidentiary proceeding before an administrative law judge, as described in the recent Piedmont Boston entry proposal.[1]

We find that the implementation of a service proposal such as American's would benefit the traveling public in this market by introducing the spur of competition and making certain low fares available to Reno passengers for the first time. The carrier estimates that the net operating profit of its proposed service will be over $1 million in the first year of service.[2] We need not find that its precise proposal here, or any other specific service pattern, can in fact be profitably operated. If the proposal or a variation can be operated on a profitable basis service is likely to be provided, and we are persuaded that this has been plausibly shown here. However, even if the service is or becomes unprofitable the carrier is free, under permissive authority, to cease serving the markets. We

[20] All Members concurred.

[1] Continental also provides one one-stop and one three-stop, one-way flight in the Midland-Odessa market.

[2] In the event no person files an appropriate pleading in opposition to such application which requests a public hearing, the Board may grant said application without further notice or hearing.

[3] All Members concurred.

[1] Order 78-4-69, April 14, 1978.

[2] Motion of American Airlines for expedited hearing, Exhibit AA-401: As noted in Order 78-4-69, our conclusion that American has made a plausible showing that service can be profitably provided is not an element of our tentative findings of public convenience and necessity, but rather of our determination to give this application priority of processing.

are satisfied that nothing developed in an oral evidentiary hearing would reverse this conclusion. Furthermore, as in the Piedmont Boston case, we find that the grant of this authority will not threaten the ability of any carrier to perform its certificate obligations.

Interested persons will be given 30 days following the date of service of this order to show cause why these tentative findings and conclusions should not be made final. We expect that objections will be supported by detailed economic or legal arguments. If an oral evidentiary hearing complete with the opportunity for cross-examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts the objector would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained.

Accordingly,

1. We direct all interested persons to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending American's certificate for Route 4 as to add a new segment authorizing the nonstop scheduled air transportation of persons, property and mail between the terminal point Reno, Nev., and the terminal point Chicago, Ill.;

2. We require any interested persons having objections to the issuance of an order making final the proposed findings, conclusions, and certificate amendments no later than October 23, 1978, to file with the Board and serve upon all persons listed in paragraph 5 a statement of objections together with a summary of testimony, statistical data, and evidence expected to be relied upon to support its objections; answers to objections shall be filed 10 days after;

3. If timely and properly supported objections are filed, we will accord full consideration to the matters or issues raised before further action is taken: [3]

4. If no one files objections to any part of this order, we will consider all further procedural steps relating to such part or parts waived, and the case submitted to us for further action;

5. We will serve a copy of this order upon all persons named in the service list of Docket 32873.

We shall publish this order in the FEDERAL REGISTER.

By the Civil Aeronautics Board.[4]

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc. 78-27178 Filed 9-26-78; 8:45 am]

[3] Since provision is made for filing objections, we will not entertain petitions for reconsideration.

[4] All Members concurred.

DEPARTMENT OF COMMERCE

Bureau of the Census

CENSUS ADVISORY COMMITTEE ON AGRICULTURE STATISTICS

Notice of Public Meeting

Pursuant to the Federal Advisory Committee Act, as amended, 5 U.S.C. APP. (1976), notice is hereby given that the Census Advisory Committee on Agriculture Statistics will convene on October 19, 1978, at 9:15 a.m. The Committee will meet in Room 2424, Federal Building 3 at the Bureau of the Census in Suitland, Md.

This Committee was established in 1962 to advise the Director, Bureau of the Census, concerning the kind of information that should be obtained from agricultural respondents; to prepare recommendations regarding the contents of agricultural reports; and to present the views and needs for data of major agricultural organizations and their members, and other suppliers and users of agricultural statistics.

The Committee is composed of 20 members appointed by the presidents of the nonprofit organizations having representatives on the Committee, and a representative from the U.S. Department of Agriculture.

The agenda for the meeting, which is scheduled to adjourn at 4:15 p.m., is: (1) Introductory remarks by the Director of the Census Bureau; (2) OMB and congressional action, including interest in foreign ownership; (3) status of preparation for mailing the 1978 Census of Agriculture; (4) publicity programs; (5) status of area sample survey; (6) processing plans for the 1978 census; (7) tabulation plans; (8) coverage plans; (9) review of follow-on survey requests; and (10) Committee recommendations, election of 1978-79 chairperson, and plans for the next meeting.

The meeting will be open to the public, and a brief period will be set aside for public comment and questions. Extensive questions or statements must be submitted in writing to the Committee Control Officer at least 3 days prior to the meeting.

Persons planning to attend and wishing additional information concerning this meeting or who wish to submit written statements may contact the Committee Control Officer, Mr. Orvin L. Wilhite, Chief, Agriculture Division, Bureau of the Census, Room 3015, Federal Building 4, Suitland, Md. (Mail address: Washington, D.C. 20233). Telephone: 301-763-5230.

Dated: September 21, 1978.

MANUEL D. PLOTKIN,
Director,
Bureau of the Census.

[FR Doc. 78-27105 Filed 9-26-78; 8:45 am]

[3510-25]

Industry and Trade Administration

DEPARTMENT OF AGRICULTURE—PASADENA, CALIF.

Decision on Application for Dufy-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m. in room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 78-00205. Applicant: U.S. Department of Agriculture, SEA—Fruit and Vegetable Chemistry Laboratory, 263 South Chester Avenue, Pasadena, Calif. 91106. Article: Mass Spectrometer, Model MM 70/70F (127 mm radius double focusing duel electron impact-chemical ionization). Manufacturer: VG-Micromass, Ltd., United Kingdom. Intended use of article: The article is intended to be used for the study of natural products from plant or microbial sources, or chemically modified products from these sources. The three main areas of research are: (1) Studies of the composition of plant materials and determination of the structures and quantities of the individual constituents, (2) studies of the structure-biological activity relations of plant constituents with emphasis on bitter or sweet taste responses, enzyme-substrate interactions, and bioregulatory responses of natural and synthetic effector molecules, and (3) studies of the biosynthesis, metabolism, and regulation of plant constituents to improve crop quality and yield. Experiments will be conducted to determine the chemical structure of these materials, and/or the relative or absolute amounts of the materials present in mixtures.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No domestic manufacturer was both able and willing to manufacture an instrument or apparatus of equivalent scientific value to the foreign article for such purposes as the foreign article is intended to be used, and have it availa-

UMI
V 43/188
SEP 27 78

ble to the applicant without unreasonable delay in accordance with subsection 301.11(c) of the regulations, at the time the foreign article was ordered (September 29, 1977).

Reasons: A request for quota (RFQ) including a comprehensive list of the applicant's technical requirements in a mass spectrometer was sent to domestic manufacturers of instruments comparable to the foreign article. Finnigan Corp. bid on these requirements offering its Model 4000 but was not able to provide the requirement for high sensitivity at molecular weights in the vicinity of 1300. Due to the lack of high sensitivity which the Department of Health, Education, and Welfare deemed pertinent in its memorandum dated August 10, 1978, we find that the Model 4000 was not of equivalent scientific value to the foreign article at the time of order. Other domestic manufacturers indicated to the applicant that they would not bid on the RFQ. Mass spectrometers fall in the category of instruments that are produced on order. As to the domestic availability to such instruments the regulations provide:

> In determining whether a U.S. manufacturer is *able* and *willing* to produce a produced or order, or custom-made instrument, apparatus, or accessory • • • the Deputy Assistant Secretary shall take into account the normal commercial practices applicable to the production and delivery of instruments, apparatus, or accessories of the same general category. (Italics added).

The regulations require that domestic manufacturers be both "able and willing" to produce an instrument for the purpose of comparison with the foreign article. Where an applicant, as in this case, extends in good faith a RFQ to domestic manufacturers and each manufacturer indicates that it does not intend to bid, it is apparent that these domestic manufacturers are either not "willing" or not "able" to produce an instrument of equivalent scientific value to the foreign article. Accordingly, the Department of Commerce finds that no domestic manufacturer was both "able and willing" to manufacturer a domestic instrument of equivalent scientific value to the foreign article for such purpose as the foreign article is intended to be used at the time the foreign article was ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

[3510-25]

BROOKHAVEN NATIONAL LABORATORY

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m. in room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00248. Applicant: Brookhaven National Laboratory, Medical Department, 30 Bell Avenue, Upton, N.Y. 11973. Article: LKB 2128-010/Ultrotome IV Ultramicrotome and Accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for the study of biological materials, both human and experimental animal in a program on Inhalation Toxicology. Investigations will include ultrastructural studies on normal and pathological tissues by histochemical, morphometric, autoradiographic and X-ray elemental analysis techniques. Tissues will originate from experimental animals exposed to controlled environments in specially designed inhalation chambers, as well as human pathological cases.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article has a cutting speed range of 0.1 to 50 millimeters/second (mm/sec). The most closely comparable domestic instrument is the Model MT-2B ultramicrotome manufactured by Ivan Sorvall, Inc. (Sorvall). The Sorvall Model MT-2B ultramicrotome has a cutting speed range of 0.09 to 3.2 mm/sec. We are advised by the Department of Health, Education, and Welfare in its memorandum dated August 10, 1978 that: (1) Cutting speeds in the excess of 4 mm/sec. are pertinent to the applicant's research studies and (2) the domestic instrument does not provide the pertinent feature. We, therefore, find that the Model MT-2B ultramicrotome is not of equivalent scientific value to the foreign article for such purposes as this article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

RICHARD M. SEPPA,
Director, Statutory Import Programs Staff.

[3510-25]

CHARLES S. WILSON MEMORIAL HOSPITAL

Consolidated Decision on Application for Duty-Free Entry of Ultramicrotomes

The following is a consolidated decision on applications for duty-free entry of ultramicrotomes pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301). (See especially § 301.11(e).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review between 8:30 a.m. and 5 p.m. in room 6886C, Department of Commerce Building, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 78-00253. Applicant: Charles S. Wilson Memorial Hospital, 33-57 Harrison Street, Johnson City, N.Y. 13790. Article: LKB 2128-010/Ultrotome IV Ultramicrotome and Accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used to section animal and human tissues and plant materials which have been embedded in plastic resins. These materials will vary in density and fragility. Biopsy materials will be studied, including kidney, skin, neoplastic tumors and hematologic specimens with the resulting observations and diagnosis used in clinical research. Also, investigational studies are planned involving ultrastructural immunohistochemistry of animal tissues, primarily kidney. An attempt will be made to identify some of the constituents in "immune complex" deposits in damaged vessels and renal glomeruli. In addition, the article will be used in informal training of

residents in pathology; i.e., to familiarize the physicians in the preparation of specimens, use of the microscope and interpretation of findings. Application received by Commissioner of Customs: June 2, 1978. Advice submitted by the Department of Health, Education, and Welfare on: August 24, 1978.

Docket No. 78-00271. Applicant: Louisiana State University and Agriculture and Mechanical College, Baton Rouge, La. 70803. Article: LKB 2128-010/Ultrotome IV Ultramicrotome and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used to section biological materials (including animal, bacteria, virus, parasite, and fungal specimens) for ultrastructural study to reveal the pathogenics and pathology involved in animal cells during infectious or metabolic disorders. Investigation of the ultrastructure of infectious agents for identification of viral agents and for determining virulence or replication properties will be conducted. In addition, the article will be used in graduate courses entitled, "Ultrastructure" and "Cytochemistry" to train graduate students in the use and application of electron miscroscopy and train various faculty researchers to use the electron microscope in solving individual research problems. Application received by Commissioner of Customs: June 12, 1978. Advice submitted by the Department of Health, Education, and Welfare on: August 24, 1978.

Comments: No comments have been received with respect to any of the foregoing applications.

Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign articles for such purposes as these articles are intended to be used, is being manufactured in the United States.

Reasons: Each of the foreign articles provides a range of cutting speeds 0.1 to 50 millimeters per second. The most closely comparable domestic instrument is the Model MT-2B ultramicrotome which is manufactured by Ivan Sorvall, Inc. (Sorvall). The Model MT-2B has a range of cutting speeds from 0.09 to 3.2 millimeters per second. The conditions for obtaining high-quality sections are that are uniform in thickness, depend to a large extent on the hardness, consistency, toughness, and other properties of the specimen materials, the properties of the embedding materials, and geometry of the block. In connection with a prior application (Docket No. 69-00665-33-46500), which relates to the duty-free entry of an article that is identical to those to which the foregoing applications relate, the Department of Health, Education, and Welfare (HEW) advised that "Smooth cuts are obtained when the speed of cutting (among such [other] factors as knife edge condition and angle), is adjusted to the characteristics of the material being sectioned. The range of cutting speeds and a capability for the higher cutting speeds is, therefore, a pertinent characteristic of the ultramicrotome to be used for sectioning materials that experience has shown difficult to section." In connection with another prior application (Docket No. 70-00077-33-46500) which also relates to an article that is identical to those described above, HEW advised that "ultrathin sectioning of a variety of tissues having a wide range in density, hardness, etc." requires a maximum range in cutting speed and, further, that the "production of ultrathin serial sections of specimens that have a great variation in physical properties is very difficult." Accordingly, HEW advises in its respectively cited memoranda, that cutting speeds in excess of 4 millimeters per second are pertinent to the satisfactory sectioning of the specimen materials and the relevant embedding materials that will be used by the applicants in their respective experiments.

For these reasons, we find that the Sorvall Model MT-2B ultramicrotome is not of equivalent scientific value to the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to any of the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used, which is being manufactured in the United States.

FREDERICK CANCER RESEARCH CENTER

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m. in Room 6886C, Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00228. Applicant: Frederick Cancer Research Center, P.O. Box B, Frederick, Md. 21701. Article: MM/ZABIB Ultra-High Resolution Electron Impact Ionization Mass Spectrometer with Reversed Geometry and Accessories. Manufacturer: VG Micromass, United Kingdom. Intended use of article: The article is intended to be used for precise mass spectrometric analysis of a wide range of substances obtained or produced by the very varied interdisciplinary carcinogenesis research programs. These will include: (1) High molecular weight potential antitumor compounds related to various antibiotics; (2) products formed by the interaction of carcinogenic polycyclic aromatic hydrocarbons (and/or metabolic derivatives) with components of DNA and RNA; (3) metabolites of bile acids, sterols, and aromatic amines which may affect tumor development; (4) metabolites and hydroxy derivatives of the carcinogen 7,12-dimethylbenz(*a*)anthracene; (5) polar antitumor drugs and metabolites; (5a) hormones and small peptides which may serve as tumor markers; (6) synthetic compounds (polycyclic aromatics, steroids, nitrosamines, etc.) prepared for use as research tools; (7) metabolites of nitrosamines; (8) alkylated purines and pyrimidines resulting from reactions with carcinogenic nitrosamines, triazenes, tetrazenes, etc.; (9) components of complex mixtures resulting from chemical studies on nitrosamine precursors.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: the foreign article provides a reversed geometry with the capability of high resolution (70,000 at 10 percent valley), in the electron impact mode of operation. The Department of Health, Education, and Welfare advises in its memorandum dated August 10, 1978 that (1) the capability of the foreign article described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

NATIONAL CANCER INSTITUTE—NATIONAL INSTITUTES OF HEALTH

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00243. Applicant: National Cancer Institute—National Institutes of Health, 9000 Rockville Pike, Bethesda, Md. 20014. Article: LKB 2128-010/Ultrotome IV Ultramicrotome and Accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for the study of animal and human specimens in the following investigations: (1) Ultrastructural studies on viruses normal and pathologic human and animal tissues, (2) cyto and histochemical studies on virus and subcellular organelle localization in cells and tissues, (3) membrane interactions at host-virus interfaces, and (4) subcellular changes in cells induced by infection with viruses. The objective of these studies is to further basic knowledge on virus, cell and tissue ultrastructure and to reveal, at the ultrastructural level, the localization and distribution of cancer viruses in cells and tissues under normal, experimental and pathological conditions.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article has a cutting speed range of 0.1 to 50 millimeters/second (mm/sec). The most closely comparable domestic instrument is the Model MT-2B ultramicrotome manufactured by Ivan Sorvall, Inc. (Sorvall). The Sorvall Model MT-2B ultramicrotome has a cutting speed range of 0.09 to 3.2 mm/sec. We are advised by the National Bureau of Standards (NBS) in its memorandum dated August 25, 1978 that (1) cutting speeds in the excess of 4 mm/sec. are pertinent to the applicant's research studies and (2) the domestic instrument does not provide the pertinent feature. We, therefore, find that the Model MT-2B ultramicrotome is not of equivalent scientific value to the foreign article for such purposes as this article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

NATIONAL RADIO ASTRONOMY OBSERVATORY, TUCSON, ARIZ.

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00178. Applicant: National Radio Astronomy Observatory Associated Universities Inc., 2010 North Forbes Boulevard, Suite 100, Tucson, Ariz. 85705. Article: Klystron, Model VRB2113A30. Manufacturer: Varian Associates of Canada Ltd., Canada. Intended use of article: The article is indended to be used as a phase-locked local oscillator in a millimeter wave radio astronomy receiver which is used in conjunction with a microwave antenna to measure the intensity, polarization, frequency and direction of cosmic radiation.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides a 105 to 111 gigahertz frequency range. The National Bureau of Standards (NBS) advises in its memorandum dated August 23, 1978 that (1) the capability of the article described above is pertinent to the applicant's research purposes and (2) it knows of no domestic instrument of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

UNIVERSITY OF CALIFORNIA

Consolidated Decision on Applications for Duty-Free Entry of Ultramicrotomes

The following is a consolidated decision on applications for duty-free entry of ultramicrotomes pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301). (See especially section 301.11(e).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review between 8:30 a.m. and 5 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00250. Applicant: University of California, Purchasing Department, 1156 High Street, Santa Cruz, Calif. 95064. Article: LKB 8800A Ultrotome III Ultramicrotome and Accessories. Intended use of article: The article is intended to be used for ultrathin sectioning of tissues in the following varied research:

(1) Biochemical isolation of the organelles of the glyoxylate cycle in seeding tissues.

(2) Investigation of the effect of different fixation techniques on bacterial mesosome morphology.

(3) A study of the cellular basis for the hormone—dependent transport process.

(4) A study of the development of lower plants.

(5) A study of the structure, function and maintenance of visual photoreceptor membranes.

(6) A comparative ultrastructural study of the juvenile and adult cuticle, as well as wild type and mutant strains.

(7) Ultrastructural studies of pit connections; algal host a parasites, the method of spore attachment to various substrates.

(8) A study of the developmental genetics of *Drosophila.*

The article will also be used for educational purposes in the courses: Biology 246L, Biology 299 and Chemistry 299. Application received by Commissioner of Customs: May 30, 1978. Advice submitted by the Department of Health, Education, and Welfare on: August 24, 1978.

Docket No. 78-00265. Applicant: The University of Texas Health Science Center at San Antonio, 7703 Floyd Curl Drive, San Antonio, Tex. 78284. Article: LKB 8800A Ultrotome III Ultramicrotome and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for investigations of a varjety of tissue types; e.g., the functionally normal piloid clonal cells of the anterior pituitary of the rat in culture; clonal tumor cells of the anterior pituitary of the rat; clonal cell transplanted into the hypothalamus or under the kidney capsule of the host animal. In addition, monolayer cells or implanted clonal cells fixed in glutaraldehyde or osmium will be studied. Ultrathin sections will be used to study the effects of various kinds of drugs or hormones on clonal cells in vitro. Experimentally induced tumor will also be investigated using ultrastructural cytochemical techniques. Application received by Commissioner of Customs: June 8, 1978. Advice submitted by the Department of Health, Education, and Welfare on: August 24, 1978.

Docket No. 78-00273. Applicant: University of Maryland School of Medicine, 655 West Baltimore Street, Baltimore, Md. 21201. Article: LKB 8800A Ultrotome III Ultramicrotome and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used to prepare specimens of neural tissues in several nonmammalian and mammalian vertebrate species for examination at the ultrastructural level. These ultrastructural studies will entail analyses of CNS tissue following experimental neuronal injury in amphibians and mammals using conventional thin section and specialized cytochemical and autoradiographic techniques. Emphasis will be focused upon pathological changes in the spinal cord following transection in mammals and a comparative examination of cellular dynamics during successful regeneration following cord interruption in lower vertebrates. The article will also be used in the training of graduate students involved in the above research. Application received by Commissioner of Customs: June 13, 1978. Advice submitted by the Department of Health, Education, and Welfare on: August 24, 1978.

Comments: No comments have been received with respect to any of the foregoing applications.

Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign articles for such purposes as these articles are intended to be used, is being manufactured in the United States.

Reasons: Each of the foreign articles provides a range of cutting speeds 0.1 to 20 millimeters per second. The most closely comparable domestic instrument is the Model MT-2B ultramicrotome which is manufactured by Ivan Sorvall, Inc. (Sorvall). The Model MT-2B has a range of cutting speeds from 0.09 to 3.2 millimeters per second. The conditions for obtaining high-quality sections that are uniform in thickness, depend to a large extent on the hardness, consistency, toughness and other properties of the specimen materials, the properties of the embedding materials, and geometry of the block. In connection with a prior application (Docket No. 69-00665-33-46500), which relates to the duty-free entry of an article that is identical to those to which the foregoing applications relate, the Department of Health, Education, and Welfare (HEW) advised that "Smooth cuts are obtained when the speed of cutting, (among such [other] factors as knife edge condition and angle), is adjusted to the characteristics of the material being sectioned. The range of cutting speeds and a capability for the higher cutting speeds is, therefore, a pertinent characteristic of the ultramicrotome to be used for sectioning materials that experience has shown difficult to section." In connection with another prior application (Docket No. 70-00077-33-46500) which also relates to an article that is identical to those described above, HEW advised that "ultrathin sectioning of a variety of tissues having a wide range in density, hardness, etc." requires a maximum range in cutting speed and, further, that the "production of ultrathin serial sections of specimens that have a great variation in physical properties is very difficult." Accordingly, HEW advises in its respectively cited memoranda, that cutting speeds in excess of 4 millimeters per second are pertinent to the satisfactory sectioning of the specimen materials and the relevant embedding materials that will be used by the applicants in their respective experiments.

For these reasons, we find that the Sorvall Model MT-2B ultramicrotome is not of equivalent scientific value to the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to any of the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

UNIVERSITY OF CALIFORNIA, SAN FRANCISCO

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00219. Applicant: University of California, San Francisco, Departmcnt of Biochemistry and Biophysics, Third and Parnassus, San Francisco, Calif. 94143. Article: Axiomat Light Microscope and Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of Article: The article is intended to be used for the following varied research projects:

(1) The study of the three-dimensional foldering pattern of polytene chromosomes in intact salivary glands,

(2) Structural study of polytene bands and interbands,

(3) Structural studies of the diploid interphase chromosomes,

(4) Genetic characterization of a homeotic locus of *Drosophila melanogaster,* engrailed (2-260),

(5) Cytological assay to permit the isolation and characterization of the enzymes and regulatory elements involved in the regulation of gene expression,

(6) Elegant tissue grafting experiments in insects, and

SEP 27 1978 UMI

V 43/188 SE 27 78

(7) Identification of the molecules and sequence of the molecules and sequence of events required for synapse formation between neurons and target cells.

The article will also be used in a course in optical microscopy to teach graduate students and post doctoral fellows the theoretical and practice aspects of this area of research especially as it applies to the technique that can be used with this microscope.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides structural stability sufficient to take a 4 minute picture with no focus or vibration change. The Department of Health, Education, and Welfare advises in its memorandum dated August 10, 1978 that (1) the capability of the foreign article described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

UNIVERSITY OF CHICAGO

Decision on Application For Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00232. Applicant: The University of Chicago, 5801 S. Ellis Ave., Chicago, Ill. 60637. Article: 12kW Ru-200H High. Brilliance Rotating Anode X-Ray Generator with Accessories. Manufacturer: Rigaku, Japan. Intended Use of Article: The article is intended to be used in studies of the X-ray properties of molecular-sieve zeolits and amorphous semiconductors in an attempt to understand the chemical forces between the atom.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article provides a focused spot of minimal size (0.1 mm x 1 mm) and a rotating target for maximum X-ray beam intensity. The National Bureau of Standards (NBS) advised in its memorandum dated August 11, 1978 that the capabilities described above are pertinent to the purposes for which the article is intended to be used. NBS also advised that it knows of no domestic instrument of equivalent scientific value to the foreign article for such purposes as the article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

UNIVERSITY OF NORTH CAROLINA AT WILMINGTON

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m. in room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00215. Applicant: University of North Carolina at Wilmington, P.O. Box 3725, Azalea Station, Wilmington, N.C. 28406. Article: CD-4 Parkinson-Cowan Dry Gasometer and Accessories. Manufacturer: Barchard Engineering Ltd., Canada. Intended use of Article: The article is intended to be used for educational purposes in the course PED 316 Exercise Physiology which is concerned with human physiological response to exercise and training. The article will also be used for PED 416, Advanced Exercise Physiology as well as in various research projects involving measurement of exercise metabolism.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, could have been made available to the applicant without excessive delay within the meaning of subsection 301.11(c) of the regulations at the time the foreign article was ordered (February 4, 1977).

Reasons: Excessive delivery time is described in subsection 301.11(c) of the regulations as follows:

Excessive delivery time. Duty-free entry of the article shall be considered justified without regard to whether there is being manufactured in the United States an instrument, apparatus, or accessory of equivalent scientific value for the purposes described. In response to question 7 of the application form, if the delay in obtaining such domestic instrument, apparatus, or accessory (as indicated by the difference between the delivery time quoted by domestic manufacturer and foreign manufacturer) will seriously impair the accomplishment of the purposes. In determining whether the difference in delivery times is excessive, the Deputy Assistant Secretary shall take into account the relevancy of the applicant's program to other research programs with respect to timing, the applicant's need to have such instrument, apparatus, or accessory available at the scheduled time for the course in which the article is intended to be used, and other relevant circumstances.

The applicant needed the article as a replacement for an indentical device which broke down in the middle of a semester. Only the manufacturer of the foreign article agreed to provide the replacement in time to benefit the applicant's students.

Accordingly, we find that the difference between the delivery time of the foreign article and the comparable domestic instrument to be excessive within the meaning of subsection 301.11(c) as it would seriously impair the accomplishment of the applicant's purpose at the time the foreign article was ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

VA. INSTITUTE OF MARINE SCIENCE

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00251. Applicant: Virginia Institute of Marine Science, Route 17, Gloucester Point, Va. 23062. Article: Turbidity Monitor Marine Sensor. Manufacturer: Spectrum Electric Ltd., Canada. Intended Use of Article: The article is intended to be used for measuring the suspended sediment of thick fluid mud on the floor of estuaries and rivers which is discharged from dredge pipes. An experiment will be conducted to determine the extent, thickness and rate of movement of the fluid mud which is detrimental to ecology.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The application relates to a compatible accessory for an instrument that had been previously imported for the use of the applicant institution. The article can measure a concentration of 1,000 parts per million. The article is being furnished by the manufacturer which produced the instrument with which the article is intended to be used and is pertinent to the applicant's purposes.

The Department of Commerce knows of no similar accessory being manufactured in the United States, which is interchangeable with or can be readily adapted to the instrument with which the foreign article is intended to be used and can measure 1,000 parts per million.

VETERANS ADMINISTRATION HOSPITAL

Consolidated Decision on Applications Duty Free Entry of Electron Microscopes

The following is a consolidated decision on applications for duty-free entry of electron microscopes pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301). (See especially section 301.11(e).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review between 8:30 a.m. and 5 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00323. Applicant: Veterans Administration Hospital, Department of Pathology, 130 West Kingsbridge Road, Bronx, N.Y. 10468. Article: Electron Microscope, Model EM 400 HMG, Scanning Attachment, and other Accessories. Manufacturer: Philips Electronics Instruments NVD, The Netherlands. Intended Use of Article: The article is intended to be used for the examination and investigation of biological materials related primarily to effects of disease or experimental conditions on living system. Experiments to be conducted will include:

(a) Studies of viral infestation as possible etiological explanations for various diseases;

(b) Examination of the intercalated disks which join myocardial cells to each other.

In addition, the article will be used to train pathologists and technical staff in the area of Scanning and Transmission Electron Microscopy. Article Ordered: January 21, 1978.

Docket No. 78-00328. Applicant: Michigan Technological University, Houghton, Mich. 49931. Article: Electron Microscope, Model JEM 100CX/SEG and accessories. Manufacturer: JEOL Ltd., Japan. Intended Use of Article: The article is intended to be used for studies of metallic and non-metallic solids in which the following phenomena will be studied:

(a) Microstructure and local chemistry, e.g., distribution and identification of phases;

(b) Defect arrangements, e.g., dislocation structures;

(c) Phase transformations, e.g., structure of partially coherent interfaces;

(d) Crystal structure;

(e) Physical and chemical identification of particulate matter. The experiments to be conducted will include:

(a) Routine bright field-centered dark field microscopy for identification of defects and particulate matter.

(b) G.b analysis of interfacial structures.

(c) Analysis of dislocations and cracks formed under microhardness identations in ceramic materials.

(d) Micro-micro diffraction for identification of small particles, fine second phases, particular matter, and defect configuration.

(e) X-Ray and electron energy loss microanalysis of phases and particulate matter.

The article will also be used in the course: MY 442—Electron microscopy (theory of operation and image formation for transmission and scanning electron microscopy with applications to the solution of scientific and engineering problems) and MY 569--Electron microscopy in materials science (theory of electron-solid interactions and the resulting application to electron diffraction and image contrast theories). ARTICLE ORDERED: February 27, 1978.

Docket No. 78-00329. Applicant: National Cancer Institute, Baltimore Cancer Research Center, 3100 Wyman Park Drive, Baltimore, Md. 21211. Article: Electron microscope, Model JEM-100CX and accessories. Manufacturer: JEOL Ltd., Japan. Intended Use of Article: The article is intended to be used in a research capacity to continue studies of subcellular aspects of differentiation, neoplastic transformation of hematopoietic cells and the response of malignant and normal cells to chemotherapuetic agents. Etiologic factors of human hematopoietic dyscrasias and animal model systems of such diseases are also under investigation. Of particular importance is the search for and identification of virus like structures in human material. The article will also be used to study structural alterations in cellular components such as nucleic acid malformations (i.e., Chromosomal malformations), subcellular particle alterations (mitochondrial and microsomal) and changes in tissue organization by pharmacologic agents or appearing in the natural course of a disease. Article Ordered: April 8, 1975.

Docket No. 78-00333. Applicant: St. Mary's Hospital, 200 Jefferson Avenue SE., Grand Rapids, Mich. 49503. Arti-

V 4 3 / 1 8 8 S E 2 7 7 8 UMI

cle: Electron microscope, model H-300 and accessories. Manufacturer: Hitachi, Japan. Intended use of article: The article is intended to be used in the pathology department for the following purposes: (1) To identify the presence or absence of virus in tissues and body fluids; (2) To aid in the diagnosis of specific diseases which cannot be categorized by light microscopy, e.g., kidney, muscle, nerve, G.I. tract, liver, and other degenerative diseases; (3) For more definitive classification of neoplasms as a guide to therapy; (4) For future research projects to be established after the microscope is acquired. The article will also be used by medical students and residents as an integral part of their educational experience in the pathology department. Article ordered: June 15, 1978.

Docket No. 78-00334. Applicant: Langston University, P.O. Box 550, Langston, Okla. 73050. Article: Electron microscope, model H-300 and accessories. Manufacturer: Hitachi Ltd., Japan. Intended use of article: The article is intended to be used for research involving the study on biological specimens such as biopsy and autopsy tissues, plant materials, algae, fungi, micro-organisms, and other biochemical and physical phenomena studies. Topography and morphology of micro-organisms and plant tissues will also be studied. Accumulation and degradation of toxic compounds (herbicides, insecticides, etc.), by micro-organisms and higher plants will also be included in our studies. Article ordered: April 11, 1978.

Docket No. 78-00335. Applicant: University of Chicago, Operator of Argonne National Laboratory, 9700 South Cass Avenue, Argonne, Ill. 70439. Article: Electron microscope, model EM-400 with high magnification goniometer and accessories. Manufacturer: Philips Electronics Instruments NVD, The Netherlands. Intended use of article: The article is intended to be used for the identification of metals and alloys, particularly nickel, aluminum, titanium, copper, their alloys, and other metals as well. The phenomena to be investigated will include primarily radiation damage, void microstructures, dislocation loops, cascades, etc. Other general usage will include microstructural analysis of new alloys and deformation mechanisms in materials. Experiments will be conducted to obtain a basic understanding of damage mechanisms in irradiated solids, thus contributing to reduction of associated problems in reactor materials. Article ordered: May 18, 1978.

Docket No. 78-00342. Applicant: Indiana University, Purchasing Department, 1101 East 17th Street, Bloomington, Ind. 47401. Article: Electron Microscope, model H-300 and accessories. Manufacturer: Hitachi Perkin-Elmer, Japan. Intended use of article: The article is intended to be used to investigate the morphology of various biological cells and tissues, i.e., rat myocardium, gerbil uterus, rattlesnake brain, mouse pituitary, chicken pancreas, et cetera. The article will be used in graduate level courses and in research for graduate students in anatomy, physiology, pathology, and pharmacology. It will also be used to prepare teaching materials for medical student courses in histology, neuroanatomy, and pathology. Article ordered: June 20, 1978.

Docket No. 78-00348. Applicant: Harvard Medical School, Department of Anatomy, 25 Shatuck Street, Boston, Mass. 02115. Article: Electron Microscope, model JEM-100CX and accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used to update an electron microscope facility for research involving localization of specific proteins in cells and tissues by scanning and transmission electron) microscopy. Specific projects to be conducted will include the following: (1) The relation of collagen and glycosaminoglycans to cells and the distribution of matrix components in developing tissues which are of importance in morphogenetic interactions between embryonic tissues; (2) Immunolabeling of the glycocalyx on Rickettsiae and host cells; (3) Localization of macromolecular secretagogues on intestinal epithelial cells; (4) Mobility and topography of cell surface glycoproteins; (5) Antigens on the surface of developing spermatogenic cells; (6) Structural analysis of the sperm flagellar axoneme and its microtubule components. The article will also be used in training postdoctoral research fellows in advanced electron microscopy. Article ordered: May 11, 1978.

Docket No. 78-00349. Applicant: Harvard University (New England Regional Primate Research Center), One Pine Hill Drive, Southboro, Mass. 01772. Article: Electron microscope, model JEM-100S and accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used for studies of biological materials, including normal and abnormal tissues from nonhuman primates as well as a multitude of infectious agents, especially viruses, isolated from nonhuman primates. Experiments will be conducted to use the nonhuman primate as a model to study specific disease problems of man with the hope of gaining a better understanding of those problems so as to benefit man. These experiments will include: 1. Fine structural analysis of new viral isolates as a crucial step in their identification and characterization; 2. Ultrastructural studies of the experimentally induced neoplastic and/or transformed cells produced by the two primate oncogenic herpeaviruses; 3. Determination of the morphological effects of new antiviral drugs on viral replication and on infected cell cultures treated in vitro; 4. Characterization of the ultrastructural lesions induced in nonhuman primates fed specific experimental diets; 5. Characterization of the ultrastructural features of certain age-related brain changes in nonhuman primates and compare them to analogous lesions found in aged human brains. In addition, the article will be used in the conduct of postdoctoral training program in comparative pathology. Article ordered: March 1, 1978.

Docket No. 78-00353. Applicant: Southern Illinois University, Center for Electron Microscopy, Carbondale, Ill. 62901. Article: Electron microscope, model H-500, goniometer stage with accessories. Manufacturer: Hitachi, Japan. Intended use of article: The article is intended to be used for the following research purposes: 1. Examination of thin sections of the fungus *Diplodia maydis* in corn tissue to determine the penetration mechanism; 2. Thin section examination of the mussel, *Mytilus edulis* treated with various agents affecting photoactivity to study the phenomenon of photoreception; 3. Diffraction studies of osmium complexes to determine structure; 4. High resolution studies of negatively stained DNA to determine size and shape; 5. Autoradiographic studies to localize various protein moieties in the yeast, Saccharomyces; 6. Identification of various virus preparations by negative staining to determine size and purity; 7. Cellulase localization in thin sections in various fungal pathogens; 8. Lattice structures of various crystals; 9. Morphology of fossils by replica technique; 10. Examination of thin sections of Bacillus bacterial spores to study the germination process and various agents affecting it; 11. Thin section study of the effect of osmium complexes on mammalian tissue and interferences of its use in arthritis; 12. Thin section study of amyloid content of fungal spore of Zelleromyces; 13. Bacterial typing of various species by flagellar location (shadowed preps); 14. Localization of PAS positive substances in fungal plan pathogens. In addition, the article will be used for educational purposes in the course Transmission Electron Microscopy for Research in which students are taught how to effectively use the article as a research tool and various preparation techniques depending on need. Article ordered: June 22, 1978.

Docket No. 78-00354. Applicant: University of Alabama in Birmingham, Department of Pathology, University Station, Birmingham, Ala. 35294. Arti-

cle: Electron microscope, model EM 400 with high magnification goniometer stage and accessories. Manufacturer: Philips Electronics Instruments NVD, The Netherlands. Intended use of article: The article is intended to be used to examine biologic tissues which will include normal tissues from animals as well as individual organisms such as bacteria, parasites, viruses or fungi. On rare occasions, tissues of nonbiological origin may also be studied. Studies will be conducted in order to define structural alterations of tissues and to correlate these with biochemical and fungal changes in the tissue. Specific examples of the research projects include: (a) Identification of membrane integrity of cardiac muscle cells following ischemic cell damage in experimental animals; (b) Specific cell localization of amino acid precursors of protein synthesis in hearts made to hypertrophy by various different techniques; (c) demonstration of altered membrane permeability of heart muscle cells using such tracers as horse radish peroxidase and ferritin; (d) localization of specific cell surface antigens using immunologically labeled antibodies on the surface of the cell with ferritin tracers; (e) characterization of the lipid bilayer membrane of liposomes specifically constructed to carry various agents within the liposome cavity; (f) identification of immune complex structures within the basement membranes of the kidney glomerulus in animals with compliment deficient induced glomerulopathy. The article will also be used to train graduate students in the use of electron microscopy and to obtain and to interpret results obtained using this technique. Article ordered: February 7, 1978.

Comments: No comments have been received with respect to any of the foregoing applications.

Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign articles for such purposes as these articles are intended to be used, was being manufactured in the United States at the time the articles were ordered.

Reasons: Each foreign article to which the foregoing applications relate is a conventional transmission electron microscope (CTEM). The description of the intended research and/or educational use of each article establishes the fact that a comparable CTEM is pertinent to the purposes for which each is intended to be used. We know of no CTEM which was being manufactured in the United States either at the time of order of each article described above or at the time of receipt of application by the U.S. Customs Service.

The Department of Commerce knows of no other instrument or apparatus of eqivalent scientific value to any of the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used, which was being manufactured in the United States either at the time of order or at the time of receipt of application by the U.S. Customs Service.

Maritime Administration

[Docket No. S-621]

GREAT LAKES-ATLANTIC STEAMSHIP CO.

Notice of Application

Notice is hereby given that Great Lakes-Atlantic Steamship Co., a Michigan corporation, has filed an application dated September 1, 1978, with the Maritime Subsidy Board pursuant to Title VI (46 U.S.C. 1171-1183) of the Merchant Marine Act, 1936, as amended, for a 20-year operating-differential subsidy contract for operation of services on Trade Area No. 1 (Great Lakes-Western Europe).

If this application is approved, Great Lakes-Atlantic would operate a fleet of five C4-type vessels, either fully or partially containerized, between U.S. ports on the Great Lakes and St. Lawrence River, intermediate Canadian Great Lakes ports, and other ports along the general track and ports in the United Kingdom and Continental Europe.

Great Lakes-Atlantic intends to operate its proposed service during the open navigation season through the St. Lawrence Seaway. During the period when the St. Lawrence Seaway is closed, between December 15 and April 15, approximately, the applicant would provide a substituted service via the port of Albany, N.Y., with through, intermodal bills of lading issued to and from Great Lakes ports in conjunction with connecting rail carriers.

Great Lakes-Atlantic has proposed to serve (1) the Great Lakes ports of Chicago, Detroit and Montreal, and other Great Lakes ports on an inducement basis, and (2) the port of Grangemouth in the United Kingdom and the ports of Rotterdam and Bremerhaven on the continent with calls on inducement at other U.K. and continental ports. Great Lakes-Atlantic has proposed a weekly service but has not established maximum sailings.

Interested parties may inspect the application in the office of the Secretary, Maritime Subsidy Board, Room 3099-B, Department of Commerce Building, 14th and E Streets NW., Washington, D.C. 20230.

Any person, firm, or corporation having an interest in such application who desires to offer views and comments thereon for consideration by the Maritime Subsidy Board should submit them in writing, in triplicate, to the Secretary, Maritime Subsidy Board, Washington, D.C. 20230, by the close of business on October 10, 1978.

The Maritime Subsidy Board will consider these views and comments and take such action with respect thereto as may be deemed appropriate.

(Catalog of Federal Domestic Assistance Program No. 11.504, Operating-Differential Subsidies (ODS).)

By order of the Martime Subsidy Board.

Dated: September 21, 1978.

ROBERT J. PATTON, Jr.,
Assistant Secretary.

[3510-15]

MOBILIZATION SHIP DEVELOPMENT

Conference

Notice is hereby given that the Maritime Administration is sponsoring a conference to publicize its efforts in developing a mobilization ship design and to facilitate and encourage the exchange of ideas by all persons and groups interested in the further design development and construction of the mobilization ship.

The major objectives of the Maritime Administration in sponsoring the conference are:

- To inform prospective shipowners, shipbuilders, and other interested parties about the versatile, efficient and commercially attractive mobilization ship design developed by the Maritime Administration.
- To inform the marine community of national defense needs in ship design, construction, operation, and maintainability.
- To learn what incentives are needed for prospective shipowners to build mobilization type ships.
- To encourage the marine industry to participate in the further design development, construction and operation of such ships that are suitable for both commercial and wartime mobilization purposes.

The Conference will be held on November 6, 1978, at the Crystal City Marriot Hotel, Arlington, Va., between 9 a.m. and 5 p.m. The registration fee is $40, if received not later than October 21, 1978. After that date the fee will be $55.

All interested persons are invited to attend.

Any person wishing to register for the conference or to obtain further information may contact: Ms. Linda M. Williams, Office of Ship Construction, Maritime Administration, Room 4059, U.S. Department of Commerce, Washington, D.C. 20230, 202-377-4538.

Dated: September 22, 1978.

By Order of the Assistant Secretary for Maritime Affairs, Maritime Administration.

ROBERT J. PATTON, Jr.
Assistant Secretary.

GOVERNMENT-OWNED INVENTIONS

Availability for Licensing

The inventions listed below are owned by the U.S. Government and are available for domestic and possibly foreign licensing in accordance with the licensing policies of the agency-sponsors.

Copies of the patents cited are available from the Commissioner of Patents and Trademarks, Washington, D.C. 20231, for $0.50 each. Requests for copies of patents must include the patent number.

Requests for licensing information on a particular invention should be directed to the address cited for the agency-sponsor.

DOUGLAS J. CAMPION,
Patent Program Coordinator, National Technical Information Service.

U.S. DEPARTMENT OF AGRICULTURE, Research Agreements and Patent Branch, General Service Division, Federal Building, Agricultural Research Service, Hyattsville, Md. 20782.

Patent 3,932,390: 2-This-1, 3, 5-Triaza-7-Phosphaadamantane 2,2-Dioxide; filed April 29, 1975; patented January 13,1976.

Patent 3,939,883: Machine to Fill Insect Rearing Cells with Diet; filed October 1, 1974; patented February 24, 1976.

Patent 3,953,165: Flameproofing Resins for Organic Textiles from Adduct Polymers; filed August 22, 1974; patented April 27, 1976.

Patent 3,954,400: Phosphorus, Nitrogen, Bromine Containing Polymers and Process for Producing Flame Retardant Textiles; filed August 22, 1974; patented May 4, 1976.

Patent 3,960,477: Crossdyed Cotton Fabrics; filed January 11, 1974; patented June 1, 1976.

Patent 3,963,434: Carboxymethylated Cotton Fabric with Improved Conditioned and Wet Wrinkle Recovery by Reaction with Propylene or Ethylene Carbonate; filed July 23, 1975; patented June 15, 1976.

Patent 3,972,924: 1-(1H, 1H-Perfluorooctyl)-1, 3-Trimethylenediphosphonic Tetrachloride; filed November 10, 1975; patented August 3, 1976.

Patent 3,975,154: Process for Producing and Utilizing Durable Press Fabrics with Strong Acid Grafts; filed June 9, 1975; patented August 17, 1976.

Patent 3,976,604: Preparation of Ethyleneimine Prepolymer; filed January 30, 1975; patented August 24, 1976.

U.S. DEPARTMENT OF ENERGY, Assistant General Counsel for Patents, Washington, D.C. 20545.

Patent 3,913,599: Coil Spring Venting Arrangement; filed September 30, 1974; patented October 21, 1975.

Patent 3,920,343: Key-and-Keyway Coupling for Transmitting Torque; filed November 13, 1974; patented November 18, 1975.

U.S. DEPARTMENT OF THE NAVY, Assistant Chief for Patents, Office of Naval Research, Code 302, Arlington, Va. 22217.

Patent 3,922,572: Electroacoustical Transducer; filed August 12, 1974; patented November 25, 1975.

Patent 3,934,288: Object Release Device; filed November 18, 1974; patented January 27, 1976.

Patent 3,934,482: Cable Traction Sheave; filed January 27, 1975; patented January 27, 1976.

Patent 3,939,467: Transducer; filed April 8, 1974; patented February 17, 1976.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

REPUBLIC OF CHINA

Further Increasing Import Restraint Levels for Certain Man-Made Fiber Textile Products

SEPTEMBER 21, 1978.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Increasing the levels of restraint applicable to certain man-made fiber textile products in Categories 638 (men's and boys' knit shirts) and 645/646 (sweaters), produced or manufactured in the Republic of China and exported to the United States during the agreement year which began on January 1, 1978.

(A detailed description of the categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on January 4, 1978 (43 FR 884), as amended on January 25, 1978 (43 FR 342), March 3, 1978 (43 FR 8828), June 22, 1978 (43 FR 26773), and September 5, 1978 (43 FR 39408)).

SUMMARY: Paragraph 8(a)(iii) of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of June 8, 1978, between the Governments of the United States and the Republic of China, provides that specific levels of restraint may exceed current-year limits by a designated percentage, with the amount of the carryforward being deducted from the applicable category level in the succeeding agreement year. The Government of the Republic of China has requested the application of carryforward to the current-year levels for Categories 638 and 645/646.

EFFECTIVE DATE: September 21, 1978.

FOR FURTHER INFORMATION CONTACT:

Donald R. Foote, International Trade Specialist, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230, 202-377-5423.

SUPPLEMENTARY INFORMATION: On June 16, 1978, a letter dated June 15, 1978, from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs was published in the FEDERAL REGISTER (43 FR 26102), which established the levels of restraint applicable to certain specific categories of cotton, wool, and man-made fiber textile products, produced or manufactured in the Republic of China, and exported to the United States during the twelve-month period beginning on January 1, 1978, and extending through December 31, 1978. In the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to increase the levels of restraint established for categories 638 and 645/646 to the designated amounts.

EDWARD GOTTFRIED,
Acting Chairman, Committee for the Implementation of Textile Agreements.

SEPTEMBER 21, 1978.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury, Washington, D.C. 20229.

DEAR MR. COMMISSIONER: On June 15, 1978, the Chairman, Committee for the Implementation of Textile Agreements, directed you to prohibit entry for consumption, or withdrawal from warehouse for consumption, of cotton, wool, and man-made fiber textile products in certain specific categories, produced or manufactured in the Republic of China and exported to the United States during the agreement year which began on January 1, 1978, in excess of designated levels of restraint. The Chairman further advised you that the levels of restraint are subject to adjustment.[1]

Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of June 8, 1978, between the Government of the United States and the Republic of China; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to amend, effective on Septem-

[1]The term "adjustment" refers to those provisions of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of June 8, 1978, between the Governments of the United States and the Republic of China which provide, in part, that: (1) Within the aggregate and group limits, specific ceilings may be exceeded by designated percentages; (2) these same levels may be increased for carryforward up to 7.15 percent of the applicable category limit; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

V 4 3 / 1 8 8

ber 21, 1978, the levels of restraint established in the directive of June 15, 1978 for Categories 638 and 645/646 to the following levels:

Category	Amended 12-month level of restraint[1]
638	1,543,543 dozen
645/646	4,315,544 dozen

[1]The levels of restraint have not been adjusted to reflect any imports after Dec. 31, 1977.

The action taken with respect to the Government of the Republic of China and with respect to imports of man-made fiber textile products from the Republic of China has been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such action, fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

EDWARD GOTTFRIED,
Acting Chairman, Committee for the Implementation of Textile Agreements.

[6355-01]

CONSUMER PRODUCT SAFETY COMMISSION

[Petition No. CP 78-11]

EYEPIECE SOLAR FILTERS

Denial of Petition

AGENCY: Consumer Product Safety Commission.

ACTION: Denial of petition.

SUMMARY: The Commission denies a petition requesting a ban of telescope eyepiece solar filters that are alleged to shatter or crack permitting the unfiltered and concentrated rays of the sun to burn the retina of the eye and cause temporary or permanent damage. The Commission concludes that the data are insufficient to support a conclusion that a mandatory rule is necessary.

FOR FURTHER INFORMATION CONTACT:

Irwin L. Greif, Office of Program Management, Consumer Product Safety Commission, Washington, D.C. 20207, 301-492-6754.

SUPPLEMENTARY INFORMATION: Section 10 of the Consumer Product Safety Act (CPSA) (15 U.S.C. 2059) provides that any interested person may petition the Consumer Product Safety Commission to commence a proceeding to issue a consumer product safety rule. Section 10 also provides that if the Commission denies such a petition, it shall publish its reasons for denial in the FEDERAL REGISTER.

On January 31, 1978, Mr. Norman Sperling, Somerville, Mass., submitted a letter to the Commission requesting the Commission to ban unsafe eyepiece solar filters used in telescopes. The petition alleges that these filters can shatter or develop hairline cracks, permitting the unfiltered and concentrated rays of the sun to burn the retina of the eye causing temporary or permanent damage. Because the Commission lacks jurisdiction over products that are considered medical devices under the Federal Food, Drug and Cosmetic Act administered by the Food and Drug Administration (FDA), Mr. Sperling's letter was sent to the FDA for a determination of whether the filters were considered a medical device. The Commission was advised by FDA on April 3, 1978, that the eyepiece solar filters are not considered by FDA to be a medical device. Mr. Sperling's letter was treated as a petition (CP 78-11) as of April 3, 1978.

SUMMARY OF INJURY DATA

In analyzing this petition, the Commission considered injury information submitted by the petitioner, its own investigation of injury data, and engineering and economic data.

The Commission has reviewed the petitioner's injury data, including a letter from an individual whose eyepiece solar lens apparently broke resulting in a slight headache. In that case, however, it appears that the filter did not match the telescope. The petitioner's information also includes a letter from an individual whose filter cracked, causing "flash-blindness" for two weeks with eyesight returning to normal after that.

The Commission has reviewed data collected through the National Electronic Information Surveillance System, in-depth investigation reports, consumer complaints and death certificates. This data yielded one consumer complaint, which was also provided by the petitioner, from a seller of telescope equipment. The complaint alleged that Japanese-produced solar filters are not designed to vent the heat from the sun which causes the glass to expand and shatter. The complainant, however, was unaware of any injuries associated with these telescopes.

In an effort to obtain more data relating to injuries associated with eyepiece solar filters in telescopes, the Commission contacted the Optical Manufacturers Association, the Optical Society of America, the Bureau of Radiological Health, the National Eye Institute, and the Society for the Prevention of Blindness. None of these organizations was able to furnish any information relating to accidents or injuries involving solar filters used with telescopes. Two physicians whom the petitioner recommended that the Commission contact were unfamiliar with solar filters and could not provide any meaningful information relating to accidents or injuries associated with the product.

The Commission's Engineering and Science Directorate advises that while direct viewing of the sun without adequate eye protection may cause serious eye damage, that does not mean that all or even most instances of eyepiece filter breakage will result in injuries. The type and extent of damage relate to a number of variables, including the angle at which the sun is viewed, the position of the sun at the time, the length of exposure, atmospheric conditions, the type and extent of cracking in the filter, and the like. An additional factor considered by the Commission is the involuntary reflex a viewer will normally experience if a sudden shock of intense light occurs.

CONCLUSION

Based on the data submitted by the petitioner and the investigation of injuries conducted by the Commission, the Commission concluded that the data are insufficient for it to determine that solar eyepiece filters present an unreasonable risk of injury for which a mandatory safety standard is necessary. In reaching this decision, the Commission has considered the relative priority of the risk associated with the product as compared with Commission resources available for rulemaking for all consumer products.

Copies of the petition and the staff's briefing package to the Commission on the petition may be obtained from the Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207.

Dated: September 21, 1978.

SADYE E. DUNN,
Secretary, Consumer Product Safety Commission.

Department of the Air Force

USAF SCIENTIFIC ADVISORY BOARD

Meeting

SEPTEMBER 19, 1978.

The USAF Scientific Advisory Board Logistics Cross-Matrix Panel will hold meetings at the Air Force Acquisition Logistics Division (ALD), Wright-Patterson Air Force Base, Ohio on October 31 and November 1, 1978. The meetings will convene at 8 a.m. and adjourn at 5 p.m. on October 31 and from 8 a.m. to 2:30 p.m. on November 1.

The Panel will receive classified briefings on the mission and functions of the ALD. The meetings will be closed to the public in accordance with section 552b(c) of Title 5, United States Code, specifically subparagraph (1) thereof.

For further information contact the Scientific Advisory Board Secretariat at 202-697-4811.

CAROL M. ROSE,
Air Force Alternate Federal Register Liaison Officer.

Office of the Secretary

CIVILIAN HEALTH AND MEDICAL PROGRAM OF THE UNIFORMED SERVICES

Notice of Termination of Cost-Sharing for Certain Orthodontic Treatment

The purpose of this notice is to set forth the circumstances under which certain claims for orthodontic treatment have continued to be cost-shared under CHAMPUS after the agency determined that such treatment was not authorized under regulations governing the CHAMPUS Program for the Handicapped. This is also notice that such cost-sharing will terminate for orthodontic care received on or after November 1, 1978, and provides the rationale for the agency decision to terminate such continued expenditure of appropriated funds.

In 1967, pursuant to Chapter 55 of Title 10, United States Code, a joint Uniformed Services regulation was published implementing both the Basic Program and the Program for the Handicapped of the "Civilian Health and Medical Program of the Uniformed Services" (CHAMPUS). The regulation, as amended, was codified at 32 CFR 577.60 et seq. It was effective until various portions thereof were affected by implementation of Department of Defense Instruction 6010.8 and 6010.8-R (32 CFR Part 199) effective January 10, 1977.

The CHAMPUS Program for the Handicapped was established by enactment of the Military Medical Benefits Amendment of 1966, Pub. L 89-614 and provides financial assistance for services which are required to meet the special needs of an active duty service member's dependent who is moderately or severely mentally retarded or who has a serious physical handicap. As specifically concerns orthodonic treatment, the joint Uniformed Services regulation implementing the CHAMPUS Program for the Handicapped provided for cost-sharing orthodontia needed to correct, overcome, or aid in adjustment to, a handicapping condition.

In 1972 the Assistant Secretary of Defense for Health and Environment initiated a comprehensive review of the CHAMPUS operation. In the course of this review it was determined that the CHAMPUS benefit determination procedures were inadequate to insure exclusion of persons under the Program for the Handicapped who were not moderately or severely mentally retarded or who did not have a serious handicap. Accordingly, effective September 1, 1974, applications for benefits under the Program for the Handicapped have not been approved under the CHAMPUS Program for the Handicapped solely on the basis of a dental condition for which orthodontic treatment is appropriate. Furthermore, orthodontic treatment to be approved under CHAMPUS must meet the requirement of the adjunctive dental care rule of the CHAMPUS Basic Program and, if approved, cost-sharing under the CHAMPUS Basic Program.

For equitable reasons, an exception was granted for ongoing cases by providing that the CHAMPUS cost-sharing of orthodontic treatment under the Program for the Handicapped would be continued on and after September 1, 1974, for those patient programs which have been approved by the agency prior to that date, or approved on or after that date if the application had been received prior to September 1, 1974.

The agency has reviewed the circumstances created by the exception for the ongoing orthodontic treatment cases and has determined that 4 years is more than reasonable time in which to complete an orthodontic treatment program based solely on a dental condition for which such treatment was appropriate. Accordingly, this is notice that CHAMPUS will not cost-share claims for orthodontic treatment received by CHAMPUS beneficiaries on or after November 1, 1978, whose applications for such treatment under the CHAMPUS Program for the Handcapped were approved prior to September 1, 1974, or whose applications were received prior to that date and approved after September 1, 1974.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Washington Headquarters Services, Department of Defense.

DOD ADVISORY GROUP ON ELECTRON DEVICES

Advisory Committee Meeting

Working Group D (Mainly Laser Devices) of the DOD Advisory Group on Electron Devices (AGED) will meet in closed session at 201 Varick Street, New York, N.Y. 10014, on October 12, 1978.

The purpose of the Advisory Group is to provide the Under Secretary of Defense for Research and Engineering, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. The laser area includes programs on developments and research related to low energy lasers for which applications as battlefield surveillance, target designation, ranging, communications, weapon guidance and data transmission. The review will include details of classified defense programs throughout.

In accordance with section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Advisory Group meeting concerns matters listed in section 552b(c) of Title 5 of the United States Code, specifically, Subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Washington Headquarters Service, Department of Defense.

DOD ADVISORY GROUP ON ELECTRON DEVICES

Advisory Committee Meeting

Working Group A (Mainly Microwave Devices) of the DOD Advisory Group on Electron Devices (AGED) will meet in closed session at 201 Varick Street, New York, N.Y. 10014, on October 17-18, 1978.

The purpose of the Advisory Group is to provide the Under Secretary of Defense for Research and Engineering, the Director, Defense Advanced Research Projects Agency and the

SEP 27 78 LIMI

Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The Working Group A meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. The microwave area includes programs on developments and research related to microwave tubes, solid state microwave, electonic warfare devices, millimeter wave devices, and passive devices. The review will include details of classified defense programs throughout. In accordance with section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this meeting of the Advisory Group on Electron Devices concerns matters listed in section 552b(c) of Title 5 of the United States Code, specifically Subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. G-4614, et al.]

SOUTHLAND ROYALTY CO.

Merger and Application for Amendment of Certificates and for Redesignation of Rate Schedules

SEPTEMBER 18, 1978.

Take notice that on February 8, 1978, Southland Royalty Co. (Southland), 1000 Fort Worth Club Tower, Fort Worth, Tex. 76102, as successor of the merger of Aztec Oil & Gas Co. (Aztec) into Southland, filed an application to amend all certificates currently held by Aztec to show Southland as certificate holder.

Effective December 31, 1977, Aztec's natural gas activities were consolidated with Southland and will be operated under the name of Southland.

Exhibit "A" attached hereto contains a listing of the various dockets in which Aztec was authorized to make sales to the various purchasers indicated thereon and pursuant to independent producer rate schedules heretofore designated as Aztec Rate Schedules numbered as shown thereon.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 10 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before September 26, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

DEPARTMENT OF ENERGY

Office of Hearings and Appeals

ISSUANCE OF PROPOSED DECISIONS AND ORDERS

SEPTEMBER 11-SEPTEMBER 15, 1978.

Notice is hereby given that during the period September 11 through September 15, 1978, the Proposed Decisions and Orders which are summarized below were issued by the Office of Hearings and Appeals of the Department of Energy with regard to Applications for Exception which had been filed with that Office.

Amendments to the DOE's procedural regulations, 10 CFR, Part 205, were issued in proposed form on September 14, 1977 (42 FR 47210 (September 20, 1977)), and are currently being implemented on an interim basis. Under the new procedures any person who will be aggrieved by the issuance of the Proposed Decision and Order in final form may file a written Notice of Objection within 10 days of service. For purposes of the new procedures, the date of service of notice shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. The new procedures also specify that if a Notice of Objection is not received from any aggrieved party within the time period specified in the regulations, the party will be deemed to consent to the issuance of the Proposed Decision and Order in final form. Any aggrieved party that wishes to contest any finding or conclusion contained in a Proposed Decision and Order must also file a detailed Statement of Objections within 30 days of the date of service of the Proposed Decision and Order. In that Statement of Objections an aggrieved party must specify each issue of fact or law contained in the Proposed Decision and Order which it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of these Proposed Decisions and Orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room B-120, 2000 M Street NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1 p.m. and 5 p.m., e.d.t., except Federal holidays.

SEPTEMBER 20, 1978.

MELVIN GOLDSTEIN,
Director,
Office of Hearings and Appeals.

PROPOSED DECISIONS AND ORDERS

BOCK AND BACON OIL CO., HOUSTON, TEX., DXE-1169 CRUDE OIL

Bock and Bacon Oil Company (Bock) filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would result in the extension of exception relief previously granted and would permit Bock to sell certain volumes of crude oil which it produces from the Champion Paper Co. Lease at market prices. On September 11, 1978, the Department of Energy issued a Proposed Decision and Order which determined that the exception request be granted.

DAMSON OIL CORP., HOUSTON, TEX., DXE-1607 CRUDE OIL

Damson Oil Corp. filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit Damson to sell the crude oil produced from the Venice Beach Lease at upper tier ceiling prices. On September 14, 1978, the DOE issued a Proposed Decision and Order which determined that the exception request be granted.

TEXACO, INC., TULSA, OKLAHOMA, DEE-1676 CRUDE OIL

Texaco, Inc., filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit the firm to continue to sell crude oil which it produces from the Dolly Cain lease at upper tier ceiling prices. On September 11, 1978, the DOE issued a Proposed Decision and Order which determined that the exception request be denied.

[6560-01]

ENVIRONMENTAL PROTECTION AGENCY

[FRL 975-4]

SCIENCE ADVISORY BOARD, ENVIRONMENTAL HEALTH ADVISORY COMMITTEE, STUDY GROUP ON PESTICIDE TOLERANCES

Open Meeting

Under Pub. L. 92-463, notice is hereby given that a 3-day meeting of the Study Group on Pesticide Tolerances of the Science Advisory Board's Environmental Health Advisory Committee will be held on October 23, 24, and 25, 1978 in Conference Room A (Room 1112), Crystal Mall Building No. 2, 1921 Jefferson Davis Highway, Arlington, Va. The meeting will start at 9 a.m. on October 23, 1978. Adjournment will be at about noon on October 25, 1978, possibly earlier.

The principal purpose of the meeting will be (1) to identify and discuss scientific issues relating to EPA's tolerance setting system which the Study Group may wish to address in its report to the Environmental Health Advisory Committee and (2) to develop positions with regard to these issues with a view to preparing a first draft of an overall critique of EPA's tolerance setting system. As an aid in this process, the Study Group is currently reviewing and, at the meeting, will refer to a draft working paper titled, "Review of EPA's Tolerance Setting System: A Compilation of Criticisms and Suggested Alternatives", draft dated August 10, 1978, prepared by EPA staff. Single copies of the paper may be obtained by contacting the Science Advisory Board Secretariat (address below). The Agenda will also include follow-up briefings, items of current interest, and statements by members of the public.

Pertinent background information follows. In response to an Agency request to the Science Advisory Board, the Board's Environmental Health Advisory Committee established a Study Group on Pesticide Tolerances and charged it with assisting the Committee in an evaluation of the scientific basis of the Agency's system for establishing tolerances for pesticide residues in agricultural crops. This is the fourth meeting of the Study Group. At a meeting on April 5, 1978, the Study Group was briefed on and discussed various aspects of the legislative authority and mandate directly or indirectly relating to the Agency's tolerance setting system. At a meeting on May 11 and 12, 1978, the Study Group was briefed on and discussed scientific issues relating to estimates of exposure. At a subsequent meeting on June 27-28, 1978, the Study Group was briefed on and discussed scientific issues relating to toxicology data and hazard evaluation. Further meetings of the Study Group will be scheduled as needed.

The meeting will be open to the public. Any member of the public wishing to attend or present or submit a paper should contact the Secretariat, Science Advisory Board (A-101), U.S. Environmental Protection Agency, Washington, D.C. 20460 by c.o.b. October 16, 1978. Please ask for Mrs. Ilene Stein or Mr. Robert Flaak. The telephone number is 703-557-7720.

Dated: September 21, 1978.

RICHARD M. DOWD,
Staff Director,
Science Advisory Board.

STATE OF MINNESOTA

State Plan for Certification of Commercial and Private Applicators of Restricted Use Pesticides—Approval Status

Section 4(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136 et seq.), and the implementing regulations of 40 CFR Part 171 require each State desiring to certify applicators to submit a plan for such purpose, subject to approval by the U.S. Environmental Protection Agency (EPA). On May 4, 1977, the Minnesota State Plan was approved contingent upon promulgation by the Minnesota Department of Agriculture (MNDA) of regulations necessary for the implementation of the Minnesota State Plan. Notice of contingent approval

V 4 3 / 1 8 8 SE 27 78 UMI

was published in the FEDERAL REGISTER on May 23, 1977 (42 FR 26241). Subsequently, on July 17, 1978, implementing regulations promulgated by the MNDA became effective. Having reviewed these regulations and finding that all requisite legal authorities required by FIFRA and 40 CFR Part 171 are now enacted and promulgated, the Regional Administrator, EPA Region V, hereby gives notice that the Minnesota State Plan is now a fully approved State Plan.

Dated: September 15, 1978.

JOHN MCGUIRE,
Regional Administrator,
Region V.

FEDERAL COMMUNICATIONS COMMISSION

[SS Docket Nos. 78-228, 78-229; File Nos. 160-M-L-67, 162-M-L-28]

NAVAJO COMMUNICATIONS CO., INC. AND JEANNINE HUNT

Designating Applications for Consolidated Hearing on Stated Issues

Adopted: July 25, 1978.

Released: July 28, 1978.

In re applications of: Navajo Communications Co., Inc., Grandview, Tex., Jeannine Hunt, Hanksville, Utah, for a Public Coast Class III-B station to serve Lake Powell, Utah.

1. The above-captioned applications are for authority to operate Class III-B Public Coast stations to serve Lake Powell in Utah. Essentially, the applicants propose to serve the same area; therefore, the applications are mutually exclusive by operation of the rules limiting duplication of services (§ 81.303). Accordingly, it is necessary to designate the applications for hearing to determine which, if any, application should be granted. Except for the issues specified herein, the applications are otherwise qualified.

2. Lake Powell was previously served by Public Coast, Class III-B radio station KTR-963 under license to The Telephone Company (TTC).[1] TTC was found to be essentially a one-man operation controlled by Arthur W. Brothers (Initial Decision, FCC 75D-41 released August 7, 1975, Docket Nos. 20155-20177 and 20211) hereinafter referred to as the Brothers' proceeding. In this proceeding, which was essentially a revocation proceeding against a number of FCC licenses held or controlled by Arthur W. Brothers, Docket No. 20158, File No. 68-M-ML-34, was concerned with an application for modification of license of station KTR-963. As a result of this proceeding which was lengthy and reviewed by the U.S. Courts of Appeals, District of Columbia Circuit, it was determined that the license for station KTR-963 expired by its terms on June 22, 1977, and no renewal application had been filed prior to expiration. Further, the application for modification was denied and the Commission stated, "We wish to emphasize that even if the license had not expired our conclusion in regard to the licensee's basic qualifications would have compelled that the license be revoked." This decision became final effective May 21, 1978. The path is now clear to consider new applications for Public Coast III-B service at Lake Powell.

3. The applications properly before us now[1] for such facilities are the applications of Navajo, and Jeannine Hunt (Hunt), file numbers as appearing in the caption. Inasmuch as the public is without service at this location it is our intention to proceed as expeditiously as possible in order that this valuable service may be reinstituted as soon as possible at Lake Powell.

4. In view of the foregoing, *it is ordered,* pursuant to the provisions of section 309(e) of the Communications Act of 1934, as amended that the above-captioned applications are hereby designated for a hearing in a consolidated proceeding at a time and place to be specified in a subsequent Order on the following issues:

a. To determine which applicant would provide the public with better public coast station service based on the following considerations:

(1) Coverage area and its relationship to the greatest number of potential users;
(2) Hours of operation;
(3) Rates and charges;
(4) Ability to participate actively in the safety system;
(5) Personnel available to operate the station and their experience in marine communications; and
(6) Interconnection with landline facilities.

b. To determine, in light of the evidence adduced on the foregoing issue, whether the public interest, convenience and necessity will be served by a grant of one of the subject applications.

5. *It is further ordered,* That the burden of proceeding with the introduction of evidence and the burden of proof is on each applicant with respect to its application, except issue (b) which is conclusory.

[1] Navajo filed on June 22, 1977, and Hunt on February 2, 1978. Inasmuch as the license of TTC for Public Coast III-B KTR-963 serving Lake Powell was the subject of litigation, the applications were held in a pending status until the matter of KTR-963 was finally settled, i.e., May 21, 1978. An application by Kaibab Communications, Inc. for similar facilities was dismissed prior to this designation Order because it failed to file a financial statement as requested.

6. *It is further ordered,* That to avail themselves of an opportunity to be heard, Navajo and Hunt, pursuant to § 1.221(c) of the Commission's rules, in person or by attorney, shall within 20 days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date set for hearing and present evidence on the issues specified in this Order. Failure to file a written appearance within the time specified may result in dismissal of the application with prejudice.

CARLOS V. ROBERTS,
Chief, Safety and Special
Radio Services Bureau.

[FR Doc. 78-27161 Filed 9-26-78; 8:45 am]

[6712-01]

[BC Docket No. 78-287, et al.]

MOULTON BROADCASTING CO., INC., ET AL.

Designating Applications for Consolidated Hearing on Stated Issues

Adopted: September 12, 1978.

Released: September 20, 1978.

In re applications of Moulton Broadcasting Co., Inc. (WHIY), Moulton, Ala., BC Docket No. 78-287; File No. BP-20,171, Has: 1530 kHz, 1 kW, D. Req: 1190 kHz, 1 kW, D, Benny Carle Broadcasting, Inc., Albertville, Ala., BC Docket No. 78-288, File No. BP-20,402, Req: 1190 kHz, 1 kW, D, J. D. Buffington & R. D. Miller, d.b.a. Mississippi Broadcasting Co., Aberdeen, Miss., BC Docket No. 78-289, File No. BP-20,622, Req: 1190 kHz, 1 kW, D, for construction permits.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has before it for consideration the above-captioned applications, which are mutually exclusive in that they involve interlinking prohibitive overlap.

2. Benny Carle Broadcasting, Inc. (hereinafter "Benny Carle") has failed to comply with the requirements of the *Primer on Ascertainment of Community Problems by Broadcast Applicants,* 27 FCC 2d 650, 21 RR 2d 1507 (1971) (hereinafter *"Primer"*). By letter of April 10, 1978, the Commission advised Benny Carle that it had failed to interview leaders representing the following significant groups in Albertville, Alabama: industry, labor, the elderly, and youth and students.[1] By subsequent amendment, Benny Carle adequately identified industry and youth leaders that it originally interviewed. *Storz Broadcasting,* 35 RR 2d 785, 58 FCC 2d 1333 (1975); *Voice of Dixie, Inc.,* 45 FCC 2d 1027, 29 RR 2d 1127 (1974). However, the Commission concludes that Benny Carle failed to interview any leaders representing labor, students, or the elderly. Although the demographic study submitted indicates that Albertville has a wide variety of manufacturing and industrial companies, the applicant has either not properly identified or interviewed any labor leaders. *Voice of Dixie, supra.* In addition, Benny Carle failed to interview student leaders *per se.* The applicant's interviews with representatives of the local school system and the local college are not a substitute for contacts with students. *Rose Broadcasting Company,* FCC 78-496, adopted July 12, 1978, released August 11, 1978. The amendment indicates that several leaders of the elderly were surveyed. However, none of the persons listed have been shown to represent organizations of and for the elderly. *J. Sherwood, Inc.,* 60 FCC 2d 808, 38 RR 2d 297 (Rev. Bd. 1976). Accordingly, a limited ascertainment issue will be specified.

3. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. However, because the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

4. Accordingly, *it is ordered,* That, pursuant to section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine the areas and populations which may be expected to gain or lose primary service from the proposed operation of Station WHIY and the availability of other primary aural service (1.0 mV/m or greater in the case of FM) to such areas and populations.
2. To determine the areas and populations which would receive primary service from the proposals of Benny Carle Broadcasting, Inc. and Mississippi Broadcasting Company and the availability of other primary aural service (1.0 mV/m or greater in the case of FM) to such areas and populations.
3. To determine whether Benny Carle Broadcasting, Inc. interviewed leaders of labor, the elderly, and students in connection with its ascertainment effort.
4. To determine, in light of section 307(b) of the Communications Act of 1934, as amended, which of the proposals would best provide a fair, efficient and equitable distribution of radio service.
5. To determine, in light of the evidence adduced pursuant to the foregoing issues, which, if any, of the applications for a construction permit should be granted.

[1] Our deficiency letter also indicated that Benny Carle had failed to interview Albertville minority and ethnic leaders. In reply, Benny Carle stated that blacks constituted less than 1 percent of the population of the community.

5. *It is further orderd,* That to avail themselves of the opportunity to be heard, the applicants, herein, pursuant to § 1.221(c) of the Commission's Rules, in person or by attorney shall, within 20 days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this Order.

6. *It is further ordered,* That the applicants herein shall, pursuant to section 311(a)(2) of the Communications Act of 1934, as amended, and § 1.594 of the Commission's Rules, give notice of the hearing, either individually or, if feasible and consistent with the Rules, jointly, within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 1.594(g) of the Rules.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

FEDERAL HOME LOAN BANK BOARD

[H.C. No. 254]

NLT CORP. AND NLT CAPITAL CORP., NASHVILLE, TENN.

Extension of Comment Period on Application for Approval To Acquire Great Southern Corp., Houston, Tex.

SEPTEMBER 20, 1978.

The Federal Savings and Loan Insurance Corporation ("Corporation") has received an application from NLT Corp. and its wholly owned subsidiary NLT Capital Corp. for approval, pursuant to section 408(e) of the National Housing Act, as amended, and § 584.4 of the regulations for Savings and Loan Holding Companies, to acquire Great Southern Corp. a registered savings and loan holding company controlling State Savings & Loan Association, Salt Lake City, Utah.

By action of the Federal Home Loan Bank Board ("FHLBB"), as operating head of the Corporation, the deadline for submission of written views or comments on the subject application has been extended to the close of business September 28, 1978. All such submissions shall be directed to the Director, Office of the District Banks, FHLBB, 1700 G Street NW., Washington, D.C. 20552.

By the Federal Home Loan Bank Board.

RONALD A. SNIDER,
Assistant Secretary.

FEDERAL TRADE COMMISSION

ICI AMERICAS, INC.

Early Termination of Waiting Period of the Premerger Notification Rules

AGENCY: Federal Trade Commission.

ACTION: Granting of request for early termination of the 30-day waiting period of the premerger notification rules.

SUMMARY: ICI Americas, Inc. is granted early termination of the 30-day waiting period provided by law and the premerger notification rules with respect to the proposed acquisition of Allied Chemical Corp.'s Baton Rouge North Works vinyl chloride monomer plant. The grant was made by the Federal Trade Commission and the Assistant Attorney General in charge of the Antitrust Division of the Department of Justice in response to a request for early termination submitted by ICI Americas, Inc. Neither agency intends to take any action with respect to this action during the waiting period.

EFFECTIVE DATE: September 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Malcolm R. Pfunder, Associate Director for Premerger Notification, Bureau of Competition, Room 303, Federal Trade Commission, Washington, D.C. 20580, 202-523-3894.

SUPPLEMENTARY INFORMATION: Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by sections 201 and 202 of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Commission and Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the act and § 803.11 of the rules implementing the act permit the two agencies, in individual cases, to terminate this waiting period prior to its expira-

V 43/188 SE 27 78 UMI

tion and to publish notice of this action in the FEDERAL REGISTER.

CAROL M. THOMAS,
Secretary.

GENERAL SERVICES ADMINISTRATION

[Federal Property Management Regs.; Temporary Reg. F-472]

SECRETARY OF DEFENSE

Delegation of Authority

1. *Purpose.* This regulation delegates authority to the Secretary of Defense to represent the interests of the executive agencies of the Federal Government in a water rate increase proceeding.

2. *Effective date.* This regulation is effective immediately.

3. *Delegation.* a. Pursuant to the authority vested in me by the Federal Property and Administrative Services Act of 1949, 63 Stat. 377, as amended, particularly sections 201(a)(4) and 205(d) (40 U.S.C. 481(a)(4) and 486(d)), authority is delegated to the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government before the Illinois Commerce Commission involving the application of the Illinois American Water Co. for a water rate increase.

b. The Secretary of Defense may redelegate this authority to any officer, official, or employee of the Department of Defense.

c. This authority shall be exercised in accordance with the policies, procedures, and controls prescribed by the General Services Administration, and shall be exercised in cooperation with the responsible officers, officials, and employees thereof.

JAY SOLOMON,
Administrator of General Services.

REGIONAL PUBLIC ADVISORY PANEL ON ARCHITECTURAL AND ENGINEERING SERVICES

Open Meeting

SEPTEMBER 18, 1978.

Pursuant to Pub. L. 92-463, notice is hereby given of a meeting of the Regional Public Advisory Panel on Architectural and Engineering Services, Region 5, October 12, 1978, from 9 a.m. to 5 p.m., Room 3520A, John C. Kluczynski Federal Building, 230 South Dearborn Street, Chicago, Ill. The meeting will be devoted to the initial step of the procedures for screening and evaluating the qualifications of architect-engineers under consideration for selection to furnish professional services for the proposed alterations for the U.S. Customs Cargo Inspection Facility and the USDA Animal Inspection Facility at the Ambassador Bridge Border Station, Detroit, Mich. The meeting will also include the review of the conceptual design for the proposed new U.S. Courthouse Annex, Detroit, Mich.

This meeting will be open to the public.

CLARENCE S. SOCHOWSKI,
Regional Administrator.

Office of Education

COMMUNITY EDUCATION ADVISORY COUNCIL

Meeting

AGENCY: Office of Education, HEW, Community Education Advisory Council.

ACTION: This notice sets forth the schedule and proposed agenda of the forthcoming meeting of the Community Education Advisory Council. It also describes the functions of the Council. Notice of these meetings is required under section 10(a)(2) of the Federal Advisory Committee Act, Pub. L. 92-624. This document is intended to notify the general public of their opportunity to attend.

DATES: MEETING: October 12-13, 1978.

ADDRESS: U.S. Office of Education, FOB-6, Room 4003, 400 Maryland Avenue SW., Washington, D.C. 20202.

FOR FURTHER INFORMATION CONTACT:

Margaret Beavan, Office of Education, Department of Health, Education, and Welfare, Room 5622-ROB-3, 7th and D Streets SW., Washington, D.C. 20202, telephone 202-245-0691.

SUPPLEMENTARY INFORMATION: The Community Education Advisory Council is authorized under Pub. L. 93-380. The Council is established to advise the Commissioner of Education on policy matters relating to the interest of community schools. All sessions of this meeting will be open to the public. On both days the meetings will begin at 9 a.m. and end at 4:30 p.m.

The Community Education Advisory Council has in the past expended large portions of its time on efforts to create linkages between community education agencies and other organizations at national, State, and local levels. The Council formulated, during their last meeting held in Denver, Colo., on August 8-9, 1978, a comprehensive plan of action for its work in the coming year. Significant aspects of that plan for the 1979 fiscal year will be discussed.

The Council will also discuss the findings of the evaluation final report for the community education program.

The proposed agenda includes:

(1) Federal planning, update, general administrative matters and related business;
(2) legislative matters;
(3) linkages—national and State;
(4) special projects undertaken on behalf of the Council;
(5) evaluation;
(6) school-community-home initiative;
(7) fiscal year 1979 grant application procedures;
(8) issues on regulations; and
(9) schedule of future meetings.

Records shall be kept of all Council proceedings and shall be available for public inspection in room 5622, Regional Office Building 3, 7th and D Streets SW., Washington, D.C. 20202.

Signed at Washington, D.C., on September 22, 1978.

JULIE ENGLUND,
Director, Community Education Program.

DIRECT, DISCRETIONARY GRANT PROGRAMS

Closing Dates for Transmittal of Applications for Fiscal Year 1979

Correction

In FR Doc. 78-23550 appearing on page 37618 in the issue of Wednesday, August 23, 1978, on page 37628 in the 3d column, the 4th full paragraph, the last sentence should read, "Private metered postmarks or mail receipts will not be accepted without a legible date stamped by the U.S. Postal Service."

[4110-02]

Office of Education

NATIONAL ADVISORY COUNCIL ON VOCATIONAL EDUCATION

Meeting

AGENCY: National Advisory Council on Vocational Education.

ACTION: Notice of public meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of forthcoming meetings of the National Advisory Council on Vocational Education. It also describes the functions of the Council. Notice of these meetings is required under the Federal Advisory Committee Act (5 U.S. Code, Appendix I Section 10(a)(2)). This document is intended to notify the general public of its opportunity to attend.

DATES: October 19-20, 1978.

ADDRESS: Hotel Washington, 15th Street and Pennsylvania Avenue NW., Washington, D.C. 20004. The Federal Room, October 19; the Caucas Room, October 20.

FOR FURTHER INFORMATION CONTACT:

Virginia Solt, NACVE STAFF, 425 13th Street NW., Suite 412, Washington, D.C. 20004, 202-376-8873.

The National Advisory Council on Vocational Education is established under section 104 of the Vocational Education Amendments of 1968, Pub. L. 90-576. The Council is directed to:

(A) Advise the Commissioner concerning the administration of, preparation of general regulations for, and operation of, vocational education programs supported with assistance under this title;

(B) Review the administration and operation of vocational education programs under this title, including the effectiveness of such programs in meeting the purposes for which they are established and operated, and make recommendations with respect thereto, and make annual reports of its findings and recommendations (including recommendations for changes in the provisions of this title) to the Secretary for transmittal to the Congress; and

(C) Conduct independent evaluations of programs carried out under this title and publish and distribute the results thereof.

The Committees and Task Forces of the Council are as follows:

BOAE Task Force.
Technical Assistance Committee.
Legislative Committee.
MERC Task Force.
Task Force on Sex Equity in Vocational Education.
Task Force on the Handicapped.

Information on meetings which may be planned for any or all of these groups may be obtained by calling the Council office as indicated.

On October 19, 1978, the National Advisory Council on Vocational Education will meet in regular session from 8:30 a.m. to 5 p.m. at the Hotel Washington in the Federal Room. The following agenda will be included in the meeting:

October 19, 1978

8:30 a.m.—Convene.
8:30 to 9 a.m.—Report of the Chairman, Approval of Minutes of August Meeting, Report of the Executive Director, Year-end Budget Report.
9 to 9:30 a.m.—Report from the National Center for Vocational Education: Dr. Robert Taylor, Director.
9:30 to 10 a.m.—Report from the American Vocational Association: Dr. James E. Bottoms, Executive Director.
10 to 10:30 a.m.—Report on the Vocational Education Study and Report on Joint NACVE/NIE Research Study: Dr. Henry David, Director.
10:30 to 12 Noon—NACVE planning session.
12 to 1:30 p.m.—Recess.
1:30 to 3 p.m.—NACVE planning session.
3 to 3:30 p.m.—Presentation, "Proposed Model Statewide Training and Placement Program for All High School Graduates, 1979-80," Hon. Pierre S. du Pont, Governor State of Delware.
3:30 to 4:30 p.m.—NACVE planning session.
4:30 to 5 p.m.—Invitation to public comment.
5 p.m.—Recess.

October 20, 1978

8:30 a.m.to Noon—NACVE planning session.
Noon—Adjourn.

Records shall be kept of all Council proceedings and shall be available 14 days after the meeting for public inspection at the Office of the National Advisory Council on Vocational Education, located at 425 13th Street NW., Suite 412, Washington, D.C. 20004.

Signed at Washington, D.C. on September 18, 1978.

RAYMOND C. PARROTT,
Executive Director, National Advisory Council on Vocational Education.

NEW MEXICO

Notice of Applications

SEPTEMBER 18, 1978.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Southern Union Gathering Co. has applied for five 4-inch natural gas pipeline rights-of-way and related facilities within the following lands:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 30 N., R. 10 W.,
Sec. 26, lots 3, 6, and 11.
T. 30 N., R. 11 W.,
Sec. 2, lot 5.
T. 31 N., R. 11 W.,
Sec. 35, SW¼SE¼.
T. 31 N., R. 12 W.,
Sec. 12, lot 9;
Sec. 22, lot 1;
Sec. 25, NW¼NW¼.

These pipelines will convey natural gas across 1.07 miles of public lands in San Juan County, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the applications should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 6770, Albuquerque, N. Mex. 87107.

RAUL E. MARTINEZ,
Acting Chief, Branch of Lands and Minerals Operations.

Notice of Applications

SEPTEMBER 19, 1978.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), El Paso Natural Gas Co. has applied for three 4½-inch natural gas pipeline rights-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 28 N., R. 6 W.,
Sec. 11, lot 2.
T. 29 N., R. 6 W.,
Sec. 35, SE¼SW¼.
T. 30 N., R. 8 W.,
Sec. 7, E½SE¼;
Sec. 8, SW¼SW¼.
T. 32 N., R. 11 W.,
Sec. 18, NE¼NE¼.

These pipelines will convey natural gas across 0.764 of a mile of public lands in Rio Arriba and San Juan Counties, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the applications should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 6770, Albuquerque, N. Mex. 87107.

FRED E. PADILLA,

[N-300]

NEVADA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

SEPTEMBER 14, 1978.

The Federal Aviation Administration filed application N-300 on October 10, 1966 with an amendment filed March 6, 1972, for a withdrawal in relation to the following-described lands:

MOUNT DIABLO MERIDIAN, NEVADA

T. 29 N., R. 45 E.,
A circular plot with a radius of 200 feet, the center of which is the on-site ARSR tower, located S. 87°48'W., 1,790 feet from the Mount Lewis triangulation station in the NW quarter of Section 12, containing approximately 2.9 acres.

The applicant desires the land for the continued operation and maintenance of the existing Air Route Surveillance Radar Facility known as Battle Mountain ARSR-2.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on November 17, 1966, Volume 31 No. 223, page 14657, Document No. 66-12452, and amended by notice published in the FEDERAL REGISTER on May 5, 1972, Volume page 9144, Document 72-6891.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, at the address shown below within 40 days from the date of publication of this notice. Upon determination by the State Director that a public hearing will be held, a notice will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual Sec. 2351.16 B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management within the 40 day period allowed.

The above described lands are temporarily segregated from the operation of the public land laws, including the mining laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregaion. In accordance with section 204(g) of the Federal Land Policy and Management act of 1976 the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All correspondence in connection with this withdrawal should be addressed to the Bureau of Land Management, Department of the Interior; Chief Division of Technical Services, 300 Booth Street, Reno, Nev. 89509.

WM. J. MALENCIK,
Chief, Division of Technical Services.

WYOMING

Notice of Application

SEPTEMBER 18, 1978.

Notice is hereby given that pursuant to section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Colorado Interstate Gas Co. of Colorado Springs, Colo. filed an application for a right-of-way to construct a 4½-inch O.D. pipeline for the purpose of transporting natural gas across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 21 N., R. 94 W.,
Sec. 10, N½SW¼.

The proposed pipeline will transport natural gas from No. 9 Siberia Ridge unit well located in the SW¼ of section 10 in a generally northwesterly direction to a point of connection with an existing line in the NW¼ of section 9, T. 21 N., R. 94 W., Sweetwater County, Wyo.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 1300 Third Street, P.O. Box 670, Rawlins, Wyo. 82301.

WYOMING

Notice of Application

SEPTEMBER 19, 1978.

Notice is hereby given that pursuant to section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Colorado Interstate Gas Co. of Colorado Springs, Colo. filed an application for a right-of-way to construct a 4½-inch O.D. pipeline for the purpose of transporting natural gas across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 17 N., R. 93 W.,
Sec. 18, lots 8, 9, 16, and 17.

The proposed pipeline will transport natural gas from their Sinclair No. 1-18 Well located in the SW¼SW¼ of section 18 in a northwesterly direction to an existing line located in section 7, T. 17 N., R. 93 W., Carbon County, Wyo.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 1300 Third Street, P.O. Box 670, Rawlins, Wyo. 82301.

[4310-84]

[Wyoming 65055]

WYOMING

Notice of Application

SEPTEMBER 18, 1978.

Notice is hereby given that pursuant to section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), Colorado Interstate Gas Co. of Colorado Springs, Colo. filed an application for a right-of-way for one 6⅝-

inch pipeline, five 8⅝-inch pipelines, and one 4½-inch pipeline for the purpose of transporting natural gas across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 20 N., R. 94 W.,
Secs. 18 and 30.
T. 21 N., R. 94 W.,
Secs. 4, 8, 20 and 32.
T. 22 N., R. 94 W.,
Secs. 8, 18, 20 and 32.
T. 23 N., R. 94 W.,
Sec. 32.
T. 20 N., R. 95 W.,
Sec. 12.

These pipelines are proposed in order to increase the capacity to transport a substantial amount of additional natural gas to the main lines through Colorado Interstate Gas Co.'s Wamsutter Regulator Site at a location in the N½ of section 31, T. 20 N., R. 94 W., Sweetwater County, Wyo.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Person submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, P.O. Box 670, 1300 Third Street, Rawlins, Wyo. 82301.

Bureau of Land Management

IDAHO

BOISE DISTRICT

Restricted Vehicle Use Closure Order

Notice is hereby given in accordance with Title 43 CFR Group 6000—Outdoor Recreation, and in conformance with the principles established by the National Environmental Policy Act of 1969 and the Federal Land Policy and Management Act of 1976, that approximately 2,700 acres of land located within the Hagerman Fossil Beds in Twin Falls County, Idaho, are closed to motorized vehicles except on designated roads and trails.

Careful review and analysis in cooperation with other agencies, professionals in the field of paleontology, and the public has determined that uncontrolled use of this area by motorized vehicles is causing damage to scientific and natural features. Continued indiscriminate use by motorized vehicles will cause severe damage to paleontological features of international importance and to the terrain, soil, and vegetation.

All forms of motorized vehicles, including those used in mining exploration, resource management and administration, scientific investigations, farming practices, and the casual operation for outdoor recreation purposes, are excluded from the area except on designated roads and trails.

This closure applies to all public lands administered by the Bureau of Land Management within the area known as the Hagerman Fossil Beds. The area is bounded on the east by Lower Salmon Falls Rervoir on the Snake River, on the south by the paved Bell Rapids Road, on the west by developed farms, and on the north by an imaginary line through the center of section 10, T. 7 S., R. 13 E., B.M. The legal description of this area is:

Portions of Sections 9, 10, 15, 16, 17, 20, 21, 28, 29, 32, and 33, T. 7S., R. 13 E., B.M., and Sections 3, 4, and 5, T. 8 S., R. 13 E., B.M.

All Federal lands administered by the Bureau of Land Management within the above described areas are closed to vehicle use except on designated roads and trails on a year-round basis until further notice. Signs will be posted to identify the exterior boundaries and to mark trails open or closed to motorized use. A map of the closure areas is posted at the Twin Falls and Hagerman Post Offices, Twin Falls County Courthouse, and at the Boise District Office of the BLM located at 230 Collins Road, Boise, Idaho 83702. Cooperation of all will be sincerely appreciated.

D. DEA BIBLES,
District Manager.

Approved: August 11, 1978.

WILLIAM L. MATHEWS,
State Director.

Bureau of Land Management

WILDERNESS INVENTORY

Commencement and Availability of Handbook

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This notice announces the commencement of wilderness inventory on public lands outside Alaska by the Bureau of Land Management and the availability of the Wilderness Inventory Handbook to guide the wilderness inventory process. The inventory, to identify the roadless areas of 5,000 acres or more of contiguous public land or roadless islands with wilderness characteristics as wilderness study areas, is the first step in the wilderness review process. The next step of the review process will be studies to determine which of these areas and islands will be recommended as suitable or nonsuitable for wilderness designation by Congress as part of the National Wilderness Preservation System. The wilderness inventory handbook is available on request from Washington, D.C., and State Offices of the Bureau of Land Management.

EFFECTIVE DATE: September 27, 1978.

ADDRESS: All Washington and State Offices. The Washington Office address is: Director (370), Bureau of Land Management, 18th and C Streets NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION, CONTACT:

Terry Sopher at the above address or call 202-343-9353.

SUPPLEMENTARY INFORMATION: On February 27, 1978, the Bureau of Land Management issued Draft Wilderness Policy and Review Procedures for conducting the review required by the Federal Land Policy and Management Act. That document was intensively reviewed by the public. It was discussed at more than 60 meetings held throughout the Western States, in the lake States, and in Washington, D.C. Some 5,000 letters and written

comments were sent to BLM on the proposed review procedures. The first result of that effort is the issuance of this handbook to guide BLM in its wilderness inventory process. As noted in this handbook, wilderness inventory is only the first step in wilderness review.

FRANK GREGG,
Director.

WYOMING

Application

SEPTEMBER 15, 1978.

Notice is hereby given that pursuant to section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Colorado Interstate Gas Co. of Colorado Springs, Colo., filed an application for a right-of-way to construct a 4½ inch O.D. pipeline for the purpose of transporting natural gas across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 15 N., R. 92 W.,
Sec. 23, S½SE¼;
Sec. 26, W½NE¼ and SE¼NW¼.

The proposed pipeline will transport natural gas from their Federal No. 23-1 well located in the SE¼ of section 23 extending in a generally northeasterly direction to a point in the SE¼ of section 26, T. 15 N., R. 92 W., Carbon County, Wyo.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 1300 Third Avenue, P.O. Box 670, Rawlins, Wyo. 82301.

National Park Service

LAND ACQUISITION POLICY

Extension of Public Comment Period

INTRODUCTION: In FEDERAL REGISTER, Volume 43, No. 156, published on Friday, August 11, 1978, the National Park Service announced that it is proposing revisions to the section of the Bureau's land acquisition policy entitled Program Execution, primarily as it pertains to inholding areas.

The National Park Service is interested in obtaining public participation in the formulation of official policy and public understanding of the policy which is adopted. To that end, the Bureau held a series of public hearings to receive comments about the entire policy as set forth in the above referenced FEDERAL REGISTER notice. Written and oral testimony was taken and will be considered in the further revision and clarification of National Park Service land acquisition policy.

ACTION: The National Park Service opened a public record for comments on land acquisition policy. That record, which will include the oral statements received at the scheduled hearings, was scheduled to remain open for written comments through September 20, 1978. Since the National Park Service has received indications from a number of citizens and groups that they desire to comment on the policy but need additional time to formulate their responses, it has decided to leave the public record open for an additional 30 days until October 20, 1978.

After compilation and review of the comments reviewed, the National Park Service may further revise its land acquisition policy. The intent is to have a formal effective policy on or about November 15, 1978.

Dated: September 20, 1978.

IRA J. HUTCHISON,
Deputy Director,
National Park Service.

Bureau of Reclamation

[INT DES 78-39]

NORTH LOUP DIVISION, NEBR.

Notice of Availability of Draft Supplement to the Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a draft supplement to the final environmental statement for the authorized North Loup Division, Nebr. The final statement, designated INT FES 72-31, was filed with the Council on Environmental Quality and publicly distributed on September 18, 1972.

The supplement addresses the geology of the Calamus and Davis damsites, ground-water quality in the service area, wildlife impacts, and researching techniques for improving livestock and crop production without diminishing ground-water reserves by irrigation.

Written comments may be submitted to the Regional Director (address below) on or before November 13, 1978.

Copies are available for inspection at the following locations:

Director, Office of Environmental Affairs, Department of the Interior, Bureau of Reclamation, Room 7626, Interior Building, Washington, D.C. 20240, telephone 202-343-4991.
Assistant Commissioner—Engineering and Research, Engineering and Research Center, P.O. Box 25007, Denver Federal Center, Denver, Colo. 80225, telephone 303-234-3022.
Regional Director, Bureau of Reclamation, Lower Missouri Region, P.O. Box 25247, Denver Federal Center, Denver Colo 80225, telephone 303-234-3779.
Central Nebraska Projects Office, Second and Locust Streets, Grand Island, Nebr. 68801, telephone 308-382-3660.

Office of Surface Mining Reclamation and Enforcement

BLACK BUTTE COAL CO.

Availability of Mining Plan For Public Review

Black Butte Coal Co. of Point of Rocks, Wyo. has submitted a mine plan for a purposed surface mine under provisions of 30 CFR 211. This proposed mining operation was analyzed in the Department of the Interior's final enviornmental statement of August 31, 1978, entitled, "Development of Coal Resources of Southwestern Wyoming." Black Butte proposes to mine approximately 13,842 acres of Federal and private coal lands, in combination, located in Sweetwater County, Wyo. The Federal coal lands that would be affected by this operation are included in Coal Lease No.

Wyoming—6266 located in Township 19 North, Range 100 West, Township 18 North, Range 100 West, and Township 18 North, Range 101 West. The proposed plan has hot been revised for completeness or adequacy by the Office of Surface Mining.

A copy of the proposed mine plan is on file for public review at the Office of the Regional Director, Regions V, Office of Surface Mining. Comments are solicited from any person who may be affected by this proposal.

Comments should be filed with the Regional Director within 30 days of the date of this publication.

The address of the Regional Director is: Regional Director, Office of the Surface Mining, Room 270, Post Office Building, 1823 Stout Street, Denver, Colo. 80202.

Date: September 21, 1978.

TONEY HEAD, JR.
Acting Director, Office fo Surface Mining Reclamation and Enforcement.

NUCLEAR REGULATORY COMMISSION

AGREEMENT FOR COOPERATION BETWEEN THE STATE OF WASHINGTON AND THE UNITED STATES NUCLEAR REGULATORY COMMISSION

The Commission, in mid-January 1976 adopted the policy of entering into agreements with States that have been delegated responsibility by EPA for issuance of National Pollutant Discharge Elimination System (NPDES) permits under section 402 of the Federal Water Pollution Control Act.

Although considerable latitude is provided, generally such agreements embody the principles of the Second Nuclear Regualtory Commission/Environmental Protection Agency Memorandum of Understanding (NRC/EPA) (FR Vol. 40, No. 251, p. 60115 ff, December 31, 1975) for cooperation in the licensing of nuclear power plants.

To date, four such agreements have been consummated. Three of these agreements; those with the Virginia State Water Control Board, the New York State Board on Electric Generation Siting and the Environment, and the Department of Environmental Conservation and Public Service, and the State of South Carolina were published in the FEDERAL REGISTER Vol. 43, No. 88, p. 19485 ff, on May 5, 1978.

The fourth is a very broad agreement and is entitled "Memorandum of agreement Between the State of Washington and the U.S. Nuclear Regulatory Commission." It became effective on September 6, 1978. This agreement applies to all nuclear facilities subject to licensing by NRC or certification by the State; it applies to matters beyond water quality. The text of this agreement is published below.

FOR FURTHER INFORMATION CONTACT:

Frank W. Young, Office of State Programs, telephone 301-492—7794, or Bennett L. Harless, Division of Site Safety and Environmental Analysis, telephone 301-492-8421, U.S. Nuclear Regulatory Commission, Washington, D.C. 2055.

Dated at Bethesda, Md., this 20th day of September, 1978.

For the Nuclear Regulatory Commission.

LEE V. GOSSICK,
Executive Director for Operations.

MEMORANDUM OF AGREEMENT BETWEEN THE STATE OF WASHINGTON AND THE U.S. NUCLEAR REGULATORY COMMISSION

This Memorandum of Agreement between the State of Washington (hereafter "State") and the U.S. Nuclear Regulatory Commission (hereafter "NRC") expresses the desire of the parties to cooperate in the regulation of nuclear activities; it sets forth mutually agreeable principles of cooperation between the State and NRC in areas subject to the jurisdiction of the State or the NRC or both.

This agreement is intended to provide the basis of subsequent detailed subagreements between the parties.

Close cooperation between the signatories will help assure that the goals and policies of State and Federal law and regulation will be carried out efficiently and expeditiously.

With the execution of this Memorandum, the State and NRC agree to consult regularly and cooperate in exploring and divising appropriate procedures to minimize, to the extent possible, duplication of effort and to avoid delays in decision making so that effective use will be made of the resources of the State and NRC.

PRINCIPLES OF COOPERATION

1. Toward these goals, the State and NRC agree to explore together the development of detailed subagreemetns in areas of mutual concern, including, but not necessarily limited to, environmental reviews (or portions thereof) of nuclear facilities subject to licensing by NRC or certification by the State Energy Facility Site Evaluation Council (EFSEC); siting considerations; conduct and structure/format of hearings; confirmatory radiological environmental monitoring around operating nuclear facilities; decommissioning of nuclear facilities; emergency preparedness planning; response to radiological incidents; and radioactive material transportation monitoring.

2. Subagreements under this Memorandum may provide for activities to be performed by the NRC or the State under mutually acceptable guidelines and criteria which assure that the needs of both are met.

3. For activities performed by the NRC or the State at the request of NRC or the State under specific subagreements to this Memorandum, the agency making the request will explore means by which compensation may be made available to the other agency or by which the costs may be shared.

4. NRC agrees to explore with the State the possibilitity of sharing of proprietary information in NRC's possession with the State.

5. Each agency will explore means by which its training programs may be made available to the other.

6. Nothing in this Memorandum is intended to restrict or extend the statutory authority of either NRC or the State or to affect or vary the terms of the present agreement between the State and NRC under section 274b of the Atomic Energy Act of 1954, as amended.

7. The principal NRC contact under this Memorandum shall be the Director of the Office of State Programs. The principal State contact shall be the Chairman of the Energy Facility Site Evaluation Council (EFSEC). Subagreements will name appropriate individuals, agencies or offices as contacts.

8. This Memorandum shall take effect immediately upon signing by the State and the Nuclear Regulatory Commission, and may be terminated upon 30 days written notice by either party.

For the State of Washington:

DIXY LEE RAY,
Governor.

For the United States Nuclear Regulatory Commission:

LEE V. GOSSICK,
Executive Director for Operations.

Dated at Olympia, Wash., this 6th day of September, 1978.

COMMONWEALTH EDISON CO.

Establishment of Atomic Safety and Licensing Board To Rule on Petitions

Pursuant to delegation by the Commission dated December 29, 1972, published in the FEDERAL REGISTER (37 FR 28710) and §§ 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717, and 2.721 of the Commission's regulations, all as amended, an Atomic Safety and Licensing Board is being established to rule on petitions and/or requests for leave to intervene in the following proceeding:

COMMONWEALTH EDISON CO. (DRESDEN NUCLEAR POWER STATION, UNITS 2 AND 3)

This action is in reference to a notice published by the Commission on August 11, 1978, in the FEDERAL REGISTER (43 FR 35763) entitled "Proposed Issuance of Amendments to Operating Licenses."

The Chairman of this Board and his address is as follows:

Edward Luton, Esq., Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

The other members of the Board and their addresses are as follows:

Dr. Linda W. Little, Research Triangle Institute, P.O. Box 12194, Research Triangle Park, N.C. 27709.

Dr. Forrest J. Remick, 305 East Hamilton Avenue, State College, Pa. 16801.

Dated at Bethesda, Md., this 21st day of September 1978.

JAMES R. YORE,
Chairman, Atomic Safety and Licensing Board Panel.

[7590-01]

[Docket Nos. 50-329A, 50-330A]

CONSUMERS POWER CO. (MIDLAND PLANT, UNITS 1 AND 2)

Order

Before the Atomic Safety and Licensing Board. Pursuant to an Order of this Board dated August 14, 1978, a conference with counsel was held on September 7, 1978, and a progress report was made concerning settlement negotiations. The report satisfied the Board that the parties were diligently pursuing negotiations and had made substantial progress since the last report toward reaching a settlement.

In order to continue monitoring the progress of negotiations and to receive further progress reports, a conference with counsel will be held at 9:30 a.m., local time, on October 12, 1978, in the Nuclear Regulatory Commission's Hearing Room, 5th Floor, East-West Towers, located at 4350 East-West Highway, Bethesda, Md. 20014.

It is so ordered.

Dated at Bethesda, Md., this 20th day of September 1978.

For the Atomic Safety and Licensing Board.

HUGH K. CLARK,
Chairman.

[Docket No. 50-259]

TENNESSEE VALLEY AUTHORITY

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commision (the Commission) has issued Amendment No. 41 to Facility Operating License No. DPR-33 issued to Tennessee Valley Authority (the licensee), which revised the technical specifications for operation of the Brown's Ferry Nuclear Plant, Unit No. 1 (the facility) located in Limestone County, Ala. The amendment is effective as of the date of issuance.

This amendment changes the technical specificiations to permit operation with one recirculation loop isolated.

The application for this amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated September 15, 1978, (2) Amendment No. 41 to License No. DPR-33, and (3) the Commisson's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Athens Public Library, South and Forrest, Athens, Ala. 35611. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 19th day of September 1978.

For the Nuclear Regulatory Commission.

THOMAS A. IPPOLITO,
Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on September 21, 1978 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; an indication of who will be the respondents to the proposed collection; the estimated number of responses; the estimated burden in reporting hours; and the name of the reviewer or reviewing division or office.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the clearance office, Office of Management and Budget, Washington, D.C. 20503, 202-395-4529, or from the reviewer listed.

NEW FORMS

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration, Shellfish Processor's Report, NOAA-88, 142, weekly, shellfish processors, 2,600 responses, 2,600 hours, C. Louis Kincannon, 395-3211.

Industry and Trade Administration, study of field research and data/information, collection on technology transfer, ITA-825P, single-time, firms with R&D estabs. which are owned by foreign firms, 100 responses, 125 hours, C. Louis Kincannon, 395-3211.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education, report of defaulted loan (National Direct Student Loan Program), OE-574, semiannually, institutions of postsecondary education, 6,600 responses, 3,300 hours, Laverne V. Collins, 395-3214.

Public Health Service, behavioral procedures for reducing worker exposures to carcinogens, single-time, workers exposed to styrene, 600 responses, 378 hours, Office of Federal Statistical Policy and Standard, 673-7956.

Health Resources Administration, impact evaluation of short-term training opportunities for long-term care providers questionnaire, single-time, nursing home employees, 2,306 responses, 796 hours, Richard Eisinger, 395-3214.

Public Health Service, national HMO census, annually prepaid health care plans, 175 responses, 2,626 hours, Richard Eisinger, 395-3214.

Social Security Administration, request for parent locator services, SSA-2953, on occasion, State-child support agencies, 75,000 responses, 6,250 hours, Reese B. F. 395-3211.

Office of Human Development, evaluation of the Head Start bilingual bicultural curriculum development project, other (see SF-83), bilingual bicultural curriculum teachers and teacher aides, 120 responses, 60 hours, human resources division, 395-3532.

V 43/188 SE 27 78 UMI

DEPARTMENT OF LABOR

Department and other legal identity report, 2000-7, on occasion, all coal or other mine oper. or any design indep. contr., 24,000 responses, 12,000 hours, Strasser, A., 395-6132.

Departmental and other record of individual exposure to Radon Daughters, MSHA 4000-9, annually metal/nonmetal mining and milling operations, 100 responses, 800 hours, Strasser, A., 395-6132.

REVISIONS

VETERANS ADMINISTRATION

Income—net worth and employment statement, 21-527, on occasion, veteran 174,000 responses, 174,000 hours, Caywood, D. P., 395-3443.

DEPARTMENT OF AGRICULTURE

Economics, statistics, and cooperatives service, multiframe hog and cattle survey, quarterly, hog and cattle farmers, 185,167 responses, 45,872 hours, Ellett, C. A., 395-6132.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

National Center for Education Statistics NLS fourth followup field test, 2,422, 2,423, single-time, graduates of the high school class of 1971, 22,000 responses, 22,000 hours, Office of Federal Statistical Policy and Standard, Laverne V. Collins, 673-7956.

Alcohol, Drug Abuse and Mental Health Administration, study of the impact of family therapy treatment on client outcomes and program functioning, single-time, drug treatment program staff and clients, Richard Eisinger, 395-3214.

Health Care Financing Administration (medicare), quarterly estimates of expenditures for medical assistance payments, HCFA 65, series, quarterly, State agencies administering medical assistance per title XIX, 440 responses, 1,320 hours, Caywood, D. P., 395-3443.

Office of the Secretary, income survey development program—1978 research panel (January 1979), OS-6-78-A, quarterly, household members in national probability sample, 2,350 responses, 11,750 hours, Office of Federal Statistical Policy and Standard, 673-7956.

Social Security Administration, application for hospital insurance, SSA-18 F4, on occasion, persons over 65 do not app. eligibility benefits, but want health insurance, 15,000 responses, 3,750 hours, Reese B. F., 395-3211.

DEPARTMENT OF JUSTICE

Law Enforcement Assistance Administration, national crime survey basic screen questionnaire, crime incident report, nonInterview record, control card NCS-1, 2, 7, and 500, on occasion, households in 376 PSU's, 917 responses, 153 hours, Office of Federal Statistical Policy and Standard, Laverne V. Collins, 673-7956.

DEPARTMENT OF LABOR

Bureau of Labor Statistics, job vacancy information in electric appliance repair shops, 2751A, 2751B, 2752A, 753F, 2753G, 275AF, cal., 552, on occasion, established in specialized SIC's, and SMSA's; sel. firms with repair facility, 33,400 responses 100,200 hours, Strasser, A., 395-6132.

EXTENSIONS

DEPARTMENT OF ENERGY

ERDA uniform contractor reporting guide (UCRG), DOE 533P, 533M, 534P, 534M, 535, 536, 537, and 538, other (see SF-83), DOE contractors, 99,360 responses, 74,520 hours, C. Louis Kincannon, 395-3211.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service, black stem rust inspectors report (plant pest control), PPQ 543, on occasion, barberry nurserymen, 900 responses, 450 hours, Ellett, C. A., 395-6132.

Economics, Statistics, and Cooperative Service, chicken and egg report, monthly, egg producers, 51,200 responses, 5,120 hours, Ellett, C. A., 395-6132.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration, image receptor module, FD 2578A, single-time, operators of X-ray equipment, 560 responses, 140 hours, Office of Federal Statistical Policy and Standard, 673-7956.

Social Security Administration:

Domestic service questionnaire, SSA-7155-F4, on occasion, employers of domestic employees, 20,000 responses, 10,000 hours, Reese B. F., 395-3211.

Application for benefits for an individual in a mental institution, SSA-2333, on occasion, public mental institutions, 25,000 responses, 3,825 hours, Reese B. F., 395-3211.

Letter to employer requesting him to furnish wages earned by beneficiary, SSA-L725, on occasion, any employer who has wages to report for an employee, 263,000 responses, 21,900 hours, Reese B. F., 395-3211.

Social Security Administration, employment relationship questionnaire, SSA-7160 F4, on occasion, employees and employers who must have work relations resolved for social security, 50,000 responses, 25,000 hours, Reese B. F., 395-3211.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Housing management, family's dwelling unit inspection report, section 8, existing housing, HUD 52579, HUD 52580, on occasion, families participating in section 8 program, 100,000 responses, 150,000 hours, Caywood, D. P., 395-3443.

DEPARTMENT OF LABOR

Bureau of Labor Statistics, information for the wholesale price index, 473C, 473D, monthly, electric utilities petroleum companies, 1,618 responses, 353 hours, Strasser, A., 395-6132.

Employment Standards Administration, wage transcription and computation sheet, WH-55, on occasion, individual employers, 42,000 responses, 10,500 hours, Strasser, A., 395-6132.

Bureau of Labor Statistics, work injury report, BLS-98, single-time, workers injured as a result of specified source, 3,000 responses, 500 hours, Office of Federal Statistical Policy and Standard, 673-7956.

DAVID R. LEUTHOLD,
Budget and Management Officer.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 10411; 812-4347]

A CORPORATE TRUST, SERIES 1 (AND SUBSEQUENT SERIES) AND BEAR, STEARNS & CO.

Filing of Application

SEPTEMBER 19, 1978.

Notice is hereby given that a corporate trust, series 1 (and subsequent series) ("Trust"), a unit investment trust registered under the Investment Company Act of 1940 ("Act"), and its sponsor, Bear, Stearns & Co. ("Sponsor"), 55 Water Street, New York, N.Y. 10041, (collectively "Applicants"), filed an application on August 10, 1978, and an amendment thereto on September 15, 1978, for an order, pursuant to section 6(c) of the Act, exempting Trust from the provisions of sections 14(a) and 22(d) of the Act and rules 19b-1 and 22c-1 thereunder. All interested person are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Each Series of Trust ("Series") will be created under the laws of Massachusetts pursuant to a separate trust agreement ("Agreement") among Sponsor, Bradford Trust Co. as trustee ("Trustee"), Bradford Trust Co. of Boston as cotrustee, and Interactive Data Services, Inc., as evaluator ("Evaluator"). Each Agreement will contain certain standard terms and conditions of trust which will be common to each Series of Trust, and each Agreement will be executed and delivered on or before the time the registration statement filed pursuant to the Securities Act of 1933 with respect to the particular Series becomes effective.

Pursuant to each Agreement, Sponsor will deposit with Trustee debt obligations ("Debt Obligations"), which Sponsor shall have accumulated for such purpose, in a principal amount at least equal to the aggregate offering price of the units ("Units") of the Trust to be offered. Simultaneously with such deposit, Trustee will deliver to Sponsor registered certificates for the Units which will represent the entire ownership of the particular Trust. Sponsor will in turn offer these Units for sale to the public.

Applicants represent that the Debt Obligations will not be pledged or in any other way be subjected to any debt at any time after the Debt Obligations are deposited in a Trust, except for the lien of Trustee as security for certain liabilities as set forth in the Agreement. Applicants state that the Debt Obligations will be long-term debt obligations issued primarily by corporations. The assets of each Trust will consist of Debt Obligations, such debt obligations as may have been acquired in exchange for or substituted for Debt obligations or for such debt obligations, accrued and undistributed interest and undistributed cash. Applicants also state that certain Debt Obligations may be sold from time to time under special circumstances which are set forth in the Agreement or may be redeemed or may mature in accordance with their terms.

Each Unit of a Trust will represent a factional undivided interest in such Trust. The numerator of the fractional interest represented will be 1, the denominator will be the number of Units in the particular Trust then outstanding. Units will be redeemable and in the event that any Units shall be redeemed, the denominator of the fraction will be reduced and the fractional undivided interest represented by each Unit will be increased. Units will remain outstanding until redeemed or until the termination of the Agreement. The Agreement with respect to any particular Trust may be terminated by agreement of the holders of Units of such Trust ("Certificate holders") holding 67 percent of the Units then outstanding, or, if the value of the Debt Obligations in a particular Trust shall fall below 40 percent of the aggregate principal amount of the Debt Obligations originally deposited in such Trust, upon direction of Sponsor to Trustee, provided that in no event will a Trust continue beyond the earlier of the disposition of the last Debt Obligation in the Trust or the expiration of twenty years after the death of the last survivor of the six persons named in the Agreement.

Following the deposit of Debt Obligations in a Trust by Sponsor, the date upon which such Trust's registration statement under the Securities Act of 1933 becomes effective, and the date upon which clearance by the securities authorities of various states is received, Applicants state that Sponsor will offer Units of the Trust to the public at the public offering prices set forth in the prospectus for such Trust plus a sales charge of 4½ percent. Applicants also state that during the initial offering period, purchasers of 100 or more Units of each Trust will be entitled to a discount from the public offering price of $5 per Unit. Applicants represent that Sponsor intends to maintain a market for Units of each Trust and continuously to offer to purchase such Units at prices in excess of the redemption prices as set forth in the Agreement. Applicants state that in the absence of this secondary market, investors may only be able to dispose of their certificates by redeeming them.

SECTION 6(c)

Section 6(c) of the Act provides, in part, that the Commission may, upon application, conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions from any provisions of the Act or from any rule or regulation under the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

SECTION 14(a)

Section 14(a) of the Act provides, in substance, that no registered investment company and no principal underwriter for such company shall made a public offering of securities of which such company is the issuer unless (1) the company has a net worth of at least $100,000; (2) such company has previously made a public offering of its securities, and at the time of such offering had a net worth of $100,000; or (3) provision is made that a net worth of $100,000 will be obtained from not more than 25 responsible

V 43/188 SE 27 78 UMI

persons within 90 days, or the entire proceeds received by such company, including any sales charge, will be refunded on demand.

Applicants request an order, pursuant to section 6(c) of the Act, exempting the Trust from compliance with the provisions of section 14(a) of the Act. In support of the requested exemption, Applicants represent that Sponsor agrees (1) to refund the sales load to purchasers of Units in any Trust, if within 90 days after the registration of such Trust under the Securities Act of 1933 becomes effective, the net worth of such Trust shall be reduced to less than $100,000 or if such Trust is terminated, (2) to instruct Trustee on the date Debt Obligations are deposited in any Trust that if such Trust shall at any time have a net worth of less than 40 percent of the aggregate principal amount of the Debt Obligations originally deposited in such Trust, as a result of redemption by Sponsor of Units constituting a part of the unsold Units, then Trustee shall terminate such Trust in the manner provided in the Agreement with respect to such Trust and distribute any Debt Obligations or other assets deposited with Trustee pursuant to such Agreement as provided therein; and (3) in the event of termination for the reasons described in (2) above, to refund any sales load to any purchaser of Units purchased from Sponsor.

SECTION 22(d)

Certificateholders of each Series of Trust will have the option to reinvest automatically and at a reduced sales charge income and principal distributions into Units of future Series ("Future Series") or, if no Future Series is available, into Units of a previously formed Series which have been purchased by Sponsor in the secondary market and with respect to which a registration statement is currently effective ("Secondary Series") (Future Series and Secondary Series are collectively referred to as "Available Series"). Each Certificateholder who elects the automatic reinvestment option ("Plan") will have his interest and principal distributions reinvested on each semiannual payment date in fractional units ("Plan Units") of the then currently effective Available Series. Applicants state that it is Sponsor's intention that an Available Series will be offered on or about each semiannual record date, which shall be June 1 and December 1 of each year. Each Available Series will be a unit investment trust similar to Trust. On or about each semiannual record date, a current prospectus relating to the semiannual record date, a current prospectus relating to the Available Series will be mailed to each participant along with a letter which will remind each participant that Plan Units are being purchased for him unless he notifies Trustee by the next semiannual payment date that he no longer wishes to participate in the Plan or in the particular transaction. If (a) Sponsor does not have a currently effective Available Series on any payment date or (b) the Available Series materially differs from the Trust in Sponsor's opinion, then Applicants state it is Sponsor's intention to suspend the Plan and distribute to each participant his regular semiannual distribution in cash. If the Plan is so suspended, it will resume with the next semiannual payment date.

Applicants state that they propose to offer the right to participate in the Plan only to Certificateholders of record in each Series of Trust who have selected the semiannual plan of distribution. Applicants state that a Certificateholder will be able to join the Plan at any time by delivering an authorization form to Trustee and that a participant may withdraw at any time upon written notice to Trustee. Once delivered to Trustee, an authorization form will constitute a valid election to participate in the Plan with respect to all Units purchased in the Trust (and with respect to Plan Units purchased with the distributions from the Units purchased in the Trust) for each subsequent distribution as long as the Certificateholder continues to participate in the Plan. However, if there should be a material change in the policies of Applicants which adversely affects Certificateholders or Plan participants, the authorization will be voided and participants will be both notified of the policy change and provided with a new authorization form which must be returned to Trustee before the Certificateholder will again be able to participate in the Plan.

Unless a Certificateholder notifies Trustee in writing to the contrary, any Certificateholder who has acquired Units through the Plan will be deemed to have elected both the semiannual plan of distribution and to participate in the Plan with respect to distributions made in connection with Units so purchased under the Plan. A Certificateholder may withdraw from the Plan with respect to distributions related to Plan Units, and remain in the Plan with respect to Units acquired other than through the Plan. All distributions made with respect to Plan Units will be accumulated with distributions generated from the Units of the Series of Trust used to purchase such additional Plan Units, but no distributions generated from Units of other Series will be accumulated with the foregoing distributions for Plan purchases. Thus, if a person owns Units of more than one Series (which are not the result of purchases under the Plan) then distributions with respect to those Units will not be aggregated for purchases under the Plan.

Under the Plan (subject to compliance with applicable State securities laws) participants will purchase Plan Units from Sponsor at a price equal to the aggregate offering price per Unit of the Debt Obligations in the Available Series portfolio divided by 100, plus a sales charge equal to 3.627 percent of the offering side evaluation of such Debt Obligations or 3½ percent of the offering price per Plan Unit, rather than the customary 4½ percent sales charge which applies to all primary and secondary sales of Units in the various Series of Trust, plus accrued interest.

Section 22(d) of the Act provides, in pertinent part, that no registered investment company shall sell any redeemable security issued by it except to or through a principal underwriter for distribution or at a current public offering price described in the prospectus, and, if such class of security is being currently offered to the public by or through an underwriter, no principal underwriter of such security and no dealer shall sell any such security to any person, except a dealer, a principal underwriter or the issuer, except at a current public offering price described in the prospectus.

Applicants request an order pursuant to section 6(c) of the Act, exempting the Plan offered with respect to each Series from the provisions of section 22(d) of the Act. In support of their request, Applicants assert that applying a sales charge for Plan purchases of less than the customary 4½ percent charge is both beneficial to Plan participants, and also is warranted in light of the related cost savings. Applicants state that a charge of 1½ percent of the price per Plan Unit is a reasonable and justifiable expense to be allocated by Sponsor to the soliciting broker for his professional assistance to a participant in connection with each Available Series. For this purpose, a participant may designate the broker entitled to receive such commission. If no broker is designated in connection with a particular reinvestment, no such allocation shall be made and Sponsor will retain the commission. Applicants further assert that implementation and continuation of the Plan will create special out-of-pocket costs which should properly be borne by the Plan participants. Applicants represent that Sponsor believes that these special out-of-pocket expenses will amount to 1 percent of the price per Plan Unit. Finally, Applicants state that prior experience indicates that the normal out-of-pocket costs for establishing each Series will approximate 1 percent of the public offering price of Units of each Available Series. Applicants represent that all such costs will be covered by the proposed 3½ percent sales charge. Thus, Applicants conclude that the proposed 3½ percent sales charge for Plan purchases passes through certain cost savings to Plan participants and charges participants for reasonable expenses related to the creation of the Plan and for fees relating to periodic, professional, and financial advice.

RULE 19b-1

Applicants propose to make distributions of interest to Certificateholders either monthly or semiannually, depending upon the plan of distribution chosen by an available to each Certificateholder. In addition, Applicants state that distributions of principal, if any, will be made semiannually, and that distributions of principal constituting capital gains to Certificateholders may arise in two instances: (1) If an issuer calls or redeems an issue held in the portfolio, and (2) if Units are redeemed and Debt Obligations are sold to provide the funds necessary for such redemption. In such instances, Applicants state that a Certificateholder may receive funds which constitute capital gains, because in some cases the value of the Debt Obligations sold will have increased since the date of initial deposit. Applicants anticipate that no capital gains will arise from the sale of Debt Obligations which may occur upon default on payment of principal or interest, or the occurrence of other factors which in the opinion of Sponsor would make the retention of such Debt Obligations in the Trust detrimental to the interests of the Certificateholders.

Rule 19b-1(a) under the Act provides, in substance, that no registered investment company which is a "regulated investment company" as defined in section 851 of the Internal Revenue Code shall distribute more than one capital gain dividend in any one taxable year. Rule 19b-1(b) under the Act contains a similar prohibition for a company not a "regulated investment company," but permits a unit investment trust to distribute capital gain dividends received from a "regulated investment company" within a reasonable time after receipt.

Applicants request an order, pursuant to section 6(c) of the Act, exempting the frequency of the capital gains distributions of the Trust from the provisions of rule 19b-1 under the Act. In support of their request, Applicants assert that a purpose of rule 19b-1(b) is to avoid forcing unit investment trusts to accumulate valid distributions received throughout the year, distributing them only at yearend, and that the operations of a Trust in this regard are squarely within the purpose of such provision. Applicants further assert that the dangers against which rule 19b-1 is intended to guard do not exist in the situation at hand, since neither Sponsor nor Trustee control events which might trigger capital gains. In addition, Applicants state that the amounts involved in a normal distribution of principal are relatively small in comparison to the normal interest distribution, and that such distributions are clearly identified in accompanying reports to Certificateholders as a return of principal.

RULE 22c-1

Following the initial offering period, Applicants state that Sponsor intends to offer to purchase and sell Units in the secondary market at prices based on the offering side evaluation of the Debt Obligations in a Trust, determined on the last business day of each week and effective for all purchases and sales made during the following week. Applicants represent that the pricing by Sponsor in the secondary market will in no way affect the Trust's assets, and that Certificateholders will benefit from Sponsor's pricing procedure by receiving a normally higher repurchase price for their Units without the cost burden of daily evaluations of the Unit redemption value. In addition, Applicants state that Sponsor has undertaken to adopt a procedure whereby Evaluator, without a formal evaluation, will provide estimated evaluations on trading days. In the case of a repurchase of Units in the secondary market, if Evaluator cannot state that the previous Friday's price is at least equal to the current bid price, then Sponsor will order a full evaluation. In case of a resale of Units in the secondary market, Sponsor agrees that if Evaluator cannot state that the previous Friday's price is not more than one-half point ($5 on a Unit representing $1,000 principal amount of underlying Debt Obligations) greater than the current offering price, a full evaluation will be ordered.

Rule 22c-1 under the Act provides, in pertinent part, that no registered investment company issuing any redeemable security shall sell, redeem, or repurchase any such security except at a price based on the current net asset value of such security which is next computed after either receipt of a tender of such security for redemption or receipt of an order to purchase or sell such security.

Applicants state that the secondary market activities of Sponsor and the manner for the acquisition by investors of new Units may be deemed to violate rule 22c-1 because of the absence of daily pricing. Accordingly, Applicants request an order, pursuant to section 6(c) of the Act, exempting the secondary market operations of Sponsor from the provisions of rule 22c-1 under the Act. In support of their request, Applicants assert that rule 22c-1 has two purposes: (1) To eliminate or to reduce any dilution of the value of outstanding redeemable securities of registered investment companies which might occur through the sale, redemption, or repurchase of such securities at prices other than their current net asset values; and (2) to minimize speculative trading practices in the securities of registered investment companies.

Applicants contend that the purposes of rule 22c-1 will not be offended by Sponsor's secondary market activities. Applicants assert that the pricing of Units by Sponsor in the secondary market will in no way dilute the assets of the Trust, and that Certificateholders will benefit from Sponsor's pricing procedure in the secondary market, since they will normally receive a higher repurchase price for their Units than they would receive by redeeming their Units at the current net asset value and that this will be accomplished without the cost burden to the Trust of daily evaluations of the Unit redemption value. Applicants state that only those investors who purchase Units in the secondary market at a price which is higher than the previous Friday's price by one-half point or less may be deemed to suffer any detriment from the lack of daily pricing. However, Applicants contend that such detriment would be offset by the lower cost burden to the Trust of having evaluations made on a weekly rather than a daily basis. In addition, Applicants state that to avoid Sponsor receiving more than the specified sales charge on the resale of Units, Sponsor undertakes not to resell (including resale to the Plan) any Units which it may repurchase at a price below the offering side evaluation of the Debt Obligations in the Trust. Finally, Applicants contend that speculation in Units of any Trust is unlikely because price changes are limited in respect to the kind of Debt Obligations which will be held by such Trust.

Notice is further given that any interested person may, not later than October 13, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such re-

V 43/188 SEP 27 78 UMI

quest shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit or, in case of an attorney at law, by certificate) shall be filed contemporaneously with the request. As provided by rule 0-5 of the rules and regulation promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 10413; 812-4287]

BAXTER-TRAVENOL INTERNATIONAL CAPITAL CORP.

Filing of an Application

SEPTEMBER 19, 1978.

Notice is hereby given that Baxter/Travenol International Capital Corp. ("Applicant"), One Baxter Parkway; Deerfield, Ill. 60015, a wholly owned finance subsidiary of Baxter Travenol Laboratories, Inc. ("Baxter"), filed an application on March 30, 1978, and an amendment thereto on July 18, 1978, pursuant to section 6(c) of the Investment Company Act of 1940 ("Act") and rule 6c-1(c)(2) thereunder, for an order of the Commission to permit the Applicant to issue additional shares of its convertible preferred stock, first series to be offered to purchasers in foreign countries. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant, a Delaware corporation, was formed by Baxter in 1971 to assist in financing the operations of Baxter and its subsidiaries outside the United States and Canada. The convertible preferred stock consists of 500,000 authorized shares, of which 375,000 were issued in November 1971, and sold to foreign investors. This stock is convertible into common stock of Baxter on a share for share basis, and as of February 14, 1978, 270,132 of the issued shares had been converted with 104,868 shares remaining outstanding. The convertible preferred stock carries with it certain dividend rights, liquidation preferences, and redemption payment privileges. The convertible preferred stock is nonvoting except in special circumstances required by law.

In 1972, Baxter and its subsidiaries outside the United States and Canada adopted a stock purchase plan ("Plan") administered by Baxter Services, A.G., a Swiss corporation ("Baxter Services") to offer to employees of certain Baxter subsidiaries operating outside of the United States and who are not nationals or residents of the United States or Canada the right to purchase shares of convertible preferred stock of the Applicant. The Applicant states that to date Baxter Services has obtained the number of shares of its convertible preferred stock needed to fulfill its obligations under the Plan by purchasing outstanding shares. However, it is asserted that the number of shares of the Applicant's convertible preferred stock outstanding is no longer large enough to permit Baxter Services to acquire the necessary shares needed under the Plan. Thus, it is proposed that the Applicant be permitted to issue to Baxter Services for offer and sale to purchasers in foreign countries the remaining 125,000 authorized shares of its convertible preferred stock, solely for the purpose of permitting Baxter Services to fulfill its obligations under the Plan.

Baxter has unconditionally guaranteed the payment of dividends on the convertible preferred stock, the payment and delivery by the Applicant of all amounts and of all shares of Baxter common stock to which holders of convertible preferred stock may be entitled upon redemption or liquidation of the Applicant, and the payment of any additional amounts, if any payable, as a result of the imposition of U.S. withholding taxes; and has agreed to deliver to holders of convertible preferred stock, upon conversion thereof, the appropriate number of shares of Baxter common stock. The common stock of Baxter into which the outstanding shares of convertible preferred stock are convertible has been registered under the Securities Act of 1933, and the common stock of Baxter into which the above shares of convertible preferred stock which are proposed to be issued will be convertible will also be registered under that Act. All convertible preferred stock heretofore issued has been, and the above shares of convertible preferred stock proposed to be issued will be deposited with the Brussels office of the Morgan Guaranty Trust Co. of New York which has issued or will issue bearer depositary receipts ("BDR's") to persons entitled thereto evidencing shares of convertible preferred stock deposited under the deposit agreement with the depositary. The BDR's evidencing outstanding shares of convertible preferred stock are listed on the Luxembourg Stock Exchange and the Applicant asserts that it will apply to said exchange for the listing of BDR's evidencing the above additional shares of convertible preferred stock which it proposes to issue.

The Applicant states that the above shares of convertible preferred stock which it proposes to issue will not be offered or sold directly or indirectly in the United States or to a person who is a national or resident of the United States or its territories or possessions. The Applicant further states that Baxter Services has agreed that none of the above shares of convertible preferred stock proposed to be issued to it by the Applicant will be converted by Baxter Services into common stock of Baxter or delivered by Baxter Services to any employee under the Plan until Baxter Services has held such convertible preferred stock for at least 6 months. Accordingly, it is asserted that no conversion of any of the shares of convertible preferred stock proposed to be issued will take place prior to 6 months from the date of issuance. Finally, the Applicant states that it has conducted its business in such a manner as to comply with all of the requirements of paragraph (b) of rule 6c-1, and it has agreed that the order requested herein may be issued subject to the condition that the Applicant continue to comply with all of the requirements of paragraph (b) of rule 6c-1.

The Applicant states that the above proposed issuance of convertible preferred stock would subject it to the provisions of the Act because the U.S. interest equalization tax has been repealed and has not been replaced by another comparable tax as required by subparagraph (c)(2) of rule 6c-1. Therefore, the Applicant seeks a Commission order to permit it to issue the remaining 125,000 authorized shares.

The Applicant represents that it should be permitted to proceed with the issuance of the remaining 125,000 authorized shares of its convertible preferred stock for, among others, the following reasons:

(1) It is unlikely that U.S. persons will be interested in investing in the convertible preferred stock because the lack of a listing on any domestic securities exchange will make acquisition of such stock by U.S. persons difficult and will discourage the development of a secondary market in the United States for the stock.

(2) Inasmuch as the payment of dividends, the liquidation preference, the redemption payment privileges and the conversion privilege on the convertible preferred stock are guaranteed by Baxter, the quality of the convertible preferred stock does not depend on the operations or investment policy of the Applicant. Accordingly, it is asserted that the public policy that led to the enactment of the Act is not applicable to the Applicant, nor do the security holders of the Applicant require the protections afforded by the Act. In this regard, the Applicant points out that holders of the above shares of convertible preferred stock proposed to be issued will have the benefit of the information made generally available by the disclosure and reporting provisions of the Securities Exchange Act of 1934 and the rules of the New York Stock Exchange, which are applicable to Baxter.

(3) The Applicant does not and will not deal or trade in securities.

Section 6(c) of the Act authorizes the Commission to exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provisions of the Act and rules and regulations thereunder if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than October 12, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon the Applicant at the address stated above. Proof of such service (by affidavit, or in case of an attorney at law by certificate) shall be filed contemporaneously with the request. As provided by rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application herein will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Administrative Proceeding File No. 3-5541; File No. 2-61151, 22-4884]

CAROLINA TELEPHONE AND TELEGRAPH CO.

Application and Opportunity for Hearing

SEPTEMBER 20, 1978.

Notice is hereby given that Carolina Telephone and Telegraph Co. (the "Applicant") has filed an application under clause (ii) of section 310(b)(1) of the Trust Indenture Act of 1939, as amended (the "Act"), for a finding by the Securities and Exchange Commission (the "Commission") that the trusteeships of Bankers Trust Co. under five indentures between Bankers Trust Co. and the Applicant qualified under the Act (the "Prior Indentures") and under an Indenture between Bankers Trust Co. and the Applicant not so qualified (the "new Indenture") are not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify Bankers Trust Co. from acting as trustee under the New Indenture.

Section 310(b) of the Act provides, in part, that if a trustee under an indenture qualified under the Act has or shall acquire any conflicting interest, it shall, within ninety days after ascertaining that it has such conflicting interest, either eliminate such conflicting interest or resign. Subsection (1) of such section provides, in effect (with certain exceptions), that a trustee under a qualified indenture shall be deemed to have a conflicting interest if such trustee is trustee under another indenture under which any other securities of the same issuer are outstanding. However, under clause (ii) of subsection (1), such other indenture may be excluded from the operation of this provision, if the issuer shall have sustained the burden of proving, on application to the Commission and after opportunity for hearing thereon, that trusteeship under such qualified indenture and such other indenture is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify such trustee from acting as such under one of such indentures.

The Applicant alleges the following:

(1) Applicant, a North Carolina corporation with telephone operations in the State of North Carolina, and United Telephone Co. of the Carolinas, Inc., a North Carolina corporation with telephone operations in the States of North Carolina and South Carolina ("Old UTC") are wholly-owned subsidiaries of United Telecommunications, Inc. ("United"). United intends to consolidate the telephone operations of Applicant and Old UTC in the State of North Carolina. Old UTC will first transfer all of its South Carolina assets to a newly-formed corporation. Thereafter Old UTC, reduced in size and having assets only in the State of North Carolina, will merge into Applicant which will be the surviving corporation. In connection with the merger, Applicant plans to issue unsecured Debentures under the New Indenture in the approximate aggregate principal amount of $18,600,000 (the "Debentures"). Pursuant to agreements with the holders thereof (the "Debenture Agreement"), certain outstanding First Mortgage Bonds of Old UTC ("Old UTC Bonds") will be exchanged for Debentures of the Applicant. The principal amount of Old UTC Bonds surrendered in the exchange will be equal to the principal amount of Debentures issued under the New Indenture. The Old UTC Bonds were issued from time to time in sixteen series, designated Series A through P, with each series having differing interest rates, redemption provisions and maturities and each series being equally secured under Old UTC Indentures. The Old UTC Bonds issued under Old UTC Indentures were purchased by institutional investors for investment and not with a view to distribution under the exemption from registration provided by section 4(2) of the Securities Act of 1933, as amended. The Debentures of the Applicant to be issued under the New Indenture and exchanged for Old UTC Bonds will similarly consist of sixteen series, designated Series A through P, with each series having the same interest rate, redemption provisions and maturity as the similarly designated series of Old UTC Bonds and each series of Debentures will rank pari passu under the New Indenture. Copies of the proposed form of the documents setting forth the terms and provisions governing the CTT Debentures to be issued under the New Indenture are attached to Applicant's Application and consist of the following: Schedule A, Debenture Agreement; Exhibit 1, Exchange Agent Agreement; Exhibit 2, Plan of Reorganization and Asset Transfer Agreement; Exhibit 3, Fourth Supplemental Indenture; Exhibit 4, Agreement and Plan of Merger; and Exhibit 5, the New Indenture of CTT. The New Indenture will contain provisions substantially identical to the provisions contained in the Prior Indentures, except for those changes necessary to

UMI

V 43/188 SE 27 78

provide for the issuance of serial Debentures. The New Indenture will contain all of the applicable provisions which would have been required by the Act had the New Indenture been qualified except that Applicant will not be required to file copies of reports with the Commission as required by sections 312(b), 313(d) and 314(a) of the Act and except that the New Indenture will not contain the statement required by section 318(a) of the Act. It is anticipated that the execution of the New Indenture, the merger and the issuance and delivery of the Debentures of the Applicant in exchange for Old UTC Bonds will occur in the third calendar quarter of 1978.

(2) Applicant has appointed Bankers Trust Co., a New York corporation, to act as trustee under the New Indenture.

(3) The Prior Indentures relate to five prior sales to the public of Debentures of Applicant in the original aggregate principal amount of $155,000,000 of which $147,202,000 remained outstanding as of May 31, 1978 (the "Outstanding Debentures"). Copies of the Prior Indentures to which the Application relates and other documents setting the terms and provisions governing the Outstanding Debentures issued thereunder were filed as exhibits to Applicant's Registration Statements under the Securities Act of 1933.

(4) The New Indenture will contain provisions substantially identical to the provisions contained in the Prior Indentures, particularly insofar as the duties and responsibilities of Bankers Trust Co. are concerned. Although not qualified under the Act, the New Indenture will contain, to the fullest extent possible, all the applicable provisions which would have been required under the Act had the New Indenture been so qualified. In addition, the New Indenture and the Prior Indentures contain cross-default provisions so that an event of default under one will constitute an event of default under the others. Thus the existence of the dual trusteeship should in no way inhibit or discourage the actions of Bankers Trust Co. The only material differences between the Indentures and the rights of the holders of Debentures issued thereunder relate to principal amounts, dates of issue, maturity and interest payment dates, interest rates and redemption provisions. However, since the Debentures of the Applicant to be issued under the New Indenture and the Outstanding Debentures issued under the Prior Indentures are unsecured obligations ranking pari passu, neither the above differences nor any other provisions of the Indentures are likely to involve a material conflict of interest so as to make it necessary in the public interest or for the protection of any of the Debenture holders to disqualify Bankers Trust Co. from acting as trustee under such Indentures.

(5) Applicant is not in default under the Prior Indentures.

The Applicant has waived notice of hearing, hearing on the issues raised by its application and all rights to specify procedures under rule 8(b) of the Commission's rules of practice in connection with this matter.

For a further statement of the matters of fact and law asserted, all persons are referred to said application, which is a public document on file in the Commission's Public Reference Section, 1100 L Street NW., Washington, D.C. 20549.

Notice is further given that any interested person may, not later than October 9, 1978, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. At any time after said date, the Commission may issue an order granting the application, upon such terms and conditions as to the Commission may seem necessary or appropriate in the public interest and the interest of investors, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01]

[Release No. 15171; SR-CBOE-78-15]

CHICAGO BOARD OPTIONS EXCHANGE, INC.

Order Approving Proposed Rule Change

SEPTEMBER 19, 1978.

On June 6, 1978, the Chicago Board Options Exchange, Inc. ("CBOE"), LaSalle at Jackson, Chicago, Ill. 60604, filed with the Commission, pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s)(b)(1) (the "Act") and rule 19b-4 thereunder, copies of a proposed rule change which provides that the Chairman or President of the Exchange, under certain circumstances as prescribed by section 6(d)(3) of the Act, many suspend, summarily, members or associated persons and may limit or prohibit, summarily, any person with respect to access to services offered by the Exchange.[1]

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 34-14973, July 18, 1978) and by publication in the FEDERAL REGISTER (43 FR 32341, July 27, 1978). All written statements with respect to the proposed rule change which were filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person were considered and (with the exception of those statements or communications which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552) were made available to the public at the Commission's Public Reference Room.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges, and in particular, the requirements of section 6, and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01]

[Release No. 15173; SR-CBOE-78-23]

CHICAGO BOARD OPTIONS EXCHANGE INC.

Order Extending Comment Period on Proposed Rule Changes

SEPTEMBER 19, 1978.

On August 9, 1978, the Chicago Board Options Exchange, Inc. ("CBOE"), LaSalle at Jackson, Chicago, Ill., filed with the Commission, pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s)(1) (the "Act") and rule 19b-4 thereunder, a proposed rule change which would establish a system where a CBOE employee called an Order Book Official would handle the public limit order book and perform related activities in place of a member of CBOE acting as a Board Broker who now performs these functions.

---

[1] On September 12, 1978, the CBOE filed an amendment to its proposed rule change to provide for notice to the Commission of any summary action taken pursuant to rule 16.1, as required by section 6(d)(3), and to provide that any person aggrieved by summary action taken pursuant to rule 16.1 may apply to the Commission for a stay of such summary action, as permitted by section 6(d)(3).

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of Commission Release (Securities Exchange Act Release No. 34-15081/August 21, 1978) and by publication in the FEDERAL REGISTER (43 FR 38651, August 29, 1978). The original period for the submission by interested persons of written data, views and arguments concerning the submission expired on September 19, 1978. Pursuant to the request of the Board Brokers Association of the CBOE, the Commission hereby extends the period for the submission of written data, views and arguments concerning the foregoing proposals until October 2, 1978.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc. 78-27173 Filed 9-26-78; 8:45 am]

[8010-01]

[Release No. 10410; 812-4341]

IDS PROGRESSIVE FUND, INC., ET AL

Filing of Application

SEPTEMBER 15, 1978.

In the matter of IDS Progressive Fund, Inc., 1000 Roanoke Building, Minneapolis, Minn. 55402, Standard Security Holding Corp., Standard Security Life Insurance, Co. of New York, 485 Madison Avenue, New York, N.Y. 10022.

Notice is hereby given that IDS Progressive Fund, Inc. ("Fund"), an open-end diversified management investment company registered under the Investment Company Act of 1940 ("Act"), Standard Security Holding Corp. ("Holding Company") and Standard Security Life Insurance Co. of New York ("Life Insurance Company") (hereinafter collectively "Applicants") filed an application on August 2, 1978, and an amendment thereto on August 25, 1978, pursuant to section 17(b) of the Act, for an order of the Commission exempting from the provisions of section 17(a) of the Act the proposed exchange of 93,100 shares of Life Insurance Company common stock currently held by the Fund for certain securities of the Holding Company. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

The Fund, A Nevada corporation, invests primarily in common stocks of various companies with a view toward capital appreciation. As of December 31, 1977, the Fund had total net assets of $143,113,648.

As of the same date, the Life Insurance Company had a shareholders' equity of $14,660,679 determined on the basis of generally accepted accounting principles. The Life Insurance Company has outstanding 911,523 shares of common stock, and 150,000 shares of class A stock, for an aggregate of 1,061,523 shares of voting stock outstanding. The Holding Company was incorporated in the State of Delaware on February 10, 1976, primarily for purpose of participating in the proposed transaction described herein and thereby becoming the parent of the Life Insurance Company. The Holding Company currently has no shareholders, and no assets.

Applicants state that during the year 1969, the Fund purchased 31,800 shares of Life Insurance Company common stock at prices ranging from $22.75 to $31.50 per share. Applicants further state that the Fund purchased an additional 63,100 shares of Life Insurance Company common stock during the year 1970 at prices ranging from $9 to $24.50 per share. Applicants further assert that during this 2 year time period from 1969-1970, 1800 shares of Life. Insurance Company common stock were sold by the Fund. According to the application, the 93,100 shares of Life Insurance Company common stock currently held by the Fund were purchased at a total cost of $1,899,875 and represent 8.78 percent of the outstanding voting stock and 10.2 percent of the outstanding common stock of the Life Insurance Company. As of August 22, 1978, such shares had a market value of $786,350 based on a price for Life Insurance Company common stock on that date of $8.25 bid and $8.75 asked.

Applicants represent that the Holding Company is proposing to offer to all the shareholders of the Life Insurance Company the opportunity to exchange their shares of both the common and class A stock of the Life Insurance Company for a designated number of shares of the common and noncumulative convertible preferred stock fo the Holding Company ("Exchange Offer"). The exchange rate for the proposed Exchange Offer will be 10 shares of Holding Company common stock plus 1 share of Holding Company convertible preferred stock for each 10 shares of Life Insurance Company stock (i.e., common or class A) exchanged. The Holding Company also proposes to offer to those Life Insurance Company shareholders who accept the proposed Exchange Offer the nontransferrable privilege of subscribing for the purchase of two additional shares of Holding Company convertible preferred stock at $10 per share for each 10 shares of Life Insurance Company stock exchanged. ("Rights Offering"). Those Life Insurance Company shareholders who accept the proposed Exchange Offer will also acquire a non-transferrable over-subscription privilege to purchase additional Holding Company convertible preferred stock through exercising the subscription privilege of those Life Insurance Company shareholders who choose not to exercise their exchange privilege or, having done so, elect not to exercise their subscription privilege in whole or in part. Applicants further state that the exchange rate was determined by the board of directors of the Holding Company on an arbitrary basis, in view of the absence of any business history of the Holding Company and such directors' determination that the Life Insurance Company shareholders who elect to exchange their securities for the securities of the Holding Company should receive ten shares of the common stock and one share of the convertible preferred stock of the Holding Company and, in addition, such Life Insurance Company shareholders should have the subscription privilege to purchase two additional shares of Holding Company convertible preferred stock for each 10 shares of Life Insurance Company common stock tendered. According to the application, the Fund will receive 93,100 shares of Holding Company common stock and 9,310 shares of Holding Company convertible preferred stock pursuant to the proposed Exchange Offer. Applicants further state that the Fund does not presently intend to exercise its subscription privilege for the purchase of additional shares of Holding Company common stock with respect to the proposed Rights Offering.

Section 17(a) of the Act, in pertinent part, makes it unlawful for any affiliated person of a registered investment company or any affiliated person of such an affiliated person, acting as principal, knowingly to sell any security or other property to, or knowingly purchase any security or other property from, such registered company (other than securities of which the investment company is the issuer) unless an application for an order exempting such proposed transaction from the provisions of section 17(a) of the Act has been filed with the Commission pursuant to section 17(b) of the Act and such application has been granted by Order of the Commission. Section 17(b) of the Act provides that the Commission, upon application, may exempt a proposed transaction from the provisions of section 17(a) of the Act if evidence establishes that the terms of the proposed transaction, including the consideration to be paid or received, are reasonable and fair and do not involve overreaching on the part of any person concerned, and the proposed transaction is consistent

V 4 3 / 1 8 8
SE 27 78

with the policy of each registered investment company concerned, and with the general purposes of the Act.

Section 2(a)(3) of the Act, in pertinent part, defines an affiliated person of another person to include any person owning 5 percent or more of the outstanding voting securities of such other person, or any person under common control with such other person. Since the Fund presently owns 8.78 percent of the outstanding voting stock of the Life Insurance Company, the fund and the Life Insurance Company are affiliated persons of each other within the meaning of section 2(a)(3) of the Act. Moreover, since the Life Insurance Company and the Holding Company have the same boards of directors and executive officers, the Life Insurance Company and the Holding Company may be deemed to be under "common control" and, thus, affiliated persons of each other within the meaning of section 2(a)(3) of the Act. Consequently, the Holding Company may be deemed an affiliated person of an affiliated person (i.e., Life Insurance Company) of a registered investment company. Therefore, making of the Exchange Offer and Rights Offering by the Holding Company to the Fund may be deemed to involve the sale of a security by a registered investment company to an affiliated person of an affiliated person of such investment company and, acceptance by the Fund of the Exchange Offer may be deemed to involve the purchase of a security by such investment company from an affiliated person of an affiliated person thereof. Accordingly, Applicants request an order exempting the proposed transactions from the provisions of section 17(a) of the Act pursuant to section 17(b).

In support of the relief requested, Applicants state that the proposed Exchange Offer, including the exchange rate contained therein, will be made to all Life Insurance Company shareholders on the same basis. With respect to the proposed Rights Offering, Applicants state that all Life Insurance Company shareholders will have the same opportunity to participate. Applicants further state, however, that if a Life Insurance Company shareholder does not exercise his subscription privilege contained in the proposed Rights Offering, the percentage of such shareholders' ownership in the Holding Company will be decreased and such shareholder will have also waived any possible oversubscription privilege. As noted above, Applicants represent that the Fund does not presently intend to exercise its subscription privilege and assuming that all Life Insurance Company shareholders exercise their rights under the proposed Exchange Offer and all such shareholders, except the Fund, exercise their subscription and oversubscription privileges, the Fund's voting power in the Holding Company will be reduced to approximately 7.33 percent from approximately 8.78 percent in the Life Insurance Company.

In support of the relief requested, the Fund sets forth the following reasons why it believes acceptance of the Exchange Offer is advantageous to it:

(a) Assuming all Life Insurance Company shareholders accept the proposed Exchange Offer, all the shares in the Holding Company issued by reason of the proposed Exchange Offer, all other factors being equal, should be of approximately equivalent value with the aggregate shares of the Life Insurance Company exchanged since every shareholder will have the same pro-rata shares of the Holding Company as he did in the Life Insurance Company. Of course, as stated above, the Fund's voting rights in the Holding Company will be reduced to 7.33 percent because the Fund does not propose to exercise its subscription and oversubscription privileges. However, the Fund is, in accordance with its charter, holding the Life Insurance Company common shares for investment and not for control, and therefore the slight reduction in its voting rights that will result after the proposed transactions have been effected will not be detrimental to its interests in the opinion of the Fund's management.

(b) If the Fund refused to accept the proposed Exchange Offer, the Fund would continue to be a minority shareholder in the Life Insurance Company and, as a result of the reduction in trading in the shares of Life Insurance Company common stock that will be the effect of consummation of the proposed transactions, the Fund might not be able to sell its shares at an advantageous price when it desired to do so. Also, it is alleged that if the Fund was one of a small number of remaining minority shareholders in the Life Insurance Company the Holding Company, being the majority shareholder, could take action under applicable State laws to squeeze out the remaining shareholders, which if done might occur at a time and a price disadvantageous to the Fund.

(c) If Progressive exercises its rights under the Exchange Offer and other shareholders do not, Progressive can be considered to have enhanced its position in that the other shareholders will be minority shareholders of the Life Insurance Company and subject to the disadvantages set forth in paragraph (b) above.

(d) It is the intent of the board of directors of the holding Company to pay a dividend on its convertible preferred stock issued pursuant to the proposed Exchange Offer in January of 1979, assuming that financial conditions warrant such action, and it is their further intent to continue paying dividends on the convertible preferred stock with the same restriction. If this dividend is paid, this would represent a yield to the Fund which it currently does not enjoy and for the foreseeable future could not be expected to enjoy on its Life Insurance Company common stock holdings.

Applicants submit on the basis of the foregoing that the terms of the proposed transactions are reasonable and fair and do not involve overreaching on the part of any person concerned. Applicants further represent that the proposed transactions are consistent with the Fund's investment policy and the general purposes of the Act.

Notice is further given that any interested person may, not later than October 9, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by such a statement as to the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing theron. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the addresses stated above. Proof of such service (by affidavit, or in case of an attorney-at-law by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application herein will be issued as of course following said date, unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A FITZSIMMONS,
Secretary.

[Release No. 10412; 812-4226]

INSURED MUNICIPALS-INCOME TRUST, ET AL

Filing of Application

SEPTEMBER 19, 1978.

Notice is hereby given that Insured Municipals-Income Trust (the "Municipal Fund"), and Investors' Corporate-Income Trust (the "Corporate Fund"), both registered under the Investment Company Act of 1940 ("Act") as unit investment trusts (together referred to herein as the "Funds"), their sponsor, Van Kampen Sauerman, Inc., 208 South La Salle Street, Chicago, Ill. 60604, and a co-sponsor of the Corporate Fund, Dain, Kalman & Quail, Inc. (collectively referred to as the "Applicants"), filed an application on July 28, 1978, and an amendment thereto on September 8, 1978, requesting an order of the Commission amending in the manner described below an earlier order of the Commission dated January 31, 1978 (Investment Company Act Release No. 10109). That order pursuant to section 6(c) of the Act exempted from the provisions of section 22(d) of the Act the offer and sale of shares of the Funds pursuant to a conversion option (the "Plan"), and pursuant to section 11 of the Act permitted the Funds to offer their units at net asset value plus a fixed dollar sales charge pursuant to the Plan. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Under the Plan, as currently administered, a certificate holder in either the Municipal Fund or the Corporate Fund wishing to dispose of his units in a series of either Fund for which a secondary market is being maintained has the option to convert his units into units of the opposite Fund (Corporate into Municipal, Municipal into Corporate) or the Investors' Government-Guaranteed Income Trust (the "Government Fund") of any series for which units are available for sale. Applicants state that the purpose of the Plan is to provide investors in each of the Funds a convenient and less costly means of transferring interests as their investment requirements change. Applicants state that the respective sponsors have indicated that they intend to maintain a market for the units of each series of the respective Funds; however, there is no obligation to maintain such a market. Consequently, the respective sponsors reserve the right to modify, suspend or terminate the Plan at any time without further notice to certificate holders.

Assuming a secondary market exists and units of the opposite Fund or the Government Fund are available, a certificate holder who notifies the sponsors of his desire to exercise his conversion option will be mailed a current prospectus for each series in which the certificate holder indicates interest. The certificate holder may then select the series into which he desires his investment to be converted. The conversion transaction will operate in a manner essentially identical to any secondary market transaction, except that the Applicants allow a reduced sales charge for all transactions effected under the Plan. Traditionally, units of the Municipal Fund and the Corporate Fund are repurchased by the sponsors and other underwriters of those Funds at the aggregate offering price per unit of the underlying bonds in the respective Fund Series, and are resold at that price per unit plus a sales charge of 4½ percent of such offering price. Traditionally, units of the Government Fund are repurchased by the sponsor and other underwriters of that fund at the aggregate offering price per unit of the underlying bonds in the respective Series of that Fund, and are resold at that price per unit plus a sales charge of 3½ percent of such offering price. Applicants resell units under the Plan at the unit offering price of the underlying bonds of the opposite Fund or the Government Fund plus a fixed charge of $15 per unit (or about 1½ percent of such offering price at current market values). The certificate holder receives payment for any excess funds remaining in his account after his investment in one Fund is converted into full units in the oppoiste Fund or the Government Fund.

Applicants hereby seek to extend the Plan to certificate holders of Series 1 and subsequent series (as such series may from time to time be created) of the Government Fund, a newly established unit investment trust which is sponsored by Van Kampen Sauerman, Inc. The Government Fund is comprised primarily of mortgage-backed securities of the modified pass-through type fully guaranteed as to principal and interest by the Government National Mortgage Association. Applicants propose to allow Government Fund certificate holders to use the proceeds from the sale of any Government Fund units to acquire units in any series or group of series of both or either the Municipal Fund and/or the Corporate Fund, and to have such aquisitions be based on the same terms and be subject to the same conditions as those presented in the original application, except as follows: Applicants propose that certificate holders of the Government Fund who have held their units for a period of at least 8 months be allowed to acquire Corporate or Municipal Fund units under the Plan at net asset value plus a sales charge of $15 per unit. However, Applicants propose that Government Fund certificate holders who wish to convert their units into units of the Corporate or Municipal Fund prior to the expiration of the 8 month period be allowed to exchange such units at net asset value plus a sales charge based on the greater of $15 per unit or an amount which together with the initial sales charge paid in connection with the acquisition of the units being converted equals 4½ percent of net asset value in the units of the Corporate or Municipal Fund, determined as of the date of conversion.

Applicants assert that the rationale for allowing certificate holders of the Municipal Fund and the Corporate Fund to participate in the Plan and effect Fund transactions at a reduced sales charge is equally applicable to certificate holders of the Government Fund. Thus, Applicants argue that certificate holders of the Government Fund should be allowed to participate in the Plan and convert their units into units of either the Municipal Fund or the Corporate Fund at a reduced sales charge.

Applicants state that the requirement that Government Fund certificate holders pay an adjusted sales charge as outlined above for conversions made by them under the Plan during the first 8 months in which they have held Government Fund units is appropriate since the sales charge relating to original purchases of units is 4½ percent on purchases of Corporate and Municipal Fund units and only 3½ percent on purchases of Government Fund units. They state that it could be possible under certain circumstances for a person to acquire units in the Government Fund and immediately convert such units into units of the Corporate or Municipal Fund and pay a lower total sales charge than a person purchasing Corporate or Municipal Fund units directly at the same time. The application states that under normal circumstances this situation is unlikely, since the initial sales charge on direct purchases of units of the Government Fund (3½ percent of the net asset value) plus the conversion sales charge ($15 per unit or approximately 1½ percent of the net asset value of Corporate or Municipal Fund units based on current market value) usually will exceed the sales charge related to direct purchases of Corporate and Municipal Fund units (4½ percent of the net asset value). However, Applicants state that if the price of Corporate or Municipal Fund units were to increase sharply, the $15 sales charge on conversion could represent less than 1 percent of the net asset value of such

V 4 3 / 1 8 8
S E 2 7 7 8
UMI

units, in which case the converting Government Fund certificate holder could obtain an unfair price advantage when compared to investors making direct purchases of units of the applicable Corporate or Municipal Fund. Applicants assert, however, that after a Government Fund certificate holder has held his Government Fund units for an adquate period of time this discriminatory nature of his effecting a conversion transaction is not as compelling, and thus argue that the possible abuses outlined above are not material if the converting Government Fund certificate holder has held his Government Fund units for at least an 8-month period of time.

Section 11(c) of the Act provides, among other things, that exchange offers involving registered unit investment trusts are subject to the provisions of section 11(a) of the Act irrespective of the basis of exchange. Section 11(a) of the Act provides, in pertinent part, that it shall be unlawful for any registered open-end company or any principal underwriter for such a company to make, or cause to be made, an offer to the holder of a security of such company or any other open-end investment company to exchange his security for a security in the same or another such company on any basis other than the relative net asset values of the respective securities to be exchanged, unless the terms of the offer have first first been submitted to and approved by the Commission.

Section 22(d) of the Act provides, in pertinent part, that no registered investment company or principal underwriter thereof shall sell any redeemable security issued by such company to any person except at a current offering price described in the prospectus. The sales charge described in the prospectus of the Government Fund and each of the Funds for effecting regular secondary market purchase and sale transactions is greater than the sales charge which will be applicable to transactions under the Plan. Rule 22d-1 under the Act permits certain variations in sales charges, none of which it is alleged will be applicable to transactions under the Plan.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security, or transactions, or any class or classes of persons, securities, or transactions from any provision of the Act or of any rule or regulation under the Act, if and to the extent such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than October 12, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon the Applicants at the address stated above. Proof of such service (by affidavit, or in the case of an attorney-at-law by certificate) shall be filed contemporaneously with the request. As provided by rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application herein will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons, who request a hearing or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 10409; 811-2576]

McNEIL MONEY MARKET FUND, INC.

Application

SEPTEMBER 15, 1978.

Notice is hereby given that McNeil Money Market Fund, Inc. ("Applicant"), c/o the Robert A. McNeil Corp., 2855 Campus Drive, San Mateo, Calif. 94403, a California corporation registered under the Investment Company Act of 1940 ("Act") as an open-end, non-diversified investment company, filed an application on July 31, 1978, pursuant to section 8(f) of the Act, for an order of the Commission declaring that Applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant asserts that it was organized on May 7, 1975 and registered under the Act on December 1, 1975. Currently, it has no shareholders other than the Robert A. McNeil Corp. (formerly, Pacific Homes Mortgage and Investment Co.), an affiliate of McNeil Management Corp., the adviser of Applicant. Applicant further asserts that the shareholder has elected by unanimous consent to liquidate and dissolve Applicant and to distribute substantially all of its assets to its remaining shareholder, in proportion to its holdings. According to the application, Applicant has ceased all business activities and no litigation is pending or threatened against Applicant. Moreover, except for the sum of $5,000 which has been retained to cover any miscellaneous expenses, Applicant states that it has no assets. All expenses incurred in connection with the liquidation and dissolution of Applicant will be paid by its adviser.

Section 8(f) of the Act provides, in part, that when the Commission upon application finds that a registered investment company has ceased to be an investment company, it shall so declare by order and, upon the effectiveness of such order the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than October 12, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01]

[Release No. 10408; 812-4336]

PILGRIM FUND INC. AND PILGRIM FORMULA SHARES, INC.

Application

SEPTEMBER 15, 1978.

Notice is hereby given that Pilgrim Fund Inc. ("Pilgrim") and Pilgrim Formula Shares, Inc. ("PFS") (collectively, "Applicants" or "Funds"), 185 Cross Street, Fort Lee, N.J., 07024, both open-end, diversified management investment companies registered under the Investment Company Act of 1940 ("Act"), filed an Application on July 20, 1978, and an amendment thereto on September 1, 1978, for an order, pursuant to section 17(b) of the Act, exempting from the provisions of section 17(a) of the Act a proposed sale of the assets of PFS in exchange for shares of Pilgrim, and pursuant to section 17(d) of the Act and rule 17d-1 thereunder, permitting Pilgrim Management Corp. ("Management"), to pay certain expenses incurred by Applicants in the proposed transaction. All interested persons are referred to the Application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicants represent that, on June 30, 1978, the total net assets of Pilgrim were $13,641,986, and those of PFS were $3,306,530. They state that the investment objective of Pilgrim is to seek possible long-term capital appreciation. PFS seeks to increase capital during periods of stock market strength and to preserve it during periods of stock market weakness through a fixed timing formula. Applicants state that they have the same investment adviser, Management.

According to the application, Pilgrim and PFS have entered into a Plan and Agreement of Reorganization dated July 12, 1978 (the "Plan"). Under the Plan, PFS will transfer to Pilgrim all of its net assets, except an amount to pay the expenses of liquidation and dissolution of PFS and any other liabilities not assumed by Pilgrim. The assets to be transferred by PFS to Pilgrim consists primarily of cash, receivables and marketable securities. In exchange for such assets, PFS will receive shares of Pilgrim's capital stock. The number of Pilgrim shares to be issued to PFS in exchange for PFS's net assets shall be determined by dividing the aggregate market value of PFS's net assets by the net asset value of each Pilgrim share. The valuation of PFS's total net assets and the net asset value per share of Pilgrim shall be determined as of the close of business on the business day immediately preceding the closing of the acquisition, which shall be no later than seven (7) business days after the stockholders of PFS shall have approved the Plan.

Applicants represent that on the effective date of the acquisition, each outstanding share of capital stock of PFS will be converted into fractional or full and fractional shares of capital stock of Pilgrim having the same aggregate net asset value as the shares being converted, and that no sales charge will be payable upon the conversion of shares.

Applicants state that Pilgrim and PFS have capital loss carryforwards for Federal income tax purposes at June 30, 1978, of approximately $2,706,000 and $833,980, respectively, and that the Board of Directors of each Fund has determined that the net asset values are to be determined by net assets as recorded on the books without recognition of each Fund's existing capital loss carryforward, since realization on such carryforward is contingent on the future existence of capital gains, which is uncertain, and because the loss carryforwards are approximately in the same proportion as each Fund's total net assets are to each other.

Applicants represent that the Plan will be submitted to the shareholders of PFS at the annual meeting to be held on October 26, 1978, and that under applicable law, it is not necessary to submit the Plan for approval by the shareholders of Pilgrim.

The application states that the obligation of each Fund to effect the proposed transaction is subject to, among other things, the approval of the Plan by the requisite vote (at least two-thirds of all outstanding shares) of the shareholders of PFS, the grant of all necessary orders and approvals under the Act and under the securities laws generally, and the receipt of either a ruling from the Internal Revenue Service or an opinion of counsel to the effect that the transaction will constitute a tax-free reorganization and that no gain or loss for Federal income tax purposes will be recognized to the shareholders of PFS upon the exchange of shares of PFS for Pilgrim shares pursuant to the Plan, and that the basis and holding period of the shares of Pilgrim to be received by the shareholders of PFS pursuant to such exchange will be the same as the basis and holding period of the PFS shares in their hands immediately prior to the exchange. The transaction also may be abandoned at any time prior to the effective date by mutual consent of the Boards of Directors of the Applicants. The application states that dissenting shareholders of PFS will have dissenter's rights pursuant to the applicable provisions of the General Corporation Law of Maryland, and shareholders also have the right to have their shares redeemed at current net asset value in accordance with the Act before or after the effective date of the transaction.

Applicants represent that they have agreed with Management that the estimated total expenses of the transaction of approximately $13,545 will be borne as follows:

(a) PFS will pay the costs normally associated with the holding of its annual meeting, including the preparation of the proxy statement which will include the proposal to vote upon the Plan. This will include the legal and accounting fees in connection with the preparation of the proxy statement and the consummation of the exchange (estimated at approximately $4,350);

(b) Pilgrim will pay its legal and accounting fees associated with the preparation of the Plan, the consummation of the exchange, and the filing of the registration statement to cover the issuance of its shares to PFS pursuant to the Plan (estimated at approximately $4,350); and

(c) Management will pay the additional costs of printing and mailing the proxy statement and registration statement to the shareholders of PFS to the extent such costs would not normally be borne by PFS as part of its annual meeting of shareholders (estimated at approximately $4,845).

The application states that the investment management agreements between PFS and Management and Pilgrim and Management both require Management to reduce its management fee to the extent that the aggregate operating expenses of the respective Fund (including the management fee but excluding taxes, interest, brokerage commissions, and certain extraordinary expenses) exceed the allowable expense limitations of the State in which shares of that Fund are registered for sale having the most stringent expense reimbursement provision. As of June 30, 1978, the most stringent expense limitation applicable to both PFS and Pilgrim, was two (2) percent of the first $10 million of average net assets, one-and-one-half (1½) percent of the next $20 million of assets, and one (1) percent of average net assets in excess of $30 million.

Section 17(a) of the Act provides, in pertinent part, that it shall be unlawful for an affiliated person of a registered investment company, or any affiliated person of such a person, knowingly to sell to such registered investment company any security or other property. Section 2(a)(3) of the Act provides, in part, that an affiliated person of another person means any person directly or indirectly controlling, controlled by, or under common control with, such other person. Applicants state that the Applicants may be

UMI
V 43/188
SEP 27 78
UMI

deemed to be affiliated persons of one another because each has investment advisory agreements with Management and because the Applicants have certain officers and directors in common with one another and with Management. Section 17(b) of the Act provides, in pertinent part, that the Commission upon application, shall exempt a proposed transaction from the provisions of section 17(a) if evidence establishes that the terms of the proposed transaction, including the consideration to be paid or received, are fair and reasonable and do not involve overreaching on the part of any person concerned, and that the proposed transaction is consistent with the policy of each registered investment company concerned and with the general purposes of the Act. Applicants have requested an order pursuant to section 17(b) of the Act exempting the proposed transaction from the provisions of section 17(a) of the Act.

Applicants submit that the terms of the proposed exchange are reasonable and fair and do not involve overreaching on the part of any person concerned since Pilgrim will be issuing shares to PFS at an exchange ratio based on their relative net asset values and without the payment of any commission. The application states that due to an excess of redemptions over sales of new shares, PFS has experienced over the past several years a decline in outstanding shares and net assets, that the directors believe this trend may continue, and that the combined assets of Pilgrim and PFS will keep the expense ratio from rising as fast as it otherwise might. Applicants represent that the Board of Directors recognizes that the management fee paid by Pilgrim to Management will be at a higher rate (¼ of 1 percent) than currently paid by PFS on the first $25 million of net assets, thus benefiting Management. Applicant submits that in considering how the proposed acquisition of the assets of PFS by Pilgrim would be finanially beneficial to both Funds, the Board of Directors of each Fund estimated the net reduction in costs expected to result from the exchange to be approximately $14,825 per annum, based on the then current size of the Funds, or approximately 5.4 percent of the actual combined expenses of Applicants for the last fiscal year. The application states that while the Directors of PFS and Pilgrim did not obtain independent advice of counsel regarding the proposed merger, they were aware of the alternatives available to PFS, including liquidation of the Fund and finding a new investment manager, and unanimously determined that under all circumstances the transaction was fair and in the best interest of PFS's shareholders. Applicants submit that the Directors of each Fund reviewed the current portfolio of both Funds, determining that many securities are of similar nature and quality, and meet the investment policies and criteria for both Funds. Applicants estimate that it will be necessary to sell portfolio securities of PFS equivalent to less than five (5) percent of the net assets of PFS in order to be acceptable to Pilgrim, and any brokerage expenses incurred by PFS in effecting the exchange of its assets will be minimal. Applicants submit that, if approved by the shareholders of PFS, the proposed exchange will be consistent with the policies of the Applicants and the general purposes of the Act.

Section 17(d) of the Act and rule 17d-1 thereunder prohibit, in pertinent part, any affiliated person of a registered investment company, acting as principal, from effecting any transaction in which such investment company is a joint participant, unless an application has been filed with the Commission and has been granted by order. In passing upon such applications, the Commission will consider whether the participation of such registered company in such arrangement, on the basis proposed, is consistent with the provisions, policies, and purposes of the Act, and the extent to which such participation is on a basis different from, or less advantageous than, that of other participants. Applicants have requested an order pursuant to section 17(d) of the Act and rule 17d-1 thereunder to permit Management to pay certain of the expenses incurred by Applicants in the proposed exchange. Applicants and Management submit that the cost-sharing arrangements, summarized above, are reasonable and fair to the parties after taking into account the relative benefits to each party, and have been approved by the noninterested directors of the Applicants.

Notice is further given that any interested person may, not later than October 10, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant(s) at the address stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release 34-15172; File No. SR-NASD-78-11]

NATIONAL ASSOCIATION OF SECURITIES DEALERS, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub L. 94-29, 16 (June 4, 1975) notice is hereby given on September 15, 1978, the National Association of Securities Dealers, Inc. ("NASD" or "Association") filed with the Securities and Exchange Commission a proposed rule change as follows:

THE NASD'S STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE-

The NASDAQ, Inc., Board of Directors and the NASD Board of Governors have determined that a reduction of NASDAQ subscription rates by means of a refund of 10 percent of total billings for levels 1, 2, and 3 service for the fiscal year ending September 30, 1978, be dispersed to each NASDAQ subscriber.

THE NASD'S STATEMENT ON PURPOSE OF PROPOSED RULE CHANGE

Section G of part IV of schedule D of the association's bylaws provides that "The Board of Governors may, at any time, refund to subscribers any charges or portion of charges that it deems appropriate." The Board of Governors determined at its meeting in September 1978 to refund 10 percent of total billings for levels 1, 2, and 3 service for fiscal year 1978 to each NASDAQ subscriber

THE NASD'S STATEMENT ON BASIS UNDER THE ACT FOR PROPOSED RULE CHANGE

Section 15A(b)(5) provides that an association of brokers and dealers shall not be registered as a national securities association unless the Commission determines that the rules of the association provide for the equitable allocation of reasonable dues, fees, and other charges among members and issuers and other persons using any facility or system which the association operates or controls.

THE NASD'S STATEMENT ON COMMENTS RECEIVED FROM MEMBERS, PARTICIPANTS, OR OTHERS 'ON THE PROPOSED RULE CHANGE

Comments from the membership were not solicited nor received.

THE NASD'S STATEMENT ON BURDEN ON COMPETITION

It is felt that no burden on competition is imposed by the proposed rule change.

THE NASD'S STATEMENT ON BASIS FOR ACCELERATED APPROVAL OF PROPOSED RULE CHANGE

The association requests that pursuant to section 19(b)(2) of the Act the Commission approve this proposed rate reduction prior to the 30th day after the date of publication in the FEDERAL REGISTER and suggests that the Commission has good cause for doing so.

NASDAQ, Inc., is on the accrual method of accounting for tax purposes and we have been advised by tax counsel that unless all events necessary to establish the refund are accomplished prior to fiscal year end, September 30, 1978, there is a potential tax liability of up to 48 percent of the funds to be utilized for the refund should NASDAQ, Inc., be determined to be a taxable company. Tax counsel further advises that because Commission approval is required for the rate reduction, the failure to obtain such approval prior to September 30, 1978, may prevent any such reductions from being accrued as a deduction against potential fiscal 1978 income tax.

Within 35 days of the date of publication of this notice in the FEDERAL REGISTER (November 1, 1978), or within such longer period: (1) As the Commission may designate up to ninety (90) days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding; or (2) as to which the above-mentioned self-regulatory organization consents, the Commission will: (a) By order approve such proposed rule change; or (b) institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons desiring to make written submissions should file six (6) copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before October 9, 1978.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

SEPTEMBER 19, 1978.

Agency for International Development

[Redelegation of Authority No. 99.1.101]

REGIONAL DEVELOPMENT OFFICER, FIJI

Redelegation of Authority Regarding Contracting Functions

Pursuant to the authority delegated to me as Director, Office of Contract Management, under Redelegation of Authority No. 99.1 (38 FR 12836) from the Assistant Administrator for Program and Management Services of the Agency for International Development, I hereby redelegate to the Regional Development Officer, Fiji, the authority to sign U.S. Government contracts, grants, or amendments thereto provided that the aggregate amount of each individual contract or grant does not exceed $25,000 or local currency equivalent.

The authority delegated herein is to be exercised in accordance with regulations, procedures, and policies established or modified and promulgated within AID and is not in derogation of the authority of the Director of the Office of Contract Management to exercise any of the functions herein redelegated.

The authority herein redelegated may be exercised by duly authorized persons who are performing the functions of the Regional Development Officer in an acting capacity.

This redelegation of authority is effective immediately.

Dated: September 18, 1978.

HUGH L. DWELLEY,
Director, Office of Contract Management.

RESEARCH ADVISORY COMMITTEE

Notice of Meeting

Pursuant to Executive Order 11769 and the provisions of section 10(a)(2), Pub. L. 92-463, Federal Advisory Committee Act, notice is hereby given of the A.I.D. Research Advisory Committee meeting on October 31-November 1, 1978, at the Pan Amerian Health Organization Building, 23d Street and Virginia Avenue NW., Conference Room "C" to review, appraise, and make recommendation to the Administrator, Agency for International Development, concerning projects proposed for A.I.D. central research funding in the field of food and nutrition, rural development and health. The meeting will begin at 9 a.m. and adjourn at 5:30 p.m. each day. The meeting is open to the public. Robert C. Simpson, Director, Office of Program, Bureau for Development Support, is designated as the A.I.D. representative at the meeting. It is suggested that those desiring more specific information, contact Mr. Simpson, 1601 North Kent Street, Arlington, Va. 22209, or call area code 202-235-8898.

Dated: September 19, 1978.

ROBERT C. SIMPSON,
A.I.D. Representative, Research Advisory Committee.

[Public Notice 629]

DETERMINATION UNDER SECTION 5(a) OF THE ATLANTIC TUNA CONVENTIONS ACT OF 1975

Pursuant to section 5(a) of the Atlantic Tuna Conventions Act of 1975 (16 U.S.C. 971c(a)), the Secretary of State, with the concurrence of the Secretaries of Commerce and Transportation, has determined that the purposes of the International Convention for the Conservation of Atlantic Tunas (TIAS 6767) would be served by bringing into effect with respect to the United States on August 9, 1978, the recommendation of the International Commission for the Conservation of Atlantic Tunas to extend for 2 years to August 10, 1980, the recommendation of the Commission which calls on the parties to the Convention to limit the fishing moratality of Atlantic bluefin tuna to "recent levels".

ADVISORY COMMITTEE ON INTERNATIONAL INTELLECTUAL PROPERTY

Notice of Meeting

The International Industrial Property Panel of the Department of State's Advisory Committee on International Intellectual Property will meet in open session on October 30, 1978, at the Department of State in Conference Room 1105, from 9:30 a.m. to 1 p.m.

The purpose of this open meeting will be to discuss the following topics.

1. The revision of the Paris Industrial Property Convention;
2. The U.N. Conference on Science and Technology for Development;
3. The UNCTAD Code of Conduct on Transfer of Technology;
4. Miscellaneous industrial property matters.

The public attending may, as time permits and subject to the instructions of the Chairman, participate in the discussions or may submit their views in writing to the Chairman prior to or at the meeting for later consideration by the Committee.

Members of the public who plan to attend the meeting will be admitted up to the limits of the conference room's capacity. Entrance to the Department of State is controlled and entry will be facilitated if arrangements are made in advance of the meeting. Members of the general public who plan to attend the meeting are requested to provide their name, affiliation, and address to Mr. Steven Brattain, Office of Business Practices, Department of State, telephone 202-632-3491 prior to October 26, 1978. All non-Government attendees at the meeting should use the C Street entrance to the building.

Dated: September 20, 1978.

HARVEY J. WINTER,
Executive Secretary.

[Notice No. 78-6]

ADVISORY COMMITTEE ON EXPLOSIVES TAGGING AND ITS TECHNICAL SUBCOMMITTEE

Closed Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. App. I 10(a)(2)), notice is hereby given that a closed meeting of the Advisory Committee on Explosives Tagging and its Technical Subcommittee will be held on November 2, 1978, at the Federal Building, 1200 Pennsylvania Avenue NW., Washington, D.C., Room 4033, beginning at 9:30 a.m. (e.s.t.).

The Advisory Committee and its Technical Subcommittee will discuss detailed proprietary, scientific, and technical data concerning various candidate explosive tagging systems that can be used in the detection and identification of explosives. The information which will be presented and discussed during the meeting will constitute trade secrets and commercial or financial information obtained from a person and privileged or confidential within the ambit of 5 U.S.C. 552b(c)(4). Accordingly, the meeting of the Advisory Committee and its Technical Subcommittee will, under authority of section 10(d) of the Federal Advisory Committee Act (5 U.S.C. App. I 10(d)), not be open to the public.

All communications regarding this meeting of the Advisory Committee and its Technical Subcommittee should be addressed to the Bureau of Alcohol, Tobacco and Firearms, Washington, D.C. 20226, Attention: Mr. Robert F. Dexter, Committees Manager, Technical Services Division, Explosives Technology Branch, Room 8233.

Signed: September 19, 1978.

JOHN S. KROZMAN,
Acting Director.

ASSIGNMENT OF HEARINGS

SEPTEMBER 22, 1978.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 142059 (Sub-29F), Cardinal Transport, Inc., now being assigned for pre-hearing conference, October 30, 1978, at the Offices of Interstate Commerce Commission, Washington, DC.

MC 61264 (Sub-30F), Pilot Freight Carriers, Inc., now being assigned for pre-hearing conference, November 6, 1978, at the Offices of Interstate Commerce Commission, Washington, DC.

MC 113855 (Sub-427F), International Transport, Inc., now being assigned for pre-hearing conference, November 20, 1978, at the Offices of Interstate Commerce Commission, Washington, DC.

MC 19227 (Sub-M1F), Leonard Bros. Trucking Co. Inc., now being assigned for hearing November 28, 1978, at the Offices of Interstate Commerce Commission, Washington, DC.

MC 143629 (Sub-1F), R. E. Oerman, DBA Oerman Road Service, & Towing, now being assigned for hearing November 30, 1978, at the Offices of Interstate Commerce Commission, Washington, DC.

MC 21866 (Sub-98F), West Motor Freight, Inc., now being assigned for hearing December 5, 1978, at the Offices of Interstate Commerce Commission, Washington, DC.

MC 139917 (Sub-5), Searail, Inc., now being assigned for hearing on November 28, 1978 (9 days), at New Orleans, LA, in a hearing room to be later designated.

MC 119226 (Sub-103F), Liquid Transport Corp., now assigned for October 17, 1978, at Chicago, IL is canceled and reassigned for November 28, 1978 (1 day), at Nashville, TN, in a hearing room to be later designated.

MC 115826 (Sub-295F), W. J. Digby, Inc., now assigned for hearing on November 29, 1978, at Denver, CO is canceled and transfered to Modified Procedure.

MC 117792 (Sub-8F), J. C. Jackson, Jr., DBA Farm Products Co., transferred to Modified Procedure.

MC 138178 (Sub-6F), Heflin Industries, Inc., transferred to modified procedure.

MC 135874 (Sub-108F), LTL Perishables, Inc., now assigned October 12, 1978, at Chicago, IL is postponed indefinitely.

MC 123115 (Sub-19F), Packer Transportation Co., now assigned for October 2, 1978, at Carson City, NV is postponed indefinitely.

MC 95350 (Sub-8F), R. W. Jones Trucking Co., now assigned October 16, 1978, at Salt Lake City, UT, is cancelled and reassigned to October 16, 1978, (2 weeks), at Denver, CO, in a hearing room to be later designated.

MC 51146 (Sub-590F), Schneider Transport, Inc., MC 114457 (Sub-379), Dart Transit Co., MC 118989 (Sub-186F), Container Transit, Inc.

MC 119726 (Sub-124F), N. A. B. Trucking Co., Inc., MC 123255 (Sub-153F), B & L Motor Freight, Inc., MC 126276 (Sub-190F), Fast Motor Service, Inc., and MC 134922 Sub-254, F. B. J. McAdams, Inc., now being assigned pre-hearing conference October 31, 1978, at the Offices of the Interstate Commerce Commission, Washington, DC.

MC 35321 (Sub-1F), Henry S. Erschen, Inc., transferred to Modified Procedure.

MC 60014 (Sub-57), Aero Trucking, Inc., now assigned for hearing on November 14, 1978, at St. Louis, MO is cancelled and application dismissed.

MC 57697 (Sub-14), Lester Smith Trucking, Inc., now assigned for hearing on December 4, 1978, at Denver, CO is cancelled and application dismissed.

MC 111812 (Sub-550), Midwest Coast Transport, Inc., now being assigned for continued hearing on November 1, 1978, at the Offices of the Interstate Commerce Commission, Washington, DC. MC-F-13463, The Lake Shore Motor Freight Co.—Purchase—Olsen Express, Inc., and MC 13569 Sub-34 and 35, Lake Shore Motor Freight Co., now being assigned October 24, 1978, at the Offices of the Interstate Commerce Commission, Washington, DC, and continued to November 14, 1978, at the Offices of the Interstate Commerce Commission, Washington, DC.

MC-F-2787, Evanston Fireproof Warehouse, et al—control—Allied Van Lines, Inc., petition to reopen record was denied. MC-C-9886, Vanpac Carriers, Inc., v. Allied Van Lines, Inc., dismissed.

MC 143578 (Sub-1), Wilson Bus Co., Inc., and MC 143578 (Sub-2F), Wilson Bus Co., Inc., now being assigned for continued hearing on November 2, 1978, at the Offices of the Interstate Commerce Commission, Washington, DC.

[Docket No. AB-19(Sub-36)

BALTIMORE & OHIO RAILROAD CO.

Abandonment Near Willard and Sandusky—and Abandonment of Operations—Over Line Jointly Owned With Norfolk & Western Railway Co. and Trackage Rights Over Consolidated Rail Corp. Near Sandusky in Huron and Erie Counties, Ohio; Findings

Notice is hereby given pursuant to section 1a(6)(a) of the Interstate Commerce Act (49 U.S.C. 1a(6)(a)) that by a decision entered on March 1, 1978, and the decision of the Commission, Division 2, served August 8, 1978, as modified, adopted the decision of the administrative law judge, which is administratively final, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in Oregon Short Line R. Co.-Abandonment Goshen, 354 ICC 584 (1978), the present and future public convenience and necessity permit the abandonment by the Baltimore & Ohio Railroad Co. (1) of a proton of its Sandusky Branch between valuation station 4637+00 at or near Willard, Ohio, and valuation station 6113+51.5 at or near Sandusky, a distance of approximately 29.22 miles, (2) to abandon its operations over a line jointly owned with the Norfolk & Western Railway Co. between valuation station 6116+56.6 and valuation station 6141+62 at or near Sandusky, Ohio, a distance of approximately 0.47 mile, and (3) to abandon trackage rights over Consolidated Rail Corp. line between valuation station 6113+51.5 and valuation station 6116+56.5 at or near Sandusky, Ohio, a distance of approximately 0.06 mile. A certificate of abandonment will be issued to the Baltimore & Ohio Railroad Co. based on the above-described finding of abandonment, 30 days after publication of this notice (October 27, 1978), unless within 30 days from the date of publication, the Commission further finds that:

(1) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued; and

(2) It is likely that such proffered assistance would:

(a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) Cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such person or entity to enter into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line and to provide for the continued operation of rail services over such line. Upon notification to the Commission of the execution of such an assistance or acquistion and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in the notice of the Commission entitled "Procedures for Pending Rail Abandonment Cases" published in the FEDERAL REGISTER on March 31, 1976, at 41 FR 13691, as amended by publication of May 10, 1978, at 43 FR 20072. All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced decision.

[7035-01]

[Docket No. AB-19 (Sub-27)[1]

BALTIMORE & OHIO RAILROAD CO.

Abandonment Between Flora and Sangamon Junction, in Clay, Effingham, Fayette, Shelby, Christian and Sangamon Counties, Illinois; Findings

Notice is hereby given pursuant to section 1a(6)(a) of the Interstate Commerce Act (49 U.S.C. 1a(6)(a)) that by a decision entered June 8, 1978, a finding, which is administratively final, was made by the Commission, Division 1, acting as an appellate division, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in *Oregon Short Line R. Co.-Abandonment Goshen*, 354 ICC 584 (1978), the present and future public convenience and necessity permit abandonment by the Baltimore & Ohio Railroad Co. of its line of railroad between Flora and Sangamon Junction, from station 3961+17 to station 3415+49, a distance of approximately 103.29 miles in Clay, Effingham, Fayette, Shelby, Christian, and Sangamon Counties, Illinois.

A certificate of abandonment will not be issued to the Baltimore & Ohio Railroad Co. based on the above-described finding of abandonment until final determination of the proceeding by the U.S. Court of Appeals. During the interim, however, the procedures specified in section 1a (6) and (7) of the Act will otherwise be followed. Thus, the Commission will be in position to issue a certificate of abandonment 30 days after publication of this notice (October 27, 1978) unless within 30 days from the date of publication, the Commission further finds that:

(1) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment), to enable the rail service involved to be continued; and

(20 It is likely that such proffered assistance would:

(a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) Cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such person or

[1] This proceeding is pending review in the U.S. Court of Appeals for the Seventh Circuit, entitled *Illinois Department of Transportation v. United States of America and Interstate Commerce Commission*, No. 78-2020.

V 43/188 SE 27 78

entity to enter into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line and to provide for the continued operation of rail services over such line. Upon notification to the Commission of the execution of such an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect.

However as previously indicated no such certificate will be issued until the pending court proceeding has been finally resolved. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in the notice of the Commission entitled "procedures for Pending Rail Abandonment Cases" published in the FEDERAL REGISTER on March 31, 1976, at 41 FR 13691, as amended by publication of May 10, 1978, at 43 FR 20072. All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced decision.

[Docket No. AB-18 (Sub-17)]

CHESAPEAKE & OHIO RAILWAY CO.

Abandonment of Portion of Greenbrier Branch Between North Caldwell and Durbin in Greenbrier and Pocahontas Counties, WV; Findings

Notice is hereby given pursuant to section 1a(6)(a) of the Interstate Commerce Act (49 U.S.C. 1a(6)(a)) that by a decision entered on December 15, 1977, and the decision of the Commission, served August 16, 1978, as modified, adopted the decision of the administrative law judge, which is administratively final, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in *Oregon Short Line R. Co.-Abandonment Goshen*, 354 ICC 584 (1978), the present and future public convenience and necessity permit the abandonment by the Chesapeake & Ohio Railway Co. of a portion of its Greenbrier branch between valuation station 161+43 at or near North Caldwell and valuation station 5021+22 at or near Durbin all in Greenbrier and Pocahontas Counties, WV, a distance of approximately 92.04 miles. A certificate of abandonment will be issued to the Chesapeake & Ohio Railroad Co. based on the above-described finding of abandonment, 30 days after publication of this notice (October 27, 1978), unless within 30 days from the date of publication, the Commission further finds that:

(1) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued; and

(2) It is likely that such proffered assistance would:

(a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) Cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such person or entity to enter into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line and to provide for the continued operation of rail services over such line. Upon notification to the Commission of the execution of such an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acqisition of the involved rail line are contained in the notice of the Commission entitled "Procedures for Pending Rail Abandonment Cases" published in the FEDERAL REGISTER on March 31, 1976, at 41 FR 13691, as amended by publication of May 10, 1978, at 43 FR 20072. All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced decision.

[7035-01]

IRREGULAR-ROUTE MOTOR COMMON CARRIERS OF PROPERTY

Elimination of Gateway Letter Notices

SEPTEMBER 20, 1978.

The following letter-notices of proposals to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's Gateway Elimination Rules (49 CFR 1065), and notice thereof to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed with the Interstate Commerce Commission on or before October 9, 1978. A copy must also be served upon applicant or its representative. Protests against the elimination of a gateway will not operate to stay commencement of the proposed operation.

Successively filed letter-notices of the same carrier under these rules will be numbered consecutively for convenience in identification. Protests, if any, must refer to such letter-notices by number.

The following applicants seek to operate as a *common carrier*, by motor vehicles, over irregular routes.

MC 32882 (Sub-E-7), filed August 29, 1978. Applicant: MITCHELL BROS. TRUCK LINES, P.O. Box 17039, Portland, OR 97217. Representative: Lex F. Page (same as above). (1) *Commodities* which by reason of size or weight, require special handling or the use of special equipment, and commodities (except motor vehicles and motor vehicle cabs and bodies, and except classes A and B explosives), which do not requre special handling or the use of special equipment when moving in the same shipment on the same bill of lading as commodities which by reason of size or weight require special handling or the use of special equipment; (2) *self-propelled vehicles*, weighing 15,000 pounds or more, transported on trailers and related machinery, tools, parts, and supplies moving in connection therewith; (3) *iron and steel articles* as described in appendix V to the Commission's report in Descriptions in Motor Carrier Certificates, 61 MCC 209 and 766; (4) *pipe and pipe fittings* (except iron and steel); and (5) *construction materials* (other than forest products, lumber, lumber products, and wood products, and commodities in bulk) between points in CO, on the one hand, and, on the other, points in OR and WA. (Gateway eliminated: Points in UT.)

MC 32882 (Sub-E-8), filed August 29, 1978. Applicant: MITCHELL BROS. TRUCK LINES, P.O. Box 17039, Portland, OR 97217. Representative: Lex F. Page (same as above). *Commodities*, the transportation of which, by reason of size or weight, requires the use of special equipment and *related machinery parts and related contractor's materials and supplies* when their transportation is incidental to, and which move in the same shipment and on the same bill of lading, the transportation of the commodities authorized above,

between points in Sedgwick County, CO, on the one hand, and, on the other, points in Washoe County, NV, and points in Humboldt County, NV, on and west of U.S. Hwy 95. (Gateways eliminated: Points in UT and points in Lake County, OR.)

MC 32882 (Sub-E-9), filed August 29, 1978. Applicant: MITCHELL BROS. TRUCK LINES, P.O. Box 17039, Portland, OR 97217. Representative: Lex F. Page (same as above). *Machinery or contractor's equipment* when also self-propelled articles, weighting 15,000 pounds or more, transported on trailers between points in ID, in and north of Idaho County, on the one hand, and, on the other, points in CO. (Gateways eliminated: Points in UT and WA.)

MC 32882 (Sub-E10), filed August 29, 1978. Applicant: MITCHELL BROS. TRUCK LINES, P.O. Box 17039, Portland, OR 97217. Representative: Lex F. Page (same as above). (1) *Lumber*, (2) *building materials which are wood products or lumber products*, (3) *building materials which are also iron and steel articles* as described in appendix V to the Commission's report in descriptions in Motor Carrier Certificates, 61 MCC 209 and 766, and (4) *pipe and tubing* (other than iron and steel) when also building materials, between points in Sedgwick County, CO, on the one hand, and, on the other, points in Washoe County, NV, and points in Humboldt County, NV, on and west of U.S. Hwy 95. (Gateways eliminated: Lake County, OR, in parts (1) and (2), and the gateways of Lake County, OR, and UT in parts (3) and (4).)

MC 32882 (Sub-E11), filed August 29, 1978. Applicant: MITCHELL BROS. TRUCK LINES, P.O. Box 17039, Portland, OR 97217. Representative: Lex F. Page (same as above). *Commodities*, which by reason of size or weight require special handling or the use of special equipment and *related machinery parts and related contractor's materials and supplies* which do not require special handling or the use of special equipment when moving in the same shipment on the same bill of lading as commodities which by reason of size or weight require special handling or the use of special equipment, between points in ID in and north of Idaho County, on the one hand, and, on the other, points in CO. (Gateways eliminated: Points in UT and WA.)

MC 32882 (Sub-E12), filed August 29, 1978. Applicant: MITCHELL BROS. TRUCK LINES, P.O. Box 17039, Portland, OR 97217. Representative: Lex F. Page (same as above). *Iron and steel articles* as described in appendix V to the Commission's Report in Descriptions in Motor Carrier Certificates, 61 MCC 209 and 766, between points in CO, on the one hand, and, on the other, points in Washoe, and Douglas Counties, NV, and points in Humboldt, Pershing, Storey, Churchill, Lyon, and Mineral Counties, NV, on and west of U.S. Hwy 95. (Gateways eliminated: Points in UT and OR.)

MC 32882 (Sub-E13), filed August 29, 1978. Applicant: MITCHELL BROS. TRUCK LINES, P.O. Box 17039, Portland, OR 97217. Representative: Lex F. Page (same as above). *Commodities* which by reason of size or weight, require special handling or the use of special equipment and *related machinery parts and related contractors' materials and supplies*, which do not require special handling or the use of special equipment when moving in the same shipments on the same bill of lading as commodities which by reason of size or weight require special handling or the use of special equipment, between Lookout Pass, MT, on the one hand, and, on the other, points in Prowess, Brent, Otero, Baca, Kiowa, Los Animas, Cheyenne, and Kit Carson Counties, CO. (Gateways eliminated: Points in UT and WA.)

MC 32882 (Sub-E14), filed August 29, 1978. Applicant: MITCHELL BROS. TRUCK LINES, P.O. Box 17039, Portland, OR 97217. Representative: Lex F. Page (same as above). *Construction materials*, between points in ID in and north of Idaho County, on the one hand, and, on the other, points in CO. (Gateways eliminated: Points in UT and WA.)

MC 32882 (Sub-E15), filed August 29, 1978. Applicant: MITCHELL BROS. TRUCK LINES, P.O. Box 17039, Portland, OR 97217. Representative: Lex F. Page (same as above). *Forest products and lumber* when also construction materials, from points in ID in and west of Owyhee, Elmore, Boise, Valley, Idaho, Clearwater, Shoshone, Bonner, and Boundary Counties, to points in CO. (Gateways eliminated: Points in UT, OR, and WA.)

MC 32882 (Sub-E16), filed August 29, 1978. Applicant: MITCHELL BROS. TRUCK LINES, P.O. Box 17039, Portland, OR 97217. Representative: Lex F. Page (same as above). (1) *Commodities*, which by reason of size or weight, require special handling or the use of special equipment, and commodities (except motor vehicles and motor vehicle cabs and bodies, and classes A and B explosives), which do not require special handling or the use of special equipment when moving in the same shipment on the same bill of lading as commodities which by reason of size or weight require special handling or the use of special equipment; (2) *self-propelled articles*, weighing 15,000 pounds or more, transported on trailers; (3) *iron and steel articles* as described in appendix V to the Commission's report in Descriptions in Motor Carrier Certificates, 61 MCC 209 and 766; (4) *pipe* (except iron and steel); and (5) *construction materials*, between points in Moffat, Routt, Jackson, Larimer, Weld, Morgan, Logan, Sedgwick, and Phillips Counties, CO, and points in San Luis Obispo, Santa Barbara, Kings, Tulare, and Kern Counties, CA. (Gateways eliminated: Points in UT and OR.)

MC 32882 (Sub-E17), filed August 29, 1978. Applicant: MITCHELL BROS. TRUCK LINES, P.O. Box 17039, Portland, OR 97217. Representative: Lex F. Page (same as above). *Iron and steel articles* when also construction materials, between Lookout Pass, MT, on the one hand, and, on the other, points in Prowess, Brent, Otero, Baca, Kiowa, Los Animas, Cheyenne, and Kit Carson Counties, CO. (Gateways eliminated: Points in UT and WA.)

MC 32882 (Sub-E18), filed August 29, 1978. Applicant: MITCHELL BROS. TRUCK LINES, P.O. Box 17039, Portland, OR 97217. Representative: Lex F. Page (same as above). *Pipe and tubing* (except iron and steel) when also construction materials, between points in ID in and north of Idaho County, on the one hand, and, on the other, points in CO. (Gateways eliminated: Points in UT and WA.)

MC 32882 (Sub-E19), filed August 29, 1978. Applicant: MITCHELL BROS. TRUCK LINES, P.O. Box 17039, Portland, OR 97217. Representative: Lex F. Page (same as above). *Iron and steel articles* when also commodities which by reason of size or weight require special handling or the use of special equipment; and *related machinery parts and related contractors' materials and supplies* which are iron and steel articles when their transportation is incidental to the transportation of the commodities authorized above, between points in ID in and north of Idaho County, on the one hand, and, or the other, points in CO. (Gateways eliminated: Points in UT and WA.)

MC 32882 (Sub-E20), filed August 29, 1978. Applicant: MITCHELL BROS. TRUCK LINES, P.O. Box 17039, Portland, OR 97217. Representative: Lex F. Page (same as above). (1) *Commodities* which by reason of size or weight, require special handling or the use of special equipment, and commodities (except motor vehicles and motor vehicle cabs and bodies, classes A and B explosives, and household goods as defined by the Commission) which do not require special handling or the use of special equipment when moving in the same shipment on the same bill of lading as commodities which by reason of size or weight require special handling or the use of special equipment; (2) *self-propelled articles*, weighing 15,000 pounds or more, transported on

V 43/188 SE 27 78 UMI

trailers; (3) *iron and steel articles,* as described in appendix V to the Commission's report in Descriptions in Motor Carrier Certificates, 61MCC 209 and 766; (4) *pipe* (except iron and steel); and (5) *construction materials,* between points in CO, on the one hand, and, on the other, points in CA in and north of Monterey, Fresno, Madera, Tuolumne, and Alpine Counties. (Gateways eliminated: Points in UT and OR.)

MC 32882 (Sub-E21), filed August 29, 1978. Applicant: MITCHELL BROS. TRUCK LINES, P.O. Box 17039, Portland, OR 97217. Representative: Lex F. Page (same as above). *Machinery or contractors' equipment* when also commodities which by reason of size or weight require special handling or the use of special equipment and commodities (except motor vehicles and motor vehicle cabs and bodies, and classes A and B explosives), which do not require special handling or the use of special equipment when moving in the same shipment on the same bill of lading as commodities which be reason of size or weight require special handling or the use of special equipment, between points in ID in and north of Idaho County, on the one hand, and, on the other, points in CO. (Gateways eliminated: Points in UT and WA.)

MC 32882 (Sub-E22), filed August 29, 1978. Applicant: MITCHELL BROS. TRUCK LINES, P.O. Box 17039, Portland, OR 97217. Representative: Lex F. Page (same as above). *Iron and steel articles* when also construction materials, between points in ID in and north of Idaho County, on the one hand, and, on the other, points in CO. (Gateways eliminated: Points in UT and WA.)

MC 32882 (Sub-E23), filed August 29, 1978. Applicant: MITCHELL BROS. TRUCK LINES, P.O. Box 17039, Portland, OR 97217. Representative: Lex F. Page (same as above). *Machinery or contractors' equipment* when also commodities which by reason of size or weight require special handling or the use of special equipment and commodities (except motor vehicles and motor vehicle cabs and bodies, and except classes A and B explosives) which do no require special handling or the use of special equipment when moving the same shipment on the same bill of lading as commodities which by reason of size or weight require special handling or the use of special equipment, between Lookout Pass, MT, on the one hand, and, on the other, points in Prowess, Brent, Otero, Baca, Kiowa, Las Animas, Cheyenne, and Kit Carson Counties, CO. (Gateways eliminated: Points in UT and WA.)

MC 32882 (Sub-E24), filed August 29, 1978. Applicant: MITCHELL BROS. TRUCK LINES, P.O. Box 17039, Portland, OR 97217. Representative: Lex F. Page (same as above). (1) *Machinery* and (2) *building materials* restricted in (1) and (2) to commodities which by reason of size or weight require special handling or the use of special equipment and commodities (except motor vehicles and motor vehicle cabs and bodies, and classes A and B explosives), which do not require special handling or the use of special equipment when moving in the same shipment on the same bill of lading as commodities which be reason of size or weight require special handling or the use of special equipment, between points in Sedgwick County, CO, on the one hand, and, on the other, points in Washoe County, NV, and points in Humboldt County, NV, on and west of U.S. Hwy 95. (Gateways eliminated: Points in UT and Lake County, OR.)

MC 83539 (Sub-E572), filed May 31, 1977. Applicant: C & H TRANSPORTATION CO., INC., 2010 West Commerce Street, P.O. Box 5976, Dallas, TX 75222. Representative: Douglas Anderson (same as above). *Heavy machinery,* between points in AL, on the one hand, and, on the other, points in CT. Restriction: The authority granted immediately above is subject to the condition that the carrier shall not transport aircraft and missiles, and parts thereof. (Gateways eliminated: Philadelphia, PA, points in VA and NC.)

MC 106644 (Sub-E49), filed February 10, 1975, published in the FEDERAL REGISTER issue of June 28, 1978, and republished, as corrected, this issue. Applicant: SUPERIOR TRUCKING CO., INC., 2770 Peyton Road NW., Atlanta, GA 30318. Representative: Guy H. Postell, Suite 713, 3384 Peachtree Road NE., Atlanta, GA 30326. (1) *Commodities,* the transportation of which, because of size, weight, or shape require the use of special equipment or handling, (2) *self-propelled articles,* each weighing 15,000 pounds or more and *related machinery, tools, parts, and supplies* moving in connection therewith (except in (1) and (2) above, pipe, pipeline machinery, equipment, and supplies incidental to and used in connection with the construction, operation, repair, and servicing and dismantling of pipelines and the stringing or picking up thereof), (a) between OK, on the one hand, and, on the other, points in GA, NC and SC and (b) between points in OK (except points in OK east and south of a line beginning at the OK-AR State line extending west along OK Hwy 9 to junction U.S. Hwy 81, then north along U.S. Hwy. 81 to the TX-OK State line), on the one hand, and, on the other, points in FL east of the Apalachicola River. (Gateways eliminated: Points in MO on and east of U.S. Hwy 61, and points in TN.)

NOTE—The purpose of this republication is to state the correct carrier's name, territorial description, and include an omission (part c).

MC 106644 (Sub-E50), filed February 10, 1975, published in the FEDERAL REGISTER issue of June 28, 1978, and republished, as corrected, this issue. Applicant: SUPERIOR TRUCKING CO., INC., 2770 Peyton Road NW., Atlanta, GA 30318. Representative: Guy H. Postell, Suite 713, 3384 Peachtree Road NE., Atlanta, GA 30326. (1) *Commodities,* the transportation of which, because of size, weight or shape require the use of special equipment or handling, (2) *self-propelled articles,* each weighing 15,000 pounds or more and *related machinery, tools, parts, and supplies* moving in connection therewith (except in (1) and (2) above, pipe, pipeline machinery, equipment, and supplies incidental to and used in connection with the construction, operation, repair, and servicing and dismantling of pipelines and the stringing or picking up thereof), between points in OK, south of a line beginning at Interstate Hwy 44, then along Interstate Hwy 44 to junction Interstate Hwy 40, then west along Interstate Hwy 40 to the OK-TX State line, on the one hand, and, on the other, points in AL south of a line beginning at U.S. Hwy 55 to the AL-FL State line; (c) between points in OK (except points east and south of a line beginning at the OK-AR State line extending along OK Hwy 1 to junction OK Hwy 7, then along OK Hwy 7 to junction U.S. Hwy 81, then along U.S. Hwy 81 to the OK-TX State line), on the one hand, and, on the other, points in AL (except points on and south of U.S. Hwy 82). (Gateways eliminated: Points in MO on and east of U.S. Hwy 61 and points in TN.)

NOTE.—The purpose of this republication is to state the correct carrier's name, territorial description, and include an omission (part c).

MC 106644 (Sub-E50), filed February 10, 1975, published in the FEDERAL REGISTER issue of June 28, 1978, and republished, as corrected, this issue. Applicant: SUPERIOR TRUCKING CO., INC., 2770 Peyton Road NW., Atlanta, GA 30318. Representative: Guy H. Postell, Suite 713, 3384 Peachtree Road NE., Atlanta, GA 30326. (1) *Commodities,* the transportation of which, because of size, weight or shape require the use of special equipment or handling, (2) *self-propelled articles,* each weighing 15,000 pounds or more and *related machinery, tools, parts, and supplies* moving in connection therewith (except in (1) and (2) above, pipe, pipeline machinery, equipment, and supplies incidental to and used in connection with the construction, operation, repair, and servicing and dismantling of pipelines and the stringing or picking up thereof), between points in OK, on the one hand, and, on the other, points in AL (except points south of a line beginning at the OK-MO State line extending along Interstate Hwy 44 to Interstate Hwy 40, then west along Interstate Hwy 40 to the OK-TX State line), on the one hand, and, on the other, points in AL (except points south of a line beginning at the AL-MS State line extending along U.S. Hwy 84 to junction AL Hwy 55, then south along AL Hwy 5 to the AL-FL State line); (b) between points in OK, south of a line beginning at Interstate Hwy 44, then along Interstate Hwy 44 to junction Interstate Hwy 40, then west along Interstate Hwy 40 to the OK-TX State line, on the one hand, and, on the other, points in AL south of a line beginning at U.S. Hwy 55 to the AL-FL State line; (c) between points in OK (except points east and south of a line beginning at the OK-AR State line extending along OK Hwy 1 to junction OK Hwy 7, then along OK Hwy 7 to junction U.S. Hwy 81, then along U.S. Hwy 81 to the OK-TX State line), on the one hand, and, on the other, points in AL (except points on and south of U.S. Hwy 82). (Gateways eliminated: Points in MO on and east of U.S. Hwy 61 and points in TN.)

NOTE—The purpose of this republication is to state the correct applicant's name, insert the commodity description omitted in previous publication, and correct the territorial description.

MC 106644 (Sub-E51), filed February 10, 1975, published in the FEDERAL REGISTER issue of June 28, 1978, and republished, as corrected, this issue. Applicant: SUPERIOR TRUCKING CO., INC., 2770 Peyton Road NW., Atlanta, GA 30318. Representative: Guy H. Postell, Suite 713, 3384 Peachtree Road NE., Atlanta, GA 30326. (1) *Commodities,* the transportation of which, because of size, weight or shape require the use of special equipment or handling, (2) *self-propelled articles,* each weighing 15,000 pounds or more and *related machinery, tools, parts, and supplies* moving in connection therewith (except in (1) and (2) above, pipe, pipeline machinery, equipment, and supplies incidental to and used in connection with the construction, operation, repair, and servicing and dismantling of pipelines and the stringing or picking up thereof), between points in OK, on the one hand, and, on the other, points in MA, NJ and RI. (Gateways eliminated: Points in MO on and east of U.S. Hwy 61, and points in TN and a specified point in NC.)

NOTE.—The purpose of this republication is to state the correct applicant's name and add the second part of the commodity description.

MC 106644 (Sub-E54), filed February 10, 1975, published in the FEDERAL REGISTER issue of June 28, 1978, and republished, as corrected, this issue. Applicant: SUPERIOR TRUCKING CO., INC., 2770 Peyton Road NW., Atlanta, GA 30318. Representative: Guy H. Postell, Suite 713, 3384 Peachtree Road NE., Atlanta, GA 30326. [Notice No. 173]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

September 27, 1978.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the Federal Register publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the Federal Register. On copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

Motor Carriers of Property

MC 107107 (Sub-468TA) filed July 21, 1978. Applicant: ALTERMAN TRANSPORT LINES, INC. (a Florida corporation), 12805 Northwest 42nd Avenue, P.O. Box 425, Opa-Locka, FL 33054. Representative: Ford W. Sewell, 12804 Northwest 42nd Avenue, Opa Locka, FL 33054. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Perishable foods and foodstuff*, in vehicles equipped with mechanical refrigeration—maintain 35 degrees—do not freeze, from Baltimore, MD, to points in FL, GA, NC, SC, and TX for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Manor Hill Food Corp., 1200 Bernard Drive, Baltimore, MD 21223. Send protests to: Donna M. Jones, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, Monterey Building, Suite 101, 8410 Northwest 53d Terrace, Miami, FL 33166.

MC 112617 (Sub-401TA) filed July 21, 1978. Applicant: LIQUID TRANSPORTER, INC. Kentucky corporation), P.O. Box 21395, 1292 Fern Valley Road, Louisville, KY 40221. Representative: Charles R. Dunford (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum pitch*, in bulk, in tank vehicles, from refineries at or near Cathlettsburg, KY to AL, CT, DE, FL, GA, LA, MD, MA, MN, MS, MO, NH, NJ, NY, NC, PA, RI, SC, TN, VT, VA, WI, DC, OH, WV, IL, IN, MI, AR, and IA for 180 days. Supporting shipper: Ashland Petroleum Co., Division of Ashland Oil, Inc., P.O. Box 391, Ashland, KY 41101. Send protests to: Mrs. Linda H. Sypher, District Supervisor, Interstate Commerce Commission, 426 U.S. Post Office Building, Louisville, KY 40202.

MC 114273 (Sub-416TA), filed July 21, 1978. Applicant: CRST, INC., P.O. Box 68, 3930 16th Avenue, Cedar Rapids, IA 52406. Representative: Kenneth L. Core (same as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fibreboard corrugated boxes*, from Philadelphia, PA, to St. Paris, OH, for 180 days. Supporting shipper: Kardon Industries, 1201 Chestnut Street, Philadelphia, PA 19107. Send protests to: Herbert W. Allen, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 518 Federal Building, Des Moines, IA 50309.

MC 114273 (Sub-417TA), filed July 21, 1978. Applicant: CRST, INC., P.O.

V 43-188
SE 27 78
DMI

Box 68, 3930 16th Avenue, Cedar Rapids, IA 52406. Representative: Kenneth L. Core (same as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Adhesives* (except in bulk), in vehicles equipped with mechanically heated and/or refrigeration from Camden, NJ, to points in IL, IN, IA, KS, MN, MO, ND, SD, OK, and WI, for 180 days. Supporting shipper: General Felt Industries, Park 80 West, Saddlebrook, NJ 07662. Send protests to: Herbert W. Allen, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 518 Federal Building, Des Moines, IA 50309.

MC 114273 (Sub-418TA), filed July 21, 1978. Applicant: CRST, INC., P.O. Box 68, 3930 16th Avenue, Cedar Rapids, IA 52406. Representative: Kenneth L. Core (same as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs*, nonfrozen (except in bulk, in tank vehicles), from Danbury and New Milford, CT, to Chicago, IL, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting Shipper: Nestle Co., 100 BLoomingdale Avenue, White Plains, NY 10605. Send protests to: Herbert W. Allen, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 518 Federal Building, Des Moines, IA 50309.

MC 114273 (Sub-437TA), filed July 21, 1978. Applicant: CRST, INC., P.O. Box 68, Cedar Rapids, IA 52406. Representative: Kenneth L. Core (same as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foodstuffs* (except in bulk, in tank vehicles), from Grand Rapids and Lake Odessa, MI, to Bettendorf, IA; Bonner Springs, KS; Chicago IL; Cumberland County, NJ; Kansas City, KS, and Richmond, VA for 180 days. Supporting shipper: Seabrook Foods, Inc., P.O. Box 500, Seabrook, NJ 08302. Send protests to: Herbert W. Allen, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 518 Federal Building, Des Moines, IA 50309.

MC 117068 (Sub-98TA), filed July 21, 1978. Applicant: MIDWEST SPECIALIZED TRANSPORTATION, INC., (Minnesota corporation), North Highway 63, P.O. Box 6418, Rochester, MN 55901. Representative: Allen I. Koenig, P.O. Box 6418, Rochester, MN 55901. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Enameled steel silos, loading and unloading devices, waste storage tanks, livestock feeding systems, livestock feed bunkers, forage metering devices, animal waste spreader tanks, and parts and accessories*, for the above named commodities, over irregular routes, from De Kalb and Eureka, IL, and Elkhorn, WI, to points in MI, IN, KY, TN, MS, AL, FL, GA, SC, NC, VA, WV, MD, VT, NH, ME, and OH (except OH counties of Ashtabula, Belmont, Columbiana, Jefferson, Mahoning, Trumbull and Monroe) for 180 days. Supporting shipper: A. O. Smith Corp., P.O. Box 584, Milwaukee, WI 53201. Send protests to: Delores A. Poe, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, 414 Federal Building, 110 South Fourth Street and U.S. Courthouse, 110 South Fourth Street, Minneapolis, MN 55401.

MC 117589 (Sub-51TA), filed July 21, 1978. Applicant: PROVISIONERS FROZEN EXPRESS, INC., 3801 Seventh Avenue South, Seattle, WA 98108. Representative: Michael D. Duppenthaler, 515 Lyon Building, 607 Third Avenue, Seattle, WA 98104. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Malt beverages and materials and supplies*, incidental to the brewing and packaging of malt beverages, in vehicles equipped with mechanical refrigeration, between Jefferson County, CO, on the one hand, and, on the other, points in WA, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Adolph Coors Co., Golden, CO 80401. Send protests to: Hugh H. Chaffee, District Supervisor, Bureau of Operations, ICC, 858 Federal Building, Seattle, WA 98174.

MC 124078 (Sub-839TA), filed July 21, 1978. Applicant: SCHWERMAN TRUCKING CO., 611 South 28 Street, Milwaukee, WI 53215. Representative: Richard H. Prevette (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Clay and clay slurry*, in bulk, in tank vehicles, from points in Jefferson and Twiggs Counties, GA, and Twiggs County, GA and Aiken County, SC, to points in MA and ME, for 180 days. Supporting shipper: J. M. Huber Corp., Thornall Street, Edison NJ 08817 (F. C. Atherton). Send protests to: Gail Daugherty, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, U.S. Federal Building and Courthouse, 517 East Wisconsin Avenue, Room 619, Milwaukee, WI 53202.

MC 125433 (Sub-162TA), filed July 21, 1978. Applicant: F-B TRUCK LINE CO. (Utah corporation), 1945 South Redwood Road, Salt Lake City, UT 84104. Representative: David J. Lister, 1945 South Redwood Road, Salt Lake City, UT 84104. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Bentonite in 100-pound bags on pallets*, from the facilities of Dresser Minerals at Greybull, WY, to KS, OK, LA, and TX for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days for operating authority. Supporting shipper: Dresser Industries, Inc., P.O. Box 6504, Houston, TX 77005 (Steve Anders, Supervisor of Domestic Traffic, Oilfield Products), Send protests to: L. D. Helfer, District Supervisor, Interstate Commerce Commission, 5301 Federal Building, Salt Lake City, UT 84138.

MC 125689 (Sub-1TA), filed July 21, 1978. Applicant: BEATTYVILLE TRANSPORT, INC. (a Kentucky corporation), P.O. Box 357, Catlettsburg, KY 41129. Representative: Mr. Oakie G. Ford (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Roofing asphalt*, in packages, from plantsite of Ashland Petroleum Co., at Leach, KY, to points in IN, MD, OH, PA, TN, VA, and WV for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Ashland Petroleum Co., Division of Ashland Oil, Inc., P.O. Box 391, Ashland, KY 41101. Send protests to: (Mrs.) Linda Sypher, Interstate Commerce Commission, 426 U.S. Post Office Bldg., Louisville, KY 40202.

MC 126844 (Sub-52TA), filed July 21, 1978. Applicant: R.D.S. TRUCKING CO., INC., 1713 North Main Road, Vineland, NJ 08360. Representative: Terrence D. Jones, 2033 K Street, NW., Washington, DC 20006. [Notice No. 172]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

SEPTEMBER 27, 1978.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

MC 1263 (Sub-29TA), filed July 19, 1978. Applicant: McCARTY TRUCK LINE, INC., 17th and Harris Avenue, Trenton, MO 64683. Representative: Frank W. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment) which are at the time moving on bills of lading of freight forwarders, between Tampa, FL, on the one hand, and on the other, Collier and DeSoto Counties, FL, for 180 days. There is no environmental impact involved in this application. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Florida-Texas Freight, Inc., 11405 Northwest 36 Avenue, Miami, FL 33167. Send protests to: Donna M. Jones, Transportation Assistant, Interstate Commerce Commission, Monterey Building, Suite 101, 8410 N.W. 53rd Terrace, Miami, FL 33166.

MC 133655 (Sub-115TA), filed June 26, 1978, and published in the FEDERAL REGISTER issue of August 24, 1978, and republished as corrected this issue. Applicant: TRANS-NATIONAL TRUCK, INC., P.O. Box 31300, Amarillo, TX 79120. Representative: Warren L. Troupe, 2480 E. Commercial Boulevard, Fort Lauderdale, FL 33308. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Dry animal feed*, (except in bulk), from the facilities of Sunshine Feed Mills, Inc., at Red Bay, AL, and Tupelo, MS, to points in AL, AR, CT, DE, FL, GA, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MN, MS, MO, NE, NH, NJ, NY, NC, ND, OH, OK, PA, RI, SC, TN, TX, VT, VA, WV, WI, and DC, for 180 days. Supporting shipper: Sunshine Feed Mills, Inc., P.O. Drawer S, Red Bay, AL 35582. Send protests to: Haskell E. Ballard, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Box F-13206 Federal Building, Amarillo, TX 79101. The purpose of this republication is to show the complete scope of the application.

MC 136818 (Sub-31TA), filed July 19, 1978. Applicant: SWIFT TRANSPORTATION COMPANY, INC., 335 W. Elwood Road, P.O. Box 3902, Phoenix, AZ 85030. Representative: Donald Fernaays, 4040 E. McDowell Road, Phoenix, AZ 85008. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Composition prepared roofing* from Pittsburgh, CA to points in UT and ID, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Johns-Manville Sales Corp., 2600 Campus Drive, San Mateo, CA 94403. Building Specialties Wholesale, 8620 Franklin Road, Boise, ID 83705. Send protests to: Andrew V. Baylor, District Supervisor, Interstate Commerce Commission, Room 2020, Federal Building, 230 North First Avenue, Phoenix, AZ 85025.

MC 138875 (Sub-98TA), filed July 19, 1978. Applicant: SHOEMAKER TRUCKING COMPANY, An Idaho Corporation, 11900 Franklin Road, Boise, ID 83705. Representative: F. L. Sigloh, Executive Vice President, (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Roofing and roofing materials, and materials, and accessories* (except in bulk) from San Antonio, TX to points in Ada, Canyon and Elmore Counties, ID, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Western Wholesale and Supply Corporation, 2717 Fletcher, Boise, ID 83706. Send protests to: Barney L. Hardin, District Supervisor, Interstate Commerce Commission, Suite 110, 1471 Shoreline Drive, Boise 83707.

MC 140729 (Sub-E3TA), filed May 31, 1978, and published in the FEDERAL REGISTER issue of July 21, 1978, and republished as corrected this issue. Applicant: RUSS EDIGER TRUCKING, INC., 4001 Martindale Road, Sioux Falls, SD 57107. Representative: M. Mark Menard, 5301 No. Cliff, P.O. Box 480, Sioux Falls, SD 57101. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Dairy products* as described in Section B of Appendix I to the report in descriptions in Motor Carrier Certificates, 61 M.C.C. 209 and *supplies* used in the production and distribution of dairy products, between Sioux Falls, SD and points in North Dakota under a continuing contract or contracts with Terrace Park Dairy, Sioux Falls, SD, for 180 days. Supporting Shipper: Terrace Park Dairy, 1501 West Tenth Street, Sioux Falls, SD. Send protests to: J. L. Hammond, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Room 455 Federal Building, Pierre, SD 57501. The purpose of this republication is to show North Dakota as previously omitted.

MC 140902 (Sub-4TA), filed July 19, 1978. Applicant: DPD, INC., 3600 N.W. 82nd Avenue, Miami, FL. Representative: Francis W. McInerny, 1000 Sixteenth Street, N.W., Washington, DC 20036. Authority sought to operate as

a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Motor vehicle parts, components, machinery, equipment or parts, materials, supplies, advertising materials and equipment, materials and supplies* utilized in the manufacture thereof between points in the states of AL, AR, CO, DE, DC, FL, GA, IL, IN, IA, KS, KY, LA, MD, MI, MN, MS, MO, MT, NE, NM, NC, ND, OK, SC, SD, TN, TX, UT, VA, WV, WI, and WY, under a continuing contract or contracts with Chrysler Corporation, Service and Parts Division, restricted to transportation of shipments moving to, from or between manufacturing, warehouses, franchised dealers, and other facilities used by Chrysler Corporation, Service and Parts Division. There is no environmental impact involved in this application. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting Shipper: Chrysler Corporation, 26311 Lawrence Avenue, Center Line, MI 48015. Send protests to: Donna M. Jones, Transportation Assistant, Interstate Commerce Commission, Monterey Building, Suite 101, 8410 N.W. 53rd Terrace, Miami, FL 33166.

MC 140902 (Sub-5TA), filed July 19, 1978. Applicant: DPD, INC., A Florida Corporation, 3600 N.W. 82nd Avenue, Miami, FL. 33152. Representative: Francis W. McInerny, 1000 Sixteenth Street, N.W., Washington, DC 20036. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Tires, tire parts, inner tubes, inner tube parts, wheels;* with mounted tires or without tires and equipment, materials, and supplies used and useful in the manufacture, distribution or repair thereof between points in the states of AL, AR, CT, DE, DC, FL, GA, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MN, MS, MO, NE, NH, NJ, NY, NC, ND, OH, OK, PA, RI, SC, SD, TN, TX, VT, VA, WV, and WI, for 180 days. The operations authorized herein are limited to a transportation service to be performed under a continuing contract or contracts with Firestone Tire and Rubber Company. There is no environmental impact involved in this application. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): The Firestone Tire and Rubber Company, 1200 Firestone Parkway, Akron, OH 44317. Send protests to: Donna M. Jones, Transportation Assistant, Interstate Commerce Commission, Monterey Building, Suite 101, 8410 N.W. 53rd Terrace, Miami, FL 33166.

MC 141621 (Sub-2TA), filed July 19, 1978. Applicant: CHARLES ORTIZ, 311 Soundview Avenue, Bronx, New York 10473. Representative: John H. Caldwell, Peter A. Greene, 900 17th Street, N.W., Washington, DC 20006. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (a) *bread* from the bakery of Denk Baking Corp., Brooklyn, NY to Easton, Emmaus, and Reading, PA and Wilmington, DE, and (b) return movement of *empty bread racks* from Easton, Emmaus and Reading, PA and Wilmington, DE to the bakery of Denk Baking Corp., Brooklyn, NY under a continuing contract or contracts with Denk Baking Corp. for 180 days. Applicant has also filed an underlying ETA seeking up to 30 days operating authority. Supporting shipper(s): Denk Baking Corp., 495 Flatbush Avenue, Brooklyn, NY 11225. Send protests to: Maria B. Kejss, Transportation Assistant, Interstate Commerce Commission, 26 Federal Plaza, New York, NY 10007.

MC 144244 (Sub-3TA), filed June 29, 1978, and published in the FEDERAL REGISTER issue of August 24, 1978, and republished as corrected this issue. Applicant: CRESTON TRANSPORTATION, INC., East Highway 34, Creston, IA 50801. Representative: Frank W. Davis, Jr., 2600 Ruan Center, Des Moines, IA 50309. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Feed and feed ingredients* from points in AR, MN, SD, ND, NE, KS, MO, and IL, to Creston and Benton, IA; (2) *Seed* from points in MN, ND, SD, NE, and MO, to Creston, IA; (3) *Fertilizer dry and fertilizer liquid*, from points in AR, MN, NE, KS, MO, and IL to Creston and Benton, IA; (4) *Liquified petroleum gas*, from points in NE, KS, and MO, to Creston, IA; and (5) *Steel products*, from points in MN, KS, and IL, to Creston and Benton, IA, under a continuing contract or contracts with Farmers Cooperative Co., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Farmers Cooperative Co., 1101 Westview Drive, Creston, IA 50801. Send protests to: Herbert W. Allen, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 518 Federal Building, Des Moines, IA 50309. The purpose of this republication is to correct part (1) to read points in AR and to correct part (3) to read AR and MN as previously published.

MC 144408 (Sub-1TA), filed July 19, 1978. Applicant: DICK HUIZENGA, d.b.a., DICK HUIZENGA TRUCKING, 2882 Pomona Boulevard, Pomona, CA 91766. Representative: Dick Huizenga (same address as above). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Animal feed*, in bulk, from Serape, AZ to Los Angeles and San Bernardino Counties, CA, under a continuing contract or contracts with Amstar Corp., for 180 days. Supporting shipper: Amstar Corp., 50 California Street, San Francisco, CA 94111. Send protests to: Irene Carlos, Transportation Assistant, Interstate Commerce Commission, Room 1321 Federal Building, 300 North Los Angeles Street, Los Angeles, CA 90012.

[Docket No. AB-10 (Sub-No. 10)]

WABASH RAILROAD CO. AND NORFOLK AND WESTERN RAILWAY CO.

Abandonment Portion of Moberly Division and—Abandonment of Trackage Rights and Joint Trackage—Over Connecting Lines in the Counties of Brown, Adams, and Hancock, Ill., and City of Keokuk, Iowa; Findings

Notice is hereby given pursuant to section 1a(6)(a) of the Interstate Commerce Act (49 U.S.C. 1a(6)(a)) that by a decision entered on February 1, 1978, and the decision of the Commission, Division 2, served June 13, 1978, which adopted the decision of the Administrative Law Judge, which is administratively final, stating that, subject to the conditions for the protection of railway employees described by the Commission in *Oregon Short Line R. Co.—Abandonment Goshen*, 354 I.C.C. 584 (1978), the present and future public convenience and necessity permit the abandonment by the Wabash Railroad Co. and Norfolk and Western Railway Co. of (1) 54.5 miles of owned railroad between railroad milepost 479.0, Versailles, and railroad milepost 553.5, Elvaston, in Brown, Adams, and Hancock Counties; (2) trackage rights over Burlington Northern Inc. (BN) between Quincy and Golden, 28.4 miles in Adams County; (3) trackage rights over the Toledo, Peoria, and Western Railroad Co. (T P. & W.) between Elvaston and Hamilton, Ill., 6.5 miles in Hancock County; (4) trackage rights over the Keokuk and Hamilton Municipal Bridge Co. across the Mississippi River, 7 miles; (5) trackage rights over the Keokuk Union Depot Co. in Keokuk, Iowa, 0.25 miles; and (6) operation over 0.58 miles of trackage in Hamilton which is jointly owned by applicants and T. P. & W. A certificate of abandonment will be issued to the Wabash Railroad Co. and Norfolk and Western Railway Co. based on the above-described finding of abandonment, 30 days after publica-

V 4 3 / 1 8 8 SE 27 78

tion of this notice (October 27, 1978), unless within 30 days from the date of publication, the Commission further finds that.

(1) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued; and

(2) It is likely that such proffered assistance would: (a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or (b) cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such person or entity to enter into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line and to provide for the continued operation of rail services over such line. Upon notification to the Commission of the execution of such an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in the Notice of the Commission entitled "Procedures for Pending Rail Abandonment Cases" published in the FEDERAL REGISTER on March 31, 1976, at 41 FR 13691, as amended by publication of May 10, 1978, at 43 FR 20072. All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced decision.

H. G. HOMME, JR.,
Acting Secretary.

COMMODITY FUTURES TRADING COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: Vol. 43, No. 185, Friday, September 22, 1978, page 43083.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 10 a.m., September 26, 1978.

CHANGES IN THE MEETING:

Delete:

1. Final rule imposing of temporary moratorium on the offer and sale of leverage contracts.

2. Proposed Federal Register release seeking public comment concerning the interpretation of contracts of sale of commodity for future delivery within the meaning of the Commodity Exchange Act.

[S-1963-78 Filed 9-25-78; 2:46 pm]

[6570-06]

2

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: S-1929-78.

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: 2:30 p.m. (eastern time), Tuesday, September 26, 1978.

CHANGE IN THE MEETING:

The following matter is added to the open portion of the meeting:

Private Bar Program; Recommended Grant Recipient to Administer Loan Fund.

A majority of the entire membership of the Commission determined by recorded vote that the business of the Commission required this change and that no earlier announcement was possible.

IN FAVOR OF CHANGE:

Eleanor Holmes Norton, Chairman.
Daniel E. Leach, Vice Chairman.
Ethel Bent Walsh, Commissioner.

PROPOSED: None.

CONTACT PERSON FOR MORE INFORMATION:

Marie D. Wilson, Executive Officer, Executive Secretariat, at 202-634-6748.

This notice issued September 22, 1978.

U.S. POSTAL SERVICE, BOARD OF GOVERNORS.

NOTICE OF COMMITTEE MEETING

The Committee on Postal Rates of the Board of Governors of the U.S. Postal Service, pursuant to the bylaws of the Board (39 CFR 5.2, 7.5) and the Government in the Sunshine Act (5 U.S.C. 52b), hereby gives notice that it intends to hold a meeting at 8 a.m. on Tuesday, October 3, 1978, in the

V 43/188 SE 27 78

Postal Service Conference Room, Second Floor, Room 2055, Federal Building, 151 Forest Avenue, Portland, Maine. The meeting is open to the public. Requests for information about the meeting should be addressed to the Secretary of the Board, Louis A. Cox, at 202-245-4632.

The Committee will discuss the Recommended Decision of the Postal Rate Commission of August 9, 1978, to reject certain proposals for separate rates for daily newspapers (Docket No. MC76-2).

LOUIS A. COX,
Secretary.

7

U.S. POSTAL SERVICE, BOARD OF GOVERNORS.

NOTICE OF MEETING

The Board of Governors of the U.S. Postal Service, pursuant to its bylaws (39 CFR 7.5) and the Government in the Sunshine Act (5 U.S.C. 552b), hereby gives notice that it intends to hold a meeting at 8:30 a.m. on Tuesday, October 3, 1978, in the Postal Service Conference Room, Second Floor, Room 2055, Federal Building, 151 Forest Avenue, Portland, Maine. The meeting is open to the public. The Board expects to discuss the matters stated in the agenda which is set forth below. Requests for information about the meeting should be addressed to the Secretary of the Board, Louis A. Cox, at 202-245-4632.

AGENDA

1. Minutes of the previous meeting.
2. Remarks of the Postmaster General.
(In keeping with its consistent practice, the Board's agenda provides this opportunity for the Postmaster General to inform the members of miscellaneous current developments concerning the Postal Service. He might report, for example, the appointment or assignment of a key official, or the effect on postal operations of unusual weather or a major strike in the transportation industry. Nothing that requires a decision by the Board is brought up under this item.)
3. Special Report on Christmas Mail Preparations.
(Mr. Conway, Deputy Postmaster General, will report on Postal Service preparations for the Christmas mailing season.)
4. Report of the Regional Postmaster General.
(Mr. Jellison, Regional Postmaster General, will report on postal conditions in the Northeastern Region.)
5. Report on the Portland, Maine, District, and Management Sectional Center.
(Mr. Peter P. Goodman, District Manager, Portland District, and Mr. Alfred V. Cashman, Sectional Center Manager/Postmaster, will brief the Board on performance in the District and Management Sectional Center, respectively. Informational briefings of this kind are customary at Board meetings outside of Washington, D.C. They are included on the agenda for the instant meeting for the convenience of the Board.)
6. Capital Investment Project, Long Beach, Calif.
(Mr. Biglin, Senior Assistant Postmaster General, will present a proposed project for a new General Mail Facility and Vehicle Maintenance Facility at Long Beach.)
7. Recommended Decision of the Postal Rate Commission on a proposal for changes in the Mail Classification Schedule.
(The Governors will consider the Recommended Decision of August 9, 1978, to reject certain proposals for separate rates for daily newspapers (Docket No. MC76-2).)
8. Review of Capital Investment Program.
(Mr. Biglin will review the general status of, and accomplishments under, the Postal Service's Capital Investment Program.)
9. Review of Public Affairs and Communications Program.
(Mr. Duka, Assistant Postmaster General, Public and Employee Communications Department, will report on developments in the communications area.)

LOUIS A. COX,
Secretary.

OFFICE OF MANAGEMENT AND BUDGET

Office of Federal Procurement Policy

POLICIES FOR ACQUIRING COMMERCIAL OR INDUSTRIAL PRODUCTS AND SERVICES FOR GOVERNMENT USE

Proposed Policy Issuance; Invitation for Public Comment

AGENCY: Office of Federal Procurement Policy, Office of Management and Budget.

SUMMARY: This proposed cost comparison handbook (enclosed) would supplement OMB Circular A-76, "Policies for Acquiring Commercial or Industrial Products and Services for Government Use." It provides comprehensive guidelines for agencies when they conduct a comparative cost analysis to determine whether a particular product or service could be provided more economically by the private sector or by use of Government employees. These guidelines should assure greater accuracy, equity, and consistency in such cost analyses and contribute significantly to improved implementation of Circular A-76.

DATE: Comments must be received on or before November 15, 1978.

ADDRESS: Comments should be addressed to the Administrator for Federal Procurement Policy, Office of Management and Budget, 726 Jackson Place NW., Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT:

Mr. William D. Russell, Deputy Assistant Administrator for Logistics, telephone 202-395-3327.

SUPPLEMENTARY INFORMATION: In the comprehensive review of OMB Circular A-76 which preceded the current revision of that circular, one of the major deficiencies noted in implementation was inaccurate, incomplete, and inconsistent cost analyses used to support both in-house and contract performance. The proposed revisions to Circular A-76, which were published for comment in November 1977, included a proposal for a detailed cost comparison handbook. This proposal was strongly endorsed by a broad range of interests responding to the notice, including Federal employee unions, private firms and associations, and Members of Congress.

This draft handbook was prepared by an interagency work group consisting of cost accounting experts from the Departments of Defense and Energy, the General Services Administration, and Veterans' Administration, and an adviser from the General Accounting Office. It is offered for review and comment by all interested parties to insure that the final version is clear, comprehensive, and adequate to insure satisfactory results.

LESTER A. FETTIG,
Administrator.

CHAPTER I - GENERAL

Introduction

This Cost Comparison Handbook implements the cost comparison principles contained in OMB Circular A-76, "Policies for Acquiring Commercial or Industrial Products and Services for Government Use." Official use of this Handbook is prescribed in OMB Circular A-76, which directs Federal agencies to ensure that their comparative cost analyses are made in conformity with these guidelines.

Purpose

The purpose of this Handbook is to provide a detailed, simplified guide for developing comprehensive cost estimates. Such information is necessary for a valid comparison of the estimated cost to the Government of acquiring a product or service by contract or by providing it with Government in-house resources. In addition to assisting agencies in developing comprehensive cost estimates, the Handbook is intended to establish consistency, assurance that all substantive factors are considered when making cost comparisons, and a desirable level of uniformity among agencies in the handling of this determinative process.

Background

The American taxpayers have a right to expect economical performance of Federal activities. In some instances, these activities must be performed by Federal employees. In many other instances, however, they may be performed either by contractors or by Federal employees. That choice must be determined by a finding as to whether contract or in-house performance would be more economical.

Government reliance on the private sector was first enunciated by the executive branch as a general policy in 1955. Since then Federal agencies have struggled to make rational judgments as to the cost considerations that should be included in a comparative analysis to establish whether the Government's interest would be served best by contract or in-house performance. Assistance was provided by OMB Circular A-76, initially issued on March 3, 1966 and revised August 30, 1967, which contained guidelines for agencies in making those analyses.

As Government cost accounting techniques progressed, it became obvious that Circular A-76 guidelines were too general to achieve desirable uniformity, and were

insufficient as a basis for comprehensive cost studies. The need for more precise guidance in developing cost estimates and for cost comparative analyses was the most prevalent suggestion made when agency and public comments were invited for consideration in a review and subsequent revision of Circular A-76. The proposed solution, a detailed cost comparison handbook, was widely and strongly supported by the numerous respondents to OMB's request for comment on the proposed changes to Circular A-76 in November 1977.

Development of Handbook

This Handbook has been developed to provide step-by-step guidance for making a cost comparison analysis. The Handbook is addressed to readers who are not cost accountants and who may not have access to the advice of a cost accountant. The simplified guidance employed in the Handbook is not so much designed to make a difficult task easy as it is to make a complicated task understandable -- and doable by persons without prior experience in cost accounting. Such technical advice as may be needed should be available from Government financial management or comptroller personnel.

The first and most important step in making a cost comparison analysis is the development of the work statement. Chapter III explains the importance of this effort and the steps necessary to its preparation. It also explains the process by which the in-house cost estimate is placed in competition with contractor bids.

The principal chapters of the Handbook describe the steps necessary to develop entries for each of the lines on the Cost Comparison Form (Exhibit 1) and the Decision Summary Form (Exhibit 2). The location of these forms in the Handbook corresponds with their place as the end objective of every cost comparison study. The forms also serve to organize the Handbook in that each of the cost analysis chapters and sections is keyed to a line entry on the Cost Comparison Form.

The Glossary of Terms, included as an appendix, contains definitions which are consistent with those generally accepted in the cost accounting community.

CHAPTER II - POLICY

Under certain circumstances, a Government agency is authorized by OMB Circular A-76 to establish in-house capability or to continue an existing activity to provide a product or service that is obtainable from a private source. One justifying circumstance is when a comparative cost analysis, prepared as provided in this Handbook, indicates that the Government's cost would be lower than if the product or service were obtained from a commercial or other non-Federal source. Detailed guidelines for making these cost comparisons are set forth in this Handbook for application by all Federal agencies. The guidelines are based on the following policy principles:

Common Ground Rules

a. Both Government and commercial cost figures must be based on the same scope of work and the same level of performance. This requires the preparation of a sufficiently precise work statement with performance standards that can be monitored for either mode of performance.

b. Standard cost factors will be used as prescribed by the Cost Comparison Handbook and as supplemented to accommodate particular agency operations. It will be incumbent on each agency to defend any variations in costing from one case to another.

c. All significant Government costs must be considered, both for administering a contract and for direct Government performance, including allocation of indirect (overhead) costs.

d. The base period for the cost analysis will be keyed to the expected span of performance to guard against "buy-in" pricing on the part of contractors or Government activities. Prepriced options and subsequent recompetition should also be used to avoid a contract "buy-in." Except when the circumstances of the requirement dictate otherwise, the base period will correspond to the period of the proposed contract, including options.

e. Cost comparisons are to be aimed at full cost, to the maximum extent possible in all cases.

f. Ordinarily, agencies should not incur the delay and expense of conducting cost comparison analyses to justify a Government commercial or industrial activity for products or services estimated to cost the Government less than $100,000 per year. However, if there is reason to believe that inadequate competition or other factors are causing commercial prices to be unreasonable, a cost comparison analysis can be conducted. Reasonable efforts should first be made to obtain satisfactory prices from existing commercial sources and to develop other competitive commercial sources.

g. The cost comparison will use the present value cost and discount rate prescribed in OMB Circular No. A-94, "Discount Rates to be Used in Evaluating Deferred Costs and Benefits," when there are significant differences in capital investment or in the timing of outlays.

Calculating Contractor Costs

The commercial cost figure must be based on a firm bid or proposal, solicited in accordance with pertinent procurement regulations. Bidders must be told that an in-house cost estimate is being developed and that a contract may or may not result, depending on the comparative cost of the alternatives.

Calculating Costs of Government Operation

a. Each agency should assure that Government operations are organized and staffed for the most efficient performance. To the extent practical and in accordance with agency manpower and personnel regulations, agencies should schedule reviews under this Circular with internal reorganizations for accomplishing the work most efficiently.

b. The Government cost factor for Federal employee retirement benefits, based on a dynamic normal cost projection for the Civil Service retirement system, will be 20.4%.

c. The Government cost factor for Federal employee insurance (life and health) benefits, based on actual cost, will be 4%.

Other Requirements

a. An existing in-house activity will not be converted to contract performance on the basis of economy unless it will result in savings of at least 10% of the estimated Government personnel costs.

b. A "new start" will not be approved on the basis of economy unless it will result in savings compared to contract performance at least equal to 10% of Government personnel costs, plus 25% of equipment and facility costs.

c. All cost comparisons must be reviewed by a qualified activity independent of the cost analysis preparation to ensure conformance to the instructions in the Cost Comparison Handbook.

CHAPTER III - PREPARATION FOR COST ANALYSIS

General

A valid comparative cost analysis under Circular A-76 requires an accurate determination of the costs of acquiring the needed products or services from the private sector and from the existing or proposed Government commercial or industrial activity. To ensure an equitable comparision, both cost figures must be based on the same scope of work, and include all significant identifiable costs that would be incurred by the Government under either alternative.

Initial Planning

The comparative cost analysis and implementation of the conclusions reached involve the responsibilities of many functional and staff offices of the agency. For best coordination of these responsibilities, a task group should be formed by representatives of the various organizations and offices concerned, such as: the functional or operational organization, the manpower and/or personnel office, the finance and accounting office, the management analysis group (if available), the budget office, the procurement office, the legal office, and other staff functions as appropriate. The task group leader should be thoroughly familiar with this Handbook.

This group should establish a plan and time schedule for orderly completion of the necessary steps to conduct the study and reach a timely conclusion to either award a contract or to continue or initiate the Government commercial or industrial activity. The schedule should allow adequate time for preparation of a comprehensive work statement, solicitation of bids or proposals, determination of in-house costs, evaluation of bids and the Government estimate, the independent audit, and review and approval of the conclusions. In this regard, close coordination with the procurement office and the personnel office is required to ensure compliance with procurement regulations and to provide maximum consideration for Government personnel who would be displaced in the event of a conversion from in-house to contract performance.

Preparation of Work Statement

The preparation of the work statement is a critical step; it must be comprehensive enough to ensure that performance by contract or in-house will satisfy the Government requirement. It must also serve as the basis for estimating both the contract and Government cost, to ensure comparability and equity in the cost analysis. The work statement should clearly state what is to be done without prescribing how it is to be done. It should also provide performance standards to ensure a comparable level of performance by both alternatives and to provide a basis for evaluation. Maximum flexibility should be permitted in staffing to permit each potential performer to propose the most efficient approach consistent with his organization and resources.

The work statement should describe all duties, tasks, responsibilities, frequency of performance of repetitive functions, and requirements for furnishing facilities and materials. Where the workload is variable, historical data for a representative period on workload, material and parts consumption, etc. will be provided, when available, along with the best estimate of future requirements. Bid solicitations will normally call for use of contractor facilities, unless performance on Government property is essential or would be more economical. When the work is currently being performed in a Government-owned facility or appropriate Government facilities are available, and contractor use of those facilities would be in the Government's interest, bids will be requested on that basis. Requirements regarding the proximity of the contractor's facility to the Government installation will be used only when clearly justified in terms of operational necessity to meet Government needs.

The work statement will be reviewed by the contracting officer to ensure that it is adequate and appropriate for a contract specification. The contracting officer will be responsible for advertising the requirement, through the Commerce Business Daily and by other means, but the functional organization will identify any known commercial sources -- this is particularly important in the case of unique products or services which have not been previously procured commercially.

Procedure

When the statement of work has been prepared and approved, firm bids or proposals will be solicited. Formal advertising, with firm fixed price bids, will be used when appropriate for the requirement. Proposals may be requested for competitive negotiations when this method would be more suitable and warranted under current procurement

regulations. Concurrent with the procurement procedure, the in-house cost estimate will be prepared, based on the same work statement that is used in the contract solicitation. If the Government staffing plan differs from the existing Government activity, it must be consistent with agency manpower and personnel regulations and must be implemented within 60 days following a determination to continue Government performance.

The in-house cost estimate will be completed and submitted to the contracting officer three days prior to opening of bids or completion of negotiations. Confidentiality of both the in-house estimate and contract prices will be maintained to ensure that they are completely independent.

The contracting officer will determine the lowest acceptable contract price, conducting preaward surveys as required to establish the lowest responsible and responsive bidder. When the proposed contract would contain flexible pricing provisions, the criteria for incentive or award fees are critical to the determination of the proper amount to be entered as the contract price. Use of the maximum incentive or award fee available would be inappropriate because it would reflect a different standard of performance from the level which provided the basis for the in-house cost estimate. It is essential that the invitation for bid or proposal provide for a common standard of performance to permit an equitable comparison of Government and contract costs for performing the same task.

When the Government and contract costs are established, the Cost Comparison Form can be completed, adding the Government costs for awarding and administering the contract and applying the appropriate cost differntial and and other considerations as provided in Chapter VI. The comparison must then be reviewed for conformance with this Handbook by a qualified party independent of the cost analysis preparation; e.g., the agency independent audit function. The results of the cost study will then be announced and the detailed analysis will be made available to any interested parties -- bidders, affected employees, and unions representing affected employees. If no significant discrepancy in the cost comparison is reported within five working days after the announcement, a contract will be awarded or the procurement action will be cancelled, as appropriate.

When a discrepancy is found in the cost analysis, every effort will be made to correct it in a time frame that corresponds to the requirement and the validity date of proposals. If the analysis is for a new start, and there is a serious defect in the in-house cost estimate, the in-house figure will be rejected and a contract will be awarded. When the analysis concerns a Government commercial or industrial activity, and the discrepancies cannot be corrected within the validity date of prposals, the procurement action may be terminated and the review rescheduled.

CHAPTER IV - DEVELOPING AN ESTIMATE OF GOVERNMENT COSTS

GENERAL

In order to develop the estimated cost to the Government for producing a product or performing a service, it is necessary to accumulate the various elements of direct and related indirect costs. The Cost Comparison Form shown as Exhibit 1 will be used for this purpose. In the following sections, definitions of the cost elements contained in this form are presented. Also included are instructions on how to estimate the amount to be included in each cost element, and on the data needed to support the estimates.

To the extent practical, the cost accounting standards published by the Cost Accounting Standards Board have been used as guides for classifying costs by elements and for distinguishing between direct and indirect costs. The following definitions, based upon Title IV, Code of Federal Regulations, Chapter III, Subchapter G, Part 400, are particularly pertinent to these determinations:

Cost Objective. A function, organizational subdivision, contract, or other work unit for which cost data are desired and for which provision is made to accumulate and measure the cost of processes, products, jobs, capitalized projects, etc.

Final Cost Objective. A cost objective which has allocated to it both direct and indirect costs, and, in the cost accumulation system, is one of the final accumulation points.

Direct Cost. Any cost which can be identified specifically with a particular final cost objective. Direct costs are not limited to items which are incorporated in the end product as material or labor. Costs which can be identified specifically with a product/service are direct costs of that product/service. All costs identified specifically with other products/services are direct costs of those products/services.

Indirect Cost. Any cost not directly identified with a single final cost objective, but identified with two or more final cost objectives or with at least one intermediate cost objective.

It is important that the basic principles contained in the above definitions be understood to preclude the possibility of "double counting" in preparing the estimate of the Government's costs. "Double counting" results when certain costs are treated as direct costs of the product/service, while similar costs related to other products/services are treated as indirect costs and a portion thereof is also allocated to the product/service for which the estimate is being prepared. A common instance of "double counting" is the treatment of travel costs. All travel is considered as an indirect cost in typical accounting systems. However, when estimating the cost of an activity being reviewed for contracting out, the travel required of personnel whose time is accounted for as direct labor can easily be allocated to the activity under review. Since the travel costs of personnel whose time is accounted for as direct labor working for other activities is treated as indirect costs, a portion of such travel will be allocated to the activity under review. This is "double counting." The correct approach is to treat all travel as indirect costs, or to change the accounting system so that all travel costs of all personnel whose time is accounted for as direct labor are allocated as direct costs to the activities charged for the direct labor costs.

The application of these principles is demonstrated, and clarified, in the following sections.

MATERIAL COSTS

Direct Material

Direct material includes the costs of such goods as raw material, parts, subassemblies, components and supplies which are identified specifically with the product/service (the final cost objective) under review. In additon, the cost should be significant enough in amount to warrant its inclusion as a direct cost. Nominal material costs should be classified as indirect costs and allocated to applicable final cost objectives. Thus, direct material should have three general characteristics:

a. They should be essential to the performance of the service or necessary to the production of the product;

V 4 3 \ 1 8 8
S E 2 7 7 8

supply services provided by GSA together with mark-up rates to be applied to GSA prices to show full costs:

Wholesale and Stores Direct Delivery. This program area involves the distribution of common-use, commercially available items, to agency requisitioners worldwide, through a network of supply distribution facilities located throughout the United States. Also included is the Stores Direct Delivery Program which is designed to provide customers with the same type of items carried in stock which, because of volume orders, are procured from the vendor for direct delivery to the requisitioner in instances when delivery time is not critical.

Retail. The Retail Program provides the agency requisitioner with high demand common-use office and janitorial requirements from retail outlets located in areas of concentrated Federal activity.

Nonstores Direct Delivery and Competitive Federal Supply Schedules. This program is concerned with obtaining customer nonstock requirements through direct shipment from the vendor. Presently, agencies are ordering directly from vendors using schedules established by the GSA Federal Supply Service. Agencies pay the vendors directly for goods and services obtained.

The results of a GSA study disclosed the following add-ons to GSA material prices which must be applied to show the full cost to the Government for purposes of Circular A-76 cost studies:

Wholesale and Stores Direct Delivery	- 21%
Retail	- 36%
Nonstores Direct Delivery and Competitive Federal Supply Schedules	- 5%

Documentation

The backup for the amount shown as direct material costs must be supported by a detailed listing of all the items needed with quantities, unit prices, suppliers, details of adjustments and the source of the information. See Figure 1.

b. Their quantity and price should be significant; and
c. measurement of their quantity and cost should be relatively easy and inexpensive.

The estimate of direct material costs begins with a thorough review of the specifications for the job to be performed or the product to be furnished by the activity under review during the specified time period. Available material usage information and bills of material; i.e., a detailed listing of material for the same or similar jobs requirements and/or products will be used to estimate direct material quantities needed. Changes in the specifications between the past and proposed work effort need to be taken into consideration. Provision needs to be made for overruns, scrap, spoilage and defective work. Thus, the estimated quantity of direct materials to be costed may exceed the minimum quantity determined from the specifications or bills of material. A detailed listing of the kind of direct materials to be used by the activity under review will be developed.

Direct material costs are determined by multiplying the quantities of direct materials by the unit prices. Unit prices will be derived from current cost records to the extent they are available and applicable to the activity under review. Current costs need to be adjusted to give effect to price level changes applicable to the future periods for which the estimate is being made. If current cost records cannot be used, the supply activity (inventory control point) can estimate issue prices for its inventory and General Services Administration or other suppliers' catalogs can be used for non-stocked material. Recent purchase prices of similar items can also be used. The procurement office (purchasing department) can be asked to help estimate the purchase price of special or unusual direct material items. When purchase prices are entirely uncertain and time permits, quotes may be obtained from potential suppliers. Specific guidance on the pricing of GSA material is presented below.

Pricing of GSA Material

In most instances, the prices charged by GSA for material do not include all the costs of the acquisition and storage functions performed by GSA. Since inclusion of these costs in GSA prices is currently prohibited by law it will be necessary to adjust GSA prices for purposes of Circular A-76 cost estimates. Following is a description of the material

FIGURE 1.

In developing the cost of direct material, it is important to know how the cost of the material was determined. That is, does it include such items as transportation, procurement, storage, etc. This determination is essential to the proper application of material overhead costs as defined in the following paragraphs.

Material Overhead

In addition to the direct cost of material, the costs of material overhead -- acquiring, handling, and controlling material -- must also be included in the Government's cost estimate. Since, in most cases, it is not practical to ascertain the costs of these activities as they relate to each item of material, the related expenses should be accumulated in an indirect cost pool (intermediate cost objective) and allocated to the service/product being estimated. Brief descriptions of the functions, the costs of which are to be added to the basic material cost, are presented below:

Acquiring. Includes the efforts related to the determination of material needs, ordering, and/or purchasing material and immediate supervision of such efforts. It also includes the incoming transportation cost of the material.

Handling. Encompasses the efforts related to the physical receipt, storing, and issuing or otherwise disposing of tangible material. Included in these efforts are receiving and inspection activities, care in storage, preservation and depreservation efforts, assembly or disassembly of "sets" and "kits," and the immediate supervision of such efforts.

Controlling. This administrative function relates to the overall acquisition, handling, and distribution process and involves the monitoring of these functions. It also includes the keeping of inventory records of material on hand or on order, and the taking of physical inventories.

The costs to the Government of certain of the above functions may already be included in the price that is paid for the material. For example, the cost of material acquired from Defense stock funds generally includes the incoming transportation costs as well as a surcharge to cover estimated net stock losses on current procurements due to pilferage, damage, deterioration, physical inventory

shortages and excess arising from obsolescence and other causes. Accordingly, as mentioned in the DIRECT MATERIAL section above, it is important to ascertain the makeup of the price paid for material to preclude double costing.

The prices charged for material sold by one Government agency to another should include all significant identifiable direct and indirect applicable costs unless exempted by law. This is in accordance with Comptroller General Decision B-136318, which states in pertinent part: "Effective compliance with the reimbursement provision of 31 U.S.C., paragraph 686(a) is only achieved when all significant elements of cost are recognized and recovered in any transaction under that section. If overhead expense is significant, then like other elements of costs, it should be recognized and recovered." Accordingly, for the most part, and with the exception of GSA, as noted in the DIRECT MATERIAL section, it can be assumed that the price paid for material acquired from other Government agencies and outside vendors will include all of their costs. Under these circumstances, only those costs incurred by the acquiring agency in accomplishing the acquiring, handling, and controlling functions need be added to the material costs.

Within the acquiring agency, it will be necessary to ascertain the costs of the above functions and allocate them to the using activities on the basis of a beneficial or causal relationship. For those agencies which conduct a significant amount of interagency material transfer, appropriate rate data should be readily available in view of the above-mentioned Comptroller General's decision. For those agencies which have not developed appropriate overhead rates, the following guidance is presented.

Anticipated costs specifically identified with the functions of acquiring, handling and controlling material will be determined for the period of performance of the activity being reviewed. Costs specifically identified with the functions include assigned personnel and materials or supplies and equipment used to perform the function as well as related occupancy costs. Purchased services may also be specifically identified with the functions; for example, special tests as part of inspections of the material upon receipt or while in storage to assure acceptability and continued usability. Supervision and other indirect costs applicable to the functions will also be included.

All other costs which measurably benefit or are caused by the functions will be allocated to them. Among these should be the costs of central purchasing, requisitioning and accounting for the activity's materials. The allocation of centralized activities is discussed further under the GENERAL AND ADMINISTRATIVE COSTS section of this Handbook.

A detailed listing of the material overhead costs will be prepared and the total of such costs shown. Figure 2 is an example of such a listing. Supporting documentation for the amounts shown should be either attached to the listing or a reference made to where such data can be examined.

After the total amount of the material overhead costs is determined, it will be necessary to allocate a portion of it to the function being costed. In most cases, an equitable allocation of these costs to the function being priced can be obtained by application of a developed rate to the material costs. As illustrated in Figure 2, a material overhead rate can be developed by dividing the total material overhead expenses by the total material costs; i.e., the allocation base. It is to be noted that this base is the total for all products/services and indirect material and supplies of the entity; not just for the activity under review.

As illustrated above, the use of total material cost as the allocation base is advocated except in those situations where a specific function's beneficial or causal relationship to goods or services produced may be significantly better measured by a physical characteristic of the direct material used such as quantity, weight, or volume. Similarly, the use of one indirect cost pool for material overhead is advocated unless its use would significantly distort the resultant allocations. When material acquired from GSA is included in material costs, the additive factors as presented in the DIRECT MATERIAL section for GSA-furnished material should be added thereto as a cost, and included in the total material costs used to determine the rate.

PERSONNEL COSTS

Direct Labor

Direct labor cost is that portion of wages or salaries which can, as a practical matter, be identified with and charged only to a specific product or service (final cost objective). As stated in the Cost Accounting Standard Board's promulgations, costs are either direct or indirect only. Accordingly, labor costs similar to those treated as direct for the cost estimate must also be considered as direct costs of other final cost objectives and not included in an indirect cost pool. Conversely, no final cost objective shall have charged to it as a direct labor cost a portion of any labor costs the remainder of which is included in an indirect cost pool.

Labor shall be classified as direct when:

a. it is essentially directly related to the product or service;

b. the labor cost can be measured with reasonable effort; and

c. the labor cost is not insignificant.

Direct labor costs are composed of two factors: the first is the time it takes to do the job, and the second is the rate(s) of pay for the labor skills required. These two factors are equally important and each must be estimated as precisely as possible. For this reason, they are treated separately in the following paragraphs.

In estimating the time required to perform a service or produce a product, the starting point is the statement of work. A thorough review of the work requirements should definitize the outputs requiring labor. The time required to perform these outputs can be estimated by utilizing prior experience if it is available, engineered standards, or engineering estimates. If similar jobs have been completed, the direct labor hours of those jobs may be used as a basis for subsequent job estimating, provided appropriate adjustments are made for any scope and procedural changes. Also, when estimating the direct labor hours, include all on-the-job training which involves productive work. Time spent on all other training will be treated as indirect labor and included in the appropriate overhead pool. See OPERATIONS OVERHEAD, and GENERAL AND ADMINISTRATIVE EXPENSES.

Normally, time requirements will be expressed in man-hours. These man-hours can be converted to man-years, by dividing the total man-hours required by either the total number of working hours in a year (i.e., 52 x 40 or 2,080) or by the number of hours normally worked in a year (i.e., 2,080 less leave and holiday time). It is important to know how the man-years were developed to determine whether the labor rate to be applied to the time estimate should be increased to provide for leave and holidays to be earned and taken by the workers. If the time estimate includes a provision for leave and holidays, the rate by which such a time estimate is to be multiplied should not be increased to provide for these costs, and vice versa. Additional comments in this regard are contained in the following paragraphs dealing

V 43/188 SE 27 78

TIME ESTIMATE REPRESENTS	LABOR RATE TO USE
Estimated hours required to do the job.	Basic hourly rate increased by the factor for leave and holidays (i.e., base pay x 120%).
Estimated hours required to do the job, plus the allowance for leave and holidays (i.e., actual hours x 120%).	Basic hourly rate.
Estimated hours to be worked for a year plus leave and holidays to be taken.	Annual rate, or basic hourly rate x 2,080.

The detail necessary to support the estimate of direct labor costs will be a listing of the various labor skills required, the number of hours and rates of pay for each job or component contained in the statement of work as illustrated in Figure 3.

with the rate of pay to be applied to the time estimates and in the examples at the end of this section.

When the number of hours of each type of labor are identified, they must be multiplied by the appropriate hourly rate in order to arrive at an estimate of direct labor costs. The skill requirements determined to be needed for arriving at the time estimates will dictate the basic rates to be used. Normally, the skills required will specify a Wage Board (WB) or General Schedule (GS) level. When computing costs for an existing Government activity, use the actual rates for current employees. For positions that are not occupied, or for a proposed new start, use salary step 4 for GS positions and wage step 2 for Wage Board positions.

Wage Board rates are normally expressed as hourly rates. These are called the basic hourly rates and will be applied to all hours worked and to all hours of annual leave earned, and sick, holiday and other leave taken to ascertain the total pay of a Wage Board employee. If night and/or environmental differential pay will be required, these differentials should also be included in the direct labor cost for Wage Board employees. Premium pay for Federal civilian firefighters and law enforcement officers is also to be included. Excluded are bonuses, allowances, overtime, and holiday pay.

General Schedule rates are normally expressed as annual rates of pay. Night and post differentials are excluded from this annual rate for GS employees. In order to convert this annual rate to an hourly rate comparable to that of a Wage Board employee, it must be divided by 2,080 hours. Neither the basic hourly rate nor the annual rate contain a provision for leave and holidays.

Based on Civil Service Commission data, a factor of 20% of basic hourly or annual pay has been developed to estimate the amount of annual leave earned and sick leave, holiday, and other leave taken. In computing direct labor costs, this factor must be used. As indicated earlier, the factor may be applied to either the basic labor rate or the productive time estimate. Because of this, care must be taken that the 20% factor not be included in, or excluded from both. The following decision diagram illustrates the proper rate to be applied to the time estimate.

FIGURE 3

DIRECT LABOR REQUIREMENTS

(Examples of Typical Entries)

Line Item	Skill Required	Req. Hrs.	Basic Hourly Rate	Hourly Rate Based on Annual Salary	Annual Salary	Total Cost W/O Leave & Holiday Required Hours X Applic. Rate	Total Annual or Periodic Labor Costs**
Repair Electric Meters	Electrician W/B-4	200	$11.00	$ -	$	$2,200.00	$ 2,640.00
Install Meter Mounts	Carpenter W/B-3	100	11.50	-		1,150.00	1,380.00
Install Water Coolers	Carpenter's Helper	100	7.00			700.00	840.00
Inspection	Inspector GS 9/2	100	-	7.21 ($15,000 ÷ 2,080 hours = $7.21)		721.00	865.20
Reliability Improvement Engineering	Engineer GS 12/2	1 Man Year*	-	-	23,000	-	$23,000.00**

* Includes leave and holiday but excludes other fringe benefits.

**Annual salary already includes leave and holiday.

Fringe Benefits

Fringe benefits are allowances and services provided by the Government to its employees as compensation in addition to the wages or salaries used in determing the basic hourly rate or the annual rate of pay. For purposes of estimating the cost of a Government operation, fringe benefits will include only the normal, recurring benefit costs attributable to an on-going operation. Costs such as termination and separation allowances of Government personnel displaced by a contractor operation are not fringe benefits but rather are to be included as Termination Costs in comparing Government costs and contractor costs. Employee relocation allowances provided to Government personnel shall be included in Government start-up or termination costs, as applicable, when associated with the opening or closing of a Government-operated activity.

The following guidance has been developed to facilitate estimating fringe benefits applicable to the basic hourly pay and the annual rate of pay of General Schedule and Wage Board employees. In cases where certain employees receive fewer or additional benefits, special computations will be needed.

In determining direct labor costs, leave and holiday time is considered as being included. Therefore, they are not included in fringe benefits. Premium pay for working on holidays is discussed under "Additional Benefits."

Standard Fringe Benefit Factors. Government-wide percentage factors shall be applied to annual or periodic labor costs (C above) to determine the following fringe benefit costs:

Retirement and Disability (for employees under Civil Service Retirement)	20.4%
Health and Life Insurance	4.0%
Other Benefits (including work disability, unemployment programs, bonuses and awards, etc.)	1.9%

Additional Benefits. For Government civilian employees (normally temporary employees) who are not under the Civil Service Retirement System, the Social Security (FICA) cost factor to be applied to salary or wage costs is the actual employer contribution rate for the employees involved. When

estimating the FICA cost, care must be exercised to assure that the FICA rate is applied only to wages and salaries subject to the tax. Information regarding FICA tax rates and minimum salaries and wages to which they are applicable should be obtained from the appropriate personnel office.

If the Government employees whose time is included in the cost estimate will receive allowances for off-site pay, location allowances, hardship pay, hazardous duty pay, uniform allowances, incentive pay, cost of living differential, night differential for General Schedule employees, etc., an estimate of the actual costs thereof will be used to develop individual rates for the local area. Information needed to compute rates involved should be obtained from the cognizant personnel or payroll office. Where allowances are not uniformly distributed among all local personnel, it may be necessary to compute separate rates or amounts for individual employees or employee groupings such as General Schedule employees and Wage Board employees.

Overtime premiums and premium pay for working holidays are not included as an additional benefit. Overtime and holiday premiums are either "other direct costs" or "indirect costs." In either case, they are not included in the determination of additional benefits nor in the total annual or periodic labor costs. Overtime and holiday premiums are direct costs only when it is known that the work required to provide the product/service being estimated must be performed on overtime. Otherwise, overtime and holiday premiums are indirect costs since the incurrence of overtime provides equal benefit to all work scheduled. Night and environmental differentials are considered additional benefits for General Schedule employees, but are included in the annual or periodic labor costs for Wage Board employees. Fire fighters and law enforcement officers' premiums are also included in the annual or periodic labor costs.

Documentation. The backup material for the amount shown as fringe benefits applicable to direct and indirect labor shall be a detailed summary of each fringe benefit, supported by a schedule showing the computation of each fringe benefit cost. The computation schedule should include the base costs to which fringe benefit factors are applied and their source, as well as the rate factors and their source. Normally, a single fringe benefit factor may be used. However, if significant differences exist in their composition, different fringe benefit rates will have to be calculated separatelty for direct labor costs and for indirect cost pools. A sample schedule is shown in Figure 4.

FIGURE 4

FRINGE BENEFITS

Annual or Periodic Labor Costs

	SUBJECT TO RETIREMENT1/	SUBJECT TO FICA UNDER LIMIT	SUBJECT TO FICA OVER LIMIT	TOTAL	FRINGE BENEFIT AMOUNTS
DIRECT LABOR	$6,800,000	$170,000	$30,000	$7,000,000	
INDIRECT LABOR					
MATERIAL OVERHEAD	1,980,000	17,000	3,000	2,000,000	
OPERATIONS OVERHEAD	2,984,000	16,000	-	3,000,000	
GENERAL & ADMINISTRATIVE EXPENSE	4,000,000			$ 4,000,000	
TOTAL	$15,764,000	$203,000	$33,000	$16,000,000	
RETIREMENT AT 20.4% of $15,764,000					$3,215,856
FICA at 6.05% of $203,000					13,195
HEALTH, LIFE INSURANCE AND OTHER BENEFITS AT 5.9% of $16,000,000					944,000
TOTAL STANDARD FRINGE BENEFITS					$4,173,051
ADDITIONAL FRINGE BENEFITS LIST AND EXPLAIN					1,906,949
TOTAL FRINGE BENEFITS					$6,080,000

CALCULATION OF FRINGE BENEFIT RATE

TOTAL FRINGE BENEFITS ÷ TOTAL ANNUAL OR PERIDOIC LABOR COSTS = $ 6,080,000 / $16,000,000 = 38%

ENTRY ON COST COMPARISON

LINE 4 - $7,000,000 DIRECT LABOR x 38% = $2,660,000

LINES 2, 5, AND 7 - THE FRINGE BENEFITS TO BE INCLUDED IN THE OVERHEAD POOLS (38% of $2,000,000; $3,000,000 AND $4,000,000, RESPECTIVELY) ARE INCLUDED IN THE TOTAL SHOWN ON THESE LINES.

1/ See Subchapter S.14, "Computation of Annuities," Federal Personnel Manual.

OPERATIONS OVERHEAD

General

Operations overhead is one of the three classifications of indirect costs. The other two, material overhead and general and administrative expense, are discussed in separate sections. This section deals only with operations overhead.

Definition

Operations overhead costs are the indirect costs of an annual fiscal period which are necessarily incurred to produce or deliver the products/services being provided by a particular organizational element (hereinafter referred to as a work center). Operations overhead differs from material overhead costs which are related only to acquiring, handling, and storing material, and from general and administrative expenses which are those costs whose incurrence benefits all the activities of the organization of which the particular work center is a part.

For practical reasons, some minor costs are treated as indirect costs even though a direct cost relationship can be determined. Short-term work efforts and small, inexpensive items of material generally fall in this category. They should be included in the overhead pool which is most closely related to the nature of the costs; i.e., material overhead, operations overhead, or general and administrative expense. It is important, however, that all costs incurred for the same purpose in like circumstances be treated as either direct costs only or indirect costs only with respect to the final cost objectives (i.e., the product or service being provided by the work center).

Estimating Operations Overhead Costs

Step One. The first step in estimating operations overhead costs is to determine the work center(s) which will perform the work necessary to provide the product/service being estimated. Once this determination is made, all of the estimated costs related to the elements of expense of that work center must be classified as either direct or indirect costs. (Refer to the applicable sections for each element of expense.) The following table illustrates the final result of such a classification.

TOTAL ESTIMATED COSTS TO BE INCURRED BY WORK CENTER "A" DURING FISCAL YEAR 197X

Direct Costs		$9,000,000
Indirect Costs		
Operations Overhead	$4,500,000	
Material Overhead	-0- *	
General & Administrative Expense	-0- *	
Total Indirect Costs		4,500,000
Total Annual Costs		$13,500,000

* While it is possible to incur some of these types of costs in Work Center "A", for purposes of this illustration it is assumed that none will be.

Step Two. The summary amount of operations overhead shown in the illustration in Step One represents the total costs of the individual types of expenses involved. To arrive at this amount, it is necessary to estimate the amount of the individual types of expenses. As a general rule, where the product or service is to be provided by an existing work center, historical records of the amounts and types of indirect costs incurred by it will be available. These historical records may be used as the basis for developing an estimate of the indirect costs to be incurred during the period in which the product or service is to be provided. They should be adjusted to reflect inflation and any other changes in staffing or operations contemplated by management. If the product or service being estimated represents a new start, the statement of work will be the fundamental document on which the estimate will be predicated. Once the requirements of the statement of work are determined, it may be possible to find a work center within the organizational structure that is similar to the one required. The indirect costs of that similar work center, appropriately adjusted, would be an acceptable basis for developing the estimate of the costs of the individual elements of expense. If neither an existing nor similar work center is available, then the annual amounts of the individual items of indirect costs necessary to accomplish the statement of work should be estimated in consultation with cognizant management and technical personnel.

Types of Operations Overhead Expenses

A description of the more common types of operations overhead expenses are discussed in the following paragraphs.

Indirect Labor - This category includes all personnel costs of the work center not considered as direct labor, material overhead, or general and administrative expense, as defined in the sections dealing with those costs. The costs of supervision and administration within the work center, as well as the costs of the time of direct employees not spent in productive effort or on leave (e.g., idle time, training, etc.) should be included. Care must be taken to assure that indirect labor costs that are more appropriately classified as material overhead or general and administrative expense are not included in the operations overhead. Indirect labor costs should include all applicable fringe benefit costs (see Figure 2). Estimates of and supporting documentation for indirect labor should be prepared in much the same way as for direct labor. Essentially, positions required by the work center identified as providing the product/service are identified and designated as direct or indirect. Once the designation is made, it must be consistently followed. The salaries and wages of the indirect employees are estimated for the year(s) being studied.

Indirect Materials and Supplies - Included in this category are those items of material or supplies utilized by the work center in its operations but which are not chargeable as direct materials as defined earlier in this chapter. Examples of such items are lubricants and rags for equipment, or common use low-cost fasteners, such as wire, staples and screws. The costs of indirect materials and supplies should include their allocable share of material overhead. Estimates of indirect materials and supplies are determined in much the same manner as those for direct materials. The prices for these types of materials and supplies are estimated and total indirect material and supply costs determined.

If it is not practical to list each single item of indirect material and supplies in the documentation supporting the estimated amount, they may be aggregated into logical subgroupings and shown in total and a reference made as to where the detail can be examined. If the amounts of indirect material and supplies are estimated in some other way than by a detailed listing, a clear explanation of the method used to arrive at the estimated amount must be contained in the supporting documentation.

Depreciation - Depreciation is the method utilized to spread the cost of tangible capital assets (plant, machinery, etc.) less residual value, over their estimated useful lives in a systematic and logical manner. Note that because land has an unlimited life, it is not a depreciable asset and its cost should not be included with other asset costs that are subject to depreciation. The cost of a tangible capital asset includes the original acquisition cost plus the transportation and installation costs incurred to place the asset in use. Additions need to be added and retirements deleted to keep the costs current. Useful life has reference to the estimated period of economic usefulness of the asset in a particular operation as distinguished from its physical life. Determination of the asset's useful life should be based on actual or planned retirement and replacement practices. An asset that is still in use should not be reflected as being fully depreciated. To avoid this happening, the estimated useful lives need to be reviewed and adjusted periodically to conform to current plans. Residual value is the estimated value of the asset at the end of its useful life. Because useful life and physical life may differ, the residual value is not always equal to scrap value. Both the useful life and residual value should be estimated, based on historical records and in consultation with engineering and management personnel. For purposes of this Handbook, depreciation will be computed on a straight-line basis. That is, an equal amount of the difference between the acquisition cost of the asset and its residual value should be charged to each accounting period or unit of usage covered by its useful life.

For example, if an asset costs $1,000 and had a residual value of $100 and a useful life of 10 years, $90 should be charged to each year's operation during its useful life ($1,000 - $100 = $900 ÷ 10 years = $90/year).

If depreciation is to be based on hours of usage, the difference between the cost and residual value would be divided by the estimated number of hours the machine will be used during its useful life to arrive at an hourly depreciation rate. The amount of depreciation to be included in the operations overhead pool would be the product of the number of hours that the machine will be used during the year, multiplied by the hourly rate previously described, as illustrated below

Acquisition Cost	$1,000
Residual Value	-100
	$ 900
Estimated usage during useful life	5,000 hours
Depreciation Rate ($900 ÷ 5000 hours)	$ .18/hour
Estimated usage during year	500 hours
Depreciation to be included (500 hours x $0.18 hour)	$ 90

The annual depreciation related to all the tangible capital assets (building, plant, equipment, etc.) used by the work center in providing the product/service being estimated will be included in the work center operations overhead costs.

The indirect cost pool (material, operations, or general and administrative expense) to which it is assigned will depend on the use made of the assets.

Supporting documentation for the estimated amount of depreciation should be a detailed listing of the assets involved and the annual depreciation related to each. Where, because of the magnitude of the assets involved, it would not be practical to prepare such a list, the amount of depreciation may be supported by a listing of logical groupings by type of assets and reference made to where the detailed supporting property records may be examined. If depreciation is estimated on other than an item-by-item basis, a complete explanation of the methology used must be included in the supporting documentation.

Rent - This is a cost incurred for the use of a non-Government entity's tangible assets (land, plant and machinery, etc.) in providing the product/service being estimated. All such costs anticipated to be incurred during a fiscal year encompassing the period of performance should be included in the operations overhead pool unless the assets are used in connection with only one product/service. In the latter case, the rental amounts will be treated as a direct cost of that product/service, provided that the rental amounts of similar assets are treated consistently for all other products/services. The amount of rent and the charges included must be determined. If the rent includes a separate charge for maintenance and repair, utility charges, etc., and the amount is significant, those charges should be included in their proper expense classification, if they do not benefit all products or services in the same proportion as the rental charge.

The cost of Government ownership of an asset will normally be included under depreciation and other ownership accounts. However, where a Government-owned asset is "rented" by one Government organization, from a different Government organization, only the actual costs of ownership should be recorded as cost. If the rental amount is predicated on the market rental value, or an incremental cost basis, there may be a significant difference between the rental amount and the cost of ownership. If the rental amount to be included in the estimate represents a GSA-billed Standard Level Users Charge (SLUC) and are in excess of $50,000 annually, a determination of this difference will be made. The difference will be either added or subtracted from the "rental" costs to bring them to the actual costs to the Government. If the rental costs are based on incremental costs, the difference will be determined regardless of their amounts. If it is impractical to arrive at actual Government ownership costs by consultation with the Government lessor, a reasonable estimate of ownership costs will be included.

Maintenance and Repair - The normal costs incurred during a fiscal year for maintaining and repairing the tangible capital assets utilized by the work center providing the product or service being estimated (but not those properly classified as material overhead or general and administrative expense) will be included in the operations overhead cost pool. These costs relate only to those maintenance and repair activities that are necessary to keep the buildings and equipment in operating condition. The costs of major overhauls and repairs which add value or prolong the life of the asset should be treated as capital expenditures and depreciated over the extended or remaining useful life of the asset. The methodology used to estimate of all these costs should be contained in the supporting documentation.

Support Costs - This category includes those indirect costs incurred during the fiscal year by other organizational elements in support of the work center in which the product/service being estimated is to be performed. For example, motor pool services in support of the products or services provided by the work center would be includable in operations overhead. Support costs applicable to material overhead or general and administrative expense should not be included in operations overhead (e.g., ADP services

involving material inventory or general management information), but should be included in those accounts.

Supporting documentation for these costs should indicate the service involved and the performing organization. If significant in amount, the organization supplying the support should estimate the costs in accordance with the provisions of this Handbook and provide the estimate and supporting documentation to the recipient work center for inclusion in its estimate. If the amount is not considered significant enough to warrant preparation of an estimate as described above, the methodology used to arrive at the estimate must be clearly stated in the supporting documentation.

Utilities - This category includes charges for fuel, electricity, telephone, water and sewage services, etc. The amount of these costs applicable to the work center will be determined either on a metered or allocated basis of consumption. Proration of the amounts to the various overhead pools will be by a unit of measure that would vary directly with consumption; e.g., floor space, number of telephones, etc. Estimates of these expenses to be incurred for fiscal years encompassing the period of performance should be based on current experience appropriately adjusted for anticipated future experience. Engineering estimates should be used when experience data are not available. All estimates should be appropriately documented in supporting detail.

Insurance - Operation of any government activity involves risks and potential costs from fire and casualty losses and from liability claims. These risks are normally covered by insurance in the private sector, but the Government is primarily self-insured and must pay for such losses as incurred. Casualty losses have been estimated at .05% of the value of Government facilities, equipment, and material; liability losses at .07% of personnel costs. For a simplified estimate of insurance costs, use .06% of the sum of lines 1 through 4 plus the net book value (acquisition cost less depreciation accumulated to date) of all depreciable assets.

Overtime and Premium Pay - The amounts of overtime and other premium pay to be included as indirect costs in the operations overhead pool are those incurred in order to complete all work of the work center in a timely manner. The reason for considering the overtime or other premium portion of the salaries and wages as an indirect cost is that the scheduling of work effort is usually done on a random basis. That is, the actual work performed during overtime hours or on holidays is usually no more the basis for incurring the premium payments than the effort performed during the regularly scheduled hours. Accordingly, under these circumstances, all work performed in the work center should receive a proration of the premium costs. This is accomplished by including these costs in the overhead expense pool.

The straight time portion of such wages will be considered as Direct Labor as indicated under that section of this Handbook. If the premium pay is necessitated not by an overloading of the work center's normal capacity, but by the special demands of a single customer or client, the related premium costs should be considered as Other Direct Cost for the product or service furnished that customer or client.

Supporting documentation for the amount of overtime and other premium pay included in the indirect cost pool should indicate how the need for such payments was determined and how the amount was computed.

Other Costs - The indirect costs previously discussed are examples of the principal common types of costs which, if applicable, may be entirely or partially included in operations overhead. If further guidance is required on some unique element of cost, the cognizant accounting office should be consulted.

Developing Overhead Rates

Allocation Base - Determination of the amount of the annual operations overhead cost to be applied to the product/service being estimated requires establishment of an appropriate base for allocation of costs. Where the product/service being estimated represents the total output of the organization for the year, all of the operations overhead costs are applicable. However, where more than one product or service is provided during the year, an allocation must be made between these products and/or services. This is normally done by determining and applying an overhead rate. Overhead rates can be expressed as a percentage of one or more elements of expense; e.g., 20% of direct labor or 15% of total direct costs. Overhead rates can also be expressed as a monetary unit related to some quantitative measure; e.g., $2.00 per direct labor hour, $3.00 per machine hour, $0.50 per square foot of space used.

To illustrate the above, assume that Work Center "A" provides three products/services entitled A-1, A-2, and A-3, and a cost comparison analysis is being prepared for A-3. The following additional facts are to be assumed:

- That 300,000 direct labor hours are incurred annually on the three products/services, as follows:

A-1	150,000
A-2	90,000
A-3	60,000
Total	300,000 labor hours

- Direct labor costs for the year are $3,000,000.
- 50,000 machine hours are used to provide the three products/services.

A-1	5,000
A-2	5,000
A-3	40,000
Total	50,000 machine hours

Overhead Rates - Using these assumptions as well as those shown for Work Center "A" in Step One, the following overhead rates (and many others) can be developed:

Percentage of Direct Labor Costs

Operations Overhead ÷ Direct Labor = $4,500,000 / $3,000,000 = 150%

Percentage of Direct Costs

Operations Overhead ÷ Total Direct Costs = $4,500,000 / $9,000,000 = 50%

Rate Per Direct Labor Hour

Operations Overhead ÷ Direct Labor Hours = $4,500,000 / 300,000 = $15.00 per Direct Labor Hours

Rate Per Machine Hour

Operations Overhead ÷ Machine Hours = $4,500,000 / 50,000 = $90.00 per Machine Hour

As can be seen from the above, there are several ways of developing overhead rates. Rarely will the various rates result in the identical allocation of overhead costs to the services/products provided by the work center. Accordingly, the selection of the proper base of allocation is of extreme importance in costing product/service A-3.

A straightforward way to select the best allocation base is to chart operations overhead costs and various possible allocation bases over time. The allocation base that varies most frequently in the same direction at the same time as the operations overhead costs would be the best allocation base.

As long as it can be ascertained that indirect costs vary directly with a measure of an element of expense or activity (dollars, hours, etc.) and that all products or services furnished by the work center benefit from the same elements of expense or activity, and in the same proportion, the use of that single element as the allocation base will normally result in an equitable distribution of overhead costs. Assuming direct labor hours meet this criterion for Work Center "A," operations overhead would be allocated to the three products/services as follows:

Product/ Service	Direct Labor Hours (1)	Operations Overhead Rate Per Direct Labor Hour (2)	Overhead Allocation (1) x (2)
A-1	150,000	$15.00	$2,250,000
A-2	90,000	15.00	1,350,000
A-3	60,000	15.00	900,000
	300,000	$15.00	$4,500,000

A single base of allocation will normally not be warranted in a work center where:

- The indirect costs do not vary directly and proportionately with a single measure of expense or activity, or
- all elements of expense and activities which influence the incurrence of operations overhead costs (e.g., direct labor influences supervision, etc.) are not incurred in roughly the same proportion for the various products/services provided.

When these conditions are encountered, there are two possible solutions. The first would be to subdivide the work centers into departments and develop a separate operations overhead for each. In that case, development of the departmental operations overhead would be identical to the development of the operations overhead rate(s) for Work Center "A", as described herein. The second solution is to develop two or more overhead rates within the work center by grouping the indirect expenses in overhead pools related to the disparate functions and allocating them on appropriate bases. Obviously, the bases of allocation will not be the same.

We can illustrate the use of two rates for Work Center "A" using the assumptions previously cited. From these assumptions, it can be seen that product/service A-3 is responsible for most of the machine hours used by the work center. Specifically:

A-1 uses 5,000 machine hours;

A-2 uses 5,000 machine hours;

A-3 uses 40,000 machine hours.

Accordingly, direct labor hours would not be an appropriate allocation base because it would result in a disproportionate amount of machine shop expenses (depreciation, maintenance and repair) being allocated to products A-1 and A-2. Conversely, the use of machine hours would result in an inequitable share of the labor-related indirect expenses being allocated to product/service A-3.

Two pools for Work Center "A" may be established by segregating machine-related costs from the other operations overhead as follows:

Basic Pool	$1,500,000
Machine Pool	3,000,000
Total Operations Overhead	$4,500,000

It is determined that the best allocation base for the basic pool is direct costs and the rate is:

Basic Pool ÷ Direct Costs	$1,500,000 / $9,000,000	= 1/6 or 16.67%

Then, the $9,000,000 direct costs are determined to be charged to each product as follows:

A-1	$4,500,000
A-2	2,700,000
A-3	1,800,000
Total	$9,000,000

Therefore, the allocation of the $1,500,000 in the basic pool is:

A-1	1/6 of $4,500,000	=	$ 750,000
A-2	1/6 of $2,700,000	=	450,000
A-3	1/6 of $1,800,000	=	300,000
			$1,500,000

It is also determined that the best allocation base for the machine pool is machine hours and the rate, $60 per machine hour (machine pool $3,000,000 ÷ 50,000 machine hours). Taking the machine hour usage previously determined and this rate, the allocation is:

A-1	5,000 hours at $60	=	$ 300,000
A-2	5,000 hours at $60	=	300,000
A-3	40,000 hours at $60	=	2,400,000
			$3,000,000

Combining the two pools gives us the total allocations:

	Basic Pool	Machine Pool	Together
A-1	$ 750,000	$ 300,000	$1,050,000
A-2	450,000	300,000	750,000
A-3	300,000	2,400,000	2,700,000
Total	$1,500,000	$3,000,000	$4,500,000

The following comparison of the resultant overhead allocation by using a single rate based on direct labor hours and the two rates as illustrated above highlight the significant differences that can be achieved by utilizing different overhead allocation methods.

	One Rate (Direct Labor Hours)	Two Rates (Basic and Machine)	Difference (Substract One from Two)
A-1	$2,250,000	$1,050,000	$(1,200,000)
A-2	1,350,000	750,000	(600,000)
A-3	900,000	2,700,000	1,800,000
Total	$4,500,000	$4,500,000	$ -0-

Summary

In summary, operations overhead is a significant cost element in estimating the cost of providing a product or service. It is extremely important that elements of indirect expense included in the operations overhead pool are appropriate and the amounts thereof are carefully estimated. It must be determined by careful study whether more than one pool of expenses is required. Also, the selection of a proper base(s) for allocation is essential to accurate estimating. As illustrated above, significant differences can result from the use of different methods for allocating overhead. The choice of the appropriate method should be based on a review of the functions and their related costs within the work center. The pools and bases should be selected based on supported facts and circumstances. They should not be selected on the basis of arbitrary assumptions, or the fact that the data for a particular base are readily available. The main purpose of the overhead rate must always be kept in mind. It is developed to permit the allocation of overhead expenses to the products/services being provided on the basis of the benefits they receive from the incurrence of the cost.

Supporting Documentation

The supporting documentation needed for the amount of operations overhead allocated to product/service A-3 will be a listing of the expenses included, the base used to develop the rate(s), and the supporting detail for each. Figure 5 is an illustration of the operations overhead costs of Work Center "A."

FIGURE 5
WORK CENTER "A"
COMPUTATION OF OPERATIONS OVERHEAD RATE
FOR THE YEAR 197x

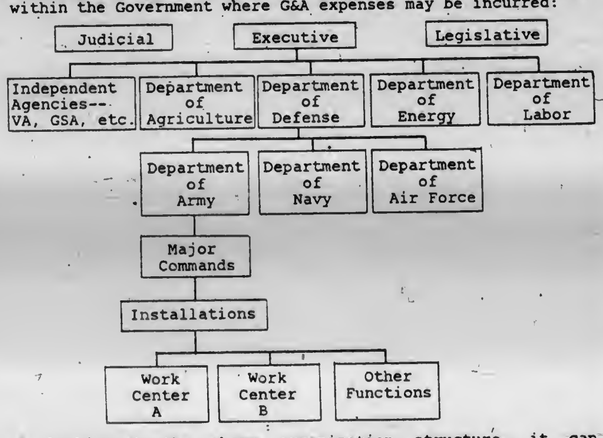
Operations Overhead Expenses	Basic	Machine	Total
Indirect Labor			
Supervision	$ 70,000	$ 300,000	$ 100,000
Clerical	700,000	300,000	1,000,000
Indirect Time of Direct Personnel	400,000	600,000	1,000,000
Indirect Materials and Supplies	30,000	370,000	400,000
Depreciation	40,000	400,000	440,000
Rent	10,000	50,000	60,000
Maintenance and Repair	40,000	385,000	425,000
Support Costs	10,000	65,000	75,000
Utilities	60,000	610,000	670,000
Insurance	10,000	20,000	30,000
Other			
Allocations Costs	127,000	168,000	295,000
Minor Direct Costs	3,000	2,000	5,000
TOTAL OPERATIONS OVERHEAD (A)	$1,500,000	$3,000,000	$4,500,000
Allocation Bases (B)			
Direct Costs		$9,000,000	
Machine Hours		50,000	
Overhead Rate (A)÷(B)=(C)	16.67% of Direct Costs	$60 Per Mach. Hour	
Application to Product/ Service A-3			
Direct Costs Applicable To A-3 (D)	$1,800,000		
Machine Hours Applicable To A-3 (D)		40,000	
Amount of Operations Overhead Allocated to A-3 (C)x(D)	$ 300,000	$2,400,000	$2,700,000

INTERAGENCY SUPPORT

In developing the estimates of Government costs, products or services which are excess to the needs of other Federal agencies should be used in preference to new procurements. The agency that will be providing the excess product or service must prepare cost estimates in accordance with this Handbook and furnish its cost data on lines 1 through 9 and its other considerations on lines 23 through 30 of the Cost Comparison Form. The Form must be signed on the "prepared by" and "audit certification" lines. The Cost Comparison Form will be submitted to the agency receiving the product or service. The receiving agency will classify the providing agency's costs as other direct costs, operations overhead, or general and administrative expense as appropriate. The other considerations will also be added to the appropriate classification. The providing agency's Cost Comparison Form will be used as supporting documentation. NOTE: Agency reimbursement charges for providing the product or service to another agency may not be used as a basis for the cost estimate unless such charges reflect all costs as provided in this Handbook.

If a decision to contract out would cause the government not to utilize available excess facilities, material or service capacity, any resulting increase in cost to the government must be included as an element in computing the total cost of contracting for the product or service. For guidance in developing and documenting such costs, see the section under OTHER CONSIDERATIONS titled, "Utilization of Government Capacity."

OTHER DIRECT COSTS



Other direct costs are the sum of all those direct costs exclusive of direct material and direct labor, which are identified as having been incurred specifically for a particular product or service (the final cost objective). Some examples of other direct cost are: service center charges (e.g., ADP service center, printing shop, etc.), travel, and purchased services.

There are certain types of effort that some organizations treat as indirect expense and others classify as direct. Examples of these costs are special travel expenses, preservation, packaging and packing, plant rearrangement, consultant's fees, certain clerical salaries, shop supplies, transportation costs, plant protection, royalties, computer expenses, and telephone and telegraph expenses. Whenever an organization decides to classify a cost as direct it normally will be included under Other Direct Cost unless it is direct material or direct labor. When an organization decides to reclassify a cost from an indirect to a direct charge, it is necessary to ascertain that the organization's accounting and estimating practices provide consistent treatment of these special costs during the period under review. To prevent duplication, it must be established that when these items of expense are treated as direct costs, similar costs are excluded from indirect costs applied to the estimate. Conversely, when an organization reclassifies a cost from direct to indirect, care must be taken to include these costs in the appropriate indirect costs pool.

Refer to the DIRECT LABOR and DIRECT MATERIALS sections of this handbook for cost estimating instructions and supporting documentation requirements which are appropriate for estimating and documenting other direct costs.

GENERAL AND ADMINISTRATIVE EXPENSES

General and administrative (G&A) expenses are those financial, management or other expenses which are incurred for the benefit of an organizational unit as a whole. They do not include expenses which should be classified as material or operations overhead expenses which have been discussed previously in this Handbook. Because of their nature, general and administrative expenses may be incurred at various levels within the Governmental structure. The following simplified diagram depicts the various levels within the Government where G&A expenses may be incurred:

By looking at the above organization structure, it can readily be seen that certain administrative expenses incurred by the executive, legislative or judicial branches of the Government are applicable to the various departments and independent agencies. Similarly, certain administrative expenses incurred at the department level would be applicable to the activities in their organization (e.g., Departments of Army, Navy, and Air Force). This flow would continue on down to the organization level. Within the organization itself, general and administative expenses may be incurred which are applicable to all the functions being performed there. This flow-down of G&A expenses will vary based on the organizational structure of each department or agency, but will exist in some form in each. A portion of the general and administrative expenses incurred above the installation level are applicable to the product or service being estimated. However, for purposes of this Handbook, only those G&A expenses which contribute directly to the actual operation of the organization will be included in the estimate. This decision is based on materiality of amount and the conclusion that the efforts involved in funding, policy-making, long-range planning, direction, etc. (commonly referred to as staff functions) would continue and be equally applicable to either contractor or Government effort.

In deciding at what level to discontinue the allocation of G&A expenses to the product or service to be provided, a self-sufficiency criterion should be used. A self-sufficient organization is one that operates as an independent unit, receiving only funds, policy direction, and guidance from the next higher organizational unit. If any general and administrative-type activities are provided at no cost or on an incremental cost basis, the organization is not self-sufficient. In these circumstances, an appropriate allocation of the applicable expenses of the incurring organization, should be included in the recipient's G&A expenses to be allocated to the products and/or services it provides.

To illustrate, assume the organization we are concerned with is a laundry. If that laundry is located on its own land, does its own maintenance, budgeting, accounting, etc., it can be considered self-sufficient and no further G&A costs will be allocated to it from the next higher organizational unit. The G&A costs incurred by the laundry itself will be allocated to the various products or services it provides. However, if that laundry was collocated on the same grounds or in the same building of another organization, say a hospital, and the hospital staff provides it with certain maintenance, budgeting and accounting effort, on a no-cost or incremental cost basis, then the laundry would not be self-sufficient. The applicable portion of the hospital's G&A expense must be allocated to the laundry. Assume further that the hospital to which the laundry is attached is located on a military base and the hospital receives certain support from the base, such as road and parking lot maintenance, security, fire protection, etc. If the hospital receives these services on a no-cost or incremental cost basis, it is not a self-sufficient unit. The allocable

portion of the costs incurred by the base that benefits the hospital should be included in the hospital's G&A expenses and an equitable amount thereof allocated to the laundry. For purposes of this illustration, we will assume that the military base is self-sufficient (they all are not); that is, it receives only funding, policy direction, and guidance from its next higher level of command. Accordingly, none of the G&A expenses incurred by the next higher level of command would be allocated to the military base.

In addition to the self-sufficiency criterion, materiality of amount must be kept in mind in determining the level above which G&A expenses will not be considered in the estimate. When the costs involved are minor in amount and their ultimate allocation to the product or service is not likely to have a bearing on the decision to contract-out or perform in-house, they may be excluded if not readily available.

The G&A rate to be used to allocate the organization's G&A expenses to its activities will be developed in much the same manner as the operations overhead rate was developed. That is, a pool of annual G&A expenses will be developed and the total divided by the allocation base.

A significant difference between general and administrative expense rate development and that for operations overhead is that G&A expenses must be accumulated in a single pool. This differs from the operations overhead where certain circumstances may require the establishment of more than one pool. The reason that only one G&A pool of expenses will be needed is the nature of G&A expenses. As previosuly stated, G&A expenses are incurred for the benefit of the organization as a whole. If an incurred expense does not meet this criterion, it should not be included in the G&A pool.

Typical examples of the types of cost to be included in the G&A expense pool are the expenses connected with the following offices or functions:

The Office of the Organization Director (Commander)
The Office of the Comptroller
The Office of the General Counsel (Judge Advocate)
Centralized Personnel Services
Centralized Administrative Services (Adjutant General)
Centralized Procurement
Public Relations
Internal Review (Audit)
Security

To develop a G&A expense pool, the costs associated with each of the functions incurred for the benefit of all products/service provided must be estimated. The cost of performing each function is the total of the expenses (indirect labor, indirect material, etc.) incurred for that purpose during the year. The nomenclature for the types of expenses to be included in G&A overhead pool are similar to those included in operations and material overhead. The characteristic which distinguishes these three types of overhead costs, one from the other, is the purpose for which it was incurred. Accordingly, the G&A pool will be made up of elements of expense similar to those for operations overhead in nomenclature but which are related to performing functions and services such as those performed by the offices listed above. The methods of estimating the amounts of these costs will be the same as those described in the Operations Overhead section and are not repeated here..

Since all G&A expenses must be incurred for the benefit of the organization as a whole, the base used to allocate these costs to the final cost objectives must be representative of the overall operations of the organization. For this reason, the total costs incurred (exclusive of G&A expenses) has been chosen as the allocation base. This base should include the cost of all the mission functions of the organization whether these are commercial, industrial or governmental functions. If, because of the use of this base, the G&A expenses allocated to any final cost objective are significantly different from the benefits it received from their incurrence, a special allocation of G&A expenses to that final cost objective should be made. The amount of the G&A expenses so allocated should be removed from the pool and the costs of the final cost objective, exclusive of G&A, should be removed from the base.

The following steps depict the development of a G&A rate:

Step 1: Develop the G&A expense pool

General and Administrative Expenses	
Executive, Professional, Technical, and Supervision Salaries	$1,450,000
Clerical and Other Salaries	1,175,000
Other Expenses (Training, Depreciation, Indirect Materials, Allocated Support Costs, etc.)	3,100,000
Total G&A Expenses	$5,725,000

Step 2: Develop the Base of Allocation (costs incurred by Organization A, exclusive of G&A expense)

Direct Costs	$42,500,000
Operations Overhead Costs	8,900,000
Material Overhead Costs	100,000
Total Cost Incurred Exclusive of G&A Expenses	$51,500,000

Step 3: Develop the Organizational G&A rate (divide the pool by the base)

$ 5,725,000 = 11.12%
$51,500,000

To estimate the amount of the annual G&A expenses applicable to the product or service being estimated, the above developed rate will be applied to the total estimated annual cost (exclusive of G&A) of providing the product or service as illustrated below:

Direct Material	$ 450,000
Material Overhead	5,000
Direct Labor	1,000,000
Fringe Benefits	250,000
Other Direct Costs	50,000
Operations Overhead	1,500,000
Subtotal	3,255,000
General & Administrative Expense ($3,255,000 x 11.12%)	361,956
TOTAL COST	$3,616,956

The detail required to support the amount of G&A expense allocated to the product or service being estimated will be a listing of the expenses related to the functions and offices classified as general and administrative expenses. The amount to be included in the pool is the annual amount of the G&A expense expected to be incurred during the year(s) in which the period of performance is encompassed. These amounts will be predicated on past experience, adjusted to provide for inflation and any change in operations. If the period of performance occurs in more than one fiscal year, a separate G&A rate will be developed for each fiscal year in which a portion of the performance will take place. For instance, if a service is to be provided for 18 consecuritve months beginning on October 1, 197X, two rates will have to be developed. The rates will be applied to the estimated cost of the service provided in each fiscal year. The base of allocation will be the total estimated cost (exclusive of G&A) expected to be incurred by the organization in each fiscal year. The supporting detail for each year will indicate the source of the estimates and where supporting documentation can be found.

INFLATION OF OUT-YEAR COSTS

In preparing the Government's estimate, all known or anticipated increases in costs to be incurred in the first year of operation should be provided for in each element of cost, as stipulated by the instructions contained in this Handbook. For all subsequent years, anticipated changes in scope of work may be added but no inflation factors will be added to the individual elements of cost. Rather, an amount equal to 4% of the preceding year's total cost (adjusted for any scope changes) will be added to each subsequent year's costs. These amounts will be entered on line 8 of the Cost Comparison Form under the appropriate year.

For example, if the first year's costs on line 9 are $150,000, then the amount on line 8 in the second year will be $6,000 (4% of $150,000); assuming there is no change in other cost elements, the amount on line 8 in the third year will be $6,240 (4% of $156,000), etc.

CHAPTER V. - DEVELOPING AN ESTIMATE OF CONTRACTING-OUT COSTS

This section of the Handbook deals with the determination of the cost to the Government of acquiring the product or service being analyzed by letting a contract. It includes determination of not only the amount to be paid to the contractor (contract price) but also the related in-house costs that will be incurred by the Government as a result of contracting out. The cost comparison form (Exhibit 1) identifies the following categories of Government cost which might be incurred in connection with contracting out:

Contract Price
Transportation
Contract Administration
Government-Furnished Property
Standby Maintenance
Other Costs
General and Administrative Expense (on the above)

Comments on each of these categories are contained in the following paragraphs.

CONTRACT PRICE

The contract price included in the cost comparison must be supported by a firm bid or proposal. The contractor's bid or proposal must be predicated on the same statement of work utilized in preparing the Government's estimate. Also, the solicitation for bids or proposals will notify the bidders or offerors that a comparison will be made between the cost of contracting the effort and performing it in-house.

In determining the amount to be recorded as the contract price, consideration must be given to the contract type. The following guidance is provided in this regard.

a. In the case of an advertised firm fixed price contract, the price of the low bidder or offeror will be entered without adjustment. If a firm fixed price contract is to be negotiated, the negotiated low bid price will be entered.

b. When fixed price contracts with flexible pricing arrangements are contemplated, e.g., fixed price incentive fee, the target price of the apparent low bidder or offeror will be entered.

c. If a contract with an award fee is proposed, the performance level comparable to that attributed to Government employees in preparing the Government's estimate will be used to estimate the amount of the fee. The estimated award fee, plus the contract costs of the apparent low bidder or offeror will be entered.

d. If a time and material or labor-hour contract is proposed, the estimated total cost of performance may be calculated and entered. Alternatively, comparable rates can be developed for the Government cost estimate and the comparison can be made on the basis of rates, rather than total costs.

e. If a cost reimbursement-type contract is required by special circumstances, the apparent low bidder or offeror's estimated costs must be subjected to a meticulous technical and cost evaluation to assure that the estimated costs are neither over nor understated. Adjustments to the bidder or offeror's estimate need to be reviewed with the bidder or offeror before the adjusted contract price is entered.

TRANSPORTATION COST

The Government may incur transportation costs whether a product/service is provided by an in-house operation or by a contractor's operation. Transportation for an in-house operation is normally associated with the applicable overhead. This section deals with the cost to the Government for transportation provided in connection with a product/service obtained by contract.

The contract documents or negotiation memoranda will indicate the additional transportation that is to be furnished by the Government. These items are usually clearly indicated. There may be some transportation in addition to that spelled out in the contracts which require an estimate. The best source for obtaining estimates of the cost of this transportation is the local transportation or purchasing office.

Typical of the transportation costs that may be incurred by the Government are:

a. Cost of transporting a contractor's employees;

b. Cost of transporting Government material, equipment, or supplies to and from a contractor's site, such as:

- Cartage cost from airport, bus, rail or marine terminals;
- The cost of special equipment, like refrigerated vans or heated containers;
- The cost of demurrage on rail cars or detention charges for trucks;
- In exceptional cases, the cost of special insurance.

The supporting documentation for these costs should describe the transportation to be provided, the mileage and/or rates utilized in arriving at the estimates, and the source from which they were obtained. If transportation costs were derived in some way other than by extending applicable mileage and rates, the methodology used to arrive at the estimate should be fully explained.

CONTRACT ADMINISTRATION

Contract administration includes the costs incurred by the Government in assuring the contract is faithfully executed by both the Government and the contractor. In addition to reviewing contractor performance and compliance with the terms of the contract, contract administration consists of processing payments, negotiating change orders, and monitoring close-out of contract operations.

The costs of contract administration will be determined by applying four percent (4%) to the contract price, line 10. The result will be entered on line 12 as the cost of contract administration.

GOVERNMENT-FURNISHED PROPERTY

When Government property is furnished to a contractor in connection with the performance of a contract, the cost connected with its use must be considered in determining the overall cost of the contract. Government-furnished property includes (1) that property that is in the possession of, or acquired directly by, the Government and subsequently delivered or otherwise made available to the contractor, and (2) property acquired by a contractor in accordance with the terms of the contract that does not become a part of the end item or is not consumed during contract performance and title thereto vests in the Government. Examples of Government-furnished property are land, buildings, facilities, equipment, special tooling, materials, and supplies.

The methods for determining the costs related to furnishing Government property will vary with the use made of the property. Where Government property becomes a part of the end product (material) or is consumed in providing a product or service (supplies) the full cost to the Government of acquiring and furnishing these materials and supplies must be added to the cost of contracting. When property such as land, buildings, facilities, equipment, and special tooling are provided for the contractor's use during the performance of the contract but will be returned to the Government upon contract completion, the costs of ownership of these assets by the Government during the period of contract performance, plus any other costs incurred in connection with furnishing the property to the contractor must be added to the cost of contracting. More specific guidance is contained in the following paragraphs. The sum of the costs for Government-furnished materials and supplies and for Government-furnished facilities, in accordance with these paragraphs, will be entered on line 13 of the Cost Comparison Form.

Government-Furnished Materials and Supplies

Government-furnished material and supplies (GFM&S) is property which may be incorporated into or attached to a product/service to be delivered under a contract and those supplies which may be consumed or expended in the performance of a contract. It includes, but is not limited to, such items as raw materials, parts, subassemblies, components, and manufacturing supplies. Care must be taken to exclude the cost of any material and supplies that are included in the contract price.

The instructions for estimating the costs of GFM&S are identical to those for estimating the cost of in-house material and supplies. Therefore, the sections of this Handbook entitled, "DIRECT MATERIALS" and "MATERIAL OVERHEAD" should be referenced for guidance in estimating the cost of GFM&S. See the section entitled, "TRANSPORTATION COST," for instruction on the treatment of costs that are associated with transporting GFM&S to and from the contractor's site.

The supporting documentation for GFM&S shall include a detailed listing of all the items to be furnished with

quantities, unit prices, suppliers, details of adjustments and the source of the information. See Figure 1 in the MATERIALS section of this Handbook for an illustration of the supporting documentation requirement.

Government-Furnished Facilities (Buildings and Other Land Improvements) and Equipment

The costs applicable to facilities and equipment furnished to contractors by the Government must be added to the cost of contracting out for purposes of Circular A-76 comparisons. These costs consist of depreciation of capitalized equipment or facilities, or the full expense of minor items of equipment which do not meet agency capitalization criteria. Depreciation on Government-furnished facilities and equipment shall be computed in accordance with the instructions on computing depreciation contained in the Handbook section entitled, "OPERATIONS OVERHEAD." Only the depreciation costs applicable to the proposed contract period will be considered for purposes of the cost comparison.

When the Government rehabilitates, modifies, or expands existing Government-owned facilities or equipment for the purpose of providing it to a contractor as Government-furnished property, the related costs will be treated as follows:

a. If the rehabilitation, modification or expansion of the Government facilities or equipment increases the useful life of the assets to the Government or the asset value of the property, the related costs shall be amortized over the remaining useful life of the assets. The amount to be included in the Circular A-76 cost comparison as an add-on to the contract cost shall be limited to the cost amortization applicable to the period covered by the proposed contract.

b. If the rehabilitation or modification work consists primarily of plant rearrangement, minor repairs, or other work which does not extend the useful life of the assets or does not increase the value of the property to the Government, the related costs shall be considered as additional costs of contracting out. The entire cost of such rehabilitation or modification will be charged to the first year of contract operations or spread over the contract period depending on the period the costs are determined to benefit.

c. While the acquisition cost of land is not depreciable, the costs of any improvements or alterations made to land utilized in performance of the contract, such as landscaping, special grading, etc., should be accumulated and amortized over the estimated useful life of the improvements or alteration. The add-on to the contract cost will be limited to the cost amortization applicable to the period covered by the proposed contract.

Cost estimates will be supported by a summary listing of all the above types of cost and the location of the detailed records used to determine them as follows:

Government-Furnished Facilities and Equipment

		Amount	Source
Depreciation			
Land Improvements	$ XXX		
Buildings	X,XXX		
Equipment	XX,XXX		
		$XX,XXX	
Other Expenses:			
Plant Rearrangement	X,XXX		
Minor Repairs	XXX		
Other	XXX		
		X,XXX	
Total		$XX,XXX	

Supporting data should include details on original cost, residual value, annual depreciation, etc., of the equipment and facilities.

STANDBY COSTS

When equipment and/or facilities must be held in standby status to assure contract performance, the cost of holding them must be added to the contract price. Costs related to holding equipment and facilities for any other purpose are not standby costs for purposes of this Handbook, and should not be added to the contract price. Standby costs are defined as expenses necessary for the upkeep of property in standby status which neither add to the permanent value of the property nor appreciably prolong its intended life, but keep it in an efficient, operating condition or available for possible use in performance of the contract.

Standby cost is not to be confused with UTILIZATION OF GOVERNMENT CAPACITY or DISPOSAL OF FIXED ASSETS. Each of these factors is discussed separately in Chapter VI of this Handbook. Normally, Government property is disposed of or put to other use when a decision is made to obtain a product or service from the private sector instead of continuing to produce it in-house.

If it is determined that it is necessary to hold Government property in a standby status, all related costs must be estimated for inclusion in the cost comparison analysis. The estimate of standby costs begins with a determination of the facilities and/or equipment that will be placed in a standby status to support a commercial procurement action. The next step is to estimate the cost, if any, of preparing the facilities and equipment for standby status. The cost of holding the facilities or equipment in a standby status must also be estimated in order to determine the total standby maintenance cost which would result from a commercial procurement versus in-house production. These costs may be estimated by utilizing engineering estimates, prior experience, or experience of other organizations. If similar standby costs have been inccured previously, these may be used as a basis for subsequent costing provided appropriate adjustments have been made for facilities, equipment, and pricing variations. When computing the depreciation cost of property in standby status it will be necessary to review the useful life of the property since useful life may be increased by the change from production to standby status. This review will be necessary even if the depreciation is based on machine hours usage because, while wear and tear may cease, obsolescence may continue.

When the estimated standby cost is determined, as described in the previous paragraph, the total of this cost will be entered on line 14 of the Cost Comparison Form. Backup data must be included for all the cost elements associated with preparation for and maintenance in standby. See Chapter IV of this Handbook for cost estimating instructions, types of cost elements to be included, and documentation requirements. Since Government property is normally disposed of or put to another use when a product/service is procured from the private sector, a detailed justification is required for holding the Government property in standby status.

OTHER COSTS

This cost category encompasses any additional Government costs which would result from commercial procurement and which are not covered elsewhere in the cost comparison. This cost category is included to provide for unusual circumstances which may be encountered in particular cost comparisons.

Supporting data will include a complete description of the costs involved, together with cost detail as outlined for the various cost elements in Chapters IV and V of the Handbook.

GENERAL AND ADMINISTRATIVE EXPENSE

The general and administrative (G&A) expense applicable to the in-house effort related to contracting for a product or service must be included as part of the cost of contracting out. The amount of such expenses to be included will be determined by applying the G&A rate developed in Chapter IV to the total costs of the in-house effort (the sum of lines 11 through 14).

CHAPTER VI - OTHER CONSIDERATIONS

Up to this point, the Handbook has been concerned with determining the cost to the Government of acquiring a product or service either by contracting-out or by in-house performance. The decision as to which alternative to follow will not necessarily be made on the basis of the costs of providing the product or service developed in accordance with Chapters IV and V. Additional costs and other factors may have to be considered to determine the most economical of the two methods.

In order to make an informed decision, the full impact of the two alternatives on the overall cost of Government operations must be known. This will require the decision-maker to evaluate the following:

- Loss of opportunity to employ resources in other areas if performed in-house (cost of capital);
- The one-time costs that will be incurred to start or terminate a Government operation;
- The impact on remaining operations of contracting-out a portion of a work center's effort (utilization of Government capacity);
- Loss of revenue (Federal taxes) due to in-house performance;
- Any other impact of contracting-out or in-house performance that can be quantified.

Comments on the determination and application of the amounts related to the above are contained in the following paragraphs.

COST OF CAPITAL

The cost of capital is defined as an imputed charge on the Government's investment in all of the plant facilities and other assets necessary for the work center to manufacture products or to provide services. For purposes of simplifying the comparisons required by this Handbook, a distinction is being made between those assets which will be retained and those that will be disposed of if the product or service is contracted out. However, as will be noted below, all of the required assets will be considered. Determination of the amount applicable to those assets that are to be retained, regardless of whether or not the product or service is contracted out, will be determined in accordance with the provisions of the following section entitled, "DETERMINATION OF THE COST OF CAPITAL FOR RETAINED ASSETS." The amount applicable to those assets to be disposed of if the product or service is contracted out will be determined in accordance with the section entitled, "DISPOSAL OF FIXED ASSETS." Basically, the imputed charge for the cost of capital is an opportunity cost; that is, if the capital had not been devoted to the production of the current period, it could have been devoted to another use which would have provided other income or avoided interest expense; it is not an attempt to recover interest on borrowed money.

Determination of the Cost of Capital for Retained Assets

When assets are to be retained by the Government, there are four possible reasons therefor. The first and most obvious reason would be to provide the product or service being estimated by in-house effort. The second reason would be that they are to be provided to the contractor in order to perform the contract. The third reason would be that they must be held to assure performance in the event of a significant contract interruption or delay. The fourth reason is a need for the Government to retain the industrial or commerical capability to meet possible future contingencies. If the assets are retained for any of the first three reasons, consideration of the opportunity cost related thereto must be given in making the cost comparison. It is to be noted that some of the same assets may be retained for any of the first three reasons. The reason for retaining such assets governs whether the cost of capital related thereto will be added to the in-house or contracting-out effort. Since the fourth reason is not germane to the question of contracting out or in-house performance, no cost comparison consideration will be given to the Government's ownership of those assets.

In order to estimate the cost of capital, it is necessary to obtain the net book value (acquisition cost less depreciation accumulated to date) of each tangible capital asset (land, improvements, buildings, equipment, etc.) which is to be retained. The acquisition cost of land and the net book value of each depreciable tangible asset should be obtained from the accounting records. However, if the accounting records are unavailable, it will be necessary to

utilize engineering estimates, prior experience, or experience of other organizations. The cost of capital will be computed by applying an opportunity cost rate of 10% to the total net book value of the assets to be retained. If the assets involved are used solely to provide the product or service being estimated, the total amount of the cost of capital will be added. If the assets involved are used not only to provide the product or service being estimated, but other products or services as well, a proration of the cost of capital will be made.

Prorating Cost of Capital - If the cost of capital were a real rather than an imputed cost, it would be properly classified as a General and Administrative (G&A) expense. Accordingly, its proration to the product or service being estimated will be in the same proportion that the total estimated costs to be incurred (less G&A expense) for the product or service being estimated bears to the total estimated cost to be incurred (less G&A expense) for the performing organization. This latter amount is the base for allocation of the G&A expenses and should be readily obtainable from the supporting documentation. An example of this computation is shown below:

From the illustration in the G&A EXPENSE section of this Handbook the following data are obtained:

Total costs incurred (less G&A expenses) for the product/service being estimated	$ 3,255,000
Total costs incurred in Organization A (less G&A expenses)	51,500,000
Assume total annual cost of capital for assets required	250,000

Then cost of capital applicable to the product or service being estimated would be computed as follows:

$$\frac{\$\ 3,255,000}{\$51,500,000} \times \$250,000 = \$\ 15,800$$

Assigning Cost of Capital -- After the cost of capital for retained assets is determined, amounts must be assigned, as appropriate, to the cost of in-house performance and the cost of contracting out.

a. In-house Performance -- In the case of assets retained because they are required for in-house performance, the entire amount of the cost of capital for those assets (or the pro rata share when appropriate) will be added to the cost of in-house performance by entry on line 18 of the Cost Comparison Form.

b. Contract Performance -- Assets retained in connection with contract performance may include one or both of the following:

1. Assets retained in order to provide them to a contractor for use in contract performance.

2. Assets retained by the Government to assure provision of the product or service in the event of interruption of contract performance.

The total cost of capital for any assets retained for 1 and 2 above must be considered as costs of contracting. The total of these amounts will be entered on line 23 of the Cost Comparison Form.

Supporting Documentation -- Supporting documentation for the cost of capital related to the assets to be retained shall include a detailed listing of such assets and the net book value of each. If these assets have been previously listed in connection with the computation of depreciation, a reference may be made to that listing rather than duplicating it. Where, because of the magnitude of the assets involved, it would not be practical to prepare such a list, the assets may be supported by a listing of logical groupings by types of assets and reference made to where the detailed supporting property records may be examined.

Disposal of Fixed Assets

When a product/service is being performed in-house by Federal employees, a decision to contract that operation may eliminate the need for all or some portion of the fixed assets used in providing the product or service. The value to the Government of reducing this need must be included as a consideration in the comparative cost analysis. This section deals with those fixed assets which will be disposed of if a decision is made to contract for the product or service.

In determining such costs for consideration in a comparative analysis, the current market value of each of the fixed

assets must be ascertained. If the property is to be disposed of by either GSA or Defense Property Disposal Service, assistance may be obtained from them as to current market value and disposal costs. Also, for equipment items, the market value may be estimated, based on commercial publications which list sales prices of used machinery and equipment of all types. Assistance in this regard may also be available from dealers in the specific equipment for which an estimate is needed.

After an estimate is made of the current market value of the fixed asset to be disposed of, an estimate will be made of the expenses connected with the disposition; i.e., sales commission, advertising, legal fee, relocation, etc. The total expenses related to the disposal will be deducted from the estimated market value to determine the net value to the Government of the fixed asset. Note well: The book value of the asset should not be deducted from the market value to arrive at the net value to the Government. The approach taken in this section precludes the necessity of considering any gain or loss on disposal of the asset.

The net value of each fixed asset will be calculated as described above, and the net value of all fixed assets to be sold will be totalled. This total will be the base for calculating the amount to be included in the comparative cost analysis. The base figure will be multiplied by a factor of 10% representing the annual value to the Government of the amount of the net proceeds. For purposes of this cost comparison, the proceeds that could be realized by disposal of the assets are considered to be a source of additional revenue to the Government. Accordingly, the amount determined from the above calculations is considered as potential revenue to the Government and will be treated as an offset (reduction) to the cost of contracting out and entered on line 28 of the Cost Comparison Form.

ONE-TIME COSTS

In every case where the Government either starts or discontinues an in-house activity it incurs one-time costs resulting from changing the source of the product or service it uses. For new starts, the one-time costs are those associated with establishing the in-house capability and discontinuing a contract arrangement. For conversions, the one-time costs arise from terminating the in-house activity and starting a contract arrangement. Even though these costs are incurred only once and will not recur unless the mode of performance again changes, the total costs may be significant. The significance is measured in relation to the difference between the Government's costs of obtaining the product or service by contract and the Government's cost of in-house performance. The estimated savings to the Government by effecting a proposed new start or conversion must be sufficient to offset the one-time costs over a reasonable time period. As a general rule, a changeover will not be justified on the basis of a cost comparison unless the total one-time costs will be recoverable from estimated savings within five years.

Guidance for determining one time costs for new start and conversion situations is contained in the following paragraphs.

One Time Costs Related to a New Start

While a new start may require substantial new investment by the Government in facilities and equipment, these costs should be annualized in accordance with guidance contained in this Handbook concerning cost of capital and depreciation, and not be included as one-time costs under this section. The costs of acquiring the facility, however, and costs incurred for the acquisition and installation of equipment, unless included in the capitalized cost, would need to be included in one-time cost estimates. Other examples of one-time costs would include office and plant rearrangements, employee relocation expenses, and expenses which are the direct result of discontinuing an existing contract. If a contract is completed, it is not normal that any additional costs will be borne by the Government.

Determination of the full scope of the Government's one-time new start costs should be made in consultation with engineering, production, management, and procurement personnel. Supporting documentation should indicate clearly the type of new start costs anticipated and the methodology used to estimate the amounts to be incurred. The detail supporting the estimate of each element of cost should be similar to that provided for in Chapter IV. For comparison purposes, one-fifth of the total should be added to each year of the cost comparison up to and including the fifth year. The one-fifth figure should be added to the cost of in-house performance by entering it on line 19.

One-Tme Costs Related to a Conversion

When the Government discontinues an in-house activity to obtain the product or service by contract there are usually substantial one-time costs associated with the conversion. These costs are identified and discussed in the following paragraphs.

Material-Related Costs -- A conversion will normally result in certain items of material being held in inventory (either unissued material, work in process, or finished goods) becoming excess. It may be possible to transfer certain of this material to the contractor who is going to provide the product or service in the future. In this case, the material will be treated as Government-furnished material and priced in accordance with Chapter V. In other cases, the material may be diverted to other uses of the Government; in this case, only the additional costs incurred in connection with making the material available for the other use will be included as conversion costs. When neither of the above dispositions of the material is practical, the material will normally be disposed of by sale. If it is anticipated that the material will be sold, the estimated gain or loss on the sale must be considered in determining conversion costs. The estimated gain or loss will be computed by deducting from the estimated sales price the acquisition cost of the material plus material overhead (at the rate developed in Chapter IV) and all other expenses related to disposition, such as packing, shipping, etc. If the material is to be disposed of by either GSA or Defense Property Disposal Service, these agencies should be consulted in arriving at these costs. The supporting documentation for such costs should contain a listing of the items and the quantity to be disposed of, their acquisition cost, and the estimated sales price. In addition, all other expenses such as packing, shipping, disposal, etc., should be adequately supported by documentation describing how the amounts were determined.

Labor-Related Costs -- A conversion will also normally result in the incurrence of certain labor-related expenses that are considered one-time costs. These include severance pay, homeowner's assistance, grade pay retention, relocation expenses and retraining expenses. The amount of these expenses should be computed in consultation with management and personnel department employees. Historical data from the agency or from other agencies gathered from similar circumstances should be considered in arriving at the appropriate cost. The supporting documentation should contain appropriate detail and indicate how the various amounts were arrived at.

Other Costs -- A conversion will normally necessitate certain actions that would not be necessary if the activity were to be continued. For example, a special physical inventory may be necessary to ascertain the material (supplies, equipment, small tools, etc.) on hand. The cost of taking such an inventory would be a proper conversion costs. Also, it may not be possible to avoid the continuation of some costs, such as lease or rental agreements for facilities or equipment, beyond the time that they are no longer required. These types of costs are also properly includable as conversion costs. Supporting documentation for such costs should clearly state the purpose for each item of costs, and how the amount thereof was determined.

General and Administrative Expense -- An amount for general and administrative expense must be included. That amount will be determined by applying the G&A rate developed in Chapter IV to the sum of the material-related, labor-related and other costs.

Documentation and Comparison -- The amount for general and administrative expense must be added to the sum of the costs to which the G&A rate was applied to establish the total one-time costs related to a conversion. The detail supporting the estimate of each element of cost should be similar to that provided for in Chapter IV. For comparison purposes, one-fifth of the total one-time costs should be added to each year of the cost comparison up to and including the fifth year. The one-fifth figure should be added to the cost of contracting by entering it on line 25.

UTILIZATION OF GOVERNMENT CAPACITY

The potential impact on a work center of contracting out for a product or service which it currently provides must be taken into consideration before a decision is made. The decision to contract out can result in the work center becoming completely idle, operating at a reduced capacity, or operating at the same or increased capacity.

When the decision to contract out will result in the work center becoming completely idle because no other use of its capacity is planned, its facilities will either be disposed of or placed in a stand-by status. The circumstances under which the costs related to placing assets in a stand-by

status will be considered as an additional cost to contracting out are set forth in the Standby Costs portion of this Handbook. When the assets are to be disposed of, an opportunity cost will be added to the Government's in-house estimate as prescribed by the Cost of Capital section of this Handbook.

When it is planned that the efforts of the work center will not be reduced because the product or service to be contracted out will be replaced by others, consideration should be given to any savings or additional costs to the Government resulting from transferring the replacement products or services. Where the transfer of effort will rsult in the disposal of Government assets related to the replacement product or service or the avoidance of rental costs, these occurrences should be treated the same as if they were happening in the work center which currently provides the product or service being estimated. See the appropriate sections of this Handbook for further guidance in this regard.

Where the decision to contract out will result in the work center(s) operating at less than its present level of utilization, the costs attributable to this underutilized capacity must be determined. In these cases, some overhead costs allocable to the product or service being contracted out may continue. These continuing overhead costs must be absorbed by the remaining in-house activities. The additional amount to be absorbed by the remaining activities is a cost of contracting out.

For purposes of this Handbook, the cost of underutilization will be determined as follows:

Step 1: From the supporting documentation for operations overhead, determine the total operations overhead expense pool(s), the total amount of the base of allocation and the resultant overhead rate. From the example shown in discussing operations overhead, these amounts would be as follows:

	Basic Pool	Machine Pool
Overhead Expense	$1,500,000	$3,000,000
Base of Allocation	$9,000,000	50,000/mach. hours
Overhead Rate	16.67% of direct costs	60/mach. hours

Step 2: Again, from the supporting detail of the Government's estimate, ascertain the amount of the base of allocation applicable to the product or service being estimated. These amounts will then be deducted from the total base of allocation. As illustrated under the Operations Overhead section, the product/service A-3 incurred direct costs of $1,800,000 and 40,000 machine hours. Thus, we would show:

	Direct Costs	Machine Hours
Total Base of Allocation	$9,000,000	50,000 hours
Less:		
Applicable to Product/ Service Being Estimated (A-3)	$1,800,000	40,000 hours
Adjusted Base of Allocation	$7,200,000	10,000 hours

Step 3: In consultation with accounting and management personnel, ascertain the decreases in overhead expenses that can be expected to occur if the product/service is contracted out. Deduct these decreases from the appropriate overhead pool. Assume that, as a result of contracting out, the total basic overhead pool will be reduced by $500,000 and the machine pool by $2,000,000. This would result in the following:

	Basic	Machine
Total Overhead Expense	$1,500,000	$3,000,000
Less Reductions due to Contracting Out	500,000	2,000,000
Adjusted Overhead Pool	$1,000,000	$1,000,000

Step 4: Ascertain the overhead rate to be applied to the remaining effort. The overhead rate will be developed by dividing the adjusted overhead pool developed in Step 3, above, by the adjusted allocation base developed in Step 2, as follows:

	Basic	Machine
Adjusted Overhead Pool (From Step 3)	$1,000,000	$1,000,000
Adjusted Base of Allocation (From Step 2)	$7,200,000	10,000 hour
Overhead Rate (Pool - Base)	13.89%	$ 100 per hour

Step 5: Ascertain the difference between the amount of overhead costs applicable to the effort not to be contracted out in both circumstances. In our illustration, this would be done as follows:

Product/Service Portion of Allocation Base		Basic (Direct Costs)	Machine (Machine Hours)
A-1		$4,500,000	5,000 hrs.
A-2		2,700,000	5,000 hrs.
Total	(A)	$7,200,000	10,000 hrs.
Overhead Rates if Performed In-House (From Step 1)	(B)	16.67%	$60/hour
Overhead Amount if Performed In-House (A) x (B) =	(C)	$1,200,240	$ 600,000
Overhead Rates if Contracted Out (From Step 4)	(D)	13.89%	$ 100/hour
Overhead Amount if Contracted Out (A) x (D)=(E)		$1,000,000	$1,000,000
Increase (Decrease) in Overhead Charged to Remaining Products Due to Contracting Out (E) - (C)		($200,160)	$ 400,000

The increase in cost due to contracting out is the sum of the differences shown above, or $199,840 ($400,000 + ($200,160). This increased cost should be added to the cost of contracting out. The supporting documentation should contain the adjustments made to the overhead expense pool and explain how they were computed.

If the product or service being estimated represents more than 5% of the general and administrative expense allocation base (total costs incurred minus general and administrative expenses), similar computations to those above for operations overhead should also be made for the general and administrative expense rate. Similarly, the impact of contracting-out a product or service on material overhead should be determined if the material content of the product or service is 5% of the total material costs.

FEDERAL TAXES

When comparing the cost to the Government of a product or service to be obtained by contract with the cost of in-house performance, the potential Federal income tax revenues must be considered. Since contract performance would provide the contractor with income subject to tax, an estimated amount for such taxes is an appropriate deduction from the net cost to the Government of acquiring the product or service by contract.

To simplify the tax computation, a table (Figure 6) prepared by the Internal Revenue Service, provides by types of industries, appropriate tax rates in relation to business receipts. The industry groupings conform to the Enterprise Standard Industrial Classification issued by the Office of Management and Budget. To determine the amount of the estimated Federal income tax, the contract price (line 10 of the Comparative Cost Form) shall be multiplied by the tax rate, selected from Figure 6, applicable to the industry identified with the product or service under consideration. The result of this computation will be the estimated amount of Federal income tax to be entered on line 27 as a deduction from the cost of contracting.

Figure 6 ↓

↓ Figure 6 is not available at this present time but will be included in the final document.

OTHER ADDITIONS/DEDUCTIONS

Space has been provided on the Cost Comparison Form by inclusion of lines 20, 21, 26, and 29 for any other additions or deductions to the cost of in-house or contracting-out performance not specifically covered by any of the foregoing classifications of costs. Amounts entered on these lines should be supported by definition of the type of cost, the methods of its computation, and if appropriate, a detailed listing of specific cost elements included therein.

CHAPTER VII COST DIFFERENTIALS

Different cost margins have been established by OMB Circular A-76 that must be exceeded before performing a "new start" in-house, and before converting an in-house activity to a contract. Details pertaining to these cost margins and the methods by which they are to be determined are set forth in the following paragraphs.

New Start

A new start for purposes of OMB Circular A-76 and his Handbook refers to any activity not currently being done in-house at a particular location. When a comparative cost analyis is conducted for a possible "new start", a cost margin equal to 10% of the estimated personnel related costs plus 25% of the estimated cost of ownership of the required facilities and equpment must be added to the cost of in-house performance on the Cost Comparison Form. For this purpose, ownership costs will be considered to be the product's or service's prorata share of the depreciation and cost of capital that are applicable to the required assets.

The margin of 10% of estimated personnel costs is consistent with the margin favoring the status quo in studies of existing Government activities. The additional margin of 25% of the cost of ownership of the required facilities and equipment provides a tangible expression of the basic policy of the Circular; it also recognizes the risks inherent in Government investment in industrial facilities.

The method of computing the cost margin for a "new start" is illustrated in the following steps. Data from the figures provided in the OPERATIONS OVERHEAD and GENERAL AND ADMINISTRATIVE EXPENSE sections of this Handbook as they pertain to Product A-3 will be use to the extent possible. Since these examples do not contain all the data necessary to the computation (e.g., direct labor, and material overhead data) certain additional assumptions pertaining to Product A-3 are necessary. These assumptions and the steps in the computation of the cost margin are shown below:

STEP 1. Determine the amount of direct labor applicable to the product or service being estimated. This will be the amount shown on line 3 of the cost comparision form.

EXAMPLE: For product A-3, this amount is assumed to be $1,000,000 of its $1,8000,000 direct costs. Based on this assumption, the direct labor amount that would be shown on line 3 is $1,000,000.

STEP 2. Determine the prorata share of the indirect labor and depreciation contained in each overhead pool that is applicable to the product or service being estimated. The total indirect labor and depreciation contained in each overhead pool should be readily available from the detail utilized to develop the various overhead rates and which are to be included as supporting documentation.

EXAMPLE: To the extent data were availabe in the examples used in various sections of the Handbook, they have been utilized; otherwise, the assumptions made are stated.

Material Overhead Assume that $600,000 of the direct costs of $1,800,000 shown for Product A-3 in the OPERATION OVERHEAD section represent direct material costs. This would normally be obtained from line 1 of the cost comparison form. Also, assume that in the material overhead pool there are total indirect labor costs of $500,000 and depreciation costs of $100,000; also, the total material costs (direct and indirect) in the allocation base are $4,800,000. These data should normally be available from the documentation supporting material overhead. The following computation for Product A-3 then can be made:

a. Determine the rate of Product A83's direct material cost to the total allocation base:

$$\frac{600,000}{4,800,000} = 1/8 \text{ or } 12.5\%$$

b. Apply the above ratio to the total indirect labor and depreciation in the material overhead pool to arrive at the amounts thereof applicable to Product A-3:

Indirect labor, $500,000 x 12.5% = $ 62,500

Depreciation, $100,000 x 12.5% = $ 12,500

Operations Overhead From the illustration in the OPERATIONS OVERHEAD section, the following data are available:

Total indirect labor in Basic Pool	$1,170,000
Total indirect labor in Machine Pool	$ 930,000
Total depreciation in Basic Pool	$ 40,000
Total depreciation in Machine Pool	$ 400,000
Total allocation base (direct costs) Basic Pool	$9,000,000
Total allocation base (machine hours) of Machine Pool	50,000 hours
Direct costs of Product A-3	$1,800,000
Machine hours applicable to Product A-3	40,000 hours

The computations for the two pools would be as follows:

Basic Pool

a. $\frac{\$1,800,000}{\$9,000,000} = 1/5 \text{ or } 20\%$

b. Indirect labor, $1,170,000 x 20% = $ 334,000
Depreciation, $40,000 x 20% = $ 8,000

Machine Pool

a. $\frac{40,000 \text{ hours}}{50,000 \text{ hours}} = 4/5 \text{ or } 80\%$

b. Indirect labor, $930,000 x 80% = $ 744,000
Depreciation, $400,000 x 80% = $ 320,000

SUMMARY

Total indirect labor in operations overhead applicable to Product A-3 = $1,078,000

Total depreciation in operations overhead applicable to Product A- = $ 328,000

General and Administrative (G&A) Expense From the illustrations in the G&A EXPENSE section, the following data are available:

Executive, Professional, and Technical Supervision Salaries	$1,450,000
Clerical and Other Salaries	$1,175,000
Total indirect labor	$2,625,000
Total allocation base (total cost incurred, exclusive of G&A)	$51,500,000

Assume:

Depreciation included in the $3,100,000 of Other Expenses is	$ 100,000
The total incurred costs, exclusive of G&A, applicable to Product A-3 are	$4,940,000

Then the computation to determine the indirect labor and depreciation in G&A applicable to product A-3 would be as follows:

a. $\frac{\$ 4,940,000}{\$51,500,000} = 9.6\%$

b. Indirect labor, $2,625,000 x 9.6% = $ 252,000
Depreciation, $100,000 x 9.6% = $ 9,600

STEP 3. Accumulate all the labor costs applicable to the product or service being estimated as developed in STEPS 1 and 2:

EXAMPLE: Direct labor from STEP 1	$1,000,000
Indirect labor from STEP 2	
Material Overhead	$ 62,000
Operations Overhead	$1,078,000
G&A Expense	$ 252,000
Total labor applicable to Product A-3	$2,392,500

STEP 4. Apply the fringe benefits rate developed in accordance with the FRINGE BENEFITS RATE section of this Handbook to the total labor costs developed in STEP 3, above.

EXAMPLE: Assume a fringe benefit rate of 38% has been developed then.
$2,392,500 x 38% = $ 909,150

STEP 5. Combine the amounts developed in STES 3 and 4 to arrive at total personnel related costs.

EXAMPLE: $2,392,500 + $909,150 = $3,301,650

STEP 6. Compute 10% of the amount developed in STEP 5 to determine the personnel related cost margin.

EXAMPLE: $3,301,650 x 10% = $ 330,165

STEP 7. Accumulate the depreciation applicable to the product or service being estimated as developed in STEP 2.

EXAMPLE: Depreciation from STEP 2:	
Material Overhead	$ 12,500
Operations Overhead	$ 328,000
General and Administrative Expense	$ 9,600
Total depreciation applicable to Product A-3	$ 350,100

STEP 8. Determine the Cost of Capital that is applicable to the product or service being estimated. The Cost of Capital will be computed in accordance with the applicable section of this Handbook and entered on line 18 of the cost comparison form.

EXAMPLE: Assume the cost of capital applicable to the facilities and equipment required to provide Product A-3 is $ 300,000

STEP 9. Combine the amounts of Depreciation and Cost of Capital developed in STEPS 7 and 8 to arrive at the total ownership costs of the required facilities and equipment.

EXAMPLE: Amounts Applicable to Product A-3

Depreciation	$ 350,100
Cost of Capital	$ 300,000
Total ownership costs	$ 650,100

STEP 10. Compute the ownership cost margin by applying 25% to total ownership costs.

EXAMPLE: $650,100 from STEP 9 x 25% $162,525

STEP 11. Combine the personnel related margin developed in STEP 6 and the ownership margin developed in STEP 10 to arrive at the total cost margin for a new start.

EXAMPLE: Personnel margin from STEP 6	$ 330,165
Ownership margin from STEP 10	$ 162,525
Total cost margin for newstart	$ 492,690

STEP 12. Enter the cost margin developed in STEP 11 on line 31 of the cost comparison form.

CONVERSION

Conversion for purposes of OMB Circular A-76 and this Handbook concerns only the change from in-house to contract performance. The opposite change, that is, from a contract to in-house performance, is considered a "new start" and is covered by the preceding subsection. When a possible conversion is being considered, a cost margin equal to 10% of the in-house personnel related costs must be added to the cost of contracting out on the cost comparsion form. This amount is added to give consideration in the cost comparison to the loss of production, the temporary decrease in efficiency and effectiveness, and other unpredicable risks that result anytime a change is made in the method of operation from in-house to contract. It also takes into consideration the personnel turbulence that results from such a change.

Computation of this personnel-related cost margin is identical to the computation of the personnel-related portion of the cost margin for a new start. Accordingly, the personnel-related portion of STEPS 1 through 6, above, will be followed to compute the cost margin. The resulting amount will be added to the cost of contracting out by entry on line 32 of the cost comparison form.

CHAPTER VIII SUMMARY

Submission of the Government's Cost Estimate

When all the costs connected with in-house performance have been estimated (lines 1 through 9, 18 through 22, and 31, if appropriate), they should be totalled and entered on line 33 of the Cost comparison Form. This will then complete the action necessary to submit the Government's in-house cost estimate. This action should be completed in time for estimate, along with its supporting data, to be submitted to the contracting officer within the prescribed dates for bid or proposal submission. The form should be signed and dated by the person responsible for its preparation in the line entitled, "In-house Estimate Prepared By." If preparation of the form was done by a task force, the Chairman of the task force should sign, indicating that he was the Chairman.

Simplified Cost Comparison When Inhouse Costs Are Below Best Offer

After the contracting officer opens the bids or completes negotiations, he will ondicate in line 10 of the form the lowest responsible bid or proposal. He will then return the form to the preparer for completion. If the contract price that has been entered on line 10 is higher than the Government's in-house cost estimate on line 33, a simplified cost comparison can be accomplished provided the Government's estimate has been properly prepared.

When the annotated contract price (line 10) exceeds the total in-house costs (line 33) it can be assumed that the cost of in-house performance will be less than the cost of contracting-out. This assumption precludes the necessity for completing those portions of the form dealing with the cost of contracting-out. Completion of these portions would only serve to document the net additional costs which must be added to the contract ptice. Since the contract price alrady exceeds the cost of in-house performance, such information would not alter the recommendation. Therefore, there is no need to complete those portions of the form. In these circumstances, the contract ptice entered as line 10 will also be entered on line 34. The ammount by which the cost of in-house performance as shown on line 33 ia under the contract price shown on line 34 will be determined and entered on line 35. The form will then be signed, on the line entitled, "Cost Comparison Completed By,: by the Task Force Chariman or such other individual who was assigned the responsibility.

After the comparison is completed and the Form signed, it will be submitted to a qualified activity independent of the cost analysis preparation to ensure the Government's estimated costs have been prepared in accordance with the provisions of this Handbook. If no, or only minor, discrepancies are noted during the review, the reviewing activity will execute the audit certificate and return the form to the preparer for resubmission to the contracting officer.

If significant discrepancies are noted during the review, they will be reported to the party preparing the cost comparison. The reviewing agency should indicate the impact of the discrepancy or recommend that the preparer correct and resubmit its estimate. If the revised estimate results in the government's costs of in-house performance exceeding the contract price on line 10, a simplified comparison is no longer warranted. The full cost comparison as indicated below must now be performed. As indicated in Chapter III, if the procurement action pertains to a new-start and the estimated cannot be corrected in a timely manner, the in-house figure will be rejected and the contract awarded. Conversely, if the contemplated procurement pertains to an activity presently being performed in-house, and the estimate cannot be corrected within the validity date of the bids or proposals, the procurement action may be terminated and the comparison rescheduled for a later date.

When the cost comparison has been audited and, with any necessary corrections, approved by the reviewing agency, the party responsible for preparing the cost comparison will originate the Decision Summary Form, Exhibit 2, including the recommendation to award a contract or to perform the work in-house. This form and the Cost Comparison Form will be forwarded to the Contracting Officer, who will indicate the action taken to award a contracat or to cancel the procurement action, signing and dating the form where indicated.

Completion of the Cost Comparison Form

When the lowest responible bid or proposal is below the Government cost estimate, the contracting officer will advise the preparer of the Form of the amount of the low bid by inserting it on line 10 of the Cost Comparison Form and returning it for completion. The preparer will then complete lines 11 through 17, 23 through 30, and 32, if appropriate. The amounts on these lines should then be totalled and entered on line 34 of the Form. The amount to be entered in line 35 should then be computed by deducting line 34 from line 33.

After the comparison has been completed, it should be submitted, along with its supporting documentation, to an organization which is independent of the preparing organization for verification. This verification is intended to assure that all the amounts contained on the Form are predicated on the most current data available to the preparer, that the data are accurate and complete, and that it has been prepared in accordance with the provisions of this Handbook. Any discrepancies noted will be treaded in the same manner as indicated in the preceding subsection dealing with Simplified Cost Comparisons. If no discrepancies are noted (or those noted have been corrected), the audit certification will be completed. Any significant discrepancies not corrected will be reported to the preparer and the contracting officer. The prepare will originate the Decision Summary Form, submitting it to the contracting officer with the Cost Comparison Form. Based on the guidance contained in Chapter III, the contracting officer may either disqualify the Government estimate or terminate the procurement action.

When the contractaing officer receives the completed cost comparison with the audit certification and the Decision Summary Form, he will take the appropriate steps to complete the procurement action and indicate it on the Decision Summary Form. When the amount on line 35 indicates that the cost of in-house performance exceeds the cost of contracting-out. Conversely, when it is indicated that the cost of in-house performance is less than (under) the cost of contracting-out, then the recommendation should be to perform in-house.

(DEPARTMENT OR AGENCY)

COMPARATIVE COST OF IN-HOUSE AND CONTRACTING-OUT PERFORMANCE OF (PRODUCT/SERVICE)

(Date)

LINE #	Cost Element	FIRST YEAR	SECOND YEAR	THIRD YEAR	ADDITIONAL YEARS AS APPROPRIATE	TOTAL	REFERENCE

APPENDIX

GLOSSARY OF TERMS

The definitions presented below are taken from the text of this handbook, the Cost Accounting Standards, procurement regulations, and other authoritative publications.

ACQUISTION COST. The amount paid to acquire an asset (Chapter IV - Operations Overhead).

ACTUAL COST. An amount based on cost incurred as distinguished from estimated costs. Includes standard cost properly adjusted for applicable variance (Chapter IV - Fringe Benefits).

ALLOCATE. To assign an item of cost or a group of items of cost to one or more cost objectives. This term includes both direct assignment of cost and the reassignment of a share from an indirect cost pool (Chapter IV, Operations Overhead).

ALLOCATION BASE. The denominator in the fraction used to develop overhead rate. It is either the total of some element of expense (or goup thereof) or a quantitative measure that is common to all items or activities to which the indirect costs are to be allocated (Chapter IV, Material Overhead, Operations Overhead, G&A Expenses).

AMORTIZATION. The gradual extinguishment of any amount over a period of time, such as the write-off of a portion or all the cost of an asset, or the retirement of a debt over a period of years (Chapter V, Government-Furnished Facilities).

AWARD-FEE CONTRACT. A cost reimbursement-type contract with special fee provisions. It provides a means of applying incentives in contracts which are not susceptible to finite measurements of performance necessary for structuring incentive contracts (Chapter V, Contract Price).

BASIC LABOR RATE. For Wage Board employees, the basic labor rate is the hourly rate to be applied to all hours worked and to all hours of annual leave earned, and sick, holiday and other leave taken to ascertain the pay of a Wage Board employee. The General Schedule (GS) basic rate is the published annual rate of pay for the

particular GS grade and step level (Chapter IV, Direct Labor).

BILL OF MATERIAL. A detailed listing of the material requirements for performing a service or providing a product (Chapter IV, Direct Material).

CAPITALIZED COST The cost of acquiring, installing and modifying a tangible capital asset that has been added to an asset account. (Chapter VI, One-Time Costs).

CARTAGE. Transportation from a freight terminal to the point of use or consumption (Chapter V, Transportation).

CONTRACT ADMINISTRATION COSTS. The cost incurred to assure faithful execution of a contract by both the Government and the contractor (Chapter 5, Contract Administration).

CONVERSION. The transfer of work from a Government commerical or industrial activity to performance by a private commerical source under contract (Chapter VI, One-Time Costs).

COST COMPARISON. An accurate determination of whether is is more economical to acquire the needed products or service from the private sector or from an existing or proposed Government commerical or industrial activity (Chapter II, Policy).

COST DIFFERENTIALS. The cost margins established by OMB Circular A-76 that must be exceeded before performing a "new-start" in-house and before converting an in-house activity to a contract (Chapter VII, Cost Differentials).

COST ELEMENT. A basic unit of cost, such as labor or material. The accummulation of all the basic units related to a given product or service provides the total cost of that product or service (Chapter IV, General).

COST OF CAPITAL. An imputed charge on the Government's investment in all of the plant facilities and other assets necessary for the work center to manufacture products or provide services (Chapter VI, Cost of Capital).

COST OF CAPITAL COMMITTED TO FACILITIES: An imputed cost determined by applying a cost of money rate to facilities' capital (Chapter VI, Cost of Capital).

COST REIMBURSEMENT CONTRACT. A type of contract that provides for reimbursement to the contractor of allowable costs incurred in the performance of a contract, to the extent prescribed in the contract (Chapter V, Contract Price).

CURRENT COSTS. Costs incurred in the current accounting period (Chapter IV, Direct Material).

CURRENT MARKET VALUE. The amount for which an item could be sold in today's market (Chapter VI, Cost of Capital).

DEMURRAGE. The compensation paid for the delaying of a ship, freight car, etc., as by the failure to load, unload, or dispatch within the time allowed (Chapter V, Transportation Cost).

DEPRECIATION. The method used to spread the cost of tangible capital assets (plant, machinery, etc.), less residual value, over their estimated useful lives in a systematic and logical manner (Chapter IV, Operations Overhead).

DIRECT COST. Any cost which can be identfiied specifically with a particular final cost objective. Direct costs are not limited to items which are incorported in the end product as material or labor. Costs which can be identified specifically with a product/service are direct costs of that product/service. All costs identified specifically with other products/services are direct costs of those products/services. (Chapter IV, General).

DIRECT LABOR. That portion of salaries and wages which, as a practical matter, can be identified with and charged only to a specific product or service (Chapter IV, Direct Labor).

DIRECT MATERIAL. The costs of such goods as raw material, parts, sub-assemblies, components and supplies which as a practical matter, can be identified specifically with the product/service (the final cost objective) under review (Chapter IV, Direct Material).

DOUBLE-COUNTING. The treatment of certain costs as direct costs of the product/service, while similar costs related to other products/services are treated as indirect costs and a portion thereof is allocated to the

product/service for which the estimate is being prepared (Chapter IV, General).

ESTIMATING COST. The process of determing a future or past result in terms of cost, based upon information available at the time (Chapter IV, General).

FAIR MARKET VALUE. A realistic valuation of what an item could be sold for in open market (Chapter V, General).

FINAL COST OBJECTIVE. A cost objective which has allocated to it both direct and indirect costs, and, in the cost accumulation system, is one of the final accumulation points (Chapter IV, General).

FIRM-FIXED-PRICE CONTRACT. A contract which provides for a price which is not subject to any adjustment by reason of the cost experience of the contractor in performance of the contract (Chapter V, Contract Price).

FISCAL YEAR. The accounting period for which annual financial statements are regularly prepared. The Government's Fiscal Year begins on October 1, and ends on September 30 (Chapter IV, Operations Overhead).

FIXED PRICE CONTRACT WITH FLEXIBLE PRICING ARRANGEMENTS. This type of contract provides for either a firm-fixed-price for an initial period and for prospective price redeterminations at stated times furing the performance of the contract or a ceiling price and retroactive price redetermination after completion of the contract Chapter V, Contract Price).

FRINGE BENEFITS. Allowances and services provided employees as compensation in additon to basic salaries and wages (Chapter IV, Fringe Benefits).

FULL COSTS. The total of all direct and indirect costs allocable to a product or service (Chapter IV, Direct Material).

GENERAL AND ADMINISTRATIVE (G&A) EXPENSE. Any management, financial and other expense which is incurred by or allocated to an organizational unit and which is for the general management and administration of the unit as a whole. G&A expense does not include those management expenses whose beneficial or causal relationship to cost objectives can be more directly measured by a base other than a cost input base representing the total activity of the unit during a cost accounting period. (Chapter IV, General and Administrative Expense).

GOVERNMENT-FURNISHED FACILITIES AND EQUIPMENT. Facilities and equipment in the possession of, or acquired directly by the Government and subsequently delivered or otherwise made available to the contractor (Chapter V, Government-Furnished Property).

INCREMENTAL COST. The increases or decreases in total cost, or the changes in specific elements of cost, that result from variations in operations (Chapter IV, Operations Overhead).

INDIRECT COST. Any cost not directly identified with a single final cost objective, but identified with two or more final cost objectives or with at least one intermediate cost objective (Chapter IV, General).

INDIRECT COST (OVERHEAD) POOL. A grouping of incurred (or projected) costs identified with two or more cost objectives but not identified specifically with any final cost objective (Chapter IV, Operations Overhead).

INDIRECT LABOR. All labor that is incurred for the benefit of more than one product or service or the business as whole. It may be included as material overhead, operations overhead, or general and administrative expense (Chapter IV, Operations Overhead).

INDIRECT MATERIALS AND SUPPLIES. Includes items of materials and supplies which are not identifiable to a single product or service but which are necessary to performance of the various functions of an entity. It also includes the minor amounts of direct material for which accounting as direct costs is not practical. (Chapter IV, Material Overhead, Operations Overhead, General and Administrative Expense).

INFLATION. An increase in the amount of money in circulation resulting in a decline in its value and rise in prices (Chapter IV, Inflation of Out-Year Costs).

INSURANCE. The cost to the Government arising from liabilities and losses not covered by insurance. The costs are incurred in consonance with the Government's policy of acting as a self-insurer (Chapter IV, Operations Overhead).

INTERAGENCY SUPPORT. Products or services furnished from the capacity of another Government agency or organization to the agency which will provide the product or service being estimated (Chapter IV, Interagency Support).

LABOR HOUR CONTRACT. A variant of the time and material-type contract, differing only in that materials are not supplied by the contractor (Chapter V, Contract Price).

LABOR-TIME STANDARD. A preestablished measure expressed in temporal terms, of the quantity of labor required to perform a task (Chapter IV, Direct Labor).

MAINTENANCE AND REPAIR Cost incurred to keep buildings and equipment in normal operating condition (Chapter IV, Operations Overhead).

MATERIAL OVERHEAD COSTS. Indirect costs related to an activity or group of activities for acquiring, handling, and/or controlling required materials, until the materials are used or consumed in the production of goods and services or are sold without processing (Chapter IV, Material Overhead).

MATERIAL-QUANTITY STANDARD. A preestablished measure, expressed in physical terms, of the quantity of material required for a specific purpose (Chapter IV, Direct Material).

NET BOOK VALUE. The capitalized cost of an asset or group of assets shown in the accounting records, less accummulated depreciation or other applicable offset (Chapter VI, Cost of Capital).

NEW START. A newly established Government commerical or industrial activity, including a transfer of work from contract to in-house performance (Chapter VI, One-Time Costs).

NO-COST BASIS. The provision of a product or service without charge or remuneration (Chapter IV, General and Administrative Expense).

NOMINAL COST. Cost of a very minor amount (Chapter IV, Direct Material).

ONE-TIME COSTS. The nonrecurring costs to the Government when it either starts or discountinues an in-house activity as a result of a decision to change the source of a product or service (Chapter VI, One-Time Costs).

OPERATIONS OVERHEAD COSTS. The indirect costs which are necessarily incurred during a fiscal year to produce or deliver the products or services being provided by a particular organizational element (Chapter IV, Operations Overhead).

OPPORTUNITY COSTS. Other income, or expense avoidance, foregone by using limited resources for a particular purpose (Chapter VI, Cost of Capital).

OTHER DIRECT COSTS. All those direct costs exclusive of direct labor and direct material which are identified as having been incurred specifically for a particular product or service (Chapter IV, Other Direct Costs).

OVERHEAD RATE. A percentage, or monetary unit related to a quantitative measure, derived by dividing an indirect cost pool by an allocation base. (Chapter IV, General, Material Overhead, Operations Overhead).

OVERTIME AND PREMIUM PAY. Additional amounts added to basic salaries for working longer than the regularly scheduled hours or under unusual conditions. (Chapter IV, Operations Overhead).

PHYSICAL INVENTORY. The actual amount of material on hand (Chapter VI, One-Time Costs).

PRICING. The process of establishing the amount or amounts to be paid in return for goods or service (Chapter IV, Direct Materials).

PROPOSAL. Any offer or other submission used as a basis for pricing a contract, contract modification or termination settlement or for securing payments thereunder (Chapter V, Contract Price).

RENT. The cost incurred for the use of a non-Government entity's tangible assets (land, plant and machinery, etc.) in providing the product/service being estimated (Chapter IV, Operations Overhead).

RESIDUAL VALUE. The proceeds (less removal and disposal costs, if any) realized upon disposition of a tangible capital asset. It usually is measured by the net

proceeds from the sale or other disposition of the asset, or its fair value if the asset is traded on another asset. (Chapter IV, Operations Overhead).

STANDARD COSTS. Any cost computed with the use of preestablished measures (Chapter IV, Direct Material, Direct Labor).

STANDARD LEVEL USER CHARGE (SLUC). The amount which the General Services Administration (GSA) assesses Federal agencies for thier assigned space in GSA controlled building. This SLUC note is a composite of three ingredients:

a. The fair annual rental appraisal rate for space, utilities and normal services;

b. an escalation of this rate; and

c. an added charge for standard protection.

STANDY MAINTENANCE COSTS. The costs necessary for the upkeep of property held in a standby status to assure contract performance. This maintenance neither adds value to the property nor appreciably prolongs its useful life. Rather, the mainenance keeps the property in an efficient operating condition so that it will be available for possible use in case of nonperformances by the contractor (Chapter V, Standby Maintenance Costs).

STRAIGHT-LINE DEPRECIATION. A method of depreciating an asset by charging an equal amount of its depreciable cost (captialized cost less residual value) to each accounting period covered by its useful life, or by charging an equal amount of its depreciable cost to each hour of use, each product produced, etc. (Chapter IV, Operations Overhead).

SUPPORT COSTS. Costs incurred by one organizational unit for the benefit of another (Chapter IV, Operations Overhead).

SURCHARGE. An additional amount added to the basic charge to cover expenses incurred in providing the products or services. (Chapter IV, Direct Material; Material Overhead).

TANGIBLE CAPITAL ASSET. An asset that has physical substance, more than minimal value, and is expected to be held for continued use or possession beyond the current accounting period.(Chapter IV, Depreciation).

TIME AND MATERIAL CONTRACT. A type of contract which provides for the procurement of supplies and services on the basis of (i) direct labor hours at specified fixed hourly rates (which shall include wages, overhead, general and administrative expense, and profit) and (ii) material at cost and in addition, where appropriate, material handling costs as a part of material cost (Chapter V, Contract Price).

WORK CENTER. The lowest organizational unit at which cost are accumulated (Chapter IV, Operations Overhead).

WORK STATEMENT. A comprehensive description of what is to be done, including performance standards as appropriate. The work statement should describe all duties, tasks, responsibilities, frequency of performance of repetitive functions and requirements for furnishing facilities and materials (Chapter III, Preparation of Work Statement).

PART III

ENVIRONMENTAL PROTECTION AGENCY

MUNICIPAL WASTEWATER TREATMENT WORKS

Construction Grants Program

V 4 3 / 1 8 8

[6560-01]

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FRL 951-8]

PART 35—STATE AND LOCAL ASSISTANCE

Subpart E—Grants For Construction of Treatment Works

AGENCY: Environmental Protection Agency.

ACTION: Rule.

SUMMARY: This is a conformed version of regulations governing the construction grants program for municipal wastewater treatment works. The substantial changes in the regulations serve several purposes. The majority of the changes implement amendments to the Federal Water Pollution Control Act (FWPCA or the Act) as amended, contained in the Clean Water Act of 1977 (Pub. L. 95-217 or the 1977 Act). The regulations also contain a series of technical amendments that make technical, administrative, and programmatic changes to facilitate administration of and participation in the program. The regulations incorporate certain requirements and incentives to implement the pretreatment program for industries contributing to municipal wastewater treatment works. To enhance public involvement in the program, the regulations add public participation activities in the development of State project priorities as well as in the approval of State-prepared population projections in the cost-effectiveness analysis guidelines. Cost-effectiveness analysis guidelines are completely revised to reflect provisions of the 1977 Act and other major policies. Finally, in response to Executive Order 12044 on improving government regulations, we have made numerous editorial changes to make the regulations more understandable.

DATES: These final rules are effective on October 1, 1978, unless otherwise specified in particular sections. They apply to grants (including subsequent related projects) awarded on or after that date. Comments on changes proposed to § 35.936-13 will be accepted until November 30, 1978.

ADDRESSES: Comments submitted on these regulations may be inspected at the Public Information Reference Unit, EPA Headquarters, Room 2922, Waterside Mall, 401 M Street SW., Washington, D.C., between 8 a.m. and 4:30 p.m., on business days. EPA-prepared summaries of the comments are also available. Comments on proposed changes to § 35.936-13 should be sent (in triplicate, if possible) to Mr. Alexander J. Greene, Director, Grants Administration Division, Attention: PM-216-P "Subpart E," Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

Michael B. Cook, Acting Director, Facility Requirements Division (WH-547), Environmental Protection Agency, 401 M Street SW., Room E1137D, Washington, D.C. 20460, telephone 202-426-9404.

SUPPLEMENTARY INFORMATION: Certain regulatory changes to implement the 1977 Act were published on April 25, 1978, in the FEDERAL REGISTER as interim final regulations. These included changes related to State priorities, grant eligible categories, land eligibility, user charges, industrial cost recovery, grants for individual systems, combined step 2 and 3 grants, training facility grants, Buy America, cost-effectiveness analysis and reserve capacity. We published these regulations as interim final and generally made them effective on April 25, 1978, because they implement provisions in the 1977 Act that were effective upon enactment and because they were necessary for ongoing administration of the program. Some of the technical amendments, which were published in FEDERAL REGISTER on June 2, 1978, as the proposed rules, made changes to the same sections. The provisions can be distinguished by reading the discussions in this preamble and referring back to the earlier FEDERAL REGISTER publications, where the regulatory changes are set forth section by section. The remainder of the regulatory changes that implement the 1977 Act were proposed on April 25, 1978, because, under the 1977 Act, they are not effective until October 1, 1978, or because their implementation was not crucial to the program's operation. These include provisions on innovative and alternative technologies, recreational, and open space uses, and the provision of assistance by EPA to grant recipients with respect to contracts.

EPA conducted extensive public participation activities in the development of these regulations. Prior to initial publication of any of the regulations in the FEDERAL REGISTER, EPA circulated four drafts of the regulations implementing the Clean Water Act. Also in the drafts were changes on pretreatment and public participation. We conducted numerous meetings to solicit public input. These included 4 days of open meetings in Washington, D.C., six briefings for State and local officials held at EPA regional offices, and meetings for EPA advisory groups. Three meetings were held with State representatives appointed by the National Governors' Conference and by the Association of State and Interstate Water Pollution Control Agencies. Two meetings were held with the Association of Metropolitan Sewerage Agencies, two meetings were held with the Management Advisory Group, and presentations were made at the government affairs seminar of the Water Pollution Control Federation. We consulted representatives of Federal agencies informally. During this prepublication period of 4 months we received over 1,000 written comments from State, regional, and municipal agencies; environmental and special interest groups; and the public generally. We circulated one draft of the technical amendments to 1,000 organizations and private citizens before publication in the FEDERAL REGISTER.

On April 25, 1978, EPA published proposed and interim final regulatory changes to implement the 1977 Act, to modify pretreatment requirements, and to add certain public participation activities. On June 2, 1978, EPA published technical amendments to the construction grants regulations as proposed rules. After publication of the regulations, several environmental and special interest groups coordinated five areawide conferences on the regulations in Atlanta, Chicago, Dallas, Philadelphia, and San Francisco. These meetings were attended by 1,000 people.

During June, EPA regional offices conducted 14 public meetings to solicit comments. The EPA officials responsible for development of the regulations made presentations and answered questions. The regional offices encouraged participation by a combination of press releases, mailings and telephone contacts to interested and affected organizations. EPA officials directly responsible for the regulations met informally with representatives of other Federal agencies, environmental, and special interest groups. They also answered innumerable telephone inquiries about the regulations. EPA received over 250 comments on the April 25 regulations and over 45 on the technical amendments published on June 2. These comments and summaries are available for inspection at the EPA Public Information Reference Unit at the address listed above.

Using the comments received during and after the comment period, EPA revised the April 25 regulations. We mailed the revised draft to more than 930 groups, agencies and persons that commented on prior drafts. We received quick responses from various groups and considered their comments in preparing the final regulations. Besides the revisions to the April 25 regulations, the final regulations included both revisions to the technical amendments and editorial changes.

Altogether the Agency circulated more than 60,000 copies of various drafts of the regulations. We received invaluable assistance from the organizations, agencies, and the public at large. Commenters raised a variety of issues. The major issues raised during the official comment period are discussed below under the appropriate subject area.

Various related regulations have been or will be published soon. As required by statutory deadline, EPA published two short amendments to the construction grants program regulations early this year. On January 10, 1978 (43 FR 1597), fiscal years 1978-81 authorizations were allotted. On June 29, 1978 (43 FR 28202), we published a correction of the section number for the allotment regulation. It is § 35.910-8 in this conformed regulation. On February 23, 1978 (43 FR 7426), the reimbursement grant regulations (subpt. D) were revised to extend eligibility dates. On June 26, 1978 (43 FR 27736), EPA published final pretreatment regulations as 40 CFR part 403. Those regulations establish the responsibilities of Government, industry, and the public to implement national pretreatment standards to control pollutants that pass through or interfere with treatment processes in publicly-owned treatment works or that may contaminate sewage sludge.

On August 7, 1978, we published proposed regulations on public participation in the FEDERAL REGISTER (43 FR 34794). Those regulations implement section 101(e) of the FWPCA which requires EPA to provide for, encourage, and assist public participation in EPA programs. The regulations would replace 40 CFR part 105 (Public Participation in Water Pollution Control) and 40 CFR part 249 (Public Participation in Solid Waste Management) with a new 40 CFR part 25.

References to part 25 are inserted in this regulation in anticipation of publication of final public participation regulations. In the interim any reference to part 25 in these regulations should be interpreted as referencing the current part 105 regulations. The new part 25 would establish overall public participation requirements for programs under the Clean Water Act, the Safe Drinking Water Act, and the Resource Conservation and Recovery Act. The regulations, in addition, revise public participation requirements in 40 CFR part 35 subpart E, specifically for the construction grants program. They focus the public's attention on decisions made during the planning of the wastewater treatment facilities. They also provide the opportunity for public involvement in later stages of project development.

EPA published proposed regulations for the water quality management program in the FEDERAL REGISTER on September 12, 1978 (43 FR 40742). Those regulations replace 40 CFR parts 130 and 131 and portions of part 35 with a new 40 CFR part 35, subpart G. The regulations govern the water quality management program under sections 106, 208, and 303(e) of the FWPCA and include changes made to implement provisions of the 1977 Act. The regulations require a State/EPA agreement, which is intended to serve as the principal management tool for the water quality management program. The State/EPA agreement will integrate the planning, management, and implementation of all water quality management programs under the Clean Water Act, RCRA, and SDWA by fiscal year 1980. At a minimum, the fiscal year 1979 agreement shall cover programs authorized by sections 106, 205(g), 208, 303, and 314 of the Clean Water Act. The State/EPA agreement is distinct from the construction grant delegation agreements that may be negotiated under section 205(g) of the FWPCA, as amended by the 1977 Act. The water quality management (WQM) regulations coordinate the establishment of State and areawide WQM agencies' sewage treatment priorities with the construction grants priority system and lists. WQM plans are to provide certain facility planning related information such as planning area delineations, waste load allocations, and population projection disaggregations. Construction grant facility plans will have to be based on this information. Overall the WQM program regulations link that program and the construction grants program together much more closely.

On September 20, 1978 (43 FR 42251) we published in the FEDERAL REGISTER final regulations on State management assistance grants (subpt. F). They make funds available to States to manage the construction grants program and to hire and train staff needed to implement delegated functions.

From time to time EPA issues guidance and technical information to supplement regulations and to assist those participating and interested in EPA programs. A listing of information and copies may be obtained from the General Services Administration (8FSS), Centralized Mailing Lists Services, Building 41, Denver Federal Center, Denver, Colo. 80225. (See § 35.900(c).)

Discussion of the regulatory changes being made are grouped by subject matter. Following the discussion of each subject area, the preamble identifies those sections in the regulations related to the subject areas that are changed. For the technical amendments each section containing a change is discussed separately.

STATE PRIORITY

Sections 20 and 40 of the 1977 Act modified the policy and procedures applicable to State project priority planning and clarified the intent of Congress regarding the roles and responsibilities of the States in preparation of priority lists. These new provisions of the Act require several modifications to the procedures used by the States in managing their priority lists. Established priority rating and ranking criteria that are consistent with applicable guidance and these regulations need not be changed.

The 1977 Act gives the States exclusive authority to rank categories of projects. The categories specified in the 1977 Act are those used in the survey of the cost of needed publicly-owned treatment works (the needs survey) and have been defined in detail in previously published guidance for the survey. The regulations have been written so that no State is required to assign a different ranking to categories of projects, but it may do so on an optional basis.

States are expected to continue to use priority criteria based on the severity of the pollution problem, the existing population affected, and other related factors necessary to meet statutory requirements. All projects on the priority lists, including those benefiting from the setaside provisions, must be rated according to the priority criteria and subject to the management procedures contained in the approved State priority system. When preparing their priority lists, States must take into account the work completed by designated State and areawide agencies responsible for water quality management.

The legislative history of the 1977 Act indicates that State priority list planning and management must be closely linked to meeting unfilled treatment needs before other eligible treatment works may be funded. The 1977 Act specifically requires, with one exception, that only projects resulting in compliance with the enforceable requirements of the Act may be included on the State's priority list. Projects on the State list which do not meet this requirement are to be removed and alternate projects which do meet the requirements added to use available funds.

Several commenters on the regulations expressed concern that the section on State priorities was very long compared with the relatively short reference to priorities in the Clean Water Act. We believe that these comments result from a misunderstanding of the role of the priority system and priority

SEP 27 78

V 4 3 / 1 8 8
SE 27 78

lists in the construction grants program. The priority system and lists are the principal mechanisms in the program for selecting who will be in line for grant funds, for scheduling grants, for planning obligations and outlays of funds, and for providing information to justify congressional authorizations and appropriations. The priority system and lists are, in short, the management tools which allow the Federal, State, and local governments to plan, budget, and oversee the construction grants program.

The 1977 Act complicated the task of management by imposing new requirements for planning and set-asides which must be met for the orderly progress of the grants program. At the same time, the Congress provided for State management assistance grants to increase revenues available to States to handle added managerial responsibilities. The grants program will not be able to maintain a proper balance and an orderly flow of step 1, 2, and 3 projects at the rate necessary to utilize the $24.5 billion authorized by Congress without a sound managerial system such as that established for State priority systems and lists.

Some commenters stated that the priority system should not have to be submitted annually to EPA, but rather only when revised. EPA agrees and has changed the regulation accordingly.

Several commenters recommended additions to the criteria forming the basis for the State priority system, including national priorities, public health, economic hardship, workers' health and safety, evidence of past or present discrimination in the use of grant funds, and groundwater pollution. We believe, however, that the criteria selected are those most relevant to achieve the goals of the Clean Water Act.

The Council on Environmental Quality recommended that water improvement be reinstated as the main goal of the priority system. We agree and have changed the regulation accordingly.

Enforceable requirements. The enforceable requirements of the Act, as defined in this regulation, are limitations or conditions of a 402 or 404 permit which, if violated, could result in a civil or criminal action under section 309 of the Act. Where a permit has not been issued, the term includes any requirement that in the judgment of the Regional Administrator would be included in the permit when issued. Where a permit is not applicable the term shall include any requirement which the Regional Administrator determines is necessary to meet applicable criteria for best practicable waste treatment technology (BPWTT).

This definition covers municipal pollution of surface water and groundwater. Permits issued under section 402 of the Act incorporate surface discharge requirements imposed by sections 301, 403, and 405. Section 301, in turn, requires BPWTT or any more stringent level of treatment determined in the water quality management planning process (authorized under sections 208 and 303) to be necessary to meet water quality standards. It also requires any more stringent level of treatment found to be necessary to meet State laws or regulations (under authority preserved by section 510).

To receive construction grants, municipal treatment works are required under section 201(g)(2)(A) of the Act to provide for the application of BPWTT. Information published by the Agency on BPWTT contains criteria which must be met by grant funded projects involving land application techniques, land utilization practices and alternatives involving reuse and recycling. These criteria, designed to protect groundwater from pollution by municipal treatment facilities, are analogous to effluent limitations and conditions in permits designed to protect surface waters.

We received several comments requesting that the definition of enforceable requirements list sections 201, 208, 301, 309, 402, and 405 of the Act. Some comments also suggested a reference to section 510. We have carefully considered these comments but decided to retain the same definition used in the interim regulation. As was discussed above, our definition encompasses these other sections of the Act to the extent they are translated into specific requirements to protect and improve ground and surface water quality. To the extent they are not translated into such specific requirements, grantees, States, and EPA would have difficulty determining if a project was necessary to meet them or not.

A few commenters expressed concern that the definition of enforceable requirements adopted by EPA would exclude projects involving reuse and recycling which were not necessary to protect ground or surface waters. The Agency believes that such projects should be excluded from the definition. Federal assistance for publicly owned treatment works under the Act is intended to correct and reduce the backlog of pollution problems.

The Act and Agency policy strongly encourage reuse and recycling techniques as a means to meet pollutant discharge requirements. Reuse and recycling projects which are needed to meet the enforceable requirements of the Act should be given higher priority. The regulations have numerous provisions to encourage reuse and recycling, including changes between the interim and final versions of the cost effectiveness guidelines to allow additional projects to qualify for the 115 percent cost preference (see section 7 of appendix A).

Priority list management. Priority list management procedures have been clarified in the new regulations to assure that EPA, the States and municipalities each know which projects will be funded with available monies during the current year, and which projects may expect funding during subsequent years. In addition, the new procedures require documentation and notification to interested parties of any changes to the funding plans. The fundable portion of the priority list has been defined to include only projects planned for funding with available funds during the first year of the 5-year period. Procedures are established to allow a project on the fundable portion of the priority list to be bypassed when the State documents and notifies the grant applicant that it cannot be ready for award during the current year. Projects that are ranked highest on the planning portion of the priority list will replace the project which is not ready to proceed. In most cases, the project bypass procedure is not expected to constitute a significant revision to the priority list, and additional public participation should not be required.

An alternative to the bypass procedure was carefully considered but eventually rejected. This alternative would allow a State to include on the fundable portion all projects that could conceivably be ready for award during the funding year without regard to the limits of available allotments. Bypass procedures would be unnecessary, as all potential projects would be included on the fundable portion of the list. This approach was rejected because it would potentially allow high priority projects to go unfunded even though ready to proceed during the funding year in favor of lower priority projects. It also would create a great deal of uncertainty about which projects would be approved during the funding year and which would not.

There are other priority list management procedures required by the new regulations, most based on existing policy and guidance. The regulations require some increase to the project information included on the priority list and an improvement to the public participation process. Supplemental guidance will be issued to further define these requirements and provide the phasing necessary to avoid disruption of State operations.

A few commenters expressed concern that the bypass procedures created undue administrative difficulties for the States. We believe, however, that without such procedures, the goal of the priority list to insure that funding is first available to projects with highest priority, could easily be thwarted. One commenter stated that the bypass provisions were too vague and could be abused. We believe that they have been defined in sufficient detail for a regulation. Additional guidance could be issued if abuses develop.

One commenter stated that adding and deleting projects to an approved priority list is very difficult. We agree that such changes are not easy. Significant changes are likely to disrupt plans for one or more municipalities and should be made only after careful consideration and opportunity for public participation.

Several States recommended changes to the regulation to restrict further the role of EPA in review of the priority list. We disagree with these recommendations because the management role of the Agency has already been reduced to the minimum necessary to insure equitable implementation of the Clean Water Act and related regulations.

Five-year priority list. The interim regulations for State priority list management require a 5-year priority list to ensure that projects are planned and managed in accordance with an overall multiple-year operating strategy. In preparing the priority list, consideration must be given to the inventory of all needed publicly owned treatment works within a State. The most recent Needs Survey should be used for this purpose. Sufficient information, including cost data, is readily available from this Survey allowing the development of a long-term priority list without undue additional effort on the part of the State.

Several commenters expressed concern that excessive information was required on the priority list. EPA agrees and has revised the regulations so that requirements for the planning portion of the list will be detailed in supplemental guidance. The Agency will require only the minimum amount of information commensurate with the requirements of program management and public participation. The remaining requirements are essential to insure orderly development of projects which will utilize available funds and set-asides, while meeting the most critical needs for water pollution control.

A few commenters said that information required on the priority list is not appropriate for public review. We believe that the required information provides the essentials of what is required for the public, including an address where more information may be obtained on individual projects.

Comments were also received recommending separate priority lists for projects utilizing set-aside funds for small communities and for innovative and alternative technologies. The Agency has allowed and will continue to allow a separate priority list for small communities where desired by a State and where the splitting of funds between the list for small communities and other communities is justified on a sound basis. Our experience is that such lists are difficult to administer. The complexity would be compounded where States could not tell with certainty whether or not a project might qualify for a set-aside. The regulation does allow a higher priority to be given to projects qualifying for the set-asides.

Several commenters expressed concern about the relationship between the needs survey and the priority list. A few commenters said that EPA should not expect the States to prepare the needs survey. We would emphasize that this was not our intent. Our interest is in having the priority list prepared on the basis of the needs inventory, and to cross reference the needs inventory so that the Agency and the States can readily ascertain which needs are planned to be met and which are not. Other commenters stated that there should be no relationship between the needs inventory and the priority list. We disagree because of the critical role the needs inventory plays in the grants program. The needs inventory includes all existing and needed treatment works. This inventory is used for program planning, oversight, and evaluation. The needs are, of course, also used by Congress as a basis for allotting grant funds among the States. When preparing the priority list, States should review the needs inventory and give highest priority to those facilities with the most critical need. After a new facility is funded, the needs inventory will be revised by EPA accordingly.

Pipe-related projects. One exception to the stipulation that all projects on the priority list must meet the enforceable requirements is provided in the Act. This exception is for projects involving major sewer rehabilitation, interceptor sewers, collector sewers, and correction of combined sewer overflows. States may, at their option, include on the fundable portion of their list facilities in these categories with a combined estimated EPA share of as much as 25 percent of the available allotment. Facilities in these categories which would use funds beyond the 25-percent level may be included on the list only where they are essential to meet the enforceable requirements of the Act.

Comments on the Agency's interpretation of the 25-percent provision fell into two groups. One group stated that all projects must satisfy the test of being necessary to meet the enforceable requirements of the Act whether or not they fall into the sewer-related categories. EPA disagrees with this interpretation because it necessarily results in vitiating almost all meaning from the 25-percent provision of section 216. Moreover, it would prevent some projects, such as those necessary to protect public health but not ground or surface waters, from being retained on the priority list. Congress clearly did not intend this result.

The other group of commenters on the 25-percent provision stated that we have misconstrued the law by stating that the 25-percent was a ceiling rather than a floor for sewer-related projects in the specified categories. We would note, however, that the 25-percent ceiling is imposed in our regulations only for sewer-related projects which cannot be justified as necessary to meet the enforceable requirements of the Act. No limitation is placed upon such projects when necessary to meet the enforceable requirements of the Act so long as they are placed on the priority list in conformance with the State priority system and are found to be grant eligible.

The Agency received several comments interpreting the regulations to imply that all projects placed on the priority list are automatically eligible for funding. This is not the case. Projects should be placed on the priority list only if they are expected to be eligible. However, there may not be sufficient information available to determine its eligibility at the time the priority list is prepared. Projects later found to be ineligible should be removed from the priority list. This requirement applies to pipe-related projects placed on the priority list under the 25-percent provision as well as other types of projects. A project must ultimately be determined cost-effective as well as eligible to receive a construction grant.

New set-asides on priority list. The Act contains a number of new provisions that require States to set aside funds for specific purposes. Included in these set-asides is a reserve for alternatives to conventional treatment for communities with populations of 3,500 or less, or the sparsely populated areas of larger communities. Rural States must set aside 4 percent of their allotment for such projects. Other States have the option of setting aside no more than 4 percent of their allotments for this purpose. In addition, 2 percent of the allotment for fiscal year 1979 and fiscal year 1980 and 3 percent of the allotment

V 4 3 / 1 8 8 S E 2 7 7 8

for fiscal year 1981 must be used only for grant increases for innovative and alternative treatment processes. At least one-half of 1 percent of the allotment (part of the 2 percent) must be used for grant increases for innovative technology during these years.

Nothing in this regulation is to affect existing administrative policy for the establishment of a separate funding strategy for small communities where a State chooses to set aside a reasonable percentage of its funds for the projects of such small communities.

Several commenters recommended that a higher priority be allowed for innovative and alternative projects at the step 3 stage as well as the step 2 stage, and also for projects to pay 100 percent of the costs of replacement when an innovative or alternative project fails. EPA agrees and has revised the regulation accordingly. One commenter said that the higher priority at the step 2 stage for innovative and alternative projects should be mandatory. EPA disagrees since the 1977 Act clearly leaves it optional.

A few commenters asked for a detailed definition in the regulation of what would qualify as a sparsely populated area of a larger community. Any area where treatment works serving an individual residence or cluster of residences are cost-effective will, in all likelihood, qualify as sparsely populated.

Public participation. This provision of the new regulation has generated many comments. These comments are almost equally divided expressing both sides of the issue. Public interest groups and private citizens largely desire more and better information and express an interest in sharing in the decisions which affect their lives and the well-being of their communities, while comments from others cite the additional expense, time delay and relatively small anticipated benefits to the public that may be associated with these new requirements. This issue is of concern to the Agency. These provisions are being retained as in the interim regulation, but will be monitored to determine if they should be changed in the future. Regulatory changes related to State priority planning and management are limited to the revision to § 35.915.

Innovative and Alternative Technologies

Under the new section 201(g)(5), after September 30, 1978, grant recipients are required to analyze innovative and alternative treatment processes and techniques for use in wastewater treatment works. Section 201(i) requires the encouragement of processes that reduce energy needs. Section 202(a)(2) provides for Federal grants for 85 percent of allowable construction costs for treatment works or significant portions of treatment works that utilize innovative and alternative treatment processes and techniques. Section 202(a)(3) provides 100 percent Federal grants for replacement or modification of treatment works constructed in accordance with section 202(a)(2), under certain conditions. Section 202(a)(4) defines the eligible treatment works that can be the subject of 85-percent grants. These provisions and others in the 1977 Act that involve innovative and alternative technologies depend upon guidelines authorized by section 304(d)(3) that set forth criteria to be utilized in identifying innovative and alternative technologies.

Regulations discussed under other headings contain several important provisions relating to innovative and alternative technologies. The cost-effectiveness guidelines permit a 15-percent cost preference for treatment works that utilize innovative or alternative processes or techniques. Under the regulations on priorities a funding reserve is established to pay for the increased part of the grants for treatment works that include innovative or alternative processes or techniques. Also, States are authorized to give higher priority to treatment works utilizing innovative or alternative technologies. A 4-percent reserve of each State's yearly allotment is set aside to fund alternatives to conventional treatment works in small communities.

The Clean Water Act of 1977 and its legislative history make it clear that the provisions pertaining to innovative and alternative technologies are intended to achieve greater use of systems which reclaim and reuse water, productively recycle wastewater constituents or otherwise eliminate the discharge of pollutants, or recover energy. The principal difference between alternative and innovative wastewater treatment technologies, as viewed by the 1977 Act and its legislative history, is the degree to which they have been developed and implemented. Alternative wastewater treatment processes and techniques are those which have been proven and used in actual practice; innovative processes and techniques are developed methods which have not been fully proven under the circumstances of their contemplated use. The goal of achieving greater recycling and reclamation, however, is clearly indicated as being an objective common to both innovative and alternative technologies.

In order to carry out this mandate of the law, the regulations developed for identification of innovative technologies take distinctly different approaches with respect to systems which incorporate wastewater reclamation and energy recovery as compared to those which are based on the conventional concept of treatment by means of biological or physical/chemical unit processes and discharge to surface waters. Accordingly, treatment and discharge processes such as primary treatment, suspended-growth or attached-growth biological systems for secondary or advanced wastewater treatment, physical/chemical treatment, disinfection and sludge processing must meet rigorous criteria pertaining to cost reduction or energy reduction in order to be considered innovative. Land application and water reuse systems for the treatment and management of wastewaters and sludges as well as energy recovery systems can be classified as innovative by applying either the cost or energy reduction criterion. They can also be classified as innovative if they represent a significant advancement in terms of greater operational reliability, better management of toxic materials, increased environmental benefits, or improved methods for joint treatment and management of municipal and industrial waste. These six criteria help define innovative processes and techniques and are listed in appendix E, section 6.

Comments received since the publication of the proposed rules on April 25 have been extremely useful to EPA. Following is a summary of pertinent comments on major issues, along with EPA's decision on how to proceed.

One area of comment centered around the 100-percent Federal grant to modify or replace malfunctioning treatment works constructed under an 85-percent grant. The proposed length of time following completion of a project during which such grants would be available drew considerable response. Many commenters supported a 3- to 5-year trial period, while others proposed different time periods for alternative and innovative projects. Still others supported the proposed 2-year interval. Related to the question of the length of the period of availability is the point at which the period commences. Suggested options included the date of initial full-scale operation, the date of completion of construction, the date of final inspection, and the date of final audit.

The Agency has decided to allow 2 years beginning with the date of final inspection. This provides for a definite commencement date. Since final inspection typically occurs 6 to 12 months after completion of the treatment works and a period of plant operation, this resolution in effect allows a 2-year period of observation after the treatment works is fully operational.

Some commenters requested that the regulations spell out the procedure for applying for the 100-percent modification grant. Such procedures will be the subject of future program guidance. Grant recipients will initiate the procedures by giving written notification of failure within the 2-year period discussed above to the State and EPA. Commenters raised some questions concerning the ways in which such grants will be funded. The priority system will be used with modification grants being made from general allotment funds. We are changing the regulations on priority lists previously published to allow consideration of the need for 100-percent modification grants in the determination of State priorities.

A second major area of comment concerned the reserve to be used for increasing grants for innovative and alternative projects from 75 percent to 85 percent. Many commenters were critical of the proposed Agency interpretation of this reserve as the maximum amount of allotted funds available for such grant increases. The Agency received and studied thoughtful analyses of the issue from the State of California, the Council on Environmental Quality, the League of Women Voters of the United States and others. Contrary to the commenters, we firmly believe that a thorough analysis of all pertinent provisions of the 1977 Act and its legislative history leads to the conclusion that the reserve is the maximum to be used to increase grants from 75 to 85 percent from funds allotted for fiscal years 1979 through 1981. This conclusion is bolstered by sound policy and administrative considerations and by the Agency's understanding of the provisions based upon extensive contacts with congressional committees during the months of preparation leading to enactment of the 1977 Act.

The 1977 Act establishes what amounts to a special program within the construction grants program to fund innovative and alternative processes and techniques. The key provisions are in sections 202(a) and 205(i). They authorize 85-percent grants; establish a special fund to increase the grants from 75 to 85 percent; provide a backup "insurance" grant for failures; and define the treatment works eligible for the 85-percent grants. All of these provisions must be read together to understand congressional intent on the question. Legislative history, especially from the conference committee report, further substantiates EPA's conclusion.

Some commenters argued that treatment of the 205(i) reserve as a maximum runs counter to the promotion of innovative and alternative technologies, which should be EPA's policy. Under the 1977 Act, EPA is implementing a variety of provisions that collectively make the encouragement of innovative and alternative technologies a major thrust of the construction grants and related programs. Nevertheless, EPA must conduct its activities within the confines of its legislative mandate.

Akin to the policy argument, one commenter recommended that EPA treat the 205(i) reserve as a minimum amount available because that would promote the overall objective of the Act—to maintain the physical, chemical and biological integrity of the Nation's waters. We believe that treatment of the reserve as a maximum amount will actually do more to promote the overall objective. This is so because EPA's approach allows more communities to be given grants at the 75-percent level to deal with their water quality problems.

A few pragmatic considerations were also raised. Some commenters argued that the 205(i) reserve is insufficient to accommodate all innovative and alternative projects and that States need the financial incentive to encourage these projects. Most indications at present are that a few States may have more projects than can be funded from the reserve. Most, however, will find it difficult to use up the reserve. The time needed to plan and design projects will cut significantly into the 3-year authorization. It is in part for this reason the EPA is permitting certain 1978 grants that qualify to be supplemented by 10 percent from the 1979 reserve. In addition, there is a major incentive for States to use the 205(i) funds rather than lose them to reallotment. If a State does not use the reserve while it is available, it not only loses the unused funds, but it cannot share in the overall reallotment of construction grant funds from States that did not obligate them.

Finally, it was argued with some merit that the interpretation as a maximum could cause delays because communities that cannot get an 85-percent grant one year may wait until the ensuing year to apply. This could occur. Two things militate against it. Funds are only authorized for 3 years. Most States will have ample funds the first year, and no one can delay beyond the third year of authorization. Additionally, delay might cost a community its position on the priority list. If any risk is apparent, a community is not likely to delay.

For these reasons, EPA is retaining its interpretation that the 205(i) reserve is the maximum amount to be spent to increase grants from 75 to 85 percent for innovative and alternative technologies.

Several States and others indicated that the distribution of the 2-percent reserve according to the chronological approval of grants is too inflexible. EPA agrees. Other approaches recommended, such as use of the priority system or establishment of criteria to choose the most desirable projects, also have serious drawbacks. Recognizing that States will want to handle the matter in different ways, EPA has made chronological approval a general rule but gives States the option of establishing a different method in cooperation with the EPA Regional Administrator.

Commenter made several proposals for reallotment of any unused portion of the 2-percent reserve. Some supported the proposed return of such funds to the general pool which is divided among States that have used all their general funds. Others favored the establishment of a special reserve that would be reallotted to States that have used up their 2-percent innovative/alternative set-aside. Another proposal was that such surpluses be used to help fund 100-percent modification/replacement grants.

Unused portions of the 2-percent reserve must be reallotted under section 205(b)(1) of the Act along with all reallotted funds. The EPA Administrator has some leeway in determining the manner of distribution of the reallotted funds. Under current regulations, reallotted funds are distributed to States that used their prior year's full allotment. EPA will reallot the reserve in the same manner. It should be noted that if a State loses funds to reallotment, whether these funds are from reserves or from general grant funds, then the State cannot receive funds from the overall reallotment.

The establishment of special funds is constrained by the reallotment provisions in section 205(b)(1). Special funds would have to be established in each State that participates in any reallotment. This would require an extra set of bureaucratic procedures that would be too burdensome and unwarranted for the potential benefits.

Some questions have been raised regarding the extent of the 85-percent grants—whether they will cover the costs of an entire treatment works or just that portion of the treatment works deemed innovative or alternative. The April 25 proposed rules adopted a 50-percent cutoff rule. Under that approach, if the present worth of innovative or alternative parts of the treatment works exceeds 50 percent of the total present worth cost of the non-sewer-related part of the treatment works, then the entire treatment works would be eligible for the 85-percent grant. Otherwise, only the innovative or alternative parts would be eligible. Support for this scheme is based largely upon administrative grounds.

Many persuasive comments have argued for an incremental approach,

V 4 3 / 1 8 8 SE 27 78

under which only innovative or alternative portions of treatment works would be eligible for 85-percent funding. The costs of an entire treatment facility would be covered by such a grant only if the whole project had been deemed innovative or alternative. The relationship between present worth of innovative or alternative parts and total present worth would no longer be important in determining what portion of a project was eligible for the 85-percent grant.

There are several grounds for favoring the incremental approach. It would be only slightly more difficult to administer than would the 50-percent cutoff approach, which utilizes the incremental approach on projects below the 50-percent level. It would spread the 2-percent reserve to more innovative and alternative projects and would use the reserve only on innovative and alternative processes and techniques. It would remove the pressure on consulting engineers to make every project at least reach the 51-percent mark. It would provide incentives to engineers and grantees to use as much innovative and alternative technology as possible. For these reasons, EPA is adopting the incremental approach under which only innovative and alternative unit processes and techniques will receive 85-percent funding.

Some commenters expressed concerns related to criteria in section 6 of appendix E for identifying innovative technology. These comments principally were directed at the cost and energy reduction criteria. Specifically, the comments indicated that (1) cost and energy reduction were not among the objectives envisioned by the Congress in authorizing specific innovative and alternative technology; (2) the accuracy of cost and energy analyses in facility plans is not sufficient to allow a meaningful comparison; and (3) the 15-percent cost reduction and 20-percent energy reduction criteria are either too easy or too difficult to achieve. A related comment suggested that using the most cost-effective alternative as the basis for comparison in the case of energy reduction (paragraph 6.e.(2) of appendix E of the proposed regulations) may not result in actual energy savings if the cost-effective noninnovative alternative for a particular project happens to be energy intensive.

The Agency disagrees with the comment that cost and energy reduction are not valid criteria for innovative technology as envisioned by the Congress. There are numerous references to cost and energy reduction in the legislative history of the 1977 Act which indicate reliance on these factors for the evaluation of innovative and alternative technology.

Likewise, no change was made with respect to the percentage decrease in cost or energy necessary to qualify a project as innovative. The Agency believes that the proposed criteria set forth substantial, yet achievable, goals with respect to cost and energy reduction. In recognition of some of the comments received, several changes were incorporated into the final regulations to insure that the cost and energy benefits claimed as the basis for designating a project as innovative are not just "paper savings" but are savings actually realized by the grantee municipalities.

These changes include: (1) authority for the Regional Administrator to deny a 10-percent grant increase for step 3 projects where one or more of the criteria upon which the innovative technology designation was based are not verified by the plans and specifications prepared for the project (§ 35.930-5(b)); (2) authority for the Regional Administrator to make an initial determination on whether a project is innovative after plans and specifications prepared for the project in step 2 are sufficiently completed to verify conformance with the criteria for innovative technology (§ 35.930-5(b)); (3) a requirement that facility plans contain analyses in sufficient detail to substantiate claimed cost or energy savings when these factors are proposed as the basis for an innovative technology designation (§ 35.917-1 and paragraph 5.a of appendix A); and (4) comparison with the least net energy, noninnovative alternative as the basis for determining whether a process or technique is innovative on the basis of energy savings (paragraph 6.e.(2) of appendix E).

The Agency is also preparing detailed guidance which contains information on a wide range of presently used processes and techniques to assist in the evaluation of innovative and alternative technology. Additionally, the Agency recently published a detailed study of the operational energy requirements for municipal wastewater treatment plants. The Agency has initiated another more comprehensive energy study, which should be available next year.

Paragraph 6.a. of appendix E indicates that the Regional Administrator may consult with EPA Headquarters as to whether a particular process or technique is innovative and as to determinations made in other EPA Regions about similar processes and techniques. As part of its implementation of these provisions, EPA is considering mechanisms to provide these capabilities to the Regional Offices. One possibility being actively considered is formation of a group or groups of technical experts to assist in determinations of innovative technologies both on a national level and on a regional basis. The contemplated composition of such groups would include qualified individuals from both Government and private industry. Also being considered is a data management operation which would catalog basic technical information on the various innovative projects implemented across the country. The objective of such an operation would be to establish and give the EPA Regions access to the pertinent information on related projects under consideration or approved elsewhere. More specific information on these efforts will be forthcoming in the form of program directives issued by the construction grants program.

Paragraph (b)(3) of § 35.908 of the proposed regulations indicated that projects or portions of projects which received step 2, step 3 or step 2+3 grant awards after December 27, 1977, may receive grant increases from funds allotted for fiscal year 1979 if they meet the criteria for innovative or alternative technologies in appendix E. Comments were received that the intent of the law to foster implementation of innovative and alternative technology by providing financial and other incentives was not being achieved by allowing these incentives to be applied to projects which already have received step 2 or step 3 grants or have approved facility plans. Plainly stated, these comments indicated that additional incentives in the context of those provided by the Clean Water Act of 1977 were not necessary to implement the technology because approval and acceptance of the project had already been obtained. The Agency agrees with these comments insofar as they apply to innovative technology projects. Criteria for innovative processes and techniques are based upon the concept of advancement of technology in comparison to currently accepted systems. This comparison implies a baseline of technology against which improvements in systems will be measured. Treatment processes and techniques which have been selected through the evaluation of alternatives in the facility planning process prior to initiation of the innovative/alternative technology program will be considered the baseline of accepted technology against which candidate innovative technology projects should be compared. This applies equally to more recently developed systems already incorporated into grant projects by virtue of the fact that such systems have been successfully subjected to the scrutiny of the construction grant process in order to receive project approval. As previously indicated, the Agency is developing guidance which will aid in making comparisons of candidate innovative

technology with accepted "baseline" technology.

We proposed criteria to identify innovative projects on April 25, 1978. They become effective in final form on October 1, 1978. Projects reviewed and approved between December 27, 1977, and October 1, 1978, were not evaluated on the basis of these criteria. They were approved under then existing criteria and as such were approved as accepted conventional or alternative systems.

For these reasons, the reference to innovative technology has been deleted from § 35.908(b)(3). Eligible portions of projects that received step 2, step 3, or step 2+3 grants after December 27, 1977, from funds allotted or reallotted in fiscal year 1978, may still receive grant increases from funds allotted for fiscal year 1979 if they meet the criteria for alternative technology in appendix E. This extension of grant increases to certain alternative technology projects is based upon the fact that such projects provide for the reclamation and reuse of wastewater and wastewater constituents or recover energy in accordance with the principal objective of the innovative/alternative technology provisions of the Clean Water Act. Furthermore, designations of these projects as alternative technology projects do not in any way depend upon a baseline comparison with other technology as is the case with innovative technology. Also, allowance of supplemental grants for alternative projects avoids possible delays in applications for grants and helps States use their reserves for the 10-percent grant increase in fiscal year 1979.

The end result of the Agency's position is fairly simple. We will begin making 85-percent grants for innovative projects after September 30, 1978, with fiscal year 1979 funds. Projects utilizing alternative technology that received 75-percent grants after December 27, 1977, from funds allotted or reallotted for fiscal year 1978, may receive a 10-percent grant increase from fiscal year 1979 funds.

A number of comments were received as to whether a particular technology or piece of equipment is innovative. Similar inquiries asked whether EPA would certify specific processes and techniques as innovative. Other related questions asked how many times a technology could be funded through the construction grants program before it ceased to be innovative.

In considering the response to these questions, it is important to note that the Agency has not in the past adopted uniform standards or specified processes and designs to be used in grant projects. Project approval is made on a case-by-case basis in accordance with broad evaluation criteria developed for the program. In keeping with this overall program structure, the Agency will not designate or certify that a specific process or technique is innovative. The designation of innovative technology will be applied on a project-by-project basis. Thus, individual projects may be determined to be innovative on the basis of their conformance with the criteria set forth in section 6 of appendix E.

As stated in paragraph 6.a. of appendix E, the Regional Administrator may consider local variations in geographic or climatic conditions which affect treatment plant design or operation in making a determination on innovative technology projects. Thus a particular process or technique may be considered innovative technology in one project but not another. Similarly, it is possible that a novel combination of processes and techniques, which individually may not be considered innovative, could qualify a project as innovative if it can be demonstrated that the project contributes to the advancement of technology and otherwise achieves the basic objectives of the innovative and alternative technology provisions of the Act.

In accordance with the above discussion, it is not possible to specify how many projects of a certain type may be approved before a particular technology is no longer considered innovative. Furthermore, because the innovative/alternative technology program authorized by the Clean Water Act presently extends only for 3 years, it will often not be possible to verify the performance of certain innovative processes and techniques through actual operation during this 3-year period. For these reasons, as stated in paragraph 6.d. of appendix E, it is possible to fund a number of projects using the same type of innovative technology where the potential benefits are great in comparison to the risks.

We also received comments on the relationship of patents and bid specifications to innovative technology. Specifically, these commenters were concerned that patent and bid specification requirements may restrict the implementation of innovative technology.

The patent requirements applicable to construction grant projects are contained in 40 CFR Part 30. The Agency is presently reviewing these regulations to determine their impact on innovative technology projects. If, as a result of this evaluation, modification of part 30 appears to be advisable, such modification will be proposed separately at a later date. Otherwise, the matter of patents with respect to innovative technology will be clarified by Agency guidance to insure that no unnecessary impediments are created due to uncertainty in this area.

Section 204(a)(6) of the Act states in part, that no bid specification for construction grant projects shall be written in such a manner as to contain proprietary, exclusionary or discriminatory requirements unless such requirements are necessary to test or demonstrate a specific process or technique. Accordingly, it is possible that restrictive bid specifications may be written for innovative technology projects when sufficient justification is provided to substantiate that such specifications are necessary to test or demonstrate a specific process. We are revising §§ 35.908, 35.936-13 and program requirements memorandum 75-5, which implements this section of the Act, to clarify this point.

These new program provisions necessitated a minor revision to clause 2 (responsibility of the engineer) of appendix C-1. We have changed the reference from "advanced" technology in § 35.908 to "innovative" technology.

Regulatory changes relating to innovative or alternative technologies are made in §§ 35.908, 35.917-1(d), 35.930-5, 35.935-20, 35-936-13, appendix A, section 7, appendix C-1, clause 2, and appendix E.

Individual Systems

Section 14 of the 1977 Act authorizes grants for privately-owned treatment works serving one or more principal residences or small commercial establishments constructed prior to and inhabited on or before December 27, 1977. These systems are intended to abate an existing water pollution or public health problem. A public body (municipality) must apply on behalf of a number of such units and certify that public ownership of such works is not feasible. The public body must certify that the treatment works will be properly maintained and operated. User charges are required for cost of operation and maintenance. Commercial users must pay back the Federal share of the cost of construction with no moratorium during the industrial cost recovery study, and the 25,000 gallons per day exemption does not apply. (See discussion of industrial cost recovery below.) We have decided that nonprofit and nongovernmental institutional entities, such as churches, schools, hospitals, and charitable organizations, for purposes of this special authority generally should be treated the same as small commercial establishments. The alternative selected must be cost-effective.

This section is intended to be utilized to construct alternative or unconventional treatment works for individual residences or clusters of residences. Alternatives include, but are not limited to, septic tanks and subsur-

V 4 3 / 1 8 8

S E 2 7 7 8

face disposal systems, other on-site systems including dual systems, small systems serving clusters of households or commercial users, and pressure and vacuum sewers. Alternative sytems can be innovative. Though small publicly-owned systems for one or more homes or small commercial establishments are not covered under § 35.918, they are covered under regulations governing grants for publicly-owned treatment works and are grant eligible. Additional guidance will be issued on the conditions under which small publicly-owned systems may be funded. As alternative systems, these individual systems are eligible for the 4 percent set aside. Both publicly-owned and privately-owned individual systems, as alternatives to conventional technology, are eligible for an additional 10 percent of the eligible costs for those projects where funds are available from the set-aside for innovative and alternative technology. However, privately-owned individual systems are not eligible for the 115 percent cost preference for alternative and innovative processes and techniques in the cost-effectiveness analysis.

Acquisition of land for individual systems is not grant eligible because there is no indication in the law or legislative history that Congress intended the limited funds available to be expended for what clearly would be a windfall to private landowners. Construction of individual systems may supplement other types of wastewater treatment works, conventional and unconventional, in the same planning area as determined to be cost-effective.

A major issue arising in the course of preparing the interim regulations was to what extent monitoring should be required to ensure groundwater supplies have not been contaminated by individual systems built with construction grants. Because individual systems will often be widely scattered and in remote areas, monitoring difficulties and costs could be of large magnitude. The periodic sampling of potable water wells, selected to represent the planning area, is deemed to be a minimum requirement. Careful analysis of the source of contamination is essential since inadequate well construction can be the primary cause. Large concentrations of individual systems which have soil absorption beds will require additional monitoring from existing or test wells, depending on the geology of the area and the location of those aquifers which are, or are likely to become, drinking water sources.

The monitoring program should be planned as part of the facility plan. Criteria for best practicable waste treatment technology, published by EPA under section 304(d)(2) of the Act, shall be met for all individual systems. These discharges shall also comply with State and local requirements for control and abatement of groundwater pollution.

Other important issues which arose follow:

1. Are full construction costs, including major rehabilitation, upgrading, installing and enlarging, grant eligible?

Yes. These functions may meet water pollution control needs in the most economical and effective manner provided the work is properly done and adequate operation and maintenance procedures are arranged.

2. Should this special authority be used to construct septic tanks serving single residences when legislative history contains an indication that this ordinarily should not be done?

Several statements in the legislative history of the 1977 Act lead to the conclusion that septic tanks, with various further treatment and disposal features, are to be considered as individual systems. The optional solution, not to make them grant eligible, would be to eliminate from Federal funding one of the most frequently used and successful devices. "Septic tanks" rarely fail. It is the soil absorption field which fails if not properly designed, constructed, maintained, and operated.

Responses to comments received after issuance of the interim regulations continue below.

Several comments were received that nonprofit and nongovernmental institutional entities, such as churches, schools, hospitals, and charitable organizations, with flows of less than 25,000 gallons per day should be exempt from paying back the Federal share of the cost of construction. The 1977 Act authorizes grants to construct privately-owned treatment works only to serve principal residences and commercial establishments. Nonprofit and nongovernmental institutions are normally not residences and therefore must fall into the "commercial" category or be considered ineligible for grants to build privately-owned treatement works. The 1977 Act requires recoupment of the capital costs of construction from "commercial" users and specifically states that such users are not exempt from the moratorium during the cost recovery study. Some comments were of the opinion that it would be difficult to administer this requirement for very small facilities in very small communities. EPA believes that the one user equivalent (generally 300 gallons per day) exemption will ease the administrative burden by exempting the very small entities from cost recovery. The industrial cost recovery study now underway as required by the 1977 Act will analyze the overall impacts of cost recovery from commercial users which receive grants to construct privately-owned systems.

Comments were received on the desirability of a separate priority list for projects eligible for the 4 percent set-aside. The comments are addressed earlier in this preamble under State priority.

Several comments pointed out the impossibility of forming individual systems management districts where State laws do not exist to permit such public bodies. One commenter asked if the costs of evaluation and changes in State codes were grant eligible. Appropriate legislation has already been enacted by some States without the assistance of grant funds. Generally, legal fees for such purposes are not eligible under the 201 grant; however, some costs of such evaluation may be eligible for grants under sections 106, 205(g), or 208 of the Act. Where such organizations are legally possible, doubt was expressed as to the availability of manpower with expertise to handle such districts. The regulations state that the public body is responsible for operation and maintenance of individual systems. and the establishment of a comprehensive program for regulation and inspection of the systems. The work can be performed by contract, by commercial firm on an on-call basis, or by means other than municipal forces if desired.

One comment stated individual systems should be handled as a generic class for step 1 and specifically designed in step 2 because the planning effort required is very demanding compared with the population served. However, individual systems vary widely in design, operation, and cost, and really cannot be treated as one similar generic group. During the facilities planning stage, various types of individual systems should be evaluated for suitability of operation in the physical setting (soils, slope, etc.) and for reliability in meeting the needs of future users; a cost-effectiveness analysis should be completed for each system under consideration. The information from these and other required analyses will range greatly and should be evaluated carefully in the planning stage before determining which system should be designed and constructed.

Many comments were received objecting to the requirement for unlimited access to each individual system at all times for such purposes as inspection, monitoring, construction, maintenance, etc. The regulation has been modified to read "access . . . at all reasonable times."

Comments were received indicating a fear of costly and restrictive monitoring of groundwater programs. Other comments recommended increased monitoring requirements. Still others concurred with the requirements as written. EPA has worded the regulations to allow considerable flexibility in monitoring so that local conditions can dictate the extent of the requirement within limits designed to ensure that minimum monitoring to protect the health of the community is required.

Concern was expressed that best practicable waste treatment criteria were not defined. These criteria are defined in chapter II of "Alternative Waste Management Techniques for Best Practicable Waste Treatment," EPA-430/9-75-013, MCD-13, under alternatives employing land application techniques.

EPA received recommendations that nonprofit organizations be deemed eligible for grants and for management of on-site systems. The Act allows award of grants only to "public bodies." Nonprofit organizations with the capability and authority to plan, design, construct, and operate treatment works for public purposes would be eligible to function in that capacity under agreement with the public body. If the nonprofit organization is constituted a public body under State law, it could qualify for consideration for a grant (e.g., a citizen's association which is officially constituted as a sewer district).

One comment asked what is a "number of individual units," is there a maximum number of individual units, and if there is a dollar ceiling for individual systems. There is no absolute dollar ceiling for individual systems; the law specifically states a minimum of "one or more principal residences or small commercial establishments." The maximum number of units would be established through selection of the appropriate alternative or unconventional technology for individual residences or clusters of residences. Under the definition elsewhere in the regulation (§ 35.915-1(e)), this technology would be applied in communities of 3,500 population or less, or highly dispersed sections of larger communities.

One comment referred to the statement that all individual systems qualify as alternative systems, yet the cost-effectiveness guidelines provision for the 115 percent cost preference for innovative and alternative systems does not apply to individual systems. The law specifically states privately owned individual systems must cost less than the cost of providing a system of collection and central treatment.

Other comments recommended more coordination between EPA and the Farmers' Home Administration (FmHA). Such coordination has already been initiated; FmHA's final decision on projects is often made pending EPA approval of a grant. In addition, coordination between the two agencies in areas such as joint applications, standardization of definitions of high-cost projects, and other streamlining of administrative procedures is proceeding under the aegis of a White House working group on rural water and sewer problems. This coordination also will be extended to other Federal agencies through this group.

One comment recommended extension of grant eligibility to bathroom fixtures and plumbing utilizing flow reduction technology. Congressional intent expressed in the legislative history is quite clear that commodes or associated plumbing are not eligible for grant funding. If eligible, administrative difficulties and costs would be very large.

EPA encourages the use of the facility plan to evaluate every feasible alternative for solution of the water pollution problem whether or not such a solution involves grant ineligible facilities or methods. Assistance in grants packaging, construction supervision, planning and initial training for operations and maintenance are all generally grant eligible.

There were several requests to define terms and concepts more specifically. This will be done in separate guidance to be issued at an early date.

Regulatory changes relating to individual systems are found in §§ 35.905-23, 35.917-1(b), 35.917-2(a), 35.918, 35.918-1, 35.918-2, and 35.918-3.

Cost-Effectiveness Analysis Guidelines and Reserve Capacity

Background. On February 4, 1977, EPA published in the Federal Register proposed guidelines to amend and supplement the Cost-Effectiveness Analysis Guidelines (Appendix A to 40 CFR, Part 35, Subpart E). That proposed revision was intended to provide for cost-effective sizes of and sufficient reserve capacity for wastewater treatment works and, at the same time, to avoid overdesign. Coverage included guidance and alternative procedures for forecasting growth of population, for estimating wastewater flows, for determining cost-effective construction staging periods, and for providing extra capacity beyond that determined to be cost-effective.

Most of the commenters on the proposed revisions, while agreeing in principle with the proposal, raised questions or suggested modifications that convinced the Agency several changes were warranted. Also, additional guidance was required to implement section 16 (Cost-Effectiveness) and section 21 (Reserve Capacity) of the 1977 Clean Water Act. Accordingly, the EPA revised the Cost-Effectiveness Analysis Guidelines to incorporate these changes, and on April 25, 1978, published them as part of a set of interim regulations to implement the Clean Water Act. These interim guidelines were effective as of June 26, 1978. Commenters on the interim guidelines suggested revisions that convinced the Agency to make some additional changes.

Innovative and alternative technologies. Section 16 of the 1977 Act encourages the use of innovative and alternative wastewater treatment technologies by extending grant eligibility to such projects if the life cycle cost does not exceed that of the most cost-effective alternative by more than 15 percent. The Agency's interim guidelines called for using option 3 of the following options for calculating the cost-effectiveness preference:

1. Use the life cycle cost of the entire proposed waste treatment system as a base for calculating the cost difference;

2. Apply the 15 percent increase to innovative and alternative components (and other differing portions) as compared with corresponding portions of the least costly noninnovative alternative; or

Use, as a base, the entire proposed waste treatment system where the system primarily (more than 50 percent of its cost) involves innovative or alternative technologies. Should innovative or alternative components comprise 50 percent or less of the system cost, the calculation base would be that for option 2.

Some commenters have expressed a preference for option 2. The Agency does not concur because option 2 would be difficult to administer and would also restrict unnecessarily the number of projects qualifying for the 15 percent preference. The Agency has rewritten option 3 to state that all projects with alternative and innovative components will qualify for the preference, except for those in which alternative or innovative unit processes replace conventional processes in a treatment plant and account for less than 50 percent of the cost. This language represents a slight liberalization of option 3, allowing some additional projects to qualify for the cost preference. This revision also clarifies and simplifies the old language.

Other commenters noted that collection systems common to both the conventional option and alternative technology system should not be included in the calculation base. The Agency agrees and has modified the guidelines accordingly.

Another commenter noted that the 15 percent cost-effectiveness preference must be mandatory rather than permissive. Both the law and these regulations mandate a 15 percent monetary cost-effectiveness preference for all innovative or alternative projects

V 4 3 / 1 8 8 S E 2 7 7 8 UMI

or components thereof that meet the Agency's criterion for such projects. However, this does not mean that the grantee must adopt an option featuring innovative or alternative technologies wherever their monetary costs are less than the 15 percent ceiling because nonmonetary factors must be taken into account as well.

Discount rate. The Agency considered raising the discount rate for evaluating proposed wastewater treatment works from that used by the Agency (currently 6⅝ percent) to 10 percent. The former rate is used by the Water Resources Council (WRC) to evaluate the costs and benefits of water resources projects. EPA, as a member agency, adopted this rate in 1973 when it published the Cost-Effectiveness Analysis Guidelines (appendix A of Construction Grant Regulations), although the construction grants program is not covered by the WRC "principles and standards" for evaluating water resource projects. The latter rate (10 percent) is cited in Office of Management and Budget (OMB) circular A-94 for use in agency programs not covered by the WRC "principles and standards."

The 10-percent rate is believed to approximate the opportunity cost of capital. The "Opportunity Cost of Capital Concept" has the most theoretical economic justification for cost-effectiveness analysis. This concept suggests the proper discount rate to use for public investment projects should be based on the rate of return to private sector investment (before taxes and adjusted for inflation). This is because resources used for public investment have alternative uses in the production of private commodities which society foregoes for the sake of the public investment.

Use of the 10-percent discount rate would help produce a more economically efficient distribution of construction grant funds. The expected result is that the optimal (cost-effective) staging period (the number of years for which the treatment plant is designed to handle a community's growth in terms of sewerage discharge) will decrease from about 10-20 years to about 9-16 years. These shorter staging periods will result in slightly smaller treatment works and in smaller initial treatment expenditures for each proposed treatment system. This should permit a somewhat greater number of treatment systems to be funded.

Despite these considerations, the Agency has decided against raising the discount rate to 10 percent. The higher discount rate would have the effect of lowering the total present worth cost of facilities with high operation and maintenance costs in comparison with the total present worth cost of capital intensive facilities with low operation and maintenance costs such as land treatment and energy recovery facilities. This could largely offset the 15-percent cost-effectiveness preference given to such measures under the 1977 Act and these guidelines. It would also run counter to the President's recent decision to retain the existing discount rate for water resources projects.

Many commenters representing a wide variety of interests opposed increasing the discount rate (only one favored such action) primarily because such actions would tend to disadvantage capital intensive land treatment and energy recovery alternatives and would favor operation and maintenance cost intensive options.

The Agency has decided to retain the WRC discount rate (currently 6⅝ percent) because this rate is consistent with the President's water resources policy and the net programmatic advantages, if any, of increasing the rate are not of overriding importance.

Cost escalation. Several commenters advocated use of a salvage value for land higher than the prevailing market price as required in the interim guidelines because of the very high rate of land value appreciation. The Agency has analyzed farmland value appreciation since 1960 and since 1970 and has compared these rates with cost escalation rates for construction, energy and labor. The analysis showed that land values over both the 17-year and 7-year periods have escalated roughly 3 percent faster than costs associated with construction or operation and maintenance of a treatment works. On this basis, the final guidelines will require, in the calculation of land salvage value, a land appreciation rate of 3 percent compounded annually, unless the grantee justifies a higher or lower percentage based upon historical differences between local land cost escalation and construction cost escalation. This allowance represents the estimated difference in rates between land cost appreciation and the cost escalation of goods and services related to construction.

Several commenters suggested escalation of energy, chemical, and labor costs in the cost-effectiveness analysis to account for anticipated high increases in these costs. It should be noted that the cost effectiveness analysis procedures call for use of constant dollars based on prevailing market prices at the time of the analysis and a low discount rate which is less than the inflation-free rate based on the opportunity cost of capital concept. This approach, rather than implying no future inflation, simply assumes that the costs of all resources involved in treatment works construction and operation will increase at about the same rate on a long-term basis. The results of the cost-effectiveness analysis would be distorted, however, if the prices of certain resource inputs changed significantly over the planning period in relation to the prices of other resources. The Agency has analyzed historic data on wastewater facility construction price indexes and on prices of various operation and maintenance components, including labor, electricity, chemicals, coal, petroleum distillates, and natural gas. We also reviewed projections of future energy use prepared by the Department of Energy. Only the historic and projected increase in natural gas prices were found to significantly exceed (by nearly 4 percent) those for construction and the average of other operation and maintenance elements. Thus, the Agency has revised the guidelines to require escalation of relative natural gas prices over the planning period at a compound rate of 4 percent annually, unless the grantee justifies a higher or lower percentage based upon regional differentials between historical natural gas price escalation and construction cost escalation.

Reserve capacity. The Clean Water Act requires the Agency, in determining the amount of reserve capacity eligible for a grant, to take into account the projected population presented in a facility plan. The population must be based on the latest information available from the U.S. Department of Commerce or from the States as EPA determines appropriate. The interim guidelines called for population forecasts in facility plans to be based upon disaggregation of State population totals already developed by the Department of Commerce. Several commenters, principally 208 planning agencies, oppose this approach and contend that population forecasting is a policy matter that should best be addressed by local governmental units. Others, principally environmental groups and individuals, favor the disaggregation approach as a means of preventing excessive capacity and resultant secondary impacts.

The Agency believes the disaggregation approach should be retained because, to avoid providing excessive reserve capacity, forecasts of population and economic activities for individual small areas such as facility planning areas or designated 208 areas should be reasonably consistent with State and national projections. This approach is consonant with the President's urban policy intended to revitalize cities and discourage urban sprawl. The guidelines permit inclusion of extra capacity in a treatment works at the expense of the grantee to accommodate local growth policies. The final guidelines allow reasonable departures

from the Department of Commerce State projections and their disaggregations to designated 208 areawide planning areas, where the State or designated 208 agency has already prepared projections. The final guidelines permit use of State projections already prepared by the State if the year 2000 State projection does not exceed that of the Department of Commerce projection by more than 5 percent. The Administrator may approve State population projections that exceed the Department of Commerce projections by more than 5 percent if justified by the State. Where a designated 208 agency has already prepared a population projection for its area, it may be used if the year 2000 population does not exceed that of the disaggregation, based on the Department of Commerce projection, by more than 10 percent.

One State suggested allowing a State prepared population forecast to exceed the Bureau of Economic Analysis forecast by 10 percent without justification. The Agency does not concur because the present 5-percent departure is substantial. Also, since the State may increase its total after the 208 agencies have received their variances up to 10 percent, the total final State departure from the Bureau of Economic Analysis projection may already approach 10 percent or even more in some cases. Another State commented that States already having policies of disaggregating State totals among counties, even within designated 208 areas, should be allowed to continue to do so. The Agency agrees and has included such a provision in the final guidelines.

One commenter has suggested that population projections in 201 and 208 plans should no longer be wedded to existing zoning ordinances, which may be exclusionary and forbid immigration by lower income people. Instead he suggested that future population and the resulting reserve capacity for grant funded projects should rely on regional population projections and, in particular, regional allocations of low- and moderate-income apartment units. The Agency cannot fully comply with this suggestion because it believes that zoning and land-use decisions should be left primarily with local governmental units, and decisions on cost-effectiveness should be based on total and not partial population projections in an area. However, these regulations require the local population projections for 201 plans to fall within ceilings based on disaggregation of State and regional population totals.

Several commenters advocate a much more flexible population forecasting approach by permitting use of population projections other than the Bureau of Economic Analysis. The Agency does not concur because use of various projections would be inequitable and would lead in many instances to funding excessive reserve capacity to accommodate growth.

One commenter stated that the population disaggregation approach is too simplistic for interstate metropolitan areas where factors influencing population change go beyond State boundaries. The Agency concedes that such situations may pose difficult forecasting and disaggregation problems. Nevertheless, the Agency believes the interstate disaggregation problems can be worked out through consultations among the concerned States, designated 208 agencies and other regional planning agencies.

Some commenters pointed out the need for public involvement in the review of the State population disaggregations. The Agency agrees that the public should have an opportunity to review and comment on the disaggregation before Agency review. Accordingly, the final guidelines now require the State to hold a public meeting on its disaggregations before submitting them for Agency review.

The Agency believes that the same population projections should be used for both air and water quality planning. Appendix A now requires, as an initial step toward implementing this objective, that States, when disaggregating total State population, consult with organizations of local officials responsible for water quality and air quality planning. In many instances the organizations certified by Governors pursuant to section 174(a) of the Clean Air Act to do air quality planning are also 208 agencies.

Some commenters have objected to the per capita flow limitations of 60-80 gallons per capita per day (the second method of estimating wastewater flows) as being unrealistically low. The Agency believes that such dry weather base flow allowances are adequate for smaller communities where flow data are lacking. These allowances exclude infiltration and inflow. Residential wastewater flows nationwide average only 45 gallons per capita per day. Other commenters favor increasing future per capita flows over time. They contend that increasing per capita flows have been observed during the past 10 years and that with increasing affluence this trend will continue. The Agency agrees that per capita water usage and wastewater flows have increased in the past but believes that this trend is reversing. This can be attributed to the increase of personal water conservation habits encouraged by periodic water shortages or higher water supply and sewerage costs even in normally water rich areas. Moreover, plumbing codes, State laws and ordinances are rapidly being revised in many areas to require installation of water-saving fixtures in new dwellings, hotels, motels, and other buildings.

Section 21 of the 1977 Act requires the Agency, in approving the amount of reserve capacity for a treatment works, to take into account efforts to reduce the flow of sewage and unnecessary water consumption. The President's water resource policy features water conservation as its cornerstone and requires Federal agencies to implement appropriate conservation measures.

The guidelines require a cost-effectiveness evaluation of flow-reduction measures such as plastic toilet dams and low flow showerheads; changes in laws, ordinances, or plumbing codes requiring installation of water-saving devices in future habitations; and water pricing changes. The grantee must develop a recommended flow reduction program featuring a public information program plus cost-effective measures for which the grantee has implementation authority or can obtain cooperation from an entity with such authority. Exempted from these requirements are those communities with a population less than 10,000 or with average daily base flows, excluding infiltration/inflow and industrial flows, for treatment works design of less than 70 gallons per capita per day or with ongoing flow reduction programs.

Several commenters have suggested that small communities should be encouraged to conserve water and thus should not be exempt from the flow reduction requirements. The Agency concedes that some water conservation potential exists for smaller communities even though such communities tend to use and waste less water than the larger, more affluent cities. Nevertheless, the Agency believes that the limited cost savings obtainable in small communities from flow reduction programs may not be commensurate with the administrative burden imposed. Some commenters have pointed out that the 70 gallons per capita per day exemption criterion is too stringent and have suggested a 100 gallons per capita per day criterion. The Agency disagrees because the 70 gallons per capita per day figure, which represents an average dry weather base flow, is large enough to exempt most small communities and water-conserving larger cities. Almost all communities, including larger water users, would be exempt if the suggested 100 gallons per capita per day criterion were used.

Two commenters objected to the flow reduction requirements as being unreasonable for areas with adequate water supplies. The Agency disagrees. During the past 20 years, persistent drought and accompanying water

V 4 3 / 1 8 8

shortages have plagued many supposedly water-rich areas. Moreover, the costs of water management, including water supply withdrawal and treatment, distribution, and, finally, wastewater treatment, are very substantial even in areas with plentiful water. Water conservation can markedly reduce these total water management costs over the long term.

Three commenters objected to the construction staging requirements for treatment plants, particularly noting that the 10-year period is insufficient for planning and designing future expansions in complex metropolitan areas. The Agency believes that construction of treatment facilities should be staged, particularly in high growth areas, to reduce the high construction and operational costs otherwise attributable to large amounts of idle reserve capacity. To achieve this objective, a staging period as short as 10 years does not appear unreasonable for high-growth situations. Another important related consideration is the high local cost burden for treatment facilities, especially for small communities. Limiting the treatment plant size to that reasonably necessary to accommodate future growth helps to reduce this local financial cost burden.

One commenter noted that the tabulated staging periods for small plants of 1 MGD or less capacity could lead to designing a treatment plant serving a high growth rate area for a capacity less than that for a lower growth rate area. The Agency agrees with this observation and has accordingly included in the final guidelines a 15-year staging period for the small plants to preclude this transition problem.

Several commenters objected to the required 20-year staging period for interceptors which can be increased only if justified and in compliance with approved water quality management or other environmental plans. They suggest that sizing a pipe for 40 to 50 years will cost less in the long run and will often decrease primary environmental impacts. The Agency has found that total present worth costs of sizing a pipe for 20 years and adding another pipe 20 years hence are about the same as providing 40 years of pipe capacity initially. The difference in primary environmental impacts will vary. The primary reason for limiting interceptor sizes to 20 years would be to limit the induced growth and resultant secondary environmental impacts related to larger pipes.

Interceptor planning. Two commenters have suggested changing the guidelines to permit extension of interceptors into undeveloped areas (but not environmentally sensitive areas) where consistent with growth management plans. This change would be intended to encourage growth in suitable areas. While this suggestion has some merit, the Agency believes the provisions discouraging interceptor extensions into undeveloped areas should remain unchanged because:

(1) Federal funding of interceptor extensions into undeveloped areas could induce very rapid growth with resultant adverse secondary environmental impacts,

(2) Sewering could be encouraged in cases where other approaches might be more cost-effective, and

(3) The Federal subsidization of new development would mean deferring Federal assistance for correcting existing water pollution problems elsewhere.

Useful life of a treatment works. The former guidelines included unnecessary and confusing distinctions between the definitions of "service life" and "useful life" for treatment works.

The new guidelines drop the former service life definitions and amend the useful life definition. This is now simply the estimated period of time during which a treatment works or a component of a waste treatment management system will be operated. Other regulation revisions have been made so that the rest of the regulation is consistent with this change.

These regulatory changes are made in appendix A to subpart E.

Grant Eligible Categories

On June 21, 1977, the Agency issued Program Requirements Memorandum (PRM) 77-8 concerning the review of pending new collector sewer projects. The policy defined in more detail and required rigorous implementation of then existing Agency guidance on eligibility and cost-effectiveness of collector sewer projects. It was intended to insure that the limited construction grant funds available are obligated for collector projects only when needed to correct a problem of public health or ground or surface water pollution. Specifically, that policy restricted grant eligibility of collector sewers to those areas with population densities of at least 1.7 persons per acre (one household for every 2 acres) on October 18, 1972. Population density of those areas was to be evaluated on a block-by-block basis or, where typical city blocks do not exist, by areas of 5 acres or less.

Section 36 of the 1977 Act amends section 211 of FWPCA to preclude use of the population density criterion in PRM 77-8 as a test of grant eligibility for collector sewer projects but permits use of the criterion for evaluating alternatives. The Agency revised the policy of PRM 77-8 accordingly and on March 3, 1978, issued new PRM 78-9 which supersedes PRM 77-8. PRM 78-9 was published in the Federal Register on April 7, 1978 (43 FR 14722). The new PRM retains the one household per 2-acre criterion only for identifying less closely populated areas where individual or other small wastewater treatment systems are likely to be more cost-effective than collector sewers and thus must be evaluated in detail if collector sewers are proposed for such areas. The Agency believes that use of the population density criterion in this manner will assist with and simplify the cost-effectiveness analysis for collector sewer projects.

These final regulations require, as a basis for eligibility, new collector sewer projects serve a community in existence on October 18, 1978, and define a community as including any area with substantial human habitation on October 18, 1972. Also required, consistent with PRM 78-9, is a block-by-block evaluation to identify areas with substantial human habitation on October 18, 1972. The proposed collection system must be cost-effective and the population density of the area to be served must be considered in determining the cost-effectiveness of the project. In addition, the proposed collection system must conform with approved 208 plans, applicable environmental laws, executive orders on wetlands and flood plains, and Agency policy on wetlands and prime agricultural lands.

Two commenters questioned use of a block-by-block evaluation to identify human habitations existing as of October 1972 as a test of grant eligibility and suggested that the existence of a community at that time is sufficient to pass the eligibility test. The Agency disagrees because Congress clearly intended to prohibit grant funding of collector sewers to serve new developments. The block-by-block evaluation is necessary for identifying new developments, principally in community fringe areas, that should not receive Federal grant assistance for collector sewers. One commenter suggested addition of a provision requiring use of grant conditions such as restrictions of sewer hookups where necessary to protect environmentally sensitive areas and prime agricultural lands from new development. The Agency, noting that this suggestion conforms with existing Agency guidance, has added the suggested provision to the final regulations.

Section 36 of the 1977 Act further amended section 211 of the FWPCA to prohibit the use of authorized construction grant funds for control of pollutants from separate storm sewers.

Regulatory provisions relating to grant eligible categories are in §§ 35.905-23, 35.925-13, and 35.925-21.

Land Eligibility

Section 37 of the 1977 Act amends the definition of "treatment works" under section 212(2)(A) of the FWPCA to include as eligible, under site acquisition of land that will be an integral part of the treatment process, the land used for the storage of treated wastewater in land treatment systems prior to land application. EPA has interpreted this provision to permit acquisition of land for composting sludge since such composting can be part of a treatment process. In order to implement this amendment, § 35.905-23 has been revised to include in the definition of "treatment works," the land used for composting of sludge and for the temporary storage of treated wastewater in land treatment systems. Section 35.940-3 has also been revised to include, among costs allowable if approved by the Regional Administrator, the land used for composting of sludges and for the temporary storage of treated wastewater in land treatment systems prior to land application.

Construction grants regulations promulgated on February 23, 1973, and February 11, 1974, are applicable to construction grants awarded between October 18, 1972, and December 27, 1977. The revised definition of treatment works made pursuant to the 1977 Act is applicable to all projects for which Agency approval of step 1 facility plans had not been given before December 27, 1977.

The Agency received comments supporting and opposing the eligibility of land for composting of sludge. The final regulations retain the eligibility because, by encouraging composting, it furthers the clear congressional intent to promote beneficial use of sludges on the land. Composting of sludge and storage of treated effluent are both critical stages immediately prior to land application. Land eligibility provides a very similar incentive for comparable situations.

Changes to the regulations implementing this amendment are made in §§ 35.905-23 and 35.940-3.

Recreational Use

Section 201(g)(6) requires that no wastewater treatment facilities grants be made after September 30, 1978, unless the grant applicant has satisfactorily demonstrated to the Administrator that potential recreation and open space opportunities have been analyzed in the planning of the proposed treatment works. This provision provides an opportunity for communities to obtain important recreational and open space benefits at relatively little extra cost.

Commenters generally addressed two questions. Should the analysis be required for all projects for which grants are made after September 30, 1978, or only for projects for which facility planning begins after that date? Should construction grants funds under steps 2 and 3 be used to design and build recreational facilities? Environmental, parks, and recreation groups argued that the analysis should be required of new and ongoing projects and that some funding for recreational use facilities should be available under steps 2 and 3. Other commenters argued to the contrary. Some pointed out that not all projects lend themselves to meaningful analyses of recreational use opportunities. Others indicated that recreational use considerations are beyond the scope of the water quality objectives of the program.

One overriding intention of Congress, often expressed in the legislative history of the 1977 Act, was that new planning requirements not delay ongoing projects needed to meet water quality objectives. Consequently, the recreational use analysis will be required only of new facility plans initiated after September 30, 1978. Nonetheless, EPA encourages planning for recreational and open space opportunities associated with treatment works. Grantees with ongoing projects are free to request grant amendments for extra money to carry out such recreational planning. EPA will look favorably upon such requests if they do not delay projects or raise costs significantly.

Section 201(g)(6) requires an analysis of potential recreation and open space opportunities in the planning of wastewater treatment facilities. It does not require nor authorize the funding of the design or construction of such recreational facilities. Such costs are not grant eligible under steps 2 and 3. EPA has already taken measures to prepare program guidance in coordination with the Heritage Conservation and Recreation Service and in consultation with park associations to implement this provision. We intend to aid grantees as much as possible to avail themselves of funding for recreation and open space design and construction from other sources.

The Heritage Conservation and Recreation Service recommended that the required analysis specifically mention access to water inasmuch as that is viewed as the key to deriving recreational benefits in this context. The final regulation reflects this recommendation.

The question of how recreational use and other nonwater quality considerations will be considered in cost- effectiveness guidelines will be dealt with in program guidance. In general, such factors come into play when choosing between two otherwise closely matched alternatives.

It was also suggested that the proposed portion of the facility plan describing measures taken to inform the public of potential recreation and open space opportunities be deleted and that this topic be included in the general public participation requirements. The Agency agrees with this approach and the extra requirement has been dropped.

Pertinent regulatory changes have been made in § 35.917-1(j).

Combined Grants (Step 2+3)

Under new provisions added to section 203(a) of the FWPCA by section 18 of the 1977 Act, a single grant may be awarded for the combined Federal share of the cost of step 2 (preparation of plans and specifications) and step 3 (actual construction) for communities of 25,000 or less population if the total estimated step 3 cost of the treatment works is $2 million or less—$3 million in States with unusually high construction costs. At the present time, Alaska, California, Hawaii, Illinois, Minnesota, and New York are designated as having high construction costs. Based upon needs survey standard cost curves, costs in these States were determined to be more than one standard deviation from the norm.

EPA awarded step 2+3 grants in the past, but in 1974 the General Accounting Office ruled that they were not allowed under the existing statute. In allowing this new procedure, Congress intends to accelerate the grant process. By providing limited relief from the step 1-2-3 process to small communities, the paperwork and attendant delays incurred by separate grant applications will be minimized. Ultimately, the completion time and costs for these projects should be greatly reduced. It is necessary, however, to balance the intent to streamline these smaller projects with the minimum control necessary to assure that an acceptable pollution abatement facility is built. Plans and specification approval prior to advertising for bids on step 3 construction is necessary for this purpose.

Formal comments on the step 2+3 construction grants regulations were received from a number of organizations.

One comment suggested that since existing State project priority lists were developed without the knowledge that step 2+3 grants were possible, that portion of the regulation requiring a step 2+3 project to appear on the approved priority list should be delayed to take effect for the priority list for fiscal year 1979 (FY 1979). The Agency made this provision effective upon publication of these regulations as interim final to allow States the opportunity to amend their FY 1978 pri-

SEP 27 78

V 43 / 188 SE 27 78 LIMI

ority lists if they chose. The provision is intended to require that step 2+3 projects appear on the priority list beginning with FY 1979.

Another comment suggested that the regulations use service area population rather than the population of the applicant municipality as the criterion for determining eligibility for a step 2+3 grant. The concern was that a regional authority or grantee serving more than one municipality may exceed the 25,000 population criterion though the service area population was less than 25,000. The regulations as written use the term, "applicant municipality," as stated in the statute. Congress provided the opportunity for step 2+3 grants to applicants with limited administrative capability. The population within the jurisdiction of the applicant municipality is thought to be a better indicator of an applicant's likely administrative capability than the service area population, which could be more or less than that which is within the applicant's jurisdiction.

Another comment concerned the Agency's criterion for determining areas of high construction cost. The standard deviation was selected as a commonly used and appropriate statistical device. As mentioned above, based upon needs survey standard cost curves, six States were determined to be more than one standard deviation from the norm. (Alaska and Hawaii were two States mentioned by the congressional conferees as having high construction costs.)

A comment from a State agency suggested that the regulations should require a comparison of the cost estimates after step 2 design with those presented in the facility plan. The objective of such comparison would be the elimination of "gold-plating" which escalates project costs above those presented in the facility plan. Since plans and specifications must be reviewed for conformity with the facility plan and approved prior to commencement of step 3 work, the necessary authority and checkpoint already exist. No modification of the step 2+3 regulation was necessary.

The last portion of § 35.909(a), stating that an existing step 2 grant could be amended to change it to a step 2+3 grant, has been deleted and paragraph (b)(3) of that section has been amended. It was included in the interim regulations to supersede Program Requirements Memorandum (PRM) 78-7, which was to be effective prior to promulgation of these final regulations and prohibited amendment of existing step 2 grants for purposes of converting to a step 2+3 grant. Since that PRM is no longer effective, specific reference to allowing such amendment is no longer necessary in the regulation.

Regulatory changes on combined grants are found in §§ 35.903(b), 35.909, 35.920-3(d), and 35.930-1(a)(4). §§ 35.930-1(a)(5), 35.935-4, and 35.935-9 were deleted.

Pretreatment

Regulations implementing a comprehensive pretreatment program were promulgated as 40 CFR-Part 403 on June 26, 1978 (43 CFR 27736). These regulations relate the construction grants program to the pretreatment program. They are intended to (1) establish pretreatment program development as a grant eligible item, (2) allow funding to be accomplished by amendment of a step 1, 2, or 3 grant whichever is most appropriate to the circumstances, (3) insure uniform development of the pretreatment program by requiring that certain elements be completed before the award of a step 2 grant, and other elements to be completed prior to award of a step 3 grant, (4) withhold grant payment at the 90 percent point in step 3 if the pretreatment program is not approved by that time, and (5) provide for time phasing that insures attainment of environmental benefits of the pretreatment program without severe disruption to the construction grants program.

Many municipalities have already developed or are in the process of developing pretreatment programs either on their own initiative or in response to national pollutant discharge elimination system permit requirements. We do not intend that such work be duplicated. To the extent that previous work meets the requirements of an approvable pretreatment program under part 403, it is to be incorporated in the program development under these construction grants regulations. To the degree that additional work must be done to complete the requirements of an approvable program, it may be grant eligible. Work done prior to the effective date of the final regulations is not grant eligible.

We received a number of formal comments on the proposed construction grants pretreatment regulations. The comments fall into the basic areas discussed below.

A number of commenters expressed concern that § 35.907(e) of the proposed regulations would not allow as eligible costs studies to determine pollutant removals and tolerance of municipal treatment works. We modified these regulations to clarify the funding eligibility of these studies. Currently such studies are grant eligible when performed for the purpose of properly designing the municipal treatment works and will continue to be grant eligible for such purposes. However, when these studies are performed solely for the purpose of the municipalities seeking allowances for removal of pollutants under part 403 of this chapter, they are not grant eligible.

Other comments requested clarification of the construction grants pretreatment strategy and indicated the need for a clearer statement. The general pretreatment regulations published under part 403 of this chapter on June 26, 1978, contain a comprehensive statement of the Agency's overall pretreatment strategy. The construction grants component is summarized as follows. Section 35.907 of these regulations provides that an existing or pending step 1, 2, or 3 grant may be modified to provide for development of a municipal pretreatment program where such a program has not been provided for in a water quality management plan under section 208 of the Act. The purpose of amending an existing or pending grant is (1) to recognize that a large proportion of the total number of step 1 grants expected to be made in this program have already been awarded, and (2) to insure development of an approvable pretreatment program at the earliest possible date. Municipalities that have not yet entered the grant process will be required to develop a pretreatment program as part of the scope of their step 1 grants.

In order to prevent disruption or delay in the movement of a project from step 1 to step 2, or from step 2 to step 3 because of pretreatment requirements, these regulations allow submission of the scope of work under the original or unamended grant upon its completion independent of the status of the work to be completed under the pretreatment grant amendment. To illustrate, if an active step 1 grant at the 90 percent completion point was modified in December 1978, to provide for development of a pretreatment program, the grantee may upon completion of the final 10 percent of the original scope of work, submit that work together with a step 2 application and the step 2 could be awarded at any time prior to June 30, 1980, without any of the elements of the pretreatment work being submitted. In order for the step 2 grant to be awarded after June 30, 1980, however, the grantee must have completed and submitted the elements of the pretreatment program specified in § 35.920-3(b)(9). The situation would be similar in going from step 2 to step 3 except that in order to receive a step 3 grant after December 31, 1980, all required elements of the pretreatment program must have been submitted. The process described above provides phase-in for development of pretreatment program requirements in the construction grants program since portions of the pretreatment program must be developed during each step of the grant process to be able to meet application requirements for the subsequent step grant. It also serves to insure continuous development of a pretreatment program.

Section 35.935-19 requires that step 3 grant payments be withheld at the 90 percent point unless the pretreatment program is approved. This provision is intended to ensure that the grantee complies with the terms of the grant agreement.

One commenter objected to the required use of the user charge system in implementing an approved pretreatment program. The regulations do not require use of the user charge system if the grantee chooses to provide other funds sufficient to implement the pretreatment program.

One commenter disagreed with the position expressed in the preamble to the proposed regulations that work done on pretreatment program development prior to the effective date of these final regulations shall not be grant eligible or reimbursable. A statement of ineligibility is found on page VII-6 of the EPA Handbook of Procedures which states that costs normally associated with functions of Government are not grant eligible. The development of regulations or ordinances are specifically cited as such unallowable costs. In addition, the proposed pretreatment regulations published in the Federal Register on February 2, 1977, stated that grant funding of the development of municipal pretreatment programs was a new provision of those proposed regulations. Those written statements of eligibility reflect the Agency policy with respect to funding eligibility for work done prior to these regulations becoming final.

Comments were received requesting that costs of sampling and analysis associated with the industrial survey required under § 35.907(d)(1) be disallowed. There was concern that such costs would be extremely high and therefore take funds needed for construction of treatment facilities. Other comments indicated Federal participation in such costs is essential if effective pretreatment programs are to be developed. These final regulations reflect both concerns by adding new paragraphs (f) to §§ 35.907 and 35.940-3 which provide funds for limited sampling when prior written approval is granted by the Regional Administrator.

A comment was received concerning the need for guidance on the exact nature of the program expected to be developed by grantees. A three volume document entitled "Federal Guidelines: State and Local Pretreatment Programs" was published under section 304(f) of Pub. L. 92-500. This document should still be of assistance although it will be updated to take into account the pretreatment regulations issued as part 403 as well as these final grant regulations.

In order to provide adequate time for the States to modify their priority systems and lists, to provide funding for the pretreatment programs required under these regulations, and to allow for development and distribution of additional guidance on pretreatment program requirements, § 35.920-3 of the proposed regulations has been modified to allow an additional 6 months for submission of the required pretreatment program elements in support of a step 2 or step 3 application. Similarly, the date contained in § 35.935-19 was amended by adding 6 months to the proposed date which marks the 90 percent hold on step 3 grants awarded after that date.

Regulatory changes on pretreatment have been made in §§ 35.907, 35.915-1, 35.917-1(k), 35.920-3 (b) and (c), 35.929-2, 35.935-19, 35.940-1, 35.940-2, and 35.940-3.

Industrial Cost Recovery

Section 24 of the 1977 Act amends section 204(b) of the FWPCA to authorize the Administrator to exempt from the industrial cost recovery (ICR) requirement any industrial user which discharges the equivalent of 25,000 gallons per day or less of domestic sanitary waste. Section 24 permits grantees to develop ICR systems on a systemwide, rather than on a project-by-project basis. It also permits a portion of the ICR revenues retained by the grantee to be used for the administration of the ICR system and maintains the current authority to establish a fund for future expansion or reconstruction of the grantee's treatment works.

Section 75 of the 1977 Act directs the Administrator to conduct a study on the efficiency of and the need for ICR and to report on the study to assist Congress to take action on the future course of ICR. This study is not addressed in these regulations. However, during the period of the study, and ending 18 months after enactment of the statute (June 30, 1979), EPA may not enforce the collection of ICR payments. This is known as the "moratorium" period. At the end of the moratorium, if Congress has not acted, the requirement to make payments of ICR attributed to this period will come back into force. Any ICR obligations incurred during the moratorium will become immediately due, but payments of these obligations may be paid in a lump sum within 1 year or spread out over the remaining ICR period. PRM 78-6 on this subject was issued February 17, 1978, and published in the Federal Register on April 7, 1978 (43 FR 14722).

This section implements the legislative history of section 24 of the Act which indicates that grantees must continue to develop ICR systems during the moratorium; only ICR payments are suspended.

Section 14 of the 1977 Act, which authorizes funding of individual systems (discussed above), requires payment by commercial users of the Federal share of construction costs. We have included this aspect of the individual system amendment in the ICR regulations.

In implementing these amendments in the regulations, we have made the following changes to the regulations promulgated on February 11, 1974. The definition of industrial user in § 35.905 has been revised to include the following: (a) A nongovernmental, nonresidential user which discharges more than the equivalent of 25,000 gallons per day of sanitary waste and which is identified in the Standard Industrial Classification Manual under divisions A, B, D, E, and I; (b) a user which discharges any wastewater containing toxic pollutants or which has any other adverse effect on the treatment works; and (c) a commercial user of an individual system.

The series of sections in § 35.928 have been revised where necessary to incorporate requirements of the 1977 Act such as those relating to systemwide ICR, payments from commercial users of individual systems, and the moratorium. The regulations do not provide for the collection of ICR during the moratorium from industrial users, although grantees may collect ICR payments from industrial users during the moratorium if they so desire. Neither the moratorium nor the 25,000 gallons per day exemption applies to commercial users of individual systems as defined in § 35.918(a)(3) of the regulations.

The grant condition requiring grantee development of an ICR system, a schedule for compliance with the condition, and sanctions for noncompliance are found in a new § 35.935-15. The schedule closely tracks the user charge system schedule discussed above. After the effective date of these regulations, payments under the grant being held for noncompliance with the ICR requirements will be released until the end of the moratorium. (This does not authorize release of payments being withheld for other reasons such as lack of an approvable user charge system). After June 30, 1979, no step 3 grant will be awarded unless the grantee's ICR system has been approved.

The important comments received on the interim regulations and the EPA response are summarized below:

UMI

V 4 3 / 1 8 8

S E 2 7 7 8

UMI

1. The definition of industrial user in § 35.905 should be changed to exclude residential users or all dischargers of sanitary wastes. Preferably, the regulations should use the definition in effect in the construction grant regulations published in 1974.

In the interim regulations, we defined industrial user in part to include all users with discharges into publicly-owned treatment works of more than 25,000 gallons per day of sanitary waste or its equivalent in process waste or combined sanitary and process waste. This interpretation of the 25,000 gallons per day exemption emphasized the volume and character of waste rather than the type of user. We recognize that Congress intended for the 25,000 gallons per day exemption to reduce administrative burdens on grantees. The definition in the interim regulations would have involved less adminstrative efforts than that required under the prior definition. However, it required more administration than if the prior definition were used with the addition of the 25,000 gallons per day exemption. Also, it would have made some large commercial and residential users subject to ICR for the first time.

We have decided not to adopt the industrial user definition published in the interim regulations. Instead, we will use the prior definition with certain modifications. Industrial users are nongovernmental, nonresidential users of publicly-owned treatment works that are identified in Standard Industrial Classification Divisions A, B, D, E, and I, and that discharge more than the equivalent of 25,000 gallons per day of sanitary waste. We have added an explanation of wastes equivalent to sanitary waste. A user's domestic wastes or discharges from sanitary conveniences may be excluded before applying the 25,000 gallons per day exemption. For example, a user that discharges 6,000 gallons of process waste and 20,000 gallons of sanitary waste would not be subject to industrial cost recovery if the grantee elects to allow sanitary wastes to be excluded and the 6,000 gallons of process waste was less than the equivalent of 25,000 gallons of domestic waste.

The term "nongovernmental" as used in the definition of industrial user is to be interpreted consistently with the discussion of publicly-owned facilities in § 35.929-1(b)(4)(iii) regarding approval of user charge systems. An exception is that publicly-owned facilities which discharge nonsanitary waste, such as hospitals, would be subject to user charges but not to ICR. Industrial cost recovery was designed to collect funds from the private sector. It would therefore be inconsistent to require a publicly-owned facility used for public purposes to pay money back to the public treasury. Assessment of user charges for large governmental users with other than sanitary wastes, however, will create a strong incentive to conserve water and reduce waste water flows, thereby reducing treatment and sludge handling costs.

This definition will keep the administrative burden on grantees at a minimum. It does not expand the applicability of ICR payments. It interprets the statute strictly and essentially makes minimal changes in the ICR program until the end of the 18 month moratorium on collection of ICR payments. By that time, the congressionally mandated study of ICR will be complete. The report will address the various options considered by EPA for the industrial user definitions. The Agency will publish as a notice document in the FEDERAL REGISTER the interim recommendations of the report and receive comments before the report is made final and presented to Congress. With the report providing substantive information on ICR systems, Congress can determine whether changes are needed and what they should be.

Two other parts of the industrial user definition in the interim regulations are now promulgated substantially as they were previously published. Industrial users include nongovernmental users that discharge toxic or other pollutants that contaminate sludge, interfere with treatment processes, or create a hazard to people or animals. We added a reference to the contamination of sludge in this part of the definition. Industrial users also include all commercial users of individual systems built with grants under section 201(h) of the Act.

2. Grantees having awarded step 3 grants as of April 25, 1978, but not an approved ICR system, should be allowed to develop an ICR system using either the old or new definition of industrial user.

Several comments expressed the concern that it would be unfair and burdensome to require grantees who already were developing an ICR system under a step 3 grant prior to April 25, 1978, to follow the new definition of industrial users published in the interim regulations on April 25. Accordingly, § 35.928(b) has been revised to allow grantees awarded step 3 grants under regulations promulgated on February 11, 1974, the option to use either the old or new definition of industrial user in developing their ICR system. If the grantee chooses to use the 25,000 gallons per day exemption then it must incorporate all aspects of the new definition of industrial user into the ICR system.

3. The grantee must submit rates to the Regional Administrator in order to obtain approval on an ICR system as specified in § 35.935-15 (b) and (c). These rates cannot be developed until construction is completed, yet under the interim regulations they are required prior to step 3 grant award.

The concern has been raised that grantees would have to develop a speculative rate schedule in order to gain approval for step 3 grants but would then have to develop a more accurate rate schedule when construction is completed and the facilities are placed in operation. EPA has answered this concern by revising the regulation so that grant approval is not contingent upon ICR rate approval.

4. A grantee must calculate ICR on an industry-by-industry basis even if it will implement a systemwide ICR program. The question was raised whether EPA requires a grantee that collects ICR funds systemwide to calculate the revenue which would be received on an industry-by-industry basis for each project within that system.

EPA does not intend for this to be done. EPA wants to insure that the total moneys collected from a systemwide ICR program would neither exceed nor fall short of the funds that would be collected on a project-by-project basis. This does not necessitate an industry-by-industry calculation, nor does EPA require that the rate structure be calculated on a project-by-project basis when a systemwide ICR program is used. We revised § 35.928-1(g) to clarify this misunderstanding.

5. The wording in § 35.928-1(l) concerning inconsistent agreements places the grantee in an untenable legal position because the grantee would renege on existing contracts.

See comment 3 under the user charge system discussion in this preamble.

6. The requirements concerning the use of ICR payments unnecessarily deprive the grantees of flexibility in the use of these payments.

Several comments suggested that the incremental cost of administration should be paid first from ICR revenues before distribution of the remaining funds. EPA has accepted a modified version of this suggestion by revising § 35.928-2(a)(2) to allow grantees to use funds from their 50 percent retained share for the incremental cost of ICR administration before further dividing their 50 percent share to be used for the other purposes specified in the regulation.

7. The requirement that step 1 costs be recovered through ICR is new and unwarranted.

A few commenters urged us to delete the requirement in § 35.928-1(a) that industrial users pay their share of the step 1 grant over the recovery period. This requirement is not new and represents no change in policy. This policy is set forth in Federal guidelines, industrial cost recovery systems (MCD-45). Therefore, EPA disagrees with this comment and will not alter the requirement.

Regulatory sections affected by the ICR amendments are §§ 35.905-6, 35.905-8, 35.928, 35.928-1, 35.928-2, 35.928-3, 35.928-4, and 35.935-15.

USER CHARGES

Section 22 of the 1977 Act amended the user charge requirements in section 204(b) of the FWPCA. This amendment permits grantees to use dedicated ad valorem tax systems for the collection of operation and maintenance costs if a portion of the grantee's ad valorem taxes was dedicated for such use on December 27, 1977, and if the grantee's system results in the distribution of operation and maintenance costs proportionally among user classes. Where an ad valorem tax system is used to collect user charges, users other than residential and small nonresidential users must pay charges based upon actual use.

To implement this amendment we have made the following changes to the regulations promulgated on February 11, 1974:

The definition of user charge in § 35.905 has been revised to include as a user charge that portion of the ad valorem taxes paid by a user for his share of the cost of operation and maintenance.

A new series of sections have been added in § 35.929 which describe the requirements for acceptable user charge systems, whether based on actual use or ad valorem taxes. (Similar requirements in the previous regulations were found in § 35.935-13.) There are no substantial changes to the requirements for user charge systems based on actual use.

The requirements for a user charge system based on ad valorem taxes include five criteria for evaluating an ad valorem tax system to determine if it meets the statutory requirements of being "dedicated" on December 27, 1977.

The regulations require, in accordance with the statute, that operation and maintenance costs be distributed proportionally among the classes of users, even though ad valorem taxes may be used to collect the charge within the residential user and small nonresidential user class. Each member of the industrial and large commercial user class must pay its share of the costs of operation and maintenance based on actual use, but ad valorem taxes may be used to collect all or part of these user charges based on actual use.

In accordance with the statute, the regulations require that each user be notified at least annually of the portion of the ad valorem taxes attributable to wastewater treatment services. The regulations apply this same requirement to user charge systems based on actual use. A grantee which has obtained approval of a user charge system based on actual use may not now substitute a system based on ad valorem taxes.

The grant condition requiring grantee development of a user charge system, a schedule for compliance with the condition, and sanctions for noncompliance continue to be found in § 35.935-13. This section provides that grants awarded under the previously promulgated regulations will continue to be administered under those regulations unless the grantee proceeds to develop a user charge system based on ad valorem taxes under the new law and these regulations. If the grantee does wish to do so, it must demonstrate by July 24, 1978, that its ad valorem tax system was dedicated on December 27, 1977. If it was, any payments being held under the old regulations will be released (in accordance with the legislative history of this provision), but it must complete the user charge system and submit it to the Regional Administrator in time for approval before July 1, 1979. Failure to comply with this requirement will result in cessation of all payments under the grant, possible termination or annulment of the grant, and no new grant awards.

For grants awarded after the effective date of these regulations, grantees must obtain approval of their user charge systems (whether based on actual use or ad valorem taxes) by June 30, 1979, or similar sanctions will apply. After that date, no step 3 grant will be awarded unless the grantee's user charge system has been approved.

The important comments received on the interim regulations and the EPA response are summarized below:

1. The requirement for an annual review of the operation and maintenance charges of a user charge system is too burdensome on the grantee.

EPA agrees with the comments that such a requirement may prove financially, administratively and politically burdensome on grantees. Therefore, we have revised § 35.929-2 to require a biennial review, although we would prefer a more frequent review if possible.

2. The notification requirement of § 35.929-2(f) would impose a very difficult burden on the grantee.

We received several comments criticizing this requirement. One series of comments urged EPA to require notification only through newspapers. This approach would not adequately satisfy the congressional intent that each taxpayer be informed individually of the amount paid for wastewater treatment services. Another series of comments pointed out that a grantee may not have the power to compel tax officials to alter bills as required by this section. EPA agrees and has revised § 35.929-2(f) to permit a grantee, if it so desires, to send out its own notices coincident with the mailing of tax bills by another governmental unit.

3. The wording in §35.929-2(g) concerning inconsistent agreements places the grantee in an untenable legal position because the grantee would renege on existing contracts.

The case law is clear that a grantee's obligation to follow requirements emanating from Federal legislation takes precedence over relevant contractual obligations they may have if the two obligations are inconsistent. This regulation states EPA's previous policy concerning inconsistent agreements which has been applied to all construction grants recipients since promulgation of original user charge and industrial cost recovery regulations on February 11, 1974. The question of whether a grantee would be released from liability for inconsistent contractual obligations is a complex legal issue for which EPA is preparing guidance. In addition, if a grantee is sued under an inconsistent agreement, the grantee may request technical and legal assistance from EPA.

In order to clarify this issue, we have made a minor change in this section. In the phrase "the user charge system shall disregard any terms or conditions," the term "shall disregard" has been replaced with the words "takes precedence over."

4. The schedule requiring the submittal and approval of user charge systems is too burdensome on grantees.

Several comments have been received to the effect that EPA should not make grant awards contingent upon the submittal and approval of user charge systems, and the EPA should extend the deadline past June 30, 1979, for user charge system approval. The legislative history speaks of 1 year after enactment, but EPA has determined that as a practical matter, it is necessary to allow about 1 year after the effective date of the regulations. The June 30, 1979, date also coincides with the end of the 18-month moratorium period for the payment of industrial cost recovery.

5. If public schools are exempt from paying user charges, private schools should also be exempt.

Public schools are exempt if the grantee adopts a user charge system based on ad valorem taxes. Since they are "publicly owned facilities performing local governmental functions" supported almost entirely by general tax revenues, and generally discharge only sanitary wastes, they are distinguish-

V 43 / 188 S E 27 78

able from private schools, which are funded privately, or other public facilities, such as hospitals, which receive part of their income from private users or discharge other than solely domestic wastes. In order to minimize administration of accounting for the user charges due from publicly owned facilities performing local governmental functions, the regulations do not require the grantee to bill itself for user charges.

6. Clarify the submissions required and dates to obtain approval of dedicated ad valorem systems as user charge systems.

All ad valorem systems must have been dedicated on December 27, 1977, in order to be approved. To be considered dedicated, the systems must comply with the criteria in § 35.929-1(b). Grantees fall into three categories. Those with step 3 grants awarded after February 10, 1974, and before April 25, 1978, must have submitted evidence of compliance with the first three criteria in § 35.929-1(b) by July 24, 1978. Subsequently they must meet the remainder of the criteria to obtain approval. The July 24, 1978, deadline only constrains grantees in this category. Grantees with step 3 grants awarded after April 24, 1978, and before July 1, 1979, must submit evidence of compliance with all of the criteria in § 35.929-1(b) in time to obtain approval before July 1, 1979. Grantees with step 3 grants awarded after June 30, 1979, must submit evidence of compliance with all of the criteria in § 35.929-1(b) in order to obtain approval before award of the step 3 grant.

7. The requirements to show that an ad valorem system is dedicated are redundant and overly complex.

EPA disagrees with this comment. These criteria are distinct and are the minimum needed to demonstrate that an ad valorem system is dedicated. No commenter has put forth recommendations on how these criteria could be stated more clearly.

Regulatory sections affected by the user charge amendments are §§ 35.905-26, 35.929, 35.929-1, 35.929-2, 35.929-3, and 35.935-13.

Requirements for American Materials (Buy American)

Section 39 of the 1977 Act amended the FWPCA by adding a new section 215 which provides that no grant (interpreted to mean step 3 grant) for which application is received by the Regional Administrator after February 1, 1978, shall be made unless preference is given to the use of domestic construction materials in the construction of the wastewater treatment works.

A new paragraph (d) is being added to § 35.936-13 (specifications) which requires that bidding documents and construction contracts for affected projects include a Buy America provision which requires use of domestic construction material in preference to foreign construction material. (Definitions of these terms are provided.) The regulations also establish those circumstances under which the Agency may waive the provision. Domestic construction material may be given preference if the domestic material is priced no more than 6 percent higher than the bid or offered price of foreign materials. In determining whether to waive the Buy American provision, the Regional Administrator will generally use the "protest" procedures of § 35.939.

Appendix C-2 to subpart E is also amended by adding a new clause which implements the Buy American provision in construction contracts.

Comments received on the Buy American provision indicate that the final regulations for this requirement should be the same as the interim regulations published on April 25, 1978. These regulations follow the regulations of the Buy American Act of 1933 which EPA was instructed by the Congress to observe where applicable. They have the advantage of being relatively simple. Some commenters wished for additional guidance on the application of this provision. Appropriate procedures of other Federal agencies will serve to fulfill this need until initial experience provides the basis for specific EPA guidance. Some commenters suggested that a separate protest procedure for those adversely affected should be adopted; however, the designated protest procedures will resolve Buy American and other issues more expeditiously than other remedies or procedures that are available. Some commenters suggested inclusion of additional preference requirements which are contained in the Buy American provisions of some direct procurement agencies. However, most such provisions have a statutory basis other than the Buy American Act of 1933. Since EPA's statutory authority is limited to Buy American, inclusion of these provisions would not be appropriate, especially since the EPA program is a grant rather than direct procurement program. Regulatory changes on Buy American use are made in §§ 35.936-13, 35-938-9, 35-939(j) and appendix C-2, clause 17.

Local Assistance

The 1977 Act authorizes EPA to provide technical and legal assistance to grantees in the enforcement and administration of grantees' contracts related to EPA-funded wastewater treatment works.

Several commenters suggested that EPA could intervene in civil actions involving a grantee's contracts only when requested by the grantee. We have revised the regulatory language in § 35.970 to track more closely the statutory language of section 203(e) so that both assistance and intervention under this section occur only at the grantee's request. While this may be true for most civil actions which arise involving contracts in connection with federally assisted treatment works, EPA has existing authority through the U.S. Department of Justice to intervene on behalf of the Federal Government in civil actions when a Federal question arises. In revising the language we have also deleted from the regulation reference to the requirement for the Office of General Counsel's concurrence in EPA's intervention in civil actions since this involves internal EPA procedures and would occur in the normal course of events.

Two States suggested that the provision of legal assistance as well as technical assistance should be delegable to States under State management assistance grants. To the extent such assistance is for the administration of contractual matters, this is correct and the regulation has been revised to reflect this change. However, in accordance with section 205(g) of the Act, State management assistance grants are limited to administrative functions and do not extend to areas of contract enforcement or intervention in civil actions involving such contracts. Further, while States may be empowered to provide legal assistance to municipalities, to the extent that such assistance would involve representation in the Federal Court, only the U.S. Department of Justice is authorized to represent the Federal interests in such proceedings.

Questions were raised regarding the provision of assistance under this authority to grantees with projects funded prior to the implementation of this provision. The statute and legislative history of the provision do not set time limits on it. Accordingly, such assistance will be provided whenever considered appropriate to accomplish the intent of the Act without regard to the date of grant award.

The suggestion was made that funds spent as a result of this authority should be deducted from the construction grants allotments of the State in which the grantee is located and that a contractor should be reimbursed by EPA for costs incurred in resolving a dispute if the matter is resolved in the contractor's favor. Assistance and intervention under this authority will normally be provided by Federal personnel and as such will be funded out of operating budgets. To the extent that States would provide contract assistance under State management assistance grants, those funds would come from the State management assistance grants which are deducted from the State allotment. EPA does not have the authority to reimburse contractors for their costs of conducting successful litigation of contract disputes with grantees even if EPA is involved in the dispute.

One commenter suggested that the reference in the regulation permitting oral requests for assistance under this authority in emergency situations is unnecessary. It is our position that since written requests for assistance were mentioned in the regulation as the proper means of requesting assistance, it is also appropriate to mention that oral requests will be accepted on an emergency basis.

Regulatory changes on contract enforcement have been made in §§ 35.936-5, 35.936-8 and by adding a new § 35.970.

Training Grants

Section 10 of the 1977 Act amends section 109(b) of the FWPCA to increase the flexibility in the expenditure of grant funds for wastewater treatment works operation and maintenance training. It also increases the authorization for such grants from $250,000 to $500,000. Under the provision, the Administrator may exempt such grants from the priority list requirement of section 204(a)(3) of the FWPCA. Agency guidance for application and implementation of subsection 109(b) of the 1977 Act, will be distributed to EPA Regional Administrators and will be available for State use.

Changes to the regulations implementing this amendment are made in §§ 35.915(a), 35.920(e), and 35.930-1(b).

Miscellaneous Comments

The Agency has also received comments and questions on topics not covered by the categories dealt with above. One organization asked that nonprofit agencies be eligible as 201 grantees in rural areas which might otherwise be neglected by a public entity. Two sections of the Act preclude such an approach. Section 201(g)(1) provides for grants to States, municipalities or intermunicipal or interstate agencies. Section 204(b)(1)(C) requires that a grantee have certain "legal, institutional, managerial, and financial" capabilities. Without a change in the law, the Agency cannot make grants for 201 projects to nonprofit agencies.

A similar response must be made to those who suggested that the Federal share of all 201 projects be increased to 85 percent or even 100 percent. Sections 202(a)(1) and 202(a)(2) specify a Federal share of 75 percent for conventional projects and 85 percent for eligible innovative and alternative projects.

The Urban Environment Conference asked that these regulations be aligned with the work of the Agency's Task Force on Minority Business Enterprise. The task force has made policy recommendations which will apply to Agency grant programs. These recommendations will be published for comment and any decisions made thereafter will apply to the 201 program. Inclusion of task force findings would be premature at this juncture. The Urban Environment Conference also asked that 201 regulations provide for the health and safety of workers during the construction and operation of a sewage treatment plant. While the well-being of such workers is of great concern to the Agency, the promulgation and enforcement of worker safety standards is the province of the Occupational Safety and Health Administration (OSHA). The Agency is not in a position to review or enforce OSHA regulations.

The New Jersey Department of the Public Advocate called on the Agency to include a fair housing review as a component of the 201 process and to insure that population projections are not based on potentially exclusionary zoning but instead include allocations for low and moderate income housing. The Agency is sensitive to its fair housing obligations and does not want communities to use 201 policy as an excuse to perpetuate discriminatory practices. Yet, there are forceful reasons why a 201 facility plan should not become an overall community development plan. The delay inherent in the many local issues that might be thus injected would make the goals set by the Act impossible to achieve. The Agency does have guidance insuring construction grants program compliance with title VI of the Civil Rights Act of 1964. The Agency is also considering additional administrative measures to enhance compliance with title VI.

As for the use of population projections that may not include an allocation for low and moderate income housing or may be based on exclusionary zoning, it should be noted that the population projection approach outlined in the cost-effectiveness analysis guidelines is a joint Federal/State/local venture. State population figures are determined on the Federal level to insure national consistency. These figures are then broken down by State and local agencies. During this disaggregation process, local problems and trade-offs can be considered in some detail when determining population figures for a given community or region. State and local governments are in a far better position than EPA to determine the appropriate disaggregation methodologies. Consistent, overall State totals which provide for some flexibility best serve the water quality objectives mandated by the Act by avoiding plant overdesign and by spreading resources to as many eligible communities as possible.

The National Marine Fisheries Service asked that these regulations prohibit the filling of wetlands and provide for consultation with the Departments of Commerce and Interior if wetlands will be disturbed by a 201 project. Regulations for the construction grants program refer to environmental requirements in general terms because so many laws and executive orders dealing with special environmental matters apply to the program. It should be noted that Executive Order 11990, relating to wetland protection, is explicitly mentioned and followed in general EPA grant regulations published as final rules in the Federal Register on June 30, 1978 (40 CFR 30.410-5 as found on 43 FR 28486). EPA recently issued a statement of procedures defining policy for use in assessing the impacts of Agency actions on floodplains and wetlands. The construction grants program will issue its own program guidance to supplement the Agency procedures. It will also implement the requirements on wetlands that are expected to be included in the upcoming revision of 40 CFR Part 6, Preparation of Environmental Impact Statements.

Finally, it was suggested that these regulations require preparation of an economic impact analysis statement under Executive Order 12044. The Agency believes that the promulgation of these regulations does not impose economic costs large enough to necessitate such an economic impact analysis.

Technical Amendments

Technical amendments to the construction grants regulations were proposed in the June 2, 1978, issue of the Federal Register. The purpose of the technical amendments is to make, in conjunction with the final promulgation of Clean Water Act changes, other changes which are necessary to ease administration of and participation in the construction grants program. These changes include changes based upon operating experience as reflected in program requirements memoranda; changes based upon deviations from the current regulations which have been issued by the Director, Grants Administration Division; changes that correct operational problems or which appear to be administratively desirable; and changes which simplify the language and readability of the regulations.

The discussion of the major changes and the public comments which were received are presented below. We do not discuss provisions on which no

V 4 3 / 1 8 8
S E 2 7 7 8

comments were received or which remain as proposed. Nor do we discuss a number of comments of less widespread interest. A fuller discussion of all sections that were proposed and other comments can be obtained by writing to Michael B. Cook at the address listed above. This complete discussion will be mailed to all those who commented on the technical amendments.

§ 35.900. This section is promulgated substantially as proposed. A new paragragh (c) has been added to advise people of the availability of technical and guidance publications.

§ 35.901. For the reasons for the addition of this new section, see the discussion below under § 35.935-1.

§ 35.903. The second sentence of paragraph (j) is being revised to clarify which costs should be claimed in the initial request for payment. This section is promulgated substantially as proposed.

Reimbursement and "grandfathered" planning phase-out (the former § 35.905-4, and §§ 35.917, 35.925-18). Revisions to these three sections were proposed to provide for two related, new transition rules.

First, we proposed an orderly phasing out of projects previously allowed to proceed, subject to reimbursement through grant award at a later date. (See § 35.925-18.) Under the present rule, most projects do not receive such reimbursement. The proposed rule would have required those projects presently entitled to reimbursement to obtain the reimbursement through grant award by March 31, 1979, or March 31, 1980, in some cases, or be barred from obtaining the reimbursement. This change is based upon a major program change made by the 1972 amendments to the Act; while section 8 of the prior Federal Water Pollution Control Act (FWPCA) permitted funding on either a reimbursable or concurrent basis, the 1972 Amendments limited the Agency's reimbursement authority to that reimbursement authorized by section 206 of the Act.

Second, we proposed phasing out the "grandfather" provision for planning performed before the enunciation of the new statutory requirements and implementing administrative procedures now applicable to facility planning. (See § 35.917.) Under the previous rule, facility planning determined by the Regional Administrator to have been initiated before May 1, 1974, is required to comply with those facility planning requirements determined appropriate by the Regional Administrator. The proposed rule would require compliance with all the facility planning requirements before award of any step 2 or step 3 grant. There was an extension until April 1, 1979, provided for planning initiated before May 1, 1974. When the subpart first detailed facility planning requirements in 1974, the Agency did not wish to require substantial revision or abandonment of prior planning efforts, particularly since that would have entailed a dramatic slowdown in grants for necessary projects and the possible loss of funds by States through the reallotment process. The Agency now desires all grantees to achieve compliance with the administrative requirements which assure attainment of the statutory objectives. Since facility planning requirements are now more thoroughly understood and procedures streamlined, this phaseout should result in minimal delay to projects, particularly if States and municipalities take the necessary steps soon to assure funding for previously planned projects.

About 15 comments were received on this proposal. Several comments expressed support for the phasing out of the planning and reimbursement transition.

The major comments received concerned the short-time period between final promulgation of these regulations and the effective dates of the phaseout, proposed as March 31, 1979 and 1980. The major obstacle to meeting the original dates was the fact that State priorty lists for fiscal year 1979 are already complete. In States which do not utilize a reserve for step 1 or step 2 assistance, this could pose a significant problem. Also, in some cases, locally financed step 2 work is awaiting completion of facility planning. Therefore, we have decided to extend each of the proposed dates by 1 year.

In other cases, where extenuating circumstances (such as preparation of an environmental impact statement which is underway) prevent award of grant assistance by the deadline, deviation requests will be considered. In most cases, however, it is of overriding importance to bring in and complete any step 1 work still underway, so that projects necessary to meet enforceable requirements of the Act can proceed through steps 2 and 3 in a manner consistent with the requirements of titles III and IV of the Act. States should utilize the step 1/step 2 reserve to fund facility planning and design already underway where projects would not obtain priority for step 3 under the approved project priority system.

§ 35.905. This section contains the definitions of terms applicable to this subpart. Formerly, each defined term had its own section number. However, this made insertion of new definitions in alphabetical order difficult, since it necessitated renumbering the other definitions and correcting cross references. Therefore, in accordance with guidance issued by the Office of the Federal Register, the section designations have been deleted. All definitions will continue to be shown in § 35.905, with the defined term in italics. All cross-references to definitions will refer to § 35.905.

§ 35.905, definition of "ad valorem tax." Although we did not propose the addition of this definition, it is appropriate to add it given its importance in the user charge provisions.

§ 35.905, definition of "construction." This proposed amendment deletes from the definition of "initiation of construction" the different definitions which were applicable for work initiated prior to November 1, 1974.

Several commenters questioned the new definition of initiation of step 1 work, i.e., the approval of a plan of study, since that action usually takes place at the same time as step 1 award and they felt that the more common action (the grant award) should be used as the definition. It is true that the award of step 1 assistance denotes approval of the plan of study in most cases; however, there are situations where step 1 work is begun by grantees following approval of the plan of study accompanied by the reservation of funds as authorized in § 35.925-18(a)(1). We would not want to omit this circumstance from the definition, thereby making ineligible some step 1 work of these grantees. Since step 1 grant awards should never take place prior to approval of a plan of study, and since it usually is the same thing, we have retained the defintion we proposed.

Two questions were raised about the problems created in the transition before April 1, 1981, by the new definitions of initiation of step 1 and step 2 work. This section is one of the provisions where the old definition will continue to apply to phaseout situations until the transition is completed before April 1, 1981. Until then, assistance will be awarded to the transition projects under the old definition. Paragraph B.1. of appendix D will be applied to new grant awards for the transition projects under the old definition.

§ 35.905, definition of "municipality." The Agency proposed a clarification of the definition of "municipality" in this section because the current definition of the term has raised several questions regarding the eligibility of special districts for funding under this program. This revision clarifies the Agency's position by expanding the description of the types of special districts which are and are not eligible. Several comments questioned the definition as it relates to eligibility of State agencies for grants. The definition of municipality does not affect the eligibility of State agencies. States and their agencies are eligible in their own right (see § 35.920-1).

In reviewing the comments which were received on this section, we concluded that paragraphs (b)(2) and (b)(3) were redundant. Therefore, we have deleted paragraph (b)(2). The key difference between an eligible and ineligible district is whether the district provides services to the surrounding community or only for itself. If it does not serve the surrounding community, even a special district which has wastewater treatment facilities before passage of the 1972 amendments is not grant eligible.

§ 35.910-2. Paragraph (c) of this section was revised on January 10, 1978. That revision inadvertently did not distinguish between funds deobligated during their initial allotment period and funds deobligated after their reallotment date. Historically, in this program, funds deobligated prior to their reallotment date are treated as are all other funds from that allotment (i.e., they are subject to reallotment if not reobligated), and the regulation need not deal with those funds. However, we treat other deobligated funds as section 205(b)(2) of the statute requires for funds "released by the payment of the final voucher for the project." We have revised paragraph (c) to describe how to treat these deobligations.

However, it has been brought to our attention that this statutory requirement may create accounting difficulties when funds which originated in one allotment are subsequently treated as a later allotment. For this reason, we intend to examine this procedure in depth during the next several months in order to determine what changes, if any, to the regulations or statute might be desirable. Individuals (particularly States) wishing to submit their views for this study are invited to do so by sending them to: Mr. Harold P. Cahill, Jr., Director, Municipal Construction Division (WH 547), EPA, 401 M Street SW., Washington, D.C. 20460.

§ 35.912. We have made textual changes to agree with the new program thrust of State management assistance grants and the delegation of § 35.913 (which was done with the promulgation of the interim subpart F on April 25).

35.917. One commenter questioned the revision of the final sentence in paragraph (b), which in effect defines "cost-effective" as the "most economical • • • recognizing environmental and social considerations." We do not believe the word "economical," when modified by the reference to environmental and social considerations, will mislead the public to think that the "cheapest" solution is desired. We believe that the revision of this sentence as proposed is better than the former regulation in briefly explaining what cost-effective means. Therefore, we have retained the language proposed but have added a cross-reference to appendix A to ease further interpretation.

Questions were raised about the meaning of paragraph (e) relating to water quality management and outputs. One commenter argued that we should not withhold construction grants because the State fails to produce water quality management outputs. It was argued that the provision ignores typical State/local relationships and further that the unavailability of State outputs and case-by-case determinations would delay the program. Section 208(d) of the Act requires EPA to insure that treatment works conform to approved areawide plans. The revised paragraph (e) specifies the facility-related information that must be available and used in planning treatment works. Coordination of the two programs, as mandated by the Act, will induce coordinated State and local action that will produce a better overall water quality effort.

We have deleted the old paragraph (f) which references the Agency's facility planning guidance. The new paragraph § 35.900(c) makes appropriate reference to the availability of all Agency construction grants guidance.

§ 35.917-1. The revision to paragraph (d) is to clarify the language and to add a reference to appendix A in which the cost-effectiveness guidelines are found. The revision to paragraph (d)(2) adds mention of nonstructural methods (see discussion in appendix A, cost-effectiveness analysis guidelines).

The part of paragraph (d)(5) dealing with best practicable waste treatment technology (BPWTT) has been moved into paragraph (d)(4) to better clarify the relationship between applicable effluent limitations and BPWTT. The previous reference in (d)(4) to not less than secondary treatment, although technically correct, is out-of-date in light of current BPWTT requirements.

In paragraph (e), we have eliminated the requirement for submission of the NPDES permit. A commenter suggested that this be done in accordance with our proposal to eliminate the permit submission requirement from § 35.925-6. The permit number must be provided.

Paragraph (g) has been revised to require a summary of public participation in the development of the facility plan. The previous regulation required a summary of meetings. Since public participation may be achieved through means other than meetings or hearings, particularly in accordance with the proposed new requirements in part 25, this revision is appropriate.

A new paragraph (l) incorporates the requirement for inclusion of total project costs and estimated charges to customers in the facility plan. This requirement was established in program requirements memorandum 76-3 (August 16, 1976).

We have added a new paragraph (m), based upon public comments received on § 35.920-3. The new paragraph requires a statement as to the availability and estimated costs of the proposed site(s). See additional discussion under § 35.920-3.

Some commenters also questioned the effective date of the revised facility planning requirements in this section. The effective date this section is October 1, 1978. Step 1 grants awarded after September 30, 1978, or facility planning initiated after September 30 without Federal grant assistance, are required to comply with these regulations. Note the relationship of the transition provisions to the effective dates; no step 2 grant will be awarded after March 31, 1980, if the facility planning does not comply with current requirements.

§ 35.917-3. In the interest of brevity, we have deleted paragraph (a) from this section. That paragraph was redundant with other provisions of the regulations. No change in substantive requirements is intended. In paragraph (a), we have added the statutory requirement that, after a waste treatment management agency has been designated for an area, only the designated agency may receive grants. Further mention of this requirement is also in § 35.925-2.

Several commenters felt that 208 planning agencies should be eligible to receive step 1 grants. This section allows only agencies which are eligible to receive step 2 and 3 grants to receive step 1 grants. We did not propose to change this provision. We note that where 208 agencies are the most qualified to conduct all or any part of step 1 planning, a qualified management agency may be the grantee and may pass the funds through to the 208 agency via an interagency agreement to do necessary planning.

Several commenters raised questions relating primarily to the process for designation of a management agency or agencies under the statute. The water quality management regulations are being revised and were proposed in the FEDERAL REGISTER on September 12, 1978 (43 FR 40742). Those regulations provide for designation of management agencies.

§ 35.920-3. Although we did not propose changes to paragraph (a), we have included in paragraph (a)(1)(iii), reference to the public participation program. Though the shape of the new program is not yet finalized, it is appropriate to request grantees to describe their intended program in the

V 4 3 / 1 8 8
SE 27 78

step 1 application, whether the new or old requirements are applicable.

Paragraph (b) has been rewritten to improve style, to correct references, and to add references to the existing requirements for intermunicipal agreements, allocation of costs to Federal facilities, project schedules, and sewer use ordinances. Experience has shown there are inordinate program delays unless intermunicipal agreements are obtained prior to the award of grant assistance. Inclusion of these references here will simplify compliance for grantees.

Several questions were raised concerning the requirement for a statement as to the availability of the proposed site (paragraph (a)(2)). A few commenters pointed out that a vague statement of availability is not sufficient, particularly in the case of land treatment projects where the feasibility and cost-effectiveness of the entire project may depend upon the firm availability of a particular site. On the other hand, it would not be appropriate, in most cases, to require fee simple interest at the step 2 stage, since most municipalities finance the purchase through bond proceeds which are generally not available until after step 3 award. Therefore, we have revised this paragraph to require "adequate information regarding the availability of the proposed site(s)." Regional offices and States are expected to use their judgment in determining what constitutes adequate information in the particular circumstances. The facility planning requirements have also been amended to require a statement of availability and cost of the site(s) (see § 35.917-1(m)).

Commenters raised several questions concerning the requirement for submission of proposed intermunicipal agreements at the step 2 application stage (paragraph (b)(6)). They desired to know the degree of certainty which would be required at this point. The degree of finality which is required in any particular case cannot be described with certainty in a regulation broadly applicable to all cases. We would expect, however, the proposed agreement which is submitted to represent more than just the proposal of the grantee municipality; it should represent the product of discussions between the parties concerned, even if the agreement is not yet ready to be signed. In particular cases, where there are doubts regarding the participation of municipalities in the project, the regional office may find it necessary to request more definitive arrangements. Therefore, the requirement has been worded to say, "proposed or executed (as determined appropriate by the Regional Administrator) * * *."

§ 35.925-7. Although no revisions to paragraph (e) were proposed, it has been revised to delete reference to a date which has passed and to emphasize the current requirements for BPWTT and reuse/recycle technology.

§ 35.925-8. The addition of paragraph (b) is intended to enforce decisions reached in the environmental review process, consistent with program requirements memorandum 75-26 (formerly program guidance memorandum 50, June 6, 1975).

A commenter on this section suggested EPA's denial or conditioning of award on compliance with environmental assessment conditions addressing secondary impacts is an inappropriate entry of EPA into land use and growth control. The commenter recommended that the program requirements memorandum issued in 1975 on this subject be rescinded as well. EPA is required by the National Environmental Policy Act to consider secondary impacts of its construction grants projects and we, therefore, could not accommodate his suggestion.

§ 35.925-12. See discussion under § 35.935-3, below.

§ 35.925-15. The revision of the first sentence clarifies the current regulation by making it clear that sewer projects which are solely for the purpose of handling industrial wastes are ineligible. This would affect, for example, a project to extend an interceptor solely to an industrial park, with no transport of domestic wastes along the way. We believe this is consistent with congressional policy to encourage joint treatment, since in the absence of domestic waste there is not a joint aspect to the project.

The several commenters on this section felt, for the most part, that single purpose, or almost single purpose, projects should be permitted to proceed.

Some suggested deletion of the words "almost exclusively" as being too vague. We have found other expressions unsatisfactory. We would not consider an interceptor which serves a large industrial park, but happens to pick up domestic wastes from one residence on its route, to thereby lose its industrial purpose and become eligible for the Federal grant. Therefore, we believe the term "almost exclusively" connotes limited but appropriate discretion for the Regional Administrator necessary to determine eligibility under the program.

The definition of "waste treatment system" has been deleted from this section because the phrase, "complete waste treatment system" is defined in § 35.905.

The references to the pretreatment regulations in the final sentence have been corrected. Part 403 contains the Agency's new pretreatment regulation published in the FEDERAL REGISTER on June 26, 1978 (43 FR 27736). § 35.907 is promulgated in this package.

§ 35.925-16. This section deals with costs allocable to Federal facilities. We deleted a proposed parenthetical expression referring to such facilities in the District of Columbia and other jurisdictions receiving direct congressional appropriations. The reference would create administrative difficulties that we prefer to handle through the grant deviation process. Otherwise, this section is promulgated substantially as proposed.

§ 35.925-18. Significant revisions have been made in paragraph (a) of this section relating to the phaseout of authority for reimbursement. See the discussion of this under the heading reimbursement and "grandfathered" planning phaseout, above.

We made three changes to paragraph (b). We have added a reference to engineering costs associated with advance acquisition or advance construction to clarify such costs as allowable when prior approval has been obtained. We have added the cost of acquisition of an option for the purchase of eligible land to the advanced work which may be approved. We have further clarified this paragraph so the Regional Administrator may not approve such advance step 3 work unless an environmental review has been completed.

Several commenters indicated their approval of the clarification of eligible items in paragraph (b). One commenter, however, questioned the necessity for the completion of an environmental review before the Regional Administrator may authorize advance expenditures. We are advised by counsel that the Regional Administrator's authorization is a major Federal action requiring completion of a review (either negative declaration or environmental impact statement) under the National Environmental Policy Act. However, grantees should be aware the environmental review can be narrowed down to a particular item in cases where there is no controversy over the particular item and the item is common to all alternatives.

§ 35.926. Although no changes were proposed to this section, we revised paragraph (a) and § 35.920-3 to require a value engineering commitment, rather than proposal, with the step 2 application. The actual value engineering proposal would be submitted during step 2. The requirement for a full proposal at the application stage was inappropriate.

§§ 35.927 et seq. In §§ 35.927, 35.927-1, 35.927-2, and 35.927-3 several changes were proposed to update the regulations in accordance with current program policy. EPA has deleted the specific content of the infiltration/inflow (I/I) analysis. Program requirements

memorandum 78-10, issued on March 17, 1978, established some new options to the traditional method of I/I analysis in this program. The remainder of the changes proposed in these sections complement that memorandum by providing more flexibility.

Several questions were raised about the proposed language of § 35.927(b)(3) which appeared to require the actual rehabilitation to take place during the sewer system evaluation survey, thereby establishing with certainty the amount of nonremovable I/I. We did not intend this and have revised the language of that sentence to reference only the program for rehabilitation as part of the sewer system survey.

One commenter requested the rationale for the deletion of the phrase, "in each sewer system tributary" in § 35.927-1(a), indicating that the revision implied that only the sewer system owned by an entity is subject to I/I analysis. If the analysis for nonowned systems was not conducted, the utility of the analysis which was conducted would be distorted. We deleted this phrase to eliminate the inference that each minor tributary must be analyzed separately to determine if it, individually, was subject to excessive I/I. Even if more than one jurisdiction is involved, all parts of the system are subject to some sort of analysis. The language has been retained as proposed.

The language of § 35.927-2(a) as proposed included a typographical error which inadvertently deleted the requirement for a comparison of the cost of transportation versus the cost of rehabilitation and treatment for each I/I source. We have corrected this language.

Section 35.927-3(a) has been further revised to indicate minor rehabilitation can be accomplished in any step under a grant (not just step 1) and rehabilitation work under $10,000 (small purchase) is not subject to the requirement for formal advertising. We have also revised § 35.936-14, relating to force account work, to include the requirement for the Regional Administrator's approval of force account work for sewer rehabilitation during step 1 and step 2, not just for step 3.

Two commenters questioned the policy of EPA which prohibits funding of sewer system rehabilitation beyond the "Y" fittings which convey wastewater from individual structures or private property. They suggested we consider as eligible all sewer rehabilitation costs for any part of a line lying in a public easement. EPA considers eligible for new construction only those parts of the line up to and including the "Y" fittings. Therefore, in accordance with the definition of sewage collection system in § 35.905-19, EPA cannot fund rehabilitation work beyond the "Y" fittings. However, the municipality's costs of treating the pipe beyond the "Y" fittings up to the point which the municipality must fund may be calculated on an incremental, rather than proportional, basis. A new paragraph (c) has been added to § 35.927-3 to clarify this point.

§ 35.930-4. No changes were proposed to this section. However, in the final regulation, we have deleted reference to the requirement for BPWTT, secondary treatment, and effluent limitations, because those requirements are adequately covered in §§ 35.917-1 and 35.925-7.

§ 35.935-1. EPA proposed to create new paragraphs (a) and (b) to describe the grantee's responsibilities under these grants.

Paragraph (a) states EPA's position that EPA review and approval of project plans and specifications, under section 203 of the Act, does not relieve the grantee of its responsibilities for the design, construction, or use of the treatment works.

Paragraph (b) provides an explicit basis for seeking specific performance or recoupment of funds from the grantee, if the grantee fails to make good faith efforts to meet its obligations under the grant.

Several comments on paragraphs (a) and (b) demonstrated to us the need to explicitly set forth the Agency's policy assumptions underlying the establishment of paragraphs (a) and (b). These basic assumptions are set forth in new § 35.901, and paragraphs (a) and (b) are promulgated as proposed.

§ 35.935-3. We proposed to add a new § 35.935-21 (now renumbered § 35.935-3) because there has been some misunderstanding of the applicability of the real property acquisition regulations in part 4 of title 40 to this program. Questions have also been raised about other property requirements. The addition of this section does not add any new requirements; rather, it clarifies those which have been in effect and summarizes them in one place. The provisions in the 1977 amendments relating to land treatment and eligibility for land purchases make this more important.

One commenter suggested the requirement in paragraph (b)(1) that any acquisition be conducted in accordance with 40 CFR part 4 (and hence, the Uniform Relocation Assistance and Real Property Acquisition Policies Act) represents unnecessary Federal involvment in local affairs. He felt that where displacement is not involved, procedures to acquire noneligible land should be locally determined, and EPA should require only satisfactory evidence of sufficient interest in the site prior to award. However, the Uniform Relocation and Real Property Acquisition Policies Act requires EPA to apply title III of that Act to the acquisition of any interest in real property (even easements) to be used for a federally assisted project. Therefore, EPA has no discretion in this matter and must apply the current statute.

§ 35.935-9. The revision of this section was intended to clarify EPA requirements for prompt initiation of project work and to integrate the grant requirements more closely with the NPDES permit program. The text was broken into the three paragraphs for ease of use.

The revision of paragraph (a) clarifies the term "project" to mean step 1, 2 or 3. The new second sentence applies the same sanctions to all three steps. Several commenters suggested the final sentence of (a) be revised to address completion, as well as initiation, of construction. This has been done. Reference to "any project schedule" has been revised in the final regulation to refer to "the project progress schedule."

Paragraph (b) explains the grantee's obligations under the NPDES permit program as they related to actions the grantee takes under the grant program. We received several comments on the relationship between grant dates and NPDES permit dates. One commenter suggested that grant dates rather than permit dates be the governing dates and that all other schedules requirements be secondary and subservient to grant dates. Another commenter noted the present permit regulations allow such a "floating" date mechanism to be employed by EPA and NPDES States. Since the intent of the Agency is to improve the extent of municipal compliance with NPDES permit requirements, it will be necessary to use selected, fixed dates in most municipal permits in order to ensure enforceability in the event of recalcitrance by grantees with permit deficiencies. EPA is presently drafting a policy which delineates new operating procedures designed to implement this permit/grant approach. Consequently, no change has been made to the revision as proposed.

Paragraph (c) contains the same termination requirement as the former regulation, but includes the items which the Regional Administrator must consider in making his determination. This paragraph also clarifies EPA's expectations as to the time by which invitations for bids should be issued.

We received several comments on this paragraph. One commenter objected to the statement that invitations for bids are expected to be issued within 90 to 120 days after award, because sometimes grantees postpone

V 43 / 188
SE 27 78

work because of too great a demend on the construction industry in a particular area. The section provides that issuance of the invitation for bids (not contract award) should occur within 90 to 120 days after award. The use of the term "should" indicates that those dates are not mandatory. However, initiation of construction on all significant elements of project work within 12 months is mandatory.

Some commenters raised questions as to the definitions of "all significant elements" and "initiation of step 3 construction." "All significant elements" is not defined because we have concluded that it is necessary to leave this to the Regional Administrator to decide on a case-by-case basis. What is essential is that work be progressing speedily toward completion of construction. The term "initiation of construction" is defined in § 35.905. For step 3, it means issuance of a notice to proceed under a construction contract for any segment of step 3 work or if notice to proceed is not required, execution of the construction contract. That definition is applicable here, except, under the terms of this section, we expect initiation of all significant elements within one year.

Two comments on paragraph (c) urged changes to give the Regional Administrator more flexibility in termination of grants. Where flexibility beyond the 6 months extension is required, for good cause, the "deviation" process (see 40 CFR 30.1000 et seq.) should be used. This will insure that the termination requirement is consistent nationwide. Where good cause has existed in the past for exceptions to the termination requirement, deviations have been granted.

§ 35.935-12. This section has been restructured in list form for clarity. Reference has been made to the NPDES permit program to indicate the relationship with that program. New paragraphs (d) and (e) implement in the regulation the class deviation which was in effect since August 24, 1977, with respect to the operation and maintenance manual payment limitations as applied to segmented projects and multiple facility projects.

Several commenters requested a provision for waiver of the 90 percent payment holding provision for good cause or where the operation and maintenance manual cannot be completed until experience during initial operation has been achieved. EPA recognizes (see program requirements memorandum 77-2) that final revisions to the O&M manual will be made after the initial start-up period. However, a manual which is satisfactory for the purpose of beginning start-up should be available for approval prior to completion of construction. If there are other "good causes" which would reasonably delay submission and approval of the manual, the deviation process must be used. EPA carefully reviews all deviations requests to insure that the situation truly justifies a waiver of the regulation. A new paragraph (b)(7) has been added to this section which provides that the plan of operation must include an operation and maintenance program for the sewer system. This requirement is in program requirements memorandum 78-10 and is included here for consistency and clarification. Existing written manuals, policy or guidance will suffice if they are adequate to meet current EPA requirements.

§ 35.935-16. This section is promulgated as proposed. Paragraphs (c) and (d) implement in the regulation the class deviation which has been in effect since August 24, 1977, with respect to the sewer use ordinance payment limitations as applied to segmented projects and multiple facility projects.

§ 35.936-13. No changes were proposed to this section. However, some changes have been made on advice of the Office of General Counsel.

In paragraph (a)(1), an addition has been made to require identification of the "salient requirements" of items of equipment when the grantee elects to procure by the two brand (or trade) names or equal procedure. In direct Federal procurement, salient requirements must be included in the specification itself. We feel that the mandatory reference to two items itself substantially identifies the salient requirements reflected in both and that while Federal rule reflects the best practice, it would be unnecessarily burdensome to grantees. However, the EPA grantee must be prepared to identify the salient requirements when an "or equal" issue arises under EPA program review or in a bid protest.

In paragraph (b), we are adding a provision relating to sole source procurement for innovative technology. See the discussion of this subject above under innovative and alternative technology. We have also added a cross-reference to § 33.500 et seq., for the applicable procedures to be followed when sole source procurement is used.

Minor revisions have been made to paragraph (c) to reflect experience obtained in program reviews, protests, and in litigation relating to grantee "experience" requirements, including bonds.

In conjunction with the final promulgation of this section, we are also proposing two additional changes for comment. The last sentence of paragraph (a)(1) relates to manufactured materials, such as pipe. The current regulation provides that if a single material is specified, the grantee must be prepared to justify this selection of only one type of material.

However, agency program reviews and determinations of protests under § 35.939 indicate that the application of this rule has not corresponded sufficiently with the basic requirement for competition (see § 35.936-3). Program requirements memorandum 75-5 (formerly PG 19A, August 8, 1975) states the interrelationship of these policies as follows:

"With regard to materials, such as pipe, it is not mandatory that two or more different types of material be specified; however, maximum competitive bidding is encouraged commensurate with sound engineering practice and requirements. * * * It is preferable to use performance specifications for materials based upon accepted nationally known standards such as AWWA, USAS, ASTM, AASHO and Federal specifications and standards."

Consideration is being given to amendment of the regulation to better achieve competition within and between types of material (particularly pipe), in the interest of affording an opportunity to compete and insuring reasonableness of prices, unless there is a sound engineering justificaton based upon specific site conditions which supports any restrictions upon competition.

In paragraph (c) we propose to add as a new final sentence the following: "No experience restriction will be permitted which unjustifiably reduces competition or innovation." This is in effect the rule which has been developed in protests decided under § 35.939. We invite public comment on this proposed addition.

We invite public comment on these two proposed changes. Comments should be addressed to the Director, Grants Administration Division, at the address given above. The deadline for receipt of comments on these issues is November 30, 1978.

§ 35.936-20. Paragraph (c) of this section was proposed to be amended to clarify that costs incurred by the grantee in complying with § 35.937-6 are allowable, even when incurred prior to award. One commenter suggested EPA should be equally explicit regarding the grantee's costs of carrying out protest procedures required by § 35.939. The paragraph has been further amended to do this.

§ 35.936-22. Bonding and insurance requirements were previously in § 35.935-3. Since the publication of the procurement regulations in § 35.936, we feel the bonding and insurance requirements are more appropriate in this section. It is promulgated substantially as proposed.

§ 35.937-2 This section is promulgated substantially as proposed.

§ 35.937-5. The proposed deletion from paragraph (b) of the reference to 40 U.S.C. 541-544 (commonly referred to as the "Brooks bill") concerned consulting engineering firms and several of their national professional societies. This amendment was suggested by the EPA Office of General Counsel on the basis of the April 25, 1978, decision by the U.S. Supreme Court in *National Society of Professional Engineers v. United States* (see especially footnote 21). In the opinion of the EPA General Counsel, the Supreme Court's decision resolved any doubt that the procurement of professional engineering services is subject to general antitrust requirements unless specifically exempted by Federal statute, e.g., the Brooks bill. The Brooks bill is applicable only to direct Federal procurement, i.e., contracts for engineering and architectural services awarded by Federal departments and agencies. There is no Federal statute which exempts Federal assistance programs from compliance with Federal antitrust laws.

The proposed amendment authorized negotiation procedures established by State or local law. This provision has been amplified to state more clearly the alternatives available to grantees. If State statutory or local code procedures exist or are adopted which are comparable to the negotiation provisions of the Brooks bill, such procedures may be utilized. Such procedures can assure reasonableness of price if the grantee has the staff capability, or otherwise acquires it (e.g., through assistance from another local or State agency) to develop an independent cost estimate to serve as the basis for price negotiations with the selected consulting engineering firm. In connection with the development of such procedures, local governments may also wish to review the March 20, 1978, U.S. Supreme Court decision in *Lafayette v. Louisiana Power and Light Company.*

The proposed amendment has also been amplified to make it clear that if no State statutory or local code procedures exist, a municipality may adopt either (1) procedures comparable to those observed by the Federal Government under the Brooks bill or (2) price-competitive procedures. If a municipality wishes to utilize a price-competitive system for negotiation of engineering fees, however, this must be based upon an objective negotiation process in which award is based upon previously announced objective evaluation factors, including price and other considerations (such as professional competence and technical merits of proposals). EPA does not require or encourage award of engineering agreements solely on the basis of price.

§ 35.937-6. No change was proposed to this section. However, from time to time, we have been asked why grantees who are required to comply with §§ 35.937-2, 35.937-3 and 35.937-4 are required to submit documentation of negotiation methodology used (negotiation is covered by § 35.927-5) when other grantees are not (see paragraph (a)(2)(i)). We have reviewed the requirement and have concluded that there is no reason for the difference. Further, all grantees are required to document the basis for selection and basis for the price under § 35.936-12. These records are available for EPA should we need them. Therefore, we have deleted the requirement for submission of the negotiation methodology used.

§ 35.937-12. We proposed a new paragraph to reference the requirement of § 35.936-5(b) regarding the status of subcontractors when the engineer is acting for the grantee in the role of construction manager. The proposed new paragraph (d) indicates that when an engineer procures items which are not covered by the provisions for architectural and engineering services procurements, the appropriate procedures of § 36.938 (formal advertising) or part 33 apply. We also modified paragraphs (a) and (b).

One comment on paragraph (d) requested we clearly indicate that professional services are excluded from the requirement of the other sections mentioned. We have specifically excluded engineering services. However, professional services other than engineering services would be procured under part 33. Clarification was also requested as to what subcontracted services might be appropriately procured under these other sections. An example of services which should be procured under part 33 regulations is accounting services for the development of user charge and industrial cost recovery systems. Sewer line cleaning or construction of a prototype unit should be procured under § 35.938 et. seq.

Revisions to paragraph (b) were proposed to clarify requirements which the engineer must comply with in awarding subcontracts. The proposed addition of (b)(3) has been revised and renumbered as (b)(7). Rather than incorporating the type of contract provisions of the entire § 35.937-1, we have included only the prohibition on the illegal types of contract (i.e., cost-plus-percentage-of-cost and percentage-of-construction-cost). Also, references have been added to the appendix C-1 clauses which are inherently (under the language of the clause) applicable to subcontracts.

§ 35.938-4(h). The addition of the phrase "for good cause" to paragraph (h)(2) is consistent with program requirements memorandum 78-8, February 13, 1978 (published in the FEDERAL REGISTER, April 7, 1978, 43 FR 14725). It is retained here.

The new paragraph (h)(5) permits award of a prime contract when there are unresolved procurement issues or protests relating only to the award of a subcontract or procurement of a subitem. This rule has been developed in the protest process. Adoption of it in the regulations will make it legally impossible to use this rule in situations not involving protest, will make it easier to enforce in the protest process, and will expedite the procurement process.

Another commenter suggested a new (h)(5)(ii) be created which would state, "Will not materially affect resolution of the protest." Although we felt this concept was implicit, we have no objection to adding it and have done so. This suggestion highlighted a problem in the proposed regulation, namely, two different subjects were being addressed. Therefore, the five items have now been rearranged into two groups—those pertaining to award of the contract and those pertaining to resolution of the protest.

One commenter asked whether the final sentence of this paragraph implies that a bid must be rejected as nonresponsive if a federally required listing or selection requirement is not met by the contractor. This sentence did not imply that. However, we have decided to delete that sentence due to current uncertainty about the future of Federal listing requirements.

§ 35.938-5. No changes were proposed to be made to this section concerning negotiation of contract amendments (change orders). However, paragraph (d)(3) indicated that detailed cost documentation may be required by EPA when a contractor is unable to certify that his costs are complete, current, and accurate, while the certification on EPA's summary format (EPA Form 5700-41) requires a contractor to certify that his cost data are complete, current, and accurate. Therefore, paragraph (d)(3) has been revised to correct this error to indicate that more detailed cost documentation may be required when a contractor is unable to certify that his cost data are complete, current, and accurate.

EPA's Office of Audit published a report in April 1978, that addressed the contract change order procedure in the construction grants program. That report recommended deletion of the reference to a provisional overhead rate in § 35.938-5(d)(3). By definition, a provisional overhead rate is a tentative percentage or dollar factor agreed upon by the grantee and the

V 43/188 SE 27 78 DM

contractor. It is negotiated for interim reimbursement pending final settlement of the actual allowable overhead rate. Change orders should be able to "stand by themselves," and should not be renegotiated when the change order work is completed. For this reason, a final overhead rate should be negotiated for a change order instead of a provisional overhead rate. Therefore, as recommended by the EPA audit report, we have deleted the last sentence in paragraph (d)(3).

§ 35.938-6(c). This amendment was proposed to deal with a problem which was brought to our attention with regard to progress payments on specifically manufactured equipment. EPA's primary reason for encouraging progress payments to equipment manufacturers is to reduce the interest cost to the manufacturers, thereby reducing the bid price and the costs to the taxpayer.

An equipment supplier complained about the additional labor, expense and paperwork needed to comply with the recordation requirement, and asserted that this diminishes the usefulness of progress payments to the companies and increases the cost to EPA. If elimination of the recordation requirement for items valued at less than a certain amount is reasonable, we judge that considerable paperwork can be eliminated. We proposed a $200,000 cutoff level and particularly solicited comment.

Two commenters felt that $200,000 was an appropriate level for application of the recordation requirement. Two other commenters felt that 10 percent of the contract value, but not less than $300,000, would be appropriate. The amount of the contract value is not pertinent, since what is important is the absolute dollar level at which the Federal Government is willing to risk nonrecordation. In view of the comments received, we have decided to retain the $200,000 level.

Some commenters felt that even at the higher level recordation should be discretionary with the grantee. Another commenter suggested that the recordation requirement implied a lack of mutual trust and confidence. We disagree with both comments. The recordation requirement was established for the purpose of protecting the interest of the Federal Government as to the work performed (as opposed to the value of the item) when progress payments are made on large equipment purchases.

§ 35.938-7. No change was proposed to this section. However, many questions have been raised over the last several years and in comments recently received as to whether the exception for State law which is mentioned in § 35.938-6 is also applicable to § 35.938-7. We have always responded that it is. We decided to add the specific exception language to this section.

§ 35.938-9(b). This section is promulgated substantially as proposed with a corrected citation. We have also added references to the appendix C-2 clauses which are inherently (under the language of the clause) applicable to subcontracts.

§ 35.939. No changes were proposed to this section. However, we have made a series of technical changes to the language. These are identified in the supplementary discussion of the technical amendments. Also, we added a new paragraph (1) to advise the public that the EPA General Counsel periodically publishes an index of Regional Administrator protest determinations.

§ 35.940-1. Paragraph (q) was proposed to be revised to delete the reference to allowability of State agency review costs in accordance with §§ 35.912 and 35.913 because of the new authority in subpart F, and to be replaced with the eligibility of start-up services. The eligibility of a plan of operation was also specifically added. Both these additions are in accordance with program requirements memoranda issued on November 29, 1976 (PRM 77-2 and PRM 77-3).

One commenter was concerned about the deletion of eligibility of fees under § 35.913 until the fee system is completely phased-out in favor of State management assistance grants. In order to avoid the necessity of amending the regulation next April 25, the eligibility of fees has been deleted. However, States which previously instituted fee systems may continue to charge fees and the grantee's costs in paying those fees are allowable in the interim, in order to permit an orderly phasing-out of the fee system no later than April 24, 1979.

§ 35.940-2. Although no changes were proposed to this section, we have made several clarifying additions. It was brought to our attention that the fact that the plan of study is an unallowable cost should be explicitly mentioned here. We have done so. We have also explicitly stated that privately owned treatment works are unallowable, except as authorized in section 201(h) of the Act.

§ 35.940-3. In this section, we proposed to delete paragraph (d), acquisition of an operable portion of a treatment works. The "Explanation" described the limited circumstances under which such acquisitions might be approved. However, we have decided to retain paragraph (d), with clarification. Comments on this topic confirm our opinion that more detailed guidance is needed to clarify when such costs may be allowable. Since the factors used to review these requests are extensive, we have decided to issue complete guidance instead of increasing the regulations on a matter of limited and rare applicability.

§ 35.945. The first paragraph of this section is promulgated as proposed. In connection with this section and with § 35.903, it was suggested that the regulations be revised to permit use of letter of credit for construction grants. EPA is currently involved in a study concerning cash management. Feasibility of letter of credit method of payment for construction grantees is one of the items being considered.

Although no changes were proposed to the former paragraph (e), it has been broken into two paragraphs and revised. The new paragraph (e) deals only with final payment. We moved the provision dealing with assignment and release to a new paragraph (f). We deleted the requirement for submission of separate assignment and release forms. Instead, the grantee's acceptance of the final payment constitutes his agreement to the assignment and release. We expect this change to eliminate considerable unnecessary paperwork.

§ 35.960. No changes were proposed to this section. However, we have added a new paragraph to advise the public that the EPA General Counsel periodically publishes an index of grant appeals decisions.

Appendix C-2, clause 11. No changes were proposed to be made to this clause. However, it has been brought to our attention that there is an inconsistency between the first sentence of paragraph (a) of this clause and the parallel clause (clause 10) in appendix C-1. When these clauses were first drafted in 1975, they both read, "If the EPA Project Officer determines • • •" As a result of public comment, they were both supposed to be changed to read, "If the owner or EPA determines • • •" Inadvertently, this change was not made in the C-2 clause. We are making this change at this time.

Appendix D, paragraph b5. This section is promulgated as proposed with clarifying language here and in paragraphs b1, b2 and c. This policy also applies to grants awarded under Pub. L. 84-660.

Other sections. Several commenters proposed that we make changes to sections, or parts of sections, which had not been proposed to be changed. Where we felt that the changes were truly of a technical nature and could be made without prior proposal, we have done so, as is noted in the text above. In some cases, however, the suggested changes were significant and inappropriate for promulgation as final rules without prior proposal. These comments will be retained on file for consideration in any regulatory changes which may be proposed in the future.

EDITORIAL CHANGES

Throughout the regulations we have made editorial changes to simplify the language. Several should be noted. We have eliminated the phrase, "but not limited to" following the word "include" or "including." We have deleted titles of cross-referenced sections in most cases (particularly from the subagreement regulations).

We made editorial changes in appendices C-1 and C-2, which contain clauses for inclusion in subagreements with engineers and construction contractors. Except for minor changes mentioned elsewhere in the preamble, no change in meaning whatsoever is intended. Old supplies of appendices C-1 and C-2 may continue to be used. However, grantees are cautioned that when using an old edition of appendix C-2, the new clause 17 (Buy American) must be added. Some grantees or engineers may prefer to use the new version of appendix C-1, because of the corrected reference to § 35.908 in clause 2.

Effective date: This subpart will be effective on October 1, 1978, unless otherwise specified in particular sections. Good cause exists for an effective date prior to 30 days after publication in the FEDERAL REGISTER because many of the requirements are made effective by the 1977 act on October 1, 1978, and because of the need to start these interrelated requirements together to ensure program continuity.

Dated: September 15, 1978.

DOUGLAS M. COSTLE,
Administrator.

40 CFR Part 35 is amended by revising subpart E to read as follows:

Subpart E—Grants for Construction of Treatment Works—Clean Water Act

Sec.
35.900 Purpose.
35.901 Program policy.
35.903 Summary of construction grant program.
35.905 Definitions.
35.907 Municipal pretreatment program.
35.908 Innovative and alternative technologies.
35.909 Step 2 + 3 grants.
35.910 Allocation of funds.
35.910-1 Allotments.
35.910-2 Period of availability; reallotment.
35.910-3 [Reserved]
35.910-4 [Reserved]
35.910-5 Additional allotments of previously withheld sums.
35.910-6 Fiscal year 1977 public works allotments.
35.910-7 Fiscal year 1977 Supplemental Appropriations Act allotments.
35.910-8 Allotments for fiscal years 1978-81.
35.912 Delegation to State agencies.
35.915 State priority system and project priority list.
35.915-1 Reserves related to the project priority list.
35.917 Facilities planning (step 1).
35.917-1 Content of facilities plan.
35.917-2 State responsibilities.
35.917-3 Federal assistance.
35.917-4 Planning scope and detail.
35.917-5 Public participation.
35.917-6 Acceptance by implementing governmental units.
35.917-7 State review and certification of facilities plan.
35.917-8 Submission and approval of facilities plan.
35.917-9 Revision or amendment of facilities plan.
35.918 Individual systems.
35.918-1 Additional limitations on awards for individual systems.
35.918-2 Eligible and ineligible costs.
35.918-3 Requirements for discharge of effluents.
35.920 Grant application.
35.920-1 Eligibility.
35.920-2 Procedure.
35.920-3 Contents of application.
35.925 Limitations on award.
35.925-1 Facilities planning.
35.925-2 Water quality management plans and agencies.
35.925-3 Priority determination.
35.925-4 State allocation.
35.925-5 Funding and other capabilities.
35.925-6 Permits.
35.925-7 Design.
35.925-8 Environmental review.

35.925-10 Operation and maintenance program.
35.925-11 User charges and industrial cost recovery.
35.925-12 Property.
35.925-13 Sewage collection system.
35.925-14 Compliance with environmental laws.
35.925-15 Treatment of industrial wastes.
35.925-16 Federal activities.
35.925-17 Retained amounts for reconstruction and expansion.
35.925-18 Limitation upon project costs incurred prior to award.
35.925-19 [Reserved]
35.925-20 Procurement.
35.925-21 Storm sewers.
35.926 Value engineering (VE).
35.927 Sewer system evaluation and rehabilitation.
35.927-1 Infiltration/Inflow analysis.
35.927-2 Sewer system evaluation survey.
35.927-3 Rehabilitation.
35.927-4 Sewer use ordinance.
35.927-5 Project procedures.
35.928 Requirements for an industrial cost recovery system.
35.928-1 Approval of the industrial cost recovery system.
35.928-2 Use of industrial cost recovery payments.
35.928-3 Implementation of the industrial cost recovery system.
35.928-4 Moratorium on industrial cost recovery payments.
35.929 Requirements for user charge system.
35.929-1 Approval of the user charge system.
35.929-2 General requirements for all user charge systems.
35.929-3 Implementation of the user charge system.
35.930 Award of grant assistance.
35.930-1 Types of projects.
35.930-2 Grant amount.
35.930-3 Grant term.
35.930-4 Project scope.
35.930-5 Federal share.
35.930-6 Limitation on Federal share.
35.935 Grant conditions.
35.935-1 Grantee responsibilities.
35.935-2 Procurement.
35.935-3 Property.
35.935-4 Step 2 + 3 grants.
35.935-5 Davis-Bacon and related statutes.
35.935-6 Equal employment opportunity.
35.935-7 Access.
35.935-8 Supervision.
35.935-9 Project initiation and completion.
35.935-10 Copies of contract documents.
35.935-11 Project changes.
35.935-12 Operation and maintenance.
35.935-13 Submission and approval of industrial cost recovery system.
35.935-14 Final inspection.
35.935-15 Submission and approval of user charge systems.
35.935-16 Sewer use ordinance and evaluation/rehabilitation program.
35.935-17 Training facility.
35.935-18 Value engineering.
35.935-19 Municipal pretreatment program.
35.935-20 Innovative processes and techniques.
35.936 Procurement.
35.936-1 Definitions.
35.936-2 Grantee procurement systems; State or local law.
35.936-3 Competition.
35.936-4 Profits.
35.936-5 Grantee responsibility.
35.936-6 EPA responsibility.
35.936-7 Small and minority business.
35.936-8 Privity of contract.
35.936-9 Disputes.

AUTHORITY: Sections 109(b), 201 through 205, 207, 208(d), 210 through 212, 215 through 217, 304(d)(3), 313, 501, 502, 511, and 516(b) of the Clean Water Act, as amended, 33 U.S.C. 1251 et seq.

§ 35.900 Purpose.

(a) This subpart supplements the EPA general grant regulations and procedures (part 30 of this chapter) and establishes policies and procedures for grants to assist in the construction of waste treatment works in compliance with the Clean Water Act.

(b) A number of provisions of this subpart which contained transition dates preceding October 1, 1978, have been modified to delete those dates. However, the earlier requirements remain applicable to grants awarded when those provisions were in effect. The transition provisions in former §§ 35.905-4, 35.917, and 35.925-18 remain applicable to certain grants awarded through March 31, 1981.

(c) Technical and guidance publications (MCD series) concerning this program which are issued by EPA may be ordered from: General Services Administration (8FFS), Centralized Mailing List Services, Building 41, Denver Federal Center, Denver, Colo. 80225. In order to expedite processing of requests, persons desiring to obtain these publications should request a copy of EPA form 7500-21 (the order form listing all available publications), from EPA Headquarters, Municipal Construction Division (WH-547) or from any regional office of EPA.

§ 35.901 Program policy.

The primary purpose of Federal grant assistance available under this subpart is to assist municipalities in meeting enforceable requirements of the Act, particularly, applicable national pollution discharge elimination system (NPDES) permit requirements. The Regional Administrator and States are authorized and encouraged to administer this grant program in a manner which will most effectively achieve the enforceable requirements of the Act.

§ 35.903 Summary of construction grant program.

(a) The construction of federally financed waste treatment works is generally accomplished in three steps: Step 1, facilities plans and related elements; step 2, preparation of construction drawings and specifications; and step 3, building of a treatment works.

(b) The Regional Administrator may award grant assistance for a step 1, step 2, or step 3 project, or, as authorized by § 35.909, for a project involving a combination of step 2 and step 3 (step 2+3 grant). For a step 1, step 2, or step 3 grant award, a "project" may consist of an entire step or any "treatment works segment" (see § 35.905) of construction within a step. In the case of step 2+3 grant awards, a project must consist of all associated step 2 and step 3 work; segmenting is not permitted.

(c) Grants are awarded from State allocations (see § 35.910 et seq.) under the Act. No grant assistance may be awarded unless priority for a project has been determined in accordance with an approved State priority system under § 35.915. The State is responsible for determining the amount and timing of Federal assistance to each municipality for which treatment works funding is needed.

(d) An applicant will initially define the scope of a project. The State may revise this initial project scope when priority for the project is established. The Regional Administrator will make the final determination of project scope when grant assistance is awarded (see § 35.930-4).

(e) For each proposed grant, an applicant must first submit his application to the State agency. The basic grant application must meet the requirements for the project in § 35.920-3. If grant assistance for subsequent related projects is necessary, the grantee shall make submissions in the form of amendments to the basic application. The State agency will forward to the appropriate EPA Regional Administrator complete project applications or amendments to them for which the State agency has determined priority. The grant will consist of the grant agreement resulting from the basic application and grant amendments awarded for subsequent related projects.

(f) Generally, grant assistance for projects involving step 2 or 3 will not be awarded unless the Regional Administrator first determines that the facilities planning requirements of §§ 35.917 to 35.917-9 of this subpart have been met. Facilities planning may not be initiated prior to approval of a step 1 grant or written approval of a "plan of study" accompanied by a reservation of funds (see § 35.925-18 and definition of "construction" in § 35.905).

(g) If initiation of step 1, 2, or 3 construction (see definition of "construction" in § 35.905) occurs before grant award, costs incurred before the approved date of initiation of construction will not be paid and award will not be made except under the circumstances in § 35.925-18.

(h) The Regional Administrator may not award grant assistance unless the application meets the requirements of § 35.920-3 and he has made the determinations required by § 35.925 et seq.

(i) A grant or grant amendment awarded for a project under this subpart shall constitute a contractual obligation of the United States to pay the Federal share of allowable project costs up to the amount approved in the grant agreement (including amendments) in accordance with § 35.930-6. However, this obligation is subject to the grantee's compliance with the conditions of the grant (see § 35.935 et seq.) and other applicable requirements of this subpart.

(j) Sections 35.937-10, 35.938-6 and 35.945 authorize prompt payment for project costs which have been incurred. The initial request for payment may cover the Federal share of allowable costs incurred before the award except as otherwise provided in § 35.925-18. Before the award of such assistance, the applicant must claim in the application for grant assistance for that project all allowable costs incurred before initiation of project construction. An applicant may make no subsequent claim for payment for such costs. The estimated amount of any grant or grant amendment, including any prior costs, must be established in conjunction with determination of priority for the project. The Regional Administrator must determine that the project costs are allowable under § 35.940 et seq.

(k) Under section 204(b) of the Act, the grantee must comply with applicable user charge and industrial cost recovery requirements; see §§ 35.925-11, 35.928 et seq., 35.929 et seq., 35.935-13, 35.935-15, and appendix B to this subpart.

(l) The costs of sewage collection systems for new communities, new subdivisions, or newly developed urban areas should be included as part of the development costs of the new construction in these areas. Under section 211 of the Act, such costs will not be allowed under the construction grant program; see § 35.925-13.

(m) The approval of a plan of study for step 1, a facilities plan, or award of grant assistance for step 1, step 2, or step 3, or any segment thereof, will not constitute a Federal commitment for grant assistance for any subsequent project.

(n) Where justified, a deviation from any substatutory requirement of this subpart may be granted under § 30.1000 of this chapter.

(o) The Act encourages public participation in the construction grant process. EPA requires an opportunity for public participation in the development of the State water pollution control strategy and State project priority list, under § 35.915, and in the development of facilities plans, under § 35.917-5.

(p) Requirements regarding the award and administration of subagreements are set forth in §§ 35.935 through 35.939.

§ 35.905 Definitions.

As used in this subpart, the following words and terms mean:

"Act." The Clean Water Act (33 U.S.C. 1251 et seq., as amended).

"Ad valorem tax." A tax based upon the value of real property.

"Combined sewer." A sewer intended to serve as a sanitary sewer and a storm sewer, or as an industrial sewer and a storm sewer.

"Complete waste treatment system." A complete waste treatment system consists of all the treatment works necessary to meet the requirements of title III of the Act, involved in: (a) The transport of waste waters from individual homes or buildings to a plant or facility where treatment of the wastewater is accomplished; (b) the treatment of the wastewaters to remove pollutants; and (c) the ultimate disposal, including recycling or reuse, of the treated wastewaters and residues which result from the treatment process. One complete waste treatment system would, normally, include one treatment plant or facility, but also includes two or more connected or integrated treatment plants or facilities.

"Construction." Any one or more of the following: Preliminary planning to determine the feasibility of treatment works, engineering, architectural, legal, fiscal, or economic investigations or studies, surveys, designs, plans, working drawings, specifications, procedures, or other necessary actions, erection, building, acquisition, alteration, remodeling, improvement, or extension of treatment works, or the inspection or supervision of any of the foregoing items. The phrase "initiation of construction," as used in this subpart means with reference to a project for:

(a) *Step 1:* The approval of a plan of study (see §§ 35.920-3(a)(1) and 35.925-18(a));

(b) *Step 2:* The award of a step 2 grant;

(c) *Step 3:* Issuance of a notice to proceed under a construction contract for any segment of step 3 project work or, if notice to proceed is not required, execution of the construction contract.

"Enforceable requirements of the Act." Those conditions or limitations of section 402 or 404 permits which, if violated, could result in the issuance of a compliance order or initiation of a civil or criminal action under section 309 of the Act. If a permit has not been issued, the term shall include any requirement which, in the Regional Administrator's judgment, would be included in the permit when issued. Where no permit applies, the term shall include any requirement which the Regional Administrator determines is necessary to meet applicable criteria for best practicable waste treatment technology (BPWTT).

"Excessive infiltration/inflow." The quantities of infiltration/inflow which can be economically eliminated from a sewerage system by rehabilitation, as determined in a cost-effectiveness analysis that compares the costs for correcting the infiltration/inflow conditions to the total costs for transportation and treatment of the infiltration/inflow, subject to the provisions in § 35.927.

"Industrial cost recovery." (a) The grantee's recovery from the industrial users of a treatment works of the grant amount allocable to the treatment of waste from such users under section 204(b) of the Act and this subpart.

(b) The grantee's recovery from the commercial users of an individual system of the grant amount allocable to the treatment of waste from such users under section 201(h) of the Act and this subpart.

"Industrial cost recovery period." That period during which the grant amount allocable to the treatment of wastes from industrial users is recovered from the industrial users of such works.

"Industrial user." (a) Any nongovernmental, nonresidential user of a publicly owned treatment works which discharges more than the equivalent of 25,000 gallons per day (gpd) of sanitary wastes and which is identified in the Standard Industrial Classification Manual, 1972, Office of Management and Budget, as amended and supplemented under one of the following divisions:

Division A. Agriculture, Forestry, and Fishing.
Division B. Mining.
Division D. Manufacturing.
Division E. Transportation, Communications, Electric, Gas, and Sanitary Services.
Division I. Services.

(1) In determining the amount of a user's discharge for purposes of industrial cost recovery, the grantee may exclude domestic wastes or discharges from sanitary conveniences.

(2) After applying the sanitary waste exclusion in subparagraph (1) of this paragraph (if the grantee chooses to do so), dischargers in the above divisions that have a volume exceeding 25,000 gpd or the weight of biochemical oxygen demand (BOD) or suspended solids (SS) equivalent to that weight found in 25,000 gpd of sanitary waste are considered industrial users. Sanitary wastes, for purposes of this calculation of equivalency, are the wastes discharged from residential users. The grantee, with the Regional Administrator's approval, shall define the strength of the residential discharges in terms of parameters including, as a minimum, BOD and SS per volume of flow.

(b) Any nongovernmental user of a publicly owned treatment works which discharges wastewater to the treatment works which contains toxic pollutants or poisonous solids, liquids, or gases in sufficient quantity either singly or by interaction with other wastes, to contaminate the sludge of any municipal systems, or to injure or to interfere with any sewage treatment process, or which constitutes a hazard to humans or animals, creates a public nuisance, or creates any hazard in or has an adverse effect on the waters receiving any discharge from the treatment works.

(c) All commercial users of an individual system constructed with grant assistance under section 201(h) of the Act and this subpart. (See § 35.918(a)(3).)

"Infiltration." Water other than wastewater that enters a sewerage system (including sewer service connections) from the ground through such means as defective pipes, pipe joints, connections, or manholes. Infiltration does not include, and is distinguished from, inflow.

"Infiltration/inflow." The total quantity of water from both infiltration and inflow without distinguishing the source.

V 4 3 / 1 8 8
SEP 27 78
UMI

"Inflow." Water other than wastewater that enters a sewerage system (including sewer service connections) from sources such as roof leaders, cellar drains, yard drains, area drains, foundation drains, drains from springs and swampy areas, manhole covers, cross connections between storm sewers and sanitary sewers, catch basins, cooling towers, storm waters, surface runoff, street wash waters, or drainage. Inflow does not include, and is distinguished from, infiltration.

"Interceptor sewer." A sewer whose primary purpose is to transport wastewaters from collector sewers to a treatment facility.

"Interstate agency." An agency of two or more States established under an agreement or compact approved by the Congress, or any other agency of two or more States, having substantial powers or duties pertaining to the control of water pollution.

"Municipality." A city, town, borough, county, parish, district, association, or other public body (including an intermunicipal agency of two or more of the foregoing entities) created under State law, or an Indian tribe or an authorized Indian tribal organization, having jurisdiction over disposal of sewage, industrial wastes, or other waste, or a designated and approved management agency under section 208 of the Act.

(a) This definition includes a special district created under State law such as a water district, sewer district, sanitary district, utility district, drainage district, or similar entity or an integrated waste management facility, as defined in section 201(e) of the Act, which has as one of its principal responsibilities the treatment, transport, or disposal of liquid wastes of the general public in a particular geographic area.

(b) This definition excludes the following:

(1) Any revenue producing entity which has as its principal responsibility an activity other than providing wastewater treatment services to the general public, such as an airport, turnpike, port facility, or other municipal utility.

(2) Any special district (such as school district or a park district) which has the responsibility to provide wastewater treatment services in support of its principal activity at specific facilities, unless the special district has the responsibility under State law to provide waste water treatment services to the community surrounding the special district's facility and no other municipality, with concurrent jurisdiction to serve the community, serves or intends to serve the special district's facility or the surrounding community.

"Operable treatment works." An operable treatment works is a treatment works that:

(a) Upon completion of construction will treat waste water, transport waste water to or from treatment, or transport and dispose of waste water in a manner which will significantly improve an objectionable water quality situation or health hazard, and

(b) Is a component part of a complete waste treatment system which, upon completion of construction for the complete waste treatment system (or completion of construction of other treatment works in the system in accordance with a schedule approved by the Regional Administrator) will comply with all applicable statutory and regulatory requirements.

"Project." The scope of work for which a grant or grant amendment is awarded under this subpart. The scope of work is defined as step 1, step 2, or step 3 of treatment works construction or segments (see definition of "treatment works segment" and § 35.930-4).

"Replacement." Expenditures for obtaining and installing equipment, accessories, or appurtenances which are necessary during the useful life of the treatment works to maintain the capacity and performance for which such works were designed and constructed. The term "operation and maintenance" includes replacement.

"Sanitary sewer." A sewer intended to carry only sanitary or sanitary and industrial waste waters from residences, commercial buildings, industrial plants, and institutions.

"Sewage collection system." For the purpose of § 35.925-13, each, and all, of the common lateral sewers, within a publicly owned treatment system, which are primarily installed to receive waste waters directly from facilities which convey waste water from individual structures or from private property, and which include service connection "Y" fittings designed for connection with those facilities. The facilities which convey waste water from individual structures, from private property to the public lateral sewer, or its equivalent, are specifically excluded from the definition, with the exception of pumping units, and pressurized lines, for individual structures or groups of structures when such units are cost effective and are owned and maintained by the grantee.

"State." A State, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Marianas.

"State agency." The State water pollution control agency designated by the Governor having responsibility for enforcing State laws relating to the abatement of pollution.

"Storm sewer." A sewer intended to carry only storm waters, surface runoff, street wash waters, and drainage.

"Treatment works." Any devices and systems for the storage, treatment, recycling, and reclamation of municipal sewage, domestic sewage, or liquid industrial wastes used to implement section 201 of the Act, or necessary to recycle or reuse water at the most economical cost over the useful life of the works. These include intercepting sewers, outfall sewers, sewage collection systems, individual systems, pumping, power, and other equipment and their appurtenances; extensions, improvement, remodeling, additions, and alterations thereof; elements essential to provide a reliable recycled supply such as standby treatment units and clear well facilities; and any works, including site acquisition of the land that will be an integral part of the treatment process or is used for ultimate disposal of residues resulting from such treatment (including land for composting sludge, temporary storage of such compost, and land used for the storage of treated wastewater in land treatment systems before land application); or any other method or system for preventing, abating, reducing, storing, treating, separating, or disposing of municipal waste or industrial waste, including waste in combined storm water and sanitary sewer systems.

"Treatment works segment." A treatment works segment may be any portion of an operable treatment works described in an approved facilities plan, under § 35.917, which can be identified as a contract or discrete subitem or subcontract for step 1, 2, or 3 work. Completion of construciton of a treatment works segment may, but need not, result in an operable treatment works.

"Useful life." Estimated period during which a treatment works will be operated.

"User charge." A charge levied on users of a treatment works, or that portion of the ad valorem taxes paid by a user, for the user's proportionate share of the cost of operation and maintenance (including replacement) of such works under sections 204(b)(1)(A) and 201(h)(2) of the Act and this subpart.

"Value engineering (VE)." A specialized cost control technique which uses a systematic and creative approach to identify and to focus on unnecessarily high cost in a project in order to arrive at a cost saving without sacrificing the reliability or efficiency of the project.

§ 35.907 Municipal pretreatment program.

(a) The Regional Administrator is authorized to provide grant assistance for the development of an approvable municipal pretreatment program as required by part 403 of this chapter in conjunction with a step 1, step 2, or step 3 project.

(b) The grantee is required to develop a pretreatment program if the Regional Administrator determines that:

(1) The municipal treatment works:

(i) Serves industries subject to proposed or promulgated pretreatment standards under section 307(b) of the Act, or

(ii) Expects to serve industries connecting into the works in accordance with section 301(i)(2), where these industries are subject to the section 307 (b) or (c) standards: and

(2) A work plan under a section 208 planning grant has not provided for the development of a program approvable under part 403 of this chapter.

(c) A pretreatment program may be required for municipal treatment works which receive other nondomestic wastes covered by guidance issued under section 304(g) of the Act.

(d) Development of an approvable municipal pretreatment program under part 403 of this chapter shall include:

(1) An industrial survey as required by § 403.8 of this chapter including identification of system users, the character and volume of pollutants discharged, type of industry, location (see paragraph (f) of this section);

(2) An evaluation of legal authority, including adequacy of enabling legislation, and selection of mechanisms to be used for control and enforcement (e.g., ordinance, joint powers agreement, contract);

(3) An evaluation of financial programs and revenue soufces to insure adequate funding to carry out the pretreatment program;

(4) A determination of technical information necessary to support development of an industrial waste ordinance or other means of enforcing pretreatment standards;

(5) Design of a monitoring enforcement program;

(6) A determination of pollutant removals in existing treatment works;

(7) A determination of the treatment works tolerance to pollutants which interfere with its operation, sludge use, or disposal;

(8) A determination of required monitoring equipment for the municipal treatment works;

(9) A determination of municipal facilities to be constructed for monitoring or analysis of industrial waste.

(e) Items (d)(6) and (d)(7) of this section are grant eligible if necessary for the proper design or operation of the municipal treatment works but are not grant eligible when performed solely for the purpose of seeking an allowance for removal of pollutants under § 403.7 of this chapter.

(f) Information concerning the character and volume of pollutants discharged by industry to a municipal treatment works is to be provided to the municipality by the industrial discharger under paragraph (d)(1) of this section. However, the costs of a limited amount of end-of-pipe sampling and associated analysis of industrial discharges to a municipal treatment works properly allocable to the municipality are allowable if the grantee obtains the prior written approval of the Regional Administrator; see § 35.940-3(f).

(g) The pretreatment program developed under paragraph (b) of this section is subject to the Regional Administrator's approval under § 35.935-19 and must be implemented in accordance with part 403 of this chapter.

§ 35.908 Innovative and alternative technologies.

(a) *Policy.* EPA's policy is to encourage and, where possible, to assist in the development of innovative and alternative technologies for the construction of waste water treatment works. Such technologies may be used in the construction of waste water treatment works under this subpart as § 35.915-1, § 35.930-5, appendix E, and this section provide. New technology or processes may also be developed or demonstrated with the assistance of EPA research or demonstration grants awarded under title I of the Act (see part 40 of this subchapter).

(b) *Funding for innovative and alterative technologies.* (1) Projects or portions of projects which the Regional Administrator determines meet criteria for innovative or alternative technologies in appendix E may receive 85-percent grants (see § 35.930-5).

(i) Only funds from the reserve in § 35.915-1(b) shall be used to increase these grants from 75 to 85 percent.

(ii) Funds for the grant increase shall be distributed according to the chronological approval of grants, unless the State and the Regional Administrator agree otherwise.

(iii) The project must be on the fundable portion of the State project priority list.

(iv) If the project is an alternative to conventional treatment works for a small community (a municipality with a population of 3,500 or less or a highly dispersed section of a larger municipality, as defined by the Regional Administrator), funds from the reserve in § 35.915(e) may be used for the 75 percent portion of the Federal grant.

(v) Only if sewer related costs qualify as alternatives to conventional treatment works for small communities are they entitled to the grant increase from 75 to 85 percent, either as part of the entire treatment works or as components.

(2) A project or portions of a project may be designated innovative or alternative on the basis of a facilities plan or on the basis of plans and specifications. A project that has been designated innovative on the basis of the facilities plan may lose that designation if plans and specifications indicate that it does not meet the appropriate criteria stated in section 6 of appendix E.

(3) Projects or portions of projects that receive step 2, step 3, or step 2+3 grant awards after December 27, 1977, from funds allotted or reallotted in fiscal year 1978 may also receive the grant increase from funds allotted for fiscal year 1979 for eligible portions that meet the criteria for alternative technologies in appendix E, if funds are available for such purposes under § 35.915-1(b).

(c) *Modification or replacement of innovative and alternative projects.* The Regional Administrator may award grant assistance to fund 100 percent of the eligible costs of the modification or replacement of any treatment works constructed with 85-percent grant assistance if:

(1) He determines that:

(i) The facilities have not met design performance specifications (unless such failure is due to any person's negligence);

(ii) Correction of the failure requires significantly increased capital or operating and maintenance expenditures; and

(iii) Such failure has occurred within the 2-year period following final inspection; and

(2) The replacement or modification project is on the fundable portion of the State's priority list.

(d) *Sole source procurement.* A determination by the Regional Administrator under this section that innovative criteria have been met will serve as the basis for sole source procurement (see § 35.936-13(b)) for step 3, if appropriate, to achieve the objective of demonstrating innovative technology.

§ 35.909 Step 2+3 grants.

(a) *Authority.* The Regional Administrator may award grant assistance for a step 2+3 project for the combination of design (step 2) and construction (step 3) of a wastewater treatment works.

(b) *Limitations.* The Regional Administrator may award step 2+3 grant assistance only if he determines that:

(1) The population is 25,000 or less for the applicant municipality (according to most recent U.S. Census information or disaggregations thereof);

(2) The treatment works has an estimated total step 3 construction cost of $2,million or less, as determined by

V 4 3 / 1 8 8
S E 2 7 7 8
UMI

the Regional Administrator. For any State that the Assistant Administrator for Water and Waste Management finds to have unusually high costs of construction, the Regional Administrator may make step 2+3 awards where the estimated total step 3 construction costs of such treatment works does not exceed $3 million. The project must consist of all associated step 2 and step 3 work; segmenting is not permitted; and

(3) The fundable range of the approved project priority list includes the step 2 and step 3 work.

(c) *Application requirements.* Step 2+3 projects are subject to all requirements of this subpart that apply to separate step 2 and step 3 projects except compliance with § 35.920-3(c) is not required before grant award. An applicant should only submit a single application.

(d) *Cross references.* See §§ 35.920-3(d) (contents of application), 35.930-1(a)(4) (types of projects) and 35.935-4 (grant conditions).

§ 35.910 Allocation of funds.

§ 35.910-1 Allotments.

Allotments are made on a formula or other basis which Congress specifies for each fiscal year. Except where Congress indicates the exact amount of funds which each State should receive, computation of a State's ratio will be carried out to the nearest ten-thousandth percent (0.0001 percent). Unless regulations for allotments for a specific fiscal year otherwise specify, alloted amounts will be rounded to the nearest thousand dollars.

§ 35.910-2 Period of availability; reallotment.

(a) All sums allotted under § 35.910-5 shall remain available for obligation within that State until September 30, 1978. Such funds which remain unobligated on October 1, 1978, will be immediately reallotted in the same manner as sums under paragraph (b).

(b) All other sums allotted to a State under section 207 of the Act shall remain available for obligation until the end of 1 year after the close of the fiscal year for which the sums were authorized. Sums not obligated at the end of that period shall be immediately reallotted on the basis of the same ratio as applicable to sums allotted for the then-current fiscal year, but none of the funds reallotted shall be made available to any State which failed to obligate any of the funds being reallotted. Any sum made available to a State by reallotment under this section shall be in addition to any funds otherwise allotted to such State for grants under this subpart during any fiscal year.

(c) Sums which are deobligated after the reallotment date for those funds shall be treated in the same manner as the most recent allotment before the deobligation.

§ 35.910-3 [Reserved]

§ 35.910-4 [Reserved]

§ 35.910-5 Additional allotments of previously withheld sums.

(a) A total sum of $9 billion is allotted from sums authorized, but initially unallotted, for fiscal years 1973, 1974, and 1975. This additional allotment shall be available for obligation through September 30, 1978, before reallotment of unobligated sums under § 35.910-2.

(b) Two-thirds of the sum hereby allotted ($6 billion) represents the initially unallotted portion of the amounts authorized for fiscal years 1973 and 1974. Therefore, the portion of the additional allotments derived from this sum were computed by applying the percentages formerly set forth in § 35.910-3(b) to the total sums authorized for fiscal years 1973 and 1974 ($11 billion) and subtracting the previously allotted sums, formerly set forth in § 35.910-3(c).

(c) One-third of the sum hereby allotted ($3 billion) represents the initially unallotted portion of the amounts authorized for fiscal year 1975. Therefore, the portion of the additional allotments derived from this sum were computed in a three-step process: First, by applying the percentages set forth in § 35.910-4(b) to the total sums authorized for fiscal year 1975 ($7 billion); then, by making adjustments necessary to assure that no State's allotment of such sums fell below its fiscal year 1972 allotment, under Pub. L. 93-243; and, finally, by subtracting the previously allotted sums set forth in § 35.910-4(c).

(d) Based upon the computations set forth in paragraphs (b) and (c) of this section, the total additional sums hereby allotted to the States are as follows:

State	
Alabama	$43,975,950
Alaska	25,250,500
Arizona	18,833,450
Arkansas	39,822,700
California	945,776,800
Colorado	43,113,300
Connecticut	155,091,800
Delaware	56,394,900
District of Columbia	72,492,000
Florida	345,870,100
Georgia	117,772,800
Hawaii	51,903,300
Idaho	19,219,100
Illinois	571,698,400
Indiana	251,631,800
Iowa	100,044,900
Kansas	53,794,200
Kentucky	90,430,800
Louisiana	71,712,250
Maine	78,495,200
Maryland	297,705,300
Massachusetts	295,809,100
Michigan	625,991,900
Minnesota	172,024,500
Mississippi	38,735,200
Missouri	157,471,200
Montana	12,378,200
Nebraska	38,539,500
Nevada	31,839,800
New Hampshire	77,199,350
New Jersey	660,830,500
New Mexico	15,054,900
New York	1,045,103,500
North Carolina	110,345,300
North Dakota	2,802,000
Ohio	497,227,400
Oklahoma	64,293,700
Oregon	77,552,900
Pennsylvania	493,984,900
Rhode Island	45,599,600
South Carolina	82,341,900
South Dakota	5,688,000
Tennessee	107,351,400
Texas	174,969,850
Utah	21,376,500
Vermont	22,506,600
Virginia	251,809,000
Washington	103,915,500
West Virginia	59,419,900
Wisconsin	145,327,400
Wyoming	2,930,650
Guam	6,399,200
Puerto Rico	84,910,500
Virgin Islands	7,794,800
American Samoa	738,200
Trust Territory of Pacific	2,672,800
Total	9,000,000,000

§ 35.910-6 Fiscal year 1977 public works allotments.

(a) The $480 million appropriated by Pub. L. 94-447, 90 Stat. 1498, is available for obligation under the authority of title III of the Public Works Employment Act of 1976 (Pub. L. 94-369, 90 Stat. 999), as provided by section 301 of Pub. L. 94-369, to carry out title II of the Clean Water Act (other than sections 206, 208, and 209). Allotments of these funds shall remain available until expended. Amounts allotted are in addition to the State's last allotment under the Clean Water Act and are to be used for the same purpose.

(b) The sum of $480 million has been allotted to States identified in column 1 of the table IV of the House Public Works and Transportation Committee print numbered 94-25 based on percentages shown in column 5 of that table.

(c) The percentages referred to in paragraph (b) of this section and used in computing the State allotments set forth in paragraph (d) of this section are as follows:

State	Percent
Alabama	4.90
Alaska	.91
Arizona	4.69
Arkansas	3.74
California	0
Colorado	3.04
Connecticut	0
Delaware	0
District of Columbia	0
Florida	2.97
Georgia	5.70
Hawaii	.60
Idaho	1.06
Illinois	0
Indiana	0
Iowa	.37
Kansas	2.90
Kentucky	2.70
Louisiana	3.51
Maine	0
Maryland	1.51

American Samoa	768,000
Trust Territory of Pacific	4,704,000
Total	480,000,000

§ 35.910-7 Fiscal Year 1977 Supplemental Appropriations Act allotments.

(a) Under title I, chapter V of Pub. L. 95-26, $1 billion is available for obligation. The allotments are to be used to carry out title II of the Act, excluding sections 206, 208, and 209. These allotments are available until expended but must be obligated by May 3, 1980. After that date, unobligated balances will be subject to reallotment under section 205 (b) of the Act (see § 35.910-2 (b)).

(b) The allotments, computed by proportionally adjusting the table on page 16 of Senate Report No. 95-38, are based on the following four factors:

(1) 25 percent on the States estimated 1975 census population;

(2) 50 percent on each State's partial needs, i.e., on the cost of needed facilities in categories I, II, and IVB (secondary treatment, more stringent treatment required to meet water quality standards, and interceptor sewers and pumping stations), as shown in table IV of the May 6, 1975, EPA report, "cost Estimates for Construction of Publicly Owned Waste Water Treatment Facilities—1974 Needs Survey";

(3) 25 percent on each State's full needs, i.e., on the cost of needed facilities in categories I, II, IIIA, IIIB, IVA, IVB, and V (secondary treatment, more stringent treatment required to meet water quality standards, infiltration and inflow correction, major sewer system rehabilitation, collector sewers, interceptor sewers, and pumping stations, and treatment of combined sewer overflows), as shown in table V of the EPA report noted in paragraph (b) (2) of this section; and

(4) An allotment adjustment to insure that no State receives less than the one-third of 1 percent of the total amount allocated.

(c) Based on paragraph (b) of this section, the total additional sums hereby allotted to the States are as follows:

State	Amount
Alabama	$10,906,000
Alaska	4,759,000
Arizona	6,345,000
Arkansas	10,807,000
California	82,391,000
Colorado	8,031,000
Connecticut	12,195,000
Delaware	3,966,000
District of Columbia	3,966,000
Florida	35,792,000
Georgia	19,929,000
Hawaii	6,940,000
Idaho	4,065,000
Illinois	52,151,000
Indiana	21,713,000
Iowa	11,005,000
Kansas	12,195,000
Kentucky	14,971,000
Louisiana	12,493,000
Maine	5,453,000
Maryland	37,874,000
Massachusetts	27,662,000
Michigan	46,897,000
Minnesota	15,070,000
Mississippi	7,535,000
Missouri	19,830,000
Montana	3,272,000
Nebraska	6,147,000
Nevada	3,272,000
New Hampshire	6,742,000
New Jersey	47,591,000
New Mexico	3,272,000
New York	105,294,000
North Carolina	20,722,000
North Dakota	3,272,000
Ohio	55,522,000
Oklahoma	13,484,000

New Jersey	160,717,500	178,575,000
New Mexico	17,185,500	19,095,000
New York	477,940,500	531,045,000
North Carolina	89,136,000	99,040,000
North Dakota	13,981,500	15,535,000
Ohio	290,947,500	323,275,000
Oklahoma	41,755,500	46,395,000
Oregon	58,383,000	64,870,000
Pennsylvania	196,272,000	218,080,000
Rhode Island	23,634,000	26,260,000
South Carolina	52,947,000	58,830,000
South Dakota	16,798,500	18,665,000
Tennessee	69,687,000	77,430,000
Texas	196,353,000	218,170,000
Utah	20,056,500	22,285,000
Vermont	17,302,500	19,225,000
Virginia	88,209,000	98,010,000
Washington	79,596,000	88,440,000
West Virginia	80,563,500	89,515,000
Wisconsin	87,763,500	97,515,000
Wyoming	13,513,500	15,015,000
Guam	3,348,000	3,720,000
Puerto Rico	52,803,000	58,670,000
Virgin Islands	1,701,000	1,890,000
American Samoa	2,772,000	3,080,000
Trust Territory of the Pacific Islands	6,885,000	7,650,000
Total	4,500,000,000	5,000,000,000

(c) The authorizations in paragraph (b) of this section depend on appropriation. Therefore, the Regional Administrator may not obligate any portion of any authorization for a fiscal year until a law is enacted appropriating part or all of the sums authorized for that fiscal year. If sums appropriated are less than the sums authorized for a fiscal year, EPA will apply the percentages in paragraph (a) of this section to distribute all appropriated sums among the States, and promptly will notify each State of its share. The Regional Administrator may not obligate more than the State's share of appropriated sums.

(d) If supplementary funds are appropriated in any fiscal year under section 205(e) of the Act to carry out the purposes of this paragraph, no State shall receive less than one-half of 1 percent of the total allotment among all States for that fiscal year, except that in the case of Guam, the Virgin Islands, American Samoa, and the Trust Territories not more than thirty-three one-hundredths of 1 percent of the total allotment shall be allotted to all four of those jurisdictions. If for any fiscal year the amount appropriated to carry out this paragraph is less than the full amount needed, the following States will share in any funds appropriated for the purposes of this paragraph in the following percentages, drawn from the note to table 3 of committee print numbered 95-30 of the Committee on Public Works and Transportation of the House of Representatives:

State	Percentage
Alaska	5.4449
Delaware	7.1459
District of Columbia	12.8612
Idaho	.3416
Montana	10.8755
Nevada	6.1352
New Mexico	8.4057
North Dakota	13.4733
South Dakota	9.0178
Utah	3.8648
Vermont	8.2206
Wyoming	14.2135
Total	100.00

§ 35.912 Delegation to State agencies.

EPA's policy is to maximize the use of staff capabilities of State agencies. Therefore, in the implementation of the construction grant program, optimum use will be made of available State and Federal resources. This will eliminate unnecessary duplicative reviews of documents required in the processing of construction grant awards. Accordingly, the Regional Administrator may enter into a written agreement, where appropriate, with a State agency to authorize the State agency's certification of the technical or administrative adequacy of specifically required documents. The agreement may provide for the review and certification of elements of: (a) Facilities plans (step 1), (b) plans and specifications (step 2), (c) operation and maintenance manuals, and (d) such other elements as the Regional Administrator determines may be appropriately delegated as the program permits and State competence allows. The agreement will define requirements which the State will be expected to fulfill as part of its general responsibilities for the conduct of an effective preaward applicant assistance program; compensation for this program is the responsibility of the State. The agreement will also define specific duties regarding the review of identified documents prerequisite to the receipt of grant awards. A certification agreement must provide that an applicant or grantee may request review by the Regional Administrator of an adverse recommendation by a State agency. Delegation activities are compensable by EPA only under section 106 of the Act or subpart F of this part.

§ 35.915 State priority system and project priorty list.

Construction grants will be awarded from allotments according to the State priority list, based on the approved State priority system. The State priority system and list must be designed to achieve optimum water quality management consistent with the goals and requirements of the Act.

(a) *State priority system.* The State priority system describes the methodology used to rate and rank projects that are considered eligible for assistance. It also sets forth the administrative, management, and public participation procedures required to develop and revise the State project priority list. In developing its annual priority list, the State must consider the construction grant needs and priorities set forth in certified and approved State and areawide water quality management (WQM) plans. The State shall hold a public hearing before submission of the priority system (or revision thereto). Before the hearing, a fact sheet describing the proposed system (including rating and ranking criteria) shall be distributed to the public. A summary of State responses to public comment and to any public hearing testimony shall be prepared and included in the priority system submission. The Regional Administrator shall review and approve the State priority system for procedural completeness, insuring that it is designed to obtain compliance with the enforceable requirements of the Act as defined in § 35.905. The Regional Administrator may exempt grants for training facilities under section 109(b)(1) of the Act and § 35.930-1(b) from these requirements.

(1) *Project rating criteria.* (i) The State priority system shall be based on the following criteria:

(A) The severity of the pollution problem;

(B) The existing population affected;

(C) The need for preservation of high quality waters; and

(D) At the State's option, the specific category of need that is addressed.

(ii) The State will have sole authority to determine the priority for each category of need. These categories comprise mutually exclusive classes of facilities and include:

(A) Category I—Secondary treatment;

(B) Category II—More stringent treatment;

(C) Category IIIA—Infiltration/inflow correction;

(D) Category IIIB—Sewer system replacement or major rehabilitation;

(E) Category IVA—New collectors and appurtenances;

(F) Category IVB—New interceptors and appurtenances; and

(G) Category V—Correction of combined sewer overflows.

(iii) Step 2, step 3 and step 2+3 projects utilizing processes and techniques meeting the innovative and alternative guidelines in appendix E of this part may receive higher priority. Also 100 percent grants for projects that modify or replace malfunctioning treatment works constructed with an 85 percent grant may receive a higher priority.

(iv) Other criteria, consistent with these, may be considered (including the special needs of small and rural communities). The State shall not consider the project area's development needs not related to pollution abatement, the geographical region within the State, or future population growth projections.

(2) *Criteria assessment.* The State shall have authority to determine the relative influence of the rating criteria used for assigning project priority. The criteria must be clearly delineated in the approved State priority system and applied consistently to all projects. A project on the priority list shall generally retain its priority rating until an award is made.

(b) *State needs inventory.* The State shall maintain a listing, including costs by category, of all needed treatment works. The most recent needs inventory, prepared in accordance with section 516(b)(1)(B) of the Act, should be used for this purpose. This State listing should be the same as the needs inventory and fulfills similar requirements in the State WQM planning process. The State project priority list shall be consistent with the needs inventory.

(c) *State project priority list.* The State shall prepare and submit annually a ranked priority listing of projects for which Federal assistance is expected during the 5-year planning period starting at the beginning of the next fiscal year. The list's fundable portion shall include those projects planned for award during the first year of the 5-year period (hereinafter called the funding year). The fundable portion shall not exceed the total funds expected to be available during the year less all applicable reserves provided in § 35.915-1 (a) through (d). The list's planning portion shall include all projects outside the fundable portion that may, under anticipated allotment levels, receive funding during the 5-year period. The Administrator shall provide annual guidance to the States outlining the funding assumptions and other criteria useful in developing the 5-year priority list.

(1) *Project priority list development.* The development of the project priority list shall be consistent with the rating criteria established in the approved priority system, in accordance with the criteria in paragraph (a)(1) of this section. In ranking projects, States must also consider the treatment works and step sequence; the allotment deadline; total funds available; and other management criteria in the approved State priority system. In developing its annual priority list, the State must consider the construction grant needs and priorities set forth in certified and approved State and areawide WQM plans. The Regional Administrator may request that a State provide justification for the rating or ranking established for specific project(s).

(2) *Project priority list information.* The project priority list shall include the information for each project that is set out below for projects on the fundable portion of the list. The Administrator shall issue specific guidance on these information requirements for the planning portion of the list, including phase-in procedures for the fiscal year 1979 priority planning process.

(i) State assigned EPA project number;

(ii) Legal name and address of applicant;

(iii) Short project name or description;

(iv) Priority rating and rank of each project, based on the approved priority system;

(v) Project step number (step 1, 2, 3, or 2+3);

(vi) Relevant needs authority/facility number(s);

(vii) NPDES number (as appropriate);

(viii) Parent project number (i.e., EPA project number for predecessor project);

(ix) For step 2, 3, or 2+3 projects, indication of alternative system for small community;

(x) For step 2, 3, or 2+3 projects, that portion (if any) of eligible cost to apply to alternative techniques;

(xi) For step 2, 3, or 2+3 projects, that portion (if any) of eligible cost to apply to innovative processes;

(xii) For step 3 or 2+3 projects, the eligible costs in categories IIIB, IV, and V (see § 35.915(a)(1)(ii));

(xiii) Total eligible cost;

(xiv) Date project is expected to be certified by State to EPA for funding;

(xv) Estimated EPA assistance (not including potential grant increase from the reserve in § 35.915-1(b)); and

(xvi) Indication that the project does or does not satisfy the enforceable requirements provision, including (as appropriate) funding estimates for those portions which do not meet the enforceable requirements of the Act.

(d) *Public participation.* Before the State submits its annual project priority list to the Regional Administrator, the State shall insure that adequate public participation (including a public hearing) has taken place as required by subpart G of this part. Before the public hearing, the State shall circulate information about the priority lis including a description of each proposed project and a statement concerning whether or not it is necessary to meet the enforceable requirements of the Act. The information on the

DRAFT

V 4 3 / 1 8 8

proposed priority list under paragraph (c)(2) of this section may be used to fulfill these requirements. This public hearing may be conducted jointly with any regular public meeting of the State agency. The public must receive adequate and timely statewide notice of the meeting (including publication of the proposed priority list) and attendees at the meeting must receive adequate opportunity to express their views concerning the list. Any revision of the State priority list (including project bypass and the deletion or addition of projects) requires circulation for public comment and a public hearing unless the State agency and the Regional Administrator determine that the revision is not significant. The approved State priority system shall describe the public participation policy and procedures applicable to any proposed revision to the priority list.

(e) *Submission and review of project priority list.* The State shall submit the priority list as part of the annual State program plan under subpart G of this part. A summary of State agency response to public comment and hearing testimony shall be prepared and submitted with the priority list. The Regional Administrator will not consider a priority list to be final until the public participation requirements are met and all information required for each project has been received. The Regional Administrator will review the final priority list within 30 days to insure compliance with the approved State priority system. No project may be funded until this review is complete.

(f) *Revision of the project priority list.* The State may modify the project priority list at any time during the program planning cycle in accordance with the public participation requirements and the procedures established in the approved State priority system. Any modification (other than clerical) to the priority list must be clearly documented and promptly reported to the Regional Administrator. As a minimum, each State's priority list management procedure must provide for the following conditions:

(1) *Project bypass.* A State may bypass a project on the fundable portion of the list after it gives written notice to the municipality and the NPDES authority that the State has determined that the project to be bypassed will not be ready to proceed during the funding year. Bypassed projects shall retain their relative priority rating for consideration in the future year allotments. The highest ranked projects on the planning portion of the list will replace bypassed projects. Projects considered for funding in accordance with this provision must comply with paragraph (g) of this section.

(2) *Additional allotments.* If a State receives any additional allotment(s), it may fund projects on the planning portion of the priority list without further public participation if:

(i) The projects on the planning portion have met all administrative and public participation requirements outlined in the approved State priority system; and

(ii) The projects included within the fundable range are the highest priority projects on the planning portion.

If sufficient projects that meet these conditions are not available on the planning portion of the list, the State shall follow the procedures outlined in paragraph (e) of this section to add projects to the fundable portion of the priority list.

(3) *Project removal.* A State may remove a project from the priority list only if:

(i) The project has been fully funded;

(ii) The project is no longer entitled to funding under the approved priority system;

(iii) The Regional Administrator has determined that the project is not needed to comply with the enforceable requirements of the Act; or

(iv) The project is otherwise ineligible.

(g) *Regional Administrator review for compliance with the enforceable requirements of the Act.* (1) Unless otherwise provided in paragraph (g)(2) of this section, the Regional Administrator may propose the removal of a specific project or portion thereof from the State project priority list during or after the initial review where there is reason to believe that it will not result in compliance with the enforceable requirements of the Act. Before making a final determination, the Regional Administrator will initiate a public hearing on this issue. Questioned projects shall not be funded during this administrative process. Consideration of grant award will continue for those projects not at issue in accordance with all other requirements of this section.

(i) The Regional Administrator shall establish the procedures for the public notice and conduct of any such hearing, or, as appropriate, the procedures may be adapted from existing agency procedures such as § 6.400 or §§ 123.32 and 123.34 of this chapter. The procedures used must conform to minimum Agency guidelines for public hearings under part 25 of this chapter.

(ii) Within 30 days after the date of the hearing, the Regional Administrator shall transmit to the appropriate State agency a written determination about the questioned projects. If the Regional Administrator determines that the project will not result in compliance with the enforceable requirements of the Act, the State shall remove the project from the priority list and modify the priority list toi reflect this action. The Regional Administrator's determination will constitute the final agency action, unless the State or municipality files a notice of appeal under part 30, subpart J of this subchapter.

(2) The State may use 25 percent of its funds during each fiscal year for projects or portions of projects in categories IIIB, IVA, IVB, and V (see § 35.915(a)(1)(ii)). These projects must be eligible for Federal funding to be included on the priority list. EPA will generally not review these projects under paragraph (g)(1) of this section to determine if they will result in compliance with the enforceable requirements of the Act. The Regional Administrator will, however, review all projects or portions thereof which would use funds beyond the 25-percent level according to the criteria in paragraph (g)(1) of this section.

(h) *Regional Administrator review for eligibility.* If the Regional Administrator determines that a project on the priority list is not eligible for assistance under this subpart, the State and municipality will be promptly advised and the State will be required to modify its priority list accordingly. Elimination of any project from the priority list shall be final and conclusive unless the State or municipality files a notice of appeal under part 30, subpart J of this subchapter.

§ 35.915–1 Reserves related to the project priority list.

In developing the fundable portion of the priority list, the State shall provide for the establishment of the several reserves required or allowed under this section. The State shall submit a statement specifying the amount to be set aside for each reserve with the final project priority list.

(a) *Reserve for State management assistance grants.* The State may (but need not) propose that the Regional Administrator set aside from each allotment a reserve not to exceed 2 percent or $400,000, whichever is greater, for State management assistance grants under subpart F of this part. Grants may be made from these funds to cover the reasonable costs of administering activities delegated to a State. Funds reserved for this purpose that are not obligated by the end of the allotment period will be added to the amounts last allotted to a State. These funds shall be immediately available for obligation to projects in the same manner and to the same extent as the last allotment.

(b) *Reserve for innovative and alternative technology project grant increase.* Each State shall set aside from its annual allotment a specific percentage to increase the Federal share of grant awards from 75 percent to 85 percent of the eligible cost of construction (under § 35.908(b)(1)) for construction projects which use innovative or alternative waste water treatment processes and techniques. The set-aside amount shall be 2 percent of the State's allotment for each of fiscal years 1979 and 1980, and 3 percent for fiscal year 1981. Of this amount not less than one-half of 1 percent of the State's allotment shall be set aside to increase the Federal grant share for projects utilizing innovative processes and techniques. Funds reserved under this section may be expended on projects for which facilities plans were initiated before fiscal year 1979. These funds shall be reallotted if not used for this purpose during the allotment period.

(c) *Reserve for grant increases.* The State shall set aside not less than 5 percent of the total funds available during the priority list year for grant increases (including any funds necessary for development of municipal pretreatment programs) for projects awarded assistance under § 35.935–11. The funds reserved for this purpose shall be reallotted if not obligated. Therefore, if they are not needed for grant increases they should be released for funding additional projects before the reallotment deadline.

(d) *Reserve for step 1 and step 2 projects.* The State may (but need not) set aside up to 10 percent of the total funds available in order to provide grant assistance to step 1 and step 2 projects that may be selected for funding after the final submission of the project priority list. The funds reserved for this purpose shall be reallotted if not obligated. Therefore, they should be released for funding additional projects before the reallotment deadline.

(e) *Reserve for alternative systems for small communities.* Each State with a rural population of 25 percent or more (as determined by population estimates of the Bureau of Census) shall set aside an amount equal to 4 percent of the State's annual allotment, beginning with the fiscal year 1979 allotment. The set-aside amount shall be used for funding alternatives to conventional treatment works for small communities. The Regional Administrator may authorize, at the request of the Governor of any nonrural State, a reserve of up to 4 percent of that State's allotment for alternatives to conventional treatment works for small communities. For the purposes of this paragraph, the definition of a small community is any municipality with a population of 3,500 or less, or highly dispersed sections of larger municipalities, as determined by the Regional Administrator. In States where the reserve is mandatory, these funds shall be reallotted if not obligated during the allotment period. In States where the reserve is optional, these funds should be released for funding projects before the reallotment deadline.

UMI

§ 35.917 Facilities planning (step 1).

(a) Sections 35.917 through 35.917–9 establish the requirements for facilities plans.

(b) Facilities planning consists of those necessary plans and studies which directly relate to the construction of treatment works necessary to comply with sections 301 and 302 of the Act. Facilities planning will demonstrate the need for the proposed facilities. Through a systematic evaluation of feasible alternatives, it will also demonstrate that the selected alternative is cost-effective, i.e., is the most economical means of meeting established effluent and water quality goals while recognizing environmental and social considerations. (See appendix A to this subpart.)

(c) EPA requires full compliance with the facilities planning provisions of this subpart before award of step 2 or step 3 grant assistance. (Facilities planning initiated before May 1, 1974, may be accepted under regulations published on February 11, 1974, if the step 2 or step 3 grant assistance is awarded before April 1, 1980.)

(d) Grant assistance for step 2 or step 3 may be awarded before approval of a facilities plan for the entire geographic area to be served by the complete waste treatment system of which the proposed treatment works will be an integral part if:

(1) The Regional Administrator determines that applicable statutory requirements have been met (see §§ 35.925–7 and 35.925–8); that the facilities planning related to the proposed step 2 or step 3 project has been substantially completed; and that the step 2 or step 3 project for which grant assistance is made will not be significantly affected by the completion of the facilities plan and will be a component part of the complete system; and

(2) The applicant agrees to complete the facilities plan on a schedule the State accepts (subject to the Regional Administrator's approval); the schedule shall be inserted as a special condition in the grant agreement.

(e) Facilities planning may not be initiated before award of a step 1 grant or written approval of a plan of study (see § 35.920-3(a)(1)) accompanied by reservation of funds for a step 1 grant (see §§ 35.925-18 and 35.905). Facility planning must be based on load allocations, delineation of facility planning areas and population projection totals and disaggregations in approved water quality management (WQM) plans. (See paragraph 8a(3) of appendix A.) After October 1, 1979, the Regional Administrator shall not approve grant assistance for any project under this subpart if such facility-related information is not available in an approved WQM plan, unless the Regional Administrator determines, in writing, based on information submitted by the State or the grantee, that the facility-related information was not within the scope of the WQM work program, or that award of the grant is necessary to achieve water quality goals of the Act.

(f) If the information required as part of a facilities plan has been developed separately, the facilities plan should incorporate it by reference. Planning which has been previously or collaterally accomplished under local, State, or Federal programs will be utilized (not duplicated).

§ 35.917–1 Content of facilities plan.

Facilities planning must address each of the following to the extent considered appropriate by the Regional Administrator:

(a) A description of the treatment works for which construction drawings and specifications are to be prepared. This description shall include preliminary engineering data, cost estimates for design and construction of the treatment works, and a schedule for completion of design and construction. The preliminary engineering data may include, to the extent appropriate, information such as a schematic flow diagram, unit processes, design data regarding detention times, flow rates, sizing of units, etc.

(b) A description of the selected complete waste treatment system(s) of which the proposed treatment works is a part. The description shall cover all elements of the system, from the service area and collection sewers, through treatment, to the ultimate discharge of treated wastewaters and management and disposal of sludge. Planning area maps must include major components of existing and proposed treatment works. For individual systems, planning area maps must include those individual systems which are proposed for funding under § 35.918.

(c) Infiltration/inflow documentation in accordance with § 35.927 et seq.

(d) A cost-effectiveness analysis of alternatives for the treatment works and for the complete waste treatment system(s) of which the treatment works is a part. The selection of the system(s) and the choice of the treatment works for which construction drawings and specifications are to be prepared shall be based on the results

V 4 3 / 1 8 8 S E 2 7 7 8 UMI

of the cost-effectiveness analysis. (See appendix A to this subpart.) This analysis shall include:

(1) The relationship of the size and capacity of alternative works to the needs to be served, including reserve capacity;

(2) An evaluation of alternative flow and waste reduction measures, including nonstructural methods;

(3) An evaluation of improved effluent quality attainable by upgrading the operation and maintenance and efficiency of existing facilities as an alternative or supplement to construction of new facilities;

(4) An evaluation of the capability of each alternative to meet applicable effluent limitations. (All step 2, step 3, or step 2+3 projects shall be based on application of best practicable waste treatment technology (BPWTT), as a minimum. Where application of BPWTT would not meet water quality standards, the facilities plan shall provide for attaining such standards. Such provision shall consider the alternative of treating combined sewer overflows.);

(5) An identification of, and provision for, applying BPWTT as defined by the Administrator, based on an evaluation of technologies included under each of the following waste treatment management techniques:

(i) Biological or physical-chemical treatment and discharge to receiving waters;

(ii) Systems employing the reuse of wastewater and recycling of pollutants;

(iii) Land application techniques;

(iv) Systems including revenue generating applications; and

(v) Onsite and nonconventional systems;

(6) An evaluation of the alternative methods for the ultimate disposal of treated wastewater and sludge materials resulting from the treatment process, and a justification for the method(s) chosen;

(7) An adequate assessment of the expected environmental impact of alternatives (including sites) under part 6 of this chapter. This assessment shall be revised as necessary to include information developed during subsequent project steps;

(8) For facilities planning begun after September 30, 1978, whether or not prepared under a step 1 grant, an analysis of innovative and alternative treatment processes and techniques that reclaim and reuse water, productively recycle wastewater constituents, eliminate the discharge of pollutants, recover energy or otherwise achieve the benefits described in appendix E. The provisions of this subparagraph are encouraged in all cases. They are required in facilities planning for new treatment works and for treatment works which are being acquired, altered, modified, improved, or extended either to handle a significant increase in the volume of treated waste or to reduce significantly the pollutant discharges from the system. Where certain categories of alternative technologies may not be generally applicable because of prevailing climatic or geological conditions, a detailed analysis of these categories of alternative technologies is not required. However, the reason for such a rejection must be fully substantiated in the facilities plan;

(9) For facilities planning begun after September 30, 1978, whether or not prepared under a step 1 grant, an analysis of the primary energy requirements (operational energy inputs) for each system considered. The alternative selected shall propose adoption of measures to reduce energy consumption or to increase recovery as long as such measures are cost-effective. Where processes or techniques are claimed to be innovative technology on the basis of energy reduction criterion contained in paragraph 6e(2) of appendix E to this subpart, a detailed energy analysis shall be included to substantiate the claim to the satisfaction of the Regional Administrator.

(e) An identification of effluent discharge limitations or, where a permit has been issued, the NPDES permit number, and a brief description of how the proposed project(s) will result in compliance with the enforceable requirements of the Act.

(f) Required comments or approvals of relevant State, interstate, regional, and local agencies (see § 30.305-8).

(g) A summary of public participation in the development of the facilities plan, in accordance with part 25 of this chapter.

(h) A brief statement demonstrating that the authorities who will be implementing the plan have the necessary legal, financial, institutional, and managerial resources available to insure the construction, operation, and maintenance of the proposed treatment works.

(i) A statement specifying that the requirements of the Civil Rights Act of 1964 and of part 7 of this chapter have been met.

(j) For facilities planning begun after September 30, 1978, whether or not prepared under a step 1 grant, a description of potential opportunities for recreation, open space, and access to bodies of water analyzed in planning the proposed treatment works and the recommended actions. The facilities plan shall also describe measures taken to coordinate with Federal, State, and local recreational programs and with recreational elements of applicable approved areawide WQM plans.

(k) A municipal-pretreatment program in accordance with § 35.907.

(l) An estimate of total project costs and charges to customers, in accordance with guidance issued by the Administrator.

(m) A statement concerning the availability and estimated cost of proposed sites.

§ 35.917-2 State responsibilities.

(a) *Facilities planning areas.* Facilities planning should focus upon the geographic area to be served by the waste treatment system(s) of which the proposed treatment works will be an integral part. The facilities plan should include the area necessary to prepare an environmental assessment and to assure that the most cost-effective means of achieving the established water quality goals can be implemented. To assure that facilities planning will include the appropriate geographic areas, the State shall:

(1) Delineate, as a preliminary basis for planning, the boundaries of the planning areas. In the determination of each area, appropriate attention should be given to including the entire area where cost savings, other management advantages, or environmental gains may result from interconnection of individual waste treatment systems or collective management of such systems;

(2) Include maps, which shall be updated annually, showing the identified areas and boundary determinations, as part of the State submission under section 106 of the act;

(3) Consult with local officials in making the area and boundary determinations; and

(4) Where individual systems are likely to be cost-effective, delineate a planning area large enough to take advantage of economies of scale and efficiencies in planning and management.

(b) *Facilities planning priorities.* The State shall establish funding priorities for facilities planning in accordance with §§ 35.915 and 35.915-1.

§ 35.917-3 Federal assistance.

(a) *Eligibility.* Only an applicant which is eligible to receive grant assistance for subsequent phases of construction (steps 2 and 3) and which has the legal authority to subsequently construct and manage the facility may apply for grant assistance for step 1. If the area to be covered by the facilities plan includes more than one political jurisdiction, a grant may be awarded for a step 1 project, as appropriate, to: (1) the joint authority representing such jurisdictions, if eligible; (2) one qualified (lead agency) applicant; or (3) two or more eligible jurisdictions. After a waste treatment management agency for an area has been designated in accordance with section 208(c) of the Act (see subpart G of this part) the Regional Administrator shall not make any grant for construction of treatment works within the area except to the designated agency.

(b) *Reports.* Where a grant has been awarded for facilities planning which is expected to require more than 1 year to complete, the grantee must submit a brief progress report to the Regional Administrator at 3-month intervals. The progress report shall contain a minimum of narrative description, and shall describe progress in completing the approved schedule of specific tasks for the project.

§ 35.917-4 Planning scope and detail.

(a) Initially, the geographic scope of step 1 grant assistance shall be based on the area delineated by the State under § 35.917-2, subject to the Regional Administrator's review. The Regional Administrator may make the preliminary delineation of the boundaries of the planning area, if the State has not done so, or may revise boundaries selected by the locality or State agency, after appropriate consultation with State and local officials.

(b) Facilities planning shall be conducted only to the extent that the Regional Administrator finds necessary in order to insure that facilities for which grants are awarded will be cost-effective and environmentally sound and to permit reasonable evaluation of grant applications and subsequent preparation of designs, construction drawings, and specifications.

§ 35.917-5 Public participation.

(a) Public participation in the facilities planning process shall be consistent with part 25 of this chapter. One or more public hearings or meetings should be held within the area to obtain public advice at the beginning of the planning process. All governmental agencies and other parties which are known to be concerned or may have an interest in the plan shall be invited to participate.

(b) Before the implementing governmental units adopt the facilities plan, they must hold a public hearing. This public hearing for the facilities plan may satisfy the grantee hearing requirement of part 6 of this chapter. The Regional Administrator may require the planning entity to hold additional public hearings, if needed, to more fully discuss the plan and alternatives or to give concerned interests adequate opportunity to express their views.

(c) The time and place of the public hearing shall be conspicuously and adequately announced, generally at least 30 days in advance. In addition, a description of the water quality problems and the principal alternatives considered in the planning process shall be displayed at a convenient local site sufficiently before the hearing (approximately 15 days).

(d) Appropriate local and State agencies, State and regional clearinghouses, interested environmental groups and appropriate local public officials should receive a written notice of public hearings.

(e) A request to waive the hearings on a facilities plan may be submitted to the Regional Administrator in writing prior to submission of the plan. The Regional Administrator will act on the request within 30 days. Each request must include a brief description of the alternatives, the area that will be served, the scope and dates of meetings and hearings previously held, and the reasons the grantee feels a public hearing would not serve the public interest.

§ 35.917-6 Acceptance by implementing governmental units.

A facilities plan submitted for approval shall include adopted resolutions or, where applicable, executed agreements of the implementing governmental units, including Federal facilities, or management agencies which provide for acceptance of the plan, or assurances that it will be carried out, and statements of legal authority necessary for plan implementation. The Regional Administrator may approve any departures from these requirements before the plan is submitted.

§ 35.917-7 State review and certification of facilities plan.

Each facilities plan must be submitted to the State agency for review. The State must certify that:

(a) The plan conforms with requirements set forth in this subpart;

(b) The plan conforms with any existing final basin plans approved under section 303(e) of the Act;

(c) Any concerned 208 planning agency has been given the opportunity to comment on the plan; and

(d) The plan conforms with any waste treatment management plan approved under section 208(b) of the act.

§ 35.917-8 Submission and approval of facilities plan.

The State agency must submit the completed facilities plan for the Regional Administrator's approval. Where deficiencies in a facilities plan are discovered, the Regional Administrator shall promptly notify the State and the grantee or applicant in writing of the nature of such deficiencies and of the recommended course of action to correct such deficiencies. Approval of a plan of study or a facilities plan will not constitute an obligation of the United States for any step 2, step 3, or step 2+3 project.

§ 35.917-9 Revision or amendment of facilities plan.

A facilities plan may provide the basis for several subsequent step 2, step 3, or step 2+3 projects. A facilities plan which has served as the basis for the award of a grant for a step 2, step 3, or step 2+3 project shall be reviewed before the award of any grant for a subsequent project involving step 2 or step 3 to determine if substantial changes have occurred. If the Regional Administrator decides substantial changes have occurred which warrant revision or amendment, the plan shall be revised or amended and submitted for review in the same manner specified in this subpart.

§ 35.918 Individual systems.

(a) For references to individual systems, the following definitions apply:

(1) *Individual systems.* Privately owned alternative wastewater treatment works (including dual waterless/gray water systems) serving one or more principal residences or small commercial establishments which are neither connected into nor a part of any conventional treatment works. Normally, these are on-site systems with localized treatment and disposal of wastewater with minimal or no conveyance of untreated waste water. Limited conveyance of treated or partially treated effluents to further treatment or disposal sites can be a function of individual systems where cost-effective.

(2) *Principal residence.* Normally the voting residence, the habitation of the family or household which occupies the space for at least 51 percent of the time annually. Second homes, vacation, or recreation residences are not included in this definition. A commercial establishment with waste water flow equal to or smaller than one user equivalent (generally 300 gallons per day dry weather flows) is included.

(3) *Small commercial establishments.* Private establishments normally found in small communities such as restaurants, hotels, stores, filling stations, or recreational facilities with dry weather wastewater flows less than 25,000 gallons per day. Private, nonprofit entities such as churches, schools, hospitals, or charitable organizations are considered small commercial establishments. A commercial establishment with waste water flow equal to or smaller than one user equivalent (generally 300 gallons per day dry weather flow) shall be treated as a residence.

(4) *Conventional system.* A collection and treatment system consisting of minimum size (6 or 8 inch) gravity

V 4 3 / 1 8 8
S E 2 7 7 8

collector sewers normally with manholes, force mains, pumping and lift stations, and interceptors leading to a central treatment plant.

(5) *Alternative waste water treatment works.* A waste water conveyance and/or treatment system other than a conventional system. This includes small diameter pressure and vacuum sewers and small diameter gravity sewers carrying partially or fully treated waste water.

(b) A public body otherwise eligible for a grant under § 35.920-1 is eligible for a grant to construct privately owned treatment works serving one or more principal residences or small commercial establishments if the requirements of §§ 35.918-1, 35.918-2, and 35.918-3 are met.

(c) All individual systems qualify as alternative systems under § 35.908 and are eligible for the 4-percent set-aside (§ 35.915-1(e)) where cost-effective.

§ 35.918-1 Additional limitations on awards for individual systems.

In addition to those limitations set forth in § 35.925, the grant applicant shall:

(a) Certify that the principal residence or small commercial establishment was constructed before December 27, 1977, and inhabited or in use on or before that date;

(b) Demonstrate in the facility plan that the solution chosen is cost-effective and selected in accordance with the cost-effectiveness guidelines for the construction grants program (see appendix A to this subpart);

(c) Apply on behalf of a number of individual units located in the facility planning area;

(d) Certify that public ownership of such works is not feasible and list the reasons in support of such certification;

(e) Certify that such treatment works will be properly installed, operated, and maintained and that the public body will be responsible for such actions;

(f) Certify before the step 2 grant award that the project will be constructed and an operation and maintenance program established to meet local, State, and Federal requirements including those protecting present or potential underground potable water sources;

(g) Establish a system of user charges and industrial cost recovery in accordance with §§ 35.928 et seq., 35.929 et seq., 35.935-13, and 35.935-15;

(h) Obtain assurance (such as an easement or covenant running with the land), before the step 2 grant award, of unlimited access to each individual system at all reasonable times for such purposes as inspection, monitoring, construction, maintenance, operation, rehabilitation, and replacement. An option will satisfy this requirement if it can be exercised no later than the initiation of construction;

(i) Establish a comprehensive program for regulation and inspection of individual systems before EPA approval of the plans and specifications. Planning for this comprehensive program shall be completed as part of the facility plan. The program shall include as a minimum, periodic testing of water from existing potable water wells in the area. Where a substantial number of onsite systems exist, appropriate additional monitoring of the aquifer(s) shall be provided;

(j) Comply with all other applicable limitations and conditions which treatment works projects funded under this subpart must meet.

§ 35.918-2 Eligible and ineligible costs.

(a) Only the treatment and treatment residue disposal portions of toilets with composting tanks, oil-flush mechanisms or similar in-house systems are grant eligible.

(b) Acquisition of land in which the individual system treatment works are located is not grant eligible.

(c) Commodes, sinks, tubs, drains, and other wastewater generating fixtures and associated plumbing are not grant eligible. Modifications to homes or commercial establishments are also excluded from grant eligibility.

(d) Only reasonable costs of construction site restoration to preconstruction conditions are eligible. Costs of improvement or decoration associated with the installation of individual systems are not eligible.

(e) Conveyance pipes from wastewater generating fixtures to the treatment unit connection flange or joint are not eligible where the conveyance pipes are located on private property.

§ 35.918-3 Requirements for discharge of effluents.

Best practicable waste treatment criteria published by EPA under section 304(d)(2) of the Act shall be met for disposal of effluent on or into the soil from individual systems. Discharges to surface waters shall meet effluent discharge limitations for publicly owned treatment works.

§ 35.920 Grant application.

Grant applications will be submitted and evaluated in accordance with part 30 subpart B of this chapter.

§ 35.920-1 Eligibility.

Municipalities (see § 35.905), intermunicipal agencies, States, or interstate agencies are eligible for grant assistance.

§ 35.920-2 Procedure.

(a) Preapplication assistance, including, where appropriate, a preapplication conference, should be requested from the State agency or the appropriate EPA Regional Office for each project for which State priority has been determined. The State agency must receive an application for each proposed treatment works. The basic application shall meet the project requirements in § 35.920-3. Submissions required for subsequent related projects shall be in the form of amendments to the basic application. The grantee shall submit each application through the State agency. It must be complete (see § 35.920-3), and must relate to a project for which priority has been determined under § 35.915. If any information required by § 35.920-3 has been furnished with an earlier application, the applicant need only incorporate it by reference and, if necessary, revise such information using the previously approved application.

(b) Grant applications (and, for subsequent related projects, amendments to them) are considered received by EPA only when complete and upon official receipt of the State priority certification document (EPA form 5700-28) in the appropriate EPA Regional Office. In a State which has been delegated Federal application processing functions under § 35.912 or under subpart F of this part, applications are considered received by EPA on the date of State certification. Preliminary or partial submittals may be made; EPA may conduct preliminary processing of these submittals.

§ 35.920-3 Contents of application.

(a) *Step 1: Facilities plan and related step 1 elements.* An application for a grant for step 1 shall include:

(1) A plan of study presenting—

(i) The proposed planning area;

(ii) An identification of the entity or entities that will be conducting the planning;

(iii) The nature and scope of the proposed step 1 project and public participation program, including a schedule for the completion of specific tasks; and

(iv) An itemized description of the estimated costs for the project;

(2) Proposed subagreements, or an explanation of the intended method of awarding subagreements for performance of any substantial portion of the project work;

(3) Required comments or approvals of relevant State, local and Federal agencies, including clearinghouse requirements of Office of Management and Budget Circular A-95, as revised (see § 30.305 of this subchapter).

(b) *Step 2: Preparation of construction drawings and specifications.* Before the award of a grant or grant amendment for a step 2 project, the applicant must furnish the following:

(1) A facilities plan (including the environmental assessment portion in accordance with part 6 of this chapter) in accordance with §§ 35.917 through 35.917-9;

(2) Adequate information regarding availability of proposed site(s), if relevant;

(3) Proposed subagreements or an explanation of the intended method of awarding subagreements for performance of any substantial portion of the project work;

(4) Required comments or approvals of relevant State, local, and Federal agencies, including clearinghouse requirements of Office and Management and Budget Circular A-95, as revised (see § 30.305 of this subchapter);

(5) A value engineering (VE) commitment in compliance with § 35.926(a) for all step 2 grant applications for projects with a projected total step 3 grant eligible construction cost of $10 million or more excluding the cost for interceptor and collector sewers. For those projects requiring VE, the grantee may propose, subject to the Regional Administrator's approval, to exclude interceptor and collector sewers from the scope of the NE analysis;

(6) Proposed or executed (as determined appropriate by the Regional Administrator) intermunicipal agreements necessary for the construction and operation of the proposed treatment works, for any treatment works serving two or more municipalities;

(7) A schedule for initiation and completion of the project work (see § 35.935-9), including milestones; and

(8) Satisfactory evidence of compliance with:

(i) §§ 35.925-11, 35.929 et seq. and 35.935-13 regarding user charges;

(ii) §§ 35.925-11, 35.928 et seq. and 35.935-15, regarding industrial cost recovery, if applicable;

(iii) § 35.925-16, regarding costs allocable to Federal facilities, if applicable;

(iv) § 35.927-4 regarding a sewer use ordinance;

(v) § 30.405-2 and part 4 of this chapter, regarding compliance with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, if applicable; and,

(vi) Other applicable Federal statutory and regulatory requirements (see subpart C of part 30 of this chapter).

(9) After June 30, 1980, for grantees subject to pretreatment requirements under § 35.907(b), the items required by § 35.907(d)(1), (d)(2), and (d)(4).

(c) *Step 3. Building and erection of a treatment works.* Prior to the award of a grant or grant amendment for a step 3 project, the applicant must furnish the following:

(1) Each of the items specified in paragraph (b) of this section (in compliance with paragraph (b)(6), the final intermunicipal agreements must be furnished);

(2) Construction drawings and specifications suitable for bidding purposes;

(3) A schedule for or evidence of compliance with §§ 35.925-10 and 35.935-12 concerning an operation and maintenance program, including a preliminary plan of operation; and

(4) After December 31, 1980, the items required by § 35.907(d)(1) through (d)(9), as applicable, for grantees subject to pretreatment requirements under § 35.907(b).

(d) *Step 2+3.* Combination design and construction of a treatment works. Before the award of a grant or grant amendment for a step 2+3 project, the grantee must furnish: (1) Each of the items specified in paragraph (b) of this section, and (2) a schedule for timely submission of plans and specifications, operation and maintenance manual, user charge and industrial cost recovery systems, sewer use ordinance, and a preliminary plan of operation.

(e) *Training facility project.* An application for grant assistance for construction and support of a training facility, facilities or training programs under section 109(b) of the Act shall include:

(1) A statement concerning the suitability of the treatment works facility, facilities or training programs for training operations and maintenance personnel for treatment works throughout one or more States;

(2) A written commitment from the State agency or agencies to carry out at such facility a program of training approved by the Regional Administrator;

(3) An engineering report (required only if a facility is to be constructed) including facility design data and cost estimates for design and construction;

(4) A detailed outline of the training programs, including (for 1-, 3-, and 5-year projections):

(i) An assessment of need for training,

(ii) How the need was determined,

(iii) Who would be trained,

(iv) What curriculum and materials would be used,

(v) What type of delivery system will be used to conduct training, (i.e., State vocational education system, State environmental agency, universities or private organizations),

(vi) What resources are available for the program,

(vii) A budget breakdown on the cost of the program, and

(viii) The relationship of the facility or programs to other training programs.

§ 35.925 Limitations on award.

Before awarding initial grant assistance for any project for a treatment works through a grant or grant amendment, the Regional Administrator shall determine that all of the applicable requirements of § 35.920-3 have been met. He shall also determine the following:

§ 35.925-1 Facilities planning.

That, if the award is for step 2, step 3, or step 2+3 grant assistance, the facilities planning requirements in § 35.917 et seq. have been met.

§ 35.925-2 Water quality management plans and agencies.

That the project is consistent with any applicable water quality management (WQM) plan approved under section 208 or section 303(e) of the Act; and that the applicant is the wastewater management agency designated in any WQM plan certified by the Governor and approved by the Regional Administrator.

§ 35.925-3 Priority determination.

That such works are entitled to priority in accordance with § 35.915, and that the award of grant assistance for the proposed project will not jeopardize the funding of any treatment works of higher priority.

§ 35.925-4 State allocation.

That the award of grant assistance for a particular project will not cause the total of all grant assistance which applicants within a State received, including grant increases, to exceed the total of all allotments and reallotments available to the State under § 35.910.

§ 35.925-5 Funding and other capabilities.

That the applicant has:

(a) Agreed to pay the non-Federal project costs, and

(b) The legal, institutional, managerial, and financial capability to insure adequate construction, operation, and maintenance of the treatment works throughout the applicant's jurisdiction. (Also see § 30.340-3 of this subchapter.)

§ 35.925-6 Permits.

That the applicant has, or has applied for, the permit or permits as required by the national pollutant discharge elimination system (NPDES) with respect to existing discharges affected by the proposed project.

§ 35.925-7 Design.

That the treatment works design will be (in the case of projects involving step 2) or has been (in the case of projects for step 3) based upon:

V 4 3 / 1 8 8 S E 2 7 7 8

(a) Appendix A to this subpart, so that the design, size, and capacity of such works are cost-effective and relate directly to the needs they serve, including adequate reserve capacity;

(b) Subject to the limitations set forth in § 35.930-4, achievement of applicable effluent limitations established under the Act, or BPWTT (see § 35.917-1(d)(5)), including consideration, as appropriate, for the application of technology which will provide for the reclaiming or recycling of water or otherwise eliminate the discharge of pollutants;

(c) The sewer system evaluation and rehabilitation requirements of § 35.927; and

(d) The value engineering requirements of § 35.926 (b) and (c).

§ 35.925-8 Environmental review.

(a) That, if the award is for step 2, step 3, or step 2+3, the requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) applicable to the project step have been met. The grantee or grant applicant must prepare an adequate assessment of expected environmental impacts, consistent with the requirements of part 6 of this chapter, as part of facilities planning, in accordance with § 35.917-1(d)(7). The Regional Administrator must insure that an environmental impact statement or a negative declaration is prepared in accordance with part 6 of this chapter (particularly §§ 6.108, 6.200, 6.212, and 6.504) in conjunction with EPA review of a facility plan and issued before any award of step 2 or step 3 grant assistance.

(b) The Regional Administrator may not award step 2 or step 3 grant assistance if the grantee has not made, or agreed to make, pertinent changes in the project, in accordance with determinations made in a negative declaration or environmental impact statement. He may condition a grant to ensure that the grantee will comply, or seek to obtain compliance, with such environmental review determinations. The conditions may address secondary impacts to the extent deemed appropriate by the Regional Administrator.

§ 35.925-9 Civil rights.

That if the award of grant assistance is for a project involving step 2 or step 3, the applicable requirements of the Civil Rights Act of 1964 and part 7 of this chapter have been met.

§ 35.925-10 Operation and maintenance program.

If the award of grant assistance is for a step 3 project, that the applicant has made satisfactory provision to assure proper and efficient operation and maintenance of the treatment works (including the sewer system), in accordance with § 35.935-12, and that the State will have an effective operation and maintenance monitoring program to assure that treatment works assisted under this subpart comply with applicable permit and grant conditions.

§ 35.925-11 User charges and industrial cost recovery.

That, in the case of grant assistance for a project involving step 2 or step 3, the grantee has complied or will comply with the requirements for user charge and industrial cost recovery systems. (See §§ 35.928 et seq., 35.929 et seq., 35.935-13, and 35.935-15.)

(a) *Grants awarded before July 1, 1979.* Grantees must submit a schedule of implementation to show that their user charge and industrial cost recovery systems will be approved in accordance with the requirements of §§ 35.935-13 and 35.935-15.

(b) *Grants awarded after June 30, 1979.* The grantee's user charge and industrial cost recovery systems must be approved before the award of step 3 grant assistance.

(c) *Letters of intent.* In the case of any grant assistance for a project involving step 2 or step 3, the applicant must have received signed letters of intent from each significant industrial user stating that it will pay that portion of the grant amount allocable to the treatment of its wastes. Each such letter shall also include a statement of the industrial user's intended period of use of the treatment works. A significant industrial user is one that will contribute greater than 10 percent of the design flow or design pollutant loading of the treatment works. In addition, the applicant must agree to require all industrial users to pay that portion of the grant amount allocable to the treatment of wastes from such users.

§ 35.925-12 Property.

That the applicant has demonstrated to the satisfaction of the Regional Administrator that it has met or will met the property requirements of § 35.935-3.

§ 35.925-13 Sewage collection system.

That, if the project involves sewage collection system work, such work (a) is for the replacement or major rehabilitation of an existing sewer system under § 35.927-3(a) and is necessary to the total integrity and performance of the waste treatment works serving the community, or (b) is for a new sewer system in a community in existence on October 18, 1972, which has sufficient existing or planned capacity to adequately treat such collected sewage. Replacement or major rehabilitation of an existing sewer system may be approved only if cost-effective; the result must be a sewer system design capacity equivalent to that of the existing system plus a reasonable amount for future growth. For purposes of this section, a community would include any area with substantial human habitation on October 18, 1972, as determined by an evaluation of each tract (city blocks or parcels of 5 acres or less where city blocks do not exist). No award may be made for a new sewer system in a community in existence on October 18, 1972, unless the Regional Administrator further determines that:

(a) The bulk (generally two-thirds) of the expected flow (flow from existing plus projected future habitations) from the collection system will be for waste waters originating from the community (habitations) in existence on October 18, 1972;

(b) The collection system is cost-effective;

(c) The population density of the area to be served has been considered in determining the cost-effectiveness of the proposed project;

(d) The collection system conforms with any approved WQM plan, other environmental laws in accordance with § 35.925-14, Executive Orders on Wetlands and Floodplains and Agency policy on wetlands and agricultural lands; and

(e) The system would not provide capacity for new habitations or other establishments to be located on environmentally sensitive land such as wetlands, floodplains or prime agricultural lands. Appropriate and effective grant conditions, (e.g., restricting sewer hook-up) should be used where necessary to protect these resources from new development.

§ 35.925-14 Compliance with environmental laws.

That the treatment works will comply with all pertinent requirements of applicable Federal, State and local environmental laws and regulations. (See § 30.101 and subpart C of part 30 of this chapter and the Clean Air Act.)

§ 35.925-15 Treatment of industrial wastes.

That the allowable project costs do not include (1) costs of interceptor or collector lines constructed exclusively, or almost exclusively, to serve industrial users or (2) costs allocable to the treatment for control or removal of pollutants in wastewater introduced into the treatment works by industrial users, unless the applicant is required to remove such pollutants introduced from nonindustrial sources. The project must be included in a complete waste treatment system, a principal purpose of which project (as defined

by the Regional Administrator; see §§ 35.903(d) and 35.905) and system is the treatment of domestic wastes of the entire community, area, region or district concerned. See the pretreatment regulations in part 403 of this chapter and § 35.907.

§ 35.925-16 Federal activities.

That the allowable step 2 or step 3 project costs do not include the proportional costs allocable to the treatment of wastes from major activities of the Federal Government. A "major activity" includes any Federal facility which contributes either (a) 250,000 gallons or more per day or (b) 5 percent or more of the total design flow of waste treatment works, whichever is less.

§ 35.925-17 Retained amounts for reconstruction and expansion.

That the allowable project costs have been reduced by an amount equal to the unexpended balance of the amounts the applicant retains for future reconstruction and expansion under § 35.928-2(a)(2)(ii), together with interest earned.

§ 35.925-18 Limitation upon project costs incurred prior to award.

That project construction has not been initiated before the approved date of initiation of construction (as defined in § 35.905), unless otherwise provided in this section.

(a) *Step 1 or Step 2:* No grant assistance is authorized for step 1 or step 2 project work performed before award of a step 1 or step 2 grant. However, payment is authorized, in conjunction with the first award of grant assistance, for all preaward allowable project costs in the following cases:

(1) Step 1 work begun after the date of approval by the Regional Administrator of a plan of study, if the State requests and the Regional Administrator has reserved funds for the step 1 grant. However, the step 1 grant must be applied for and awarded within the allotment period of the reserved funds.

(2) Step 1 or step 2 work begun after October 31, 1974, but before June 30, 1975, in accordance with an approved plan of study or an approved facilities plan, as appropriate, but only if a grant is awarded before April 1, 1981.

(3) Step 1 or step 2 work begun before November 1, 1974, but only if a grant is awarded before April 1, 1980.

(b) *Step 3:* Except as otherwise provided in this paragraph, no grant assistance for a step 3 project may be awarded unless the award precedes initiation of the step 3 construction. Preliminary step 3 work, such as advance acquisition of major equipment items requiring long lead times, acquisition of an option for the purchase of eligible land, or advance construction of minor portions of treatment works, including associated engineering costs, in emergencies or instances where delay could result in significant cost increases, may be approved by the Regional Administrator after completion of environmental review, but only if (1) the applicant submits a written and adequately substantiated request for approval and (2) written approval by the Regional Administrator is obtained before initiation of the advance acquisition or advance construction.

(c) The approval of a plan of study, a facilities plan, or advance acquisition of equipment or advance construction will not constitute a commitment for approval of grant assistance for a subsequent treatment works project, but will allow payment for the previously approved costs as allowable project costs upon subsequent award of grant assistance, if requested before grant award (see § 35.945(a)). In instances where such approval is obtained, the applicant proceeds at its own risk, since payment for such costs cannot be made unless grant assistance for the project is awarded.

§ 35.925-19 [Reserved]

§ 35.925-20 Procurement.

That the applicant has complied or will comply with the applicable provisions of §§ 35.935 through 35.939 with respect to procurement actions taken before the award of step 1, 2, or 3 grant assistance, such as submission of the information required under § 35.937-6.

§ 35.925-21 Storm sewers.

That, under section 211(c) of the Act, the allowable project costs do not include costs of treatment works for control of pollutant discharges from a separate storm sewer system (as defined in § 35.905).

§ 35.926 Value Engineering (VE).

(a) *Value engineering proposal.* All step 2 grant applications for projects having a projected total step 3 grant eligible cost of $10 million or more, excluding the cost for interceptor and collector sewers, will contain a VE commitment. The VE proposal submitted during step 2 must contain enough information to determine the adequacy of the VE effort and the justification of the proposed VE fee. Essential information shall include:

(1) Scope of VE analysis;

(2) VE team and VE coordinator (names and background);

(3) Level of VE effort;

(4) VE cost estimate;

(5) VE schedule in relation to project schedule (including completion of VE analysis and submittal of VE summary reports).

(b) *Value engineering analysis.* For projects subject to the VE requirements of paragraph (a) of this section, a VE analysis of the project design shall be performed. When the VE analysis is completed, a preliminary report summarizing the VE findings and a final report describing implementation of the VE recommendations must be submitted to the project officer on a schedule approved by him.

(c) *Implementation.* For those projects for which a VE analysis has been performed in accordance with paragraph (b) of this section, VE recommendations shall be implemented to the maximum extent feasible, as determined by the grantee, subject to the approval of the EPA project officer. Rejection of any recommendation shall be on the basis of cost-effectiveness, reliability, extent of project delays, and other factors that may be critical to the treatment processes and the environmental impact of the project.

§ 35.927 Sewer system evaluation and rehabilitation.

(a) All applicants for step 2 or step 3 grant assistance must demonstrate to the Regional Administrator's satisfaction that each sewer system discharging into the treatment works project for which grant application is made is not or will not be subject to excessive infiltration/inflow. A determination of whether excessive infiltration/inflow exists may take into account, in addition to flow and related data, other significant factors such as cost-effectiveness (including the cost of substantial treatment works construction delay, see appendix A to this subpart), public health emergencies, the effects of plant bypassing or overloading, or relevant economic or environmental factors.

(b) A sewer system evaluation will generally be used to determine whether or not excessive infiltration/inflow exists. It will consist of:

(1) Certification by the State agency, as appropriate; and, when necessary,

(2) An infiltration/inflow analysis; and, if appropriate,

(3) A sewer system evaluation survey and, if appropriate, a program, including an estimate of costs, for rehabilitation of the sewer system to eliminate excessive infiltration/inflow identified in the sewer system evaluation. Information submitted to the Regional Administrator for such determination should be the minimum necessary to enable him to make a judgment.

(c) Guidelines on sewer system evaluation published by the Administrator provide further advisory information (see § 35.900(c)). Also see §§ 35.925-7(c) and 35.935-16.

V 43/188 S E 27 78

§ 35.927-1 Infiltration/inflow analysis.

(a) The infiltration/inflow analysis shall demonstrate the nonexistence or possible existence of excessive infiltration/inflow in the sewer system. The analysis should identify the presence, flow rate, and type of infiltration/inflow conditions which exist in the sewer system.

(b) For determination of the possible existence of excessive infiltration/inflow, the analysis shall include an estimate of the cost of eliminating the infiltration/inflow conditions. These costs shall be compared with estimated total costs for transportation and treatment of the infiltration/inflow. Cost-effectiveness analysis guidelines (appendix A to this subpart) should be consulted with respect to this determination.

(c) If the infiltration/inflow analysis demonstrates the existence or possible existence of excessive infiltration/inflow a detailed plan for a sewer system evaluation survey shall be included in the analysis. The plan shall outline the tasks to be performed in the survey and their estimated costs.

§ 35.927-2 Sewer system evaluation survey.

(a) The sewer system evaluation survey shall identify the location, estimated flow rate, method of rehabilitation and cost of rehabilitation versus cost of transportation and treatment for each defined source of infiltration/inflow.

(b) A report shall summarize the results of the sewer system evaluation survey. In addition, the report shall include:

(1) A justification for each sewer section cleaned and internally inspected.

(2) A proposed rehabilitation program for the sewer system to eliminate all defined excessive infiltration/inflow.

§ 35.927-3 Rehabilitation.

(a) Subject to State concurrence, the Regional Administrator may authorize the grantee to perform minor rehabilitation concurrently with the sewer system evaluation survey in any step under a grant if sufficient funding can be made available and there is no adverse environmental impact. However, minor rehabilitation work in excess of $10,000 which is not accomplished with force account labor (see § 35.936-14(a)(2)), must be procured through formal advertising in compliance with the applicable requirements of §§ 35.938 et seq. and 35.939, the statutory requirements referenced in §§ 30.415 through 30.415-4 of this subchapter, and other applicable provisions of part 30.

(b) Grant assistance for a step 3 project segment consisting of major rehabilitation work may be awarded concurrently with step 2 work for the design of the new treatment works.

(c) The scope of each treatment works project defined within the facilities plan as being required for implementation of the plan, and for which Federal assistance will be requested, shall define (1) any necessary new treatment works construction and (2) any rehabilitation work (including replacement) determined by the sewer system evaluation to be necessary for the elimination of excessive infiltration/inflow. However, rehabilitation which should be a part of the applicant's normal operation and maintenance responsibilities shall not be included within the scope of a step 3 treatment works project.

(d) Only rehabilitation of the grantee's sewage collection system is eligible for grant assistance. However, the grantee's costs of rehabilitation beyond "Y" fittings (see definition of "sewage collection system" in § 35.905) may be treated on an incremental cost basis.

§ 35.927-4 Sewer use ordinance.

Each applicant for grant assistance for a step 2 or step 3 project shall demonstrate to the satisfaction of the Regional Administrator that a sewer use ordinance or other legally binding requirement will be enacted and enforced in each jurisdiction served by the treatment works project before the completion of construction. The ordinance shall prohibit any new connections from inflow sources into the sanitary sewer portions of the sewer system and shall insure that new sewers and connections to the sewer system are properly designed and constructed.

§ 35.927-5 Project procedures.

(a) *State certification.* The State agency may (but need not) certify that excessive infiltration/inflow does or does not exist. The Regional Administrator will determine that excessive infiltration/inflow does not exist on the basis of State certification, if he finds that the State had adequately established the basis for its certification through submission of only the minimum information necessary to enable a judgment to be made. Such information could include a preliminary review by the applicant or State, for example, of such parameters as per capita design flow, ratio of flow to design flow, flow records or flow estimates, bypasses or overflows, or summary analysis of hydrological, geographical, and geological conditions, but this review would not usually be equivalent to a complete infiltration/inflow analysis. State certification must be on a project-by-project basis. If, on the basis of State certification, the Regional Administrator determines that the treatment works is or may be subject to excessive infiltration/inflow, no step 2 or step 3 grant assistance may be awarded except as paragraph (c) of this section provides.

(b) *Pre-award sewer system evaluation.* Generally, except as otherwise provided in paragraph (c) of this section, an adequate sewer system evaluation, consisting of a sewer system analysis and, if required, an evaluation survey, is an essential element of step 1 facilities planning. It is a prerequisite to the award of step 2 or 3 grant assistance. If the Regional Administrator determines through State Certification or an infiltration/inflow analysis that excessive infiltration/inflow does not exist, step 2 or 3 grant assistance may be awarded. If on the basis of State certification or the infiltration/inflow analysis, the Regional Administrator determines that possible excessive infiltration/inflow exists, an adequate sewer system evaluation survey and, if required, a rehabilitation program must be furnished, except as set forth in paragraph (c) of this section before grant assistance for step 2 or 3 can be awarded. A step 1 grant may be awarded for the completion of this segment of step 1 work, and, upon completion of step 1, grant assistance for a step 2 or 3 project (for which priority has been determined under § 35.915) may be awarded.

(c) *Exception.* If the Regional Administrator determines that the treatment works would be regarded (in the absence of an acceptable program of correction) as being subject to excessive infiltration/inflow, grant assistance may be awarded if the applicant establishes to the Regional Administrator's satisfaction that the treatment works project for which grant application is made will not be significantly changed by any subsequent rehabilitation program or will be a component part of any rehabilitated system. The applicant must agree to complete the sewer system evaluation and any resulting rehabilitation on an implementation schedule the State accepts (subject to approval by the Regional Administrator), which shall be inserted as a special condition in the grant agreement.

(d) *Regional Administrator review.* Municipalities may submit through the State agency the infiltration/inflow analysis and, when appropriate, the sewer system evaluation survey to the Regional Administrator for his review at any time before application for a treatment works grant. Based on such a review, the Regional Administrator shall provide the municipality with a written response indicating either his concurrence or nonconcurrence. In order for the survey to be an allowable cost, the Regional Administrator must concur with the sewer system evaluation survey plan before the work is performed.

§ 35.928 Requirements for an industrial cost recovery system.

(a) The Regional Administrator shall approve the grantee's industrial cost recovery system and the grantee shall implement and maintain it in accordance with § 35.935-15 and the requirements in §§ 35.928-1 through 35.928-4. The grantee shall be subject to the noncompliance provisions of § 35.965 for failure to comply.

(b) Grantees awarded step 3 grants under regulations promulgated on February 11, 1974, or grantees who obtained approval of their industrial cost recovery systems before April 25, 1978, may amend their systems to correspond to the definition of industrial users in § 35.905 or to provide for systemwide industrial cost recovery under § 35.928-1(g).

§ 35.928-1 Approval of the industrial cost recovery system.

The Regional Administrator may approve an industrial cost recovery system if it meets the following requirements:

(a) *General.* Each industrial user of the treatment works shall pay an annual amount equal to its share of the total amount of the step 1, 2, and 3 grants and any grant amendments awarded under this subpart, divided by the number of years in the recovery period. An industrial user's share shall be based on factors which significantly influence the cost of the treatment works. Volume of flow shall be a factor in determining an industrial user's share in all industrial cost recovery systems; other factors shall include strength, volume, and delivery flow rate characteristics, if necessary, to insure that all industrial users of the treatment works pay a proportionate distribution of the grant assistance allocable to industrial use.

(b) *Industrial cost recovery period.* The industrial cost recovery period shall be equal to 30 years or to the useful life of the treatment works, whichever is less.

(c) *Frequency of payment.* Except as provided in § 35.928-3, each industrial user shall pay not less often than annually. The first payment by an industrial user shall be made not later than 1 year after the user begins use of the treatment works.

(d) *Reserve capacity.* If an industrial user enters into an agreement with the grantee to reserve a certain capacity in the treatment works, the user's industrial cost recovery payments shall be based on the total reserved capacity in relation to the design capacity of the treatment works. If the discharge of an industrial user exceeds the reserved capacity in volume, strength or delivery flow rate characteristics, the user's industrial cost recovery payment shall be increased to reflect the actual use. If there is no reserve capacity agreement between the industrial user and the grantee, and a substantial change in the strength, volume, or delivery flow rate characteristics of an industrial user's discharge share occurs, the user's share shall be adjusted proportionately.

(e) *Upgrading and expansion.* (1) If the treatment works are upgraded, each existing industrial user's share shall be adjusted proportionately.

(2) If the treatment works are expanded, each industrial user's share shall be adjusted proportionately, except that a user with reserved capacity under paragraph (d) of this section shall incur no additional industrial cost recovery charges unless the user's actual use exceeded its reserved capacity.

(g) *Collection of industrial cost recovery payments.* Industrial cost recovery payments may be collected on a systemwide or on a project-by-project basis. The total amount collected from all industrial users on a systemwide basis shall equal the sum of the amounts which would be collected on a project-by-project basis.

(h) *Adoption of system.* One or more municipal legislative enactments or other appropriate authority must incorporate the industrial cost recovery system. If the project is a regional treatment works accepting waste waters from other municipalities, the subscribers receiving waste treatment services from the grantee shall adopt industrial cost recovery systems in accordance with section 204(b)(1)(B) of the Act and §§ 35.928 through 35.928-4. These industrial cost recovery systems shall also be incorporated in appropriate municipal legislative enactments or other appropriate authority of all municipalities contributing wastes to the treatment works.

(i) *Inconsistent agreements.* The grantee may have pre-existing agreements which address (1) the reservation of capacity in the grantee's treatment works or (2) the charges to be collected by the grantee in providing waste water treatment services or reserving capacity. The industrial cost recovery system shall take precedence over any terms or conditions of agreements or contracts between the grantee and industrial users which are inconsistent with the requirements of section 204(b)(1)(B) of the Act and these industrial cost recovery regulations.

§ 35.928-2 Use of industrial cost recovery payments.

(a) The grantee shall use industrial cost recovery payments received from industrial users as follows:

(1) The grantee shall return 50 percent of the amounts received from industrial users, together with any interest earned, to the U.S. Treasury annually.

(2) The grantee shall retain 50 percent of the amount recovered from industrial users.

(i) A portion of the amounts which the grantee retains may be used to pay the incremental costs of administration of the industrial cost recovery system. The incremental costs of administration are those costs remaining after deducting all costs reasonably attributable to the administration of the user charge system. The incremental costs shall be segregated from all other administrative costs of the grantee.

(ii) A minimum of 80 percent of the amounts the grantee retains after paying the incremental costs of administration, together with any interest earned, shall be used for the allowable costs (see § 35.940) of any expansion, upgrading or reconstruction of treatment works necessary to meet the requirements of the Act. The grantee shall obtain the written approval of the Regional Administrator before the commitment of the amounts retained for expansion, upgrading, or reconstruction.

(iii) The remainder of the amounts retained by the grantee may be used as the grantee sees fit, except that they may not be used for construction of industrial pretreatment facilities or rebates to industrial users for costs incurred in complying with user charge or industrial cost recovery requirements.

(b) Pending the use of industrial cost recovery payments, as described in paragraph (a) of this section, the grantee shall:

(1) Invest the amounts received in obligations of the U.S. Government or in obligations guaranteed as to principal and interest by the U.S. Government or any agency thereof; or

(2) Deposit the amounts received in accounts fully collateralized by obligations of the U.S. Government or any agency thereof.

§ 35.928-3 Implementation of the industrial cost recovery system.

(a) When a grantee's industrial cost recovery system is approved, implementation of the approved system shall become a condition of the grant.

(b) The grantee shall maintain all records that are necessary to document compliance with these regulations.

§ 35.928-4 Moratorium on industrial cost recovery payments.

(a) EPA does not require that industrial users defined in paragraphs (a) and (b) of the definition in § 35.905

V 4 3 / 1 8 8 S E 2 7 7 8 UMI

pay industrial cost recovery for charges incurred during the period after December 31, 1977, and before July 1, 1979. Any industrial cost recovery charges incurred for accounting periods or portions of periods ending before January 1, 1978, shall be paid by industrial users. These funds are to be used as described in § 35.928-2.

(b) Grantees may either defer industrial cost recovery payments, or require industrial users as defined in paragraphs (a) and (b) of the definition in § 35.905 to pay industrial cost recovery payments for the period after December 31, 1977, and before July 1, 1979. If grantees require payment, the amount held by the municipality for eventual return to the U.S. Treasury under § 35.928-2(a)(1) shall be invested as required under § 35.928-2(b) until EPA advises how such sums shall be distributed. Grantees shall implement or continue operating approved industrial cost recovery systems and maintain their activities of monitoring flows, calculating payments due, and submitting bills to industrial users informing them of their current or deferred obligation.

(c) Industrial users as defined in paragraphs (a) and (b) of the definition in § 35.905 who are served by grantees who defer payment during the 18-month period ending June 30, 1979, shall make industrial cost recovery payments for that period in a lump sum by June 30, 1980, or in equal annual installments prorated from July 1, 1979, over the remaining industrial cost recovery period.

§ 35.929 Requirements for user charge system.

The Regional Administrator shall approve the grantee's user charge system and the grantee shall implement and maintain it in accordance with § 35.935-13 and the requirements in §§ 35.929-1 through 35.929-3. The grantee shall be subject to the noncompliance provisions of § 35.965 for failure to comply.

§ 35.929-1 Approval of the user charge system.

The Regional Administrator may approve a user charge system based on either actual use under paragraph (a) of this section or ad valorem taxes under paragraph (b) of this section. The general requirements in §§ 35.929-2 and 35.929-3 must also be satisfied.

(a) *User charge system based on actual use.* A grantee's user charge system based on actual use (or estimated use) of waste water treatment services may be approved if each user (or user class) pays its proportionate share of operation and maintenance (including replacement) costs of treatment works within the grantee's service area, based on the user's proportionate contribution to the total waste water loading from all users (or user classes). To insure a proportional distribution of operation and maintenance costs to each user (or user class), the user's contribution shall be based on factors such as strength, volume, and delivery flow rate characteristics.

(b) *User charges based on ad valorem taxes.* A grantee's user charge system (or the user charge system of a subscriber, i.e., a constituent community receiving waste treatment services from the grantee) which is based on ad valorem taxes may be approved if it meets the requirements of paragraphs (b)(1) through (b)(7) of this section. If the Regional Administrator determines that the grantee did not have a dedicated ad valorem tax system on December 27, 1977, meeting the requirements of paragraphs (b)(1) through (b)(3) of this section, the grantee shall develop a user charge system based on actual use under § 35.929-1(a).

(1) The grantee (or subscriber) had in existence on December 27, 1977, a system of ad valorem taxes which collected revenues to pay the cost of operation and maintenance of waste water treatment works within the grantee's service area and has continued to use that system.

(2) The grantee (or subscriber) has not previously obtained approval of a user charge system on actual use.

(3) The system of ad valorem taxes in existence on December 27, 1977, was dedicated ad valorem tax system.

(i) A grantee's system will be considered to be dedicated if the Regional Administrator determines that the system meets all of the following criteria:

(A) The ad valorem tax system provided for a separate tax rate or for the allocation of a portion of the taxes collected for payment of the grantee's costs of waste water treatment services;

(B) The grantee's budgeting and accounting procedures assured that a specified portion of the tax funds would be used for the payment of the costs of operation and maintenance;

(C) The ad valorem tax system collected tax funds for the costs of waste water treatment services which could not be or historically were not used for other purposes; and

(D) The authority responsible for the operation and maintenance of the treatment works established the budget for the costs of operation and maintenance and used those specified amounts solely to pay the costs of operation and maintenance.

(ii) A subscriber's system based on ad valorem taxes will be considered to be dedicated if a contractual agreement or a charter established under State law existed on December 27, 1977, which required the subscriber to pay its share of the cost of waste water treatment services.

(4) A user charge system funded by dedicated ad valorem taxes shall establish, as a minimum, the classes of users listed below:

(i) Residential users, including single-family and multifamily dwellings, and small nonresidential users, including nonresidential commercial and industrial users which introduce no more than the equivalent of 25,000 gallons per day of domestic sanitary wastes to the treatment works;

(ii) Industrial and commercial users:

(A) Any nongovernmental user of publicly owned treatment works which discharges more than 25,000 gallons per day (gpd) of sanitary waste; or a volume of process waste, or combined process and sanitary waste, equivalent to 25,000 gpd of sanitary waste. The grantee, with the Regional Administrator's approval, shall define the strength of the residential discharges in terms of parameters including, as a minimum, biochemical oxygen demand (BOD) and suspended solids (SS) per volume of flow. Dischargers with a volume exceeding 25,000 gpd or the weight of BOD or SS equivalent to that weight found in 25,000 gpd of sanitary waste are considered industrial users.

(B) Any nongovernmental user of a publicly owned treatment works which discharges wastewater to the treatment works which contains toxic pollutants or poisonous solids, liquids, or gases in sufficient quantity either singly or by interaction with other wastes, to contaminate the sludge of any municipal systems, or to injure or to interfere with any sewage treatment process, or which constitutes a hazard to humans or animals, creates a public nuisance, or creates any hazard in or has an adverse effect on the waters receiving any discharge from the treatment works.

(iii) Users which pay no ad valorem taxes or receive substantial credits in paying such taxes, such as tax exempt institutions or governmental users, but excluding publicly owned facilities performing local governmental functions (e.g., city office building, police station, school) which discharge solely domestic wastes.

(5) The grantee must be prepared to demonstrate for the Regional Administrator's approval that its system of evaluating the volume, strength, and characteristics of the discharges from users or categories of users classified within the subclass of small nonresidential users is sufficient to assure that such users or the average users in such categories do not discharge either toxic pollutants or more than

the equivalent of 25,000 gallons per day of domestic wastewater.

(6) The ad valorem user charge system shall distribute the operation and maintenance costs for all treatment works in the grantee's jurisdiction to the residential and small nonresidential user class, in proportion to the use of the treatment works by this class. The proportional allocation of costs for this user class shall take into account the total waste water loading of the treatment works, the constituent elements of the wastes from this user class and other appropriate factors. The grantee may assess one ad valorem tax rate to this entire class of users or, if permitted under State law, the grantee may assess different ad valorem tax rates for the subclass of residential users and the subclass of small nonresidential users provided the operation and maintenance costs are distributed proportionately between these subclasses.

(7) Each member of the industrial and commercial user class described under paragraph (b)(4)(ii) of this section and of the user class which pays no ad valorem taxes or receives substantial credits in paying such taxes described under paragraph (b)(4)(iii) of this section shall pay its share of the costs of operation and maintenance of the treatment works based upon charges for actual use (in accordance with § 35.929-1(a)). The grantee may use its ad valorem tax system to collect, in whole or in part, those charges from members of the industrial and large commercial class where the following conditions are met:

(i) A portion or all of the ad valorem tax rate assessed to members of this class has been specifically designated to pay the costs of operation and maintenance of the treatment works, and that designated rate is uniformly applied to all members of this class;

(ii) A system of surcharges and rebates is employed to adjust the revenues from the ad valorem taxes collected from each user of this class in accordance with the rate designated under paragraph (b)(7)(i) of this section, such that each member of the class pays a total charge for its share of the costs of operation and maintenance based upon actual use.

§ 35.929-2 General requirements for all user charge systems.

User charge systems based on actual use under § 35.929-1(a) or ad valorem taxes under § 35.929-1(b) shall also meet the following requirements:

(a) *Initial basis for operation and maintenance charges.* For the first year of operation, operation and maintenance charges shall be based upon past experience for existing treatment works or some other method that can be demonstrated to be appropriate to the level and type of services provided.

(b) *Biennial review of operation and maintenance charges.* The grantee shall review not less often than every 2 years the waste water contribution of users and user classes, the total costs of operation and maintenance of the treatment works, and its approved user charge system. The grantee shall revise the charges for users or user classes to accomplish the following:

(1) Maintain the proportionate distribution of operation and maintenance costs among users and user classes as required herein;

(2) Generate sufficient revenue to pay the total operation and maintenance costs necessary to the proper operation and maintenance (including replacement) of the treatment works; and

(3) Apply excess revenues collected from a class of users to the costs of operation and maintenance attributable to that class for the next year and adjust the rate accordingly.

(c) *Toxic pollutants.* The user charge system shall provide that each user which discharges any toxic pollutants which cause an increase in the cost of managing the effluent or the sludge of the grantee's treatment works shall pay for such increased costs.

(d) *Charges for operation and maintenance for extraneous flows.* The user charge system shall provide that the costs of operation and maintenance for all flow not directly attributable to users (i.e., infiltration/inflow) be distributed among all users of the grantee's treatment works system based upon either of the following:

(1) In the same manner that it distributes the costs of operation and maintenance among users (or user classes) for their actual use, or

(2) Under a system which uses one of any combination of the following factors on a reasonable basis:

(i) Flow volume of the users;

(ii) Land area of the users;

(iii) Number of hookups or discharges to the users;

(iv) Property valuation of the users, if the grantee has a user charge system based on ad valorem taxes approved under § 35.929-1(b).

(e) *Adoption of system.* One or more municipal legislative enactments or other appropriate authority must incorporate the user charge system. If the project is a regional treatment system accepting waste waters from other municipalities, the subscribers receiving waste treatment services from the grantee shall adopt user charge systems in accordance with section 204(b)(1)(A) of the Act and §§ 35.929 through 35.929-3. These user charge systems shall also be incorporated in appropriate municipal legislative enactments or other appropriate authority of all municipalities contributing wastes to the treatment works.

(f) *Notification.* Each user charge system must provide that each user be notified, at least annually, in conjunction with a regular bill, of the rate and that portion of the user charges or ad valorem taxes which are attributable to waste water treatment services.

(g) *Inconsistent agreements.* The grantee may have preexisting agreements which address: (1) the reservation of capacity in the grantee's treatment works, or (2) the charges to be collected by the grantee in providing wastewater treatment services or reserving capacity. The user charge system shall take precedence over any terms or conditions of agreements or contracts between the grantee and users (including industrial users, special districts, other municipalities, or Federal agencies or installations) which are inconsistent with the requirements of section 204 (b)(1)(A) of the Act and these regulations.

(h) *Costs of pretreatment program.* A user charge system submitted by a municipality with an approved pretreatment program shall provide that the costs necessary to carry out the program and to comply with any applicable requirements of section 405 of the Act and related regulations are included within the costs of operation and maintenance of the system and paid through user charges, or are paid in whole or in part by other identified sources of funds.

§ 35.929-3 Implementation of the user charge system.

(a) When a grantee's user charge system is approved, implementation of the approved system shall become a condition of the grant.

(b) The grantee shall maintain such records as are necessary to document compliance with these regulations.

(c) Appendix B to this subpart contains guidelines with illustrative examples of acceptable user charge systems.

(d) The Regional Administrator may review, no more often than annually, a grantee's user charge system to assure that it continues to meet the requirements of §§ 35.929-1 through 35.929-3.

§ 35.930 Award of grant assistance.

The Regional Administrator's approval of an application or amendments to it through execution of a grant agreement (including a grant amendment), in accordance with § 30.345 of this subchapter, shall constitute a contractual obligation of the United States for the payment of the Federal share of the allowable project costs, as determined by the Regional Administrator. Information about the approved project furnished in accordance with § 35.920-3 shall be consid-

V 4 3 / 1 8 8
S E 2 7 7 8

ered incorporated in the grant agreement.

§ 35.930-1 Types of projects.

(a) The Regional Administrator is authorized to award grant assistance for the following types of projects:

(1) *Step 1.* A facilities plan and related step 1 elements (see § 35.920-3(b)), if he determines that the applicant has submitted the items required under § 35.920-3(a);

(2) *Step 2.* Construction drawings and specifications, if he determines that the applicant has submitted the items required under § 35.920-3(b);

(3) *Step 3.* Building and erection of a treatment works, if he determines that the applicant has submitted the items required under § 35.920-3(c); or

(4) *Step 2 & 3.* A combination of design (step 2) and construction (step 3) for a treatment works (see § 35.909) if he determines that the applicant has submitted the items required under § 35.920-3(d).

(b) The Regional Administrator may award Federal assistance by a grant or grant amendment from any allotment or reallotment available to a State under § 35.910 et seq. for payment of 100 percent of the cost of construction of treatment works required to train and upgrade waste treatment works operations and maintenance personnel and for the costs of other operator training programs. Costs of other operator training programs are limited to mobile training units, classroom rental, specialized instructors, and instructional material, under section 109(b) of the Act.

(1) Where a grant is made to serve two or more States, the Administrator is authorized to make an additional grant for a supplemental facility in each State. The Federal funds awarded under section 109(b) to any State for all training facilities or programs shall not exceed $500,000.

(2) Any grantee who received a grant under section 109(b) before December 27, 1977, is eligible to have the grant increased by funds made available under the Act, not to exceed 100 percent of eligible costs.

§ 35.930-2 Grant amount.

The grant agreement shall set forth the amount of grant assistance. The grant amount may not exceed the amount of funds available from the State allotments and reallotments under § 35.910 et seq. Grant payments will be limited to the Federal share of allowable project costs incurred within the grant amount or any increases effected through grant amendments (see § 35.955).

§ 35.930-3 Grant term.

The grant agreement shall establish the period within which the project must be completed, in accordance with § 30.345-1 of this chapter. This time period is subject to extension for excusable delay, at the discretion of the Regional Administrator.

§ 35.930-4 Project scope.

The grant agreement must define the scope of the project for which Federal assistance is awarded under the grant. The project scope must include a step or an identified segment. Grant assistance may be awarded for a segment of step 3 treatment works construction, when that segment in and of itself does not provide for achievement of applicable effluent discharge limitations, if:

(a) The segment is to be a component of an operable treatment works which will achieve the applicable effluent discharge limitations; and

(b) A commitment for completion of the entire treatment works is submitted to the Regional Administrator and that commitment is reflected in a special condition in the grant agreement.

§ 35.930-5 Federal share.

(a) *General.* The grant shall be 75 percent of the estimated total cost of construction that the Regional Administrator approves in the grant agreement, except as otherwise provided in paragraphs (b) and (c) of this section and in §§ 35.925-15, 35.925-16, 35.925-17, 35.930-1(b), and paragraph 10 of appendix A.

(b) *Innovative and alternative technology.* In accordance with § 35.908(b), the amount of any step 2, step 3, or step 2+3 grant assistance awarded from funds allotted for fiscal years 1979, 1980, and 1981 shall be 85 percent of the estimated cost of construction for those eligible treatment works or significant portions of them that the Regional Administrator determines meet the criteria for innovative or alternative technology in appendix E. These grants depend on the availability of funds from the reserve under § 35.915-1(b). The proportional State contribution to the non-Federal share of construction costs for 85-percent grants must be the same as or greater than the proportional State contribution (if any) to the non-Federal share of eligible construction costs for all treatment works which receive 75-percent grants in the State.

(c) *Modification and replacement of innovative and alternative projects.* In accordance with § 35.908(c) and procedures published by EPA, the Regional Administrator may award grant assistance to fund 100 percent of the eligible costs of the modification or replacement of any treatment works constructed with grant assistance based upon a Federal share of 85 percent under paragraph (b) of this section.

§ 35.930-6 Limitation on Federal share.

The grantee must exert its best efforts to perform the project work as specified in the grant agreement within the approved cost ceiling. If at any time the grantee believes that the costs which it expects to incur in the performance of the project will exceed or be substantially less than the previously approved estimated total project costs, the grantee must notify the Regional Administrator and the State agency promptly in writing. As soon as practicable, the grantee must give the revised estimate of total cost for the performance of the project (see § 30.900 of this subchapter). Delay in submission of the notice and excess cost information may prejudice approval of an increase in the grant amount. The United States shall not be obligated to pay for costs incurred in excess of the approved grant amount or any amendment to it until the State has approved an increase in the grant amount from available allotments under § 35.915 and the Regional Administrator has issued a written grant amendment under § 35.955.

§ 33.935 Grant conditions.

In addition to the EPA general grant conditions (subpart C and appendix A to part 30 of this subchapter), each treatment works grant shall be subject to the following conditions:

§ 35.935-1 Grantee responsibilities.

(a) Review or approval of project plans and specifications by or for EPA is for administrative purposes only and does not relieve the grantee of its responsibility to design, construct, operate, and maintain the treatment works described in the grant application and agreement.

(b) By its acceptance of the grant, the grantee agrees to complete the treatment works in accordance with the facilities plan, plans and specifications, and related grant documents approved by the Regional Administrator, and to maintain and operate the treatment works to meet the enforceable requirements of the Act for the design life of the treatment works. The Regional Administrator is authorized to seek specific enforcement or recovery of funds from the grantee, or to take other appropriate action (see § 35.965), if he determines that the grantee has failed to make good faith efforts to meet its obligations under the grant.

(c) The grantee agrees to pay, pursuant to section 204(a)(4) of the Act, the non-Federal costs of treatment works construction associated with the project and commits itself to complete the construction of the operable treatment works and complete waste treatment system (see definitions in § 35.905) of which the project is a part.

(d) The Regional Administrator may include special conditions in the grant or administer this subpart in the manner which he determines most appropriate to coordinate with, restate, or enforce NPDES permit terms and schedules.

§ 35.935-2 Procurement.

The grantee and party to any subagreement must comply with the applicable provisions of §§ 35.935 through 35.939 with respect to procurement for step 1, 2, or 3 work. The Regional Administrator will cause appropriate review of grantee procurement to be made.

§ 35.935-3 Property.

(a) The grantee must comply with the property provisions of § 30.810 et seq. of this subchapter with respect to all property (real and personal) acquired with project funds.

(b) With respect to real property (including easements) acquired in connection with the project, whether such property is acquired with or in anticipation of EPA grant assistance or solely with funds furnished by the grantee or others:

(1) The acquisition must be conducted in accordance with part 4 of this chapter;

(2) Any displacement of a person by or as a result of any acquisition of the real property shall be conducted under the applicable provisions of part 4 of this chapter; and

(3) The grantee must obtain (before initiation of step 3 construction), and must thereafter retain, a fee simple or such estate or interest in the site of a step 3 project, and rights of access, as the Regional Administrator finds sufficient to assure undisturbed use and possession for the purpose of construction and operation for the estimated life of the project. If a step 3 project serves more than one municipality, the grantee must insure that the participating municipalities have, or will have before the initiation of step 3 construction, such interests or rights in land as the Regional Administrator finds sufficient to assure their undisturbed utilization of the project site for the estimated life of the project.

(c) With respect to real property acquired with EPA grant assistance, the grantee must defer acquisition of such property until approval of the Regional Administrator is obtained under § 35.940-3.

§ 35.935-4 Step 2+3 projects.

A grantee which has received step 2+3 grant assistance must make submittals required by § 35.920-3(c), together with approvable user charge and industrial cost recovery systems and a preliminary plan of operation. The Regional Administrator shall give written approval of these submittals before advertising for bids on the step 3 construction portion of the step 2+3 project. The cost of step 3 work initiated before such approval is not allowable. Failure to make the above submittals as required is cause for invoking sanctions under § 35.965.

§ 35.935-5 Davis-Bacon and related statutes.

Before soliciting bids or proposals for step 3-type work, the grantee must consult with the Regional Administrator concerning compliance with Davis-Bacon and other statutes referenced in § 30.415 et seq. of this subchapter.

§ 35.935-6 Equal employment opportunity.

Contracts involving step 3-type work of $10,000 or more are subject to equal employment opportunity requirements under Executive Order 11246 (see part 8 of this chapter). The grantee must consult with the Regional Administrator about equal employment opportunity requirements before issuance of an invitation for bids where the cost of construction work is estimated to be more than $1 million or where required by the grant agreement.

§ 35.935-7 Access.

The grantee must insure that EPA and State representatives will have access to the project work whenever it is in preparation or progress. The grantee must provide proper facilities for access and inspection. The grantee must allow the Regional Administrator, the Comptroller General of the United States, the State agency, or any authorized representative, to have access to any books, documents, plans, reports, papers, and other records of the contractor which are pertinent to the project for the purpose of making audit, examination, excerpts, copies and transcriptions. The grantee must insure that a party to a subagreement will provide access to the project work, sites, documents, and records. See §§ 30.605 and 30.805 of this subchapter, clause 9 of appendix C-1 to this subpart, and clause 10 of appendix C-2 to this subpart.

§ 35.935-8 Supervision.

In the case of any project involving step 3, the grantee will provide and maintain competent and adequate engineering supervision and inspection of the project to ensure that the construction conforms with the approved plans and specifications.

§ 35.935-9 Project initiation and completion.

(a) The grantee agrees to expeditiously initiate and complete the step 1, 2, or 3 project, or cause it to be constructed and completed, in accordance with the grant agreement and application, including the project progress schedule, approved by the Regional Administrator. Failure of the grantee to promptly initiate and complete step 1, 2, or 3 project construction may result in annulment or termination of the grant.

(b) No date reflected in the grant agreement, or in the project completion schedule, or extension of any such date, shall modify any compliance date established in an NPDES permit. It is the grantee's obligation to request any required modification of applicable permit terms or other enforceable requirements.

(c) The invitation for bids for step 3 project work is expected to be issued promptly after grant award. Generally this action should occur within 90 to 120 days after award unless compliance with State or local laws requires a longer period of time. The Regional Administrator shall annul or terminate the grant if initiation of all significant elements of step 3 construction has not occurred within 12 months of the award for the step 3 project (or approval of plans and specifications, in the case of a step 2+3 project). (See definition of "initiation of construction" under "construction" in § 35.905.) However, the Regional Administrator may defer (in writing) the annulment or termination for not more than 6 additional months if:

(1) The grantee has applied for and justified the extension in writing to the Regional Administrator;

(2) The grantee has given written notice of the request for extension to the NPDES permit authority;

(3) The Regional Administrator determines that there is good cause for the delay in initiation of project construction; and

(4) The State agency concurs in the extension.

§ 35.935-10 Copies of contract documents.

In addition to the notification of project changes under § 30.900 of this chapter, a grantee must promptly submit to the Regional Administrator a copy of any prime contract or modification of it and of revisions to plans and specifications.

§ 35.935-11 Project changes.

(a) In addition to the notification of project changes required under § 30.900-1 of this chapter, the Regional Administrator's and (where necessary) the State agency's prior written approval is required for:

(1) Project changes which may—

(i) Substantially alter the design and scope of the project;

(ii) Alter the type of treatment to be provided;

V 4 3 / 1 8 8

(iii) Substantially alter the location, size, capacity, or quality of any major item of equipment; or

(iv) Increase the amount of Federal funds needed to complete the project.

However, prior EPA approval is not required for changes to correct minor errors, minor changes, or emergency changes; and

(2) Subagreement amendments amounting to more than $100,000 for which EPA review is required under §§ 35.937-6(b) and 35.938-5 (d) and (g).

(b) No approval of a project change under § 30.900 of this chapter shall obligate the United States to any increase in the amount of the grant or grant payments unless a grant increase is also approved under § 35.955. This does not preclude submission or consideration of a request for a grant amendment under § 30.900-1 of this chapter.

§ 35.935-12 Operation and maintenance.

(a) The grantee must make provision satisfactory to the Regional Administrator for assuring economic and effective operation and maintenance of the treatment works in accordance with a plan of operation approved by the State water pollution control agency or, as appropriate, the interstate agency.

(b) As a minimum, the plan shall include provision for:

(1) An operation and maintenance manual for each facility;

(2) An emergency operating and response program;

(3) Properly trained management, operation and maintenance personnel;

(4) Adequate budget for operation and maintenance;

(5) Operational reports;

(6) Provisions for laboratory testing and monitoring adequate to determine influent and effluent characteristics and removal efficiencies as specified in the terms and conditions of the NPDES permit;

(7) An operation and maintenance program for the sewer system.

(c) Except as provided in paragraphs (d) and (e) of this section, the Regional Administrator shall not pay—

(1) More than 50 percent of the Federal share of any step 3 project unless the grantee has furnished a draft of the operation and maintenance manual for review, or adequate evidence of timely development of such a draft; or

(2) More than 90 percent of the Federal share unless the grantee has furnished a satisfactory final operation and maintenance manual.

(d) In projects where segmenting of an operable treatment works has occurred, the Regional Administrator shall not pay—

(1) More than 50 percent of the Federal share of the total of all interdependent step 3 segments unless the grantee has furnished a draft of the operation and maintenance manual for review, or adequate evidence of timely development of such a draft, or

(2) More than 90 percent of the Federal share of the total of all interdependent step 3 segments unless the grantee has furnished a satisfactory final operation and maintenance manual.

(e) In multiple facility projects where an element or elements of the treatment works are operable components and have been completely constructed and placed in operation by the grantee, the Regional Administrator shall not make any additional step 3 payment unless the operation and maintenance manual (or those portions associated with the operating elements of the treatment works) submitted by the grantee has been approved by the Regional Administrator.

§ 35.935-13 Submission and approval of user charge systems.

The grantee shall obtain the approval of the Regional Administrator of its system of user charges. (See also § 35.929 et seq.)

(a) *Step 3 grant assistance awarded under regulations promulgated on February 11, 1974.* (1) Except as paragraph (a)(2) of this section provides, the grantee must obtain the Regional Administrator's approval of its system of user charges based on actual use which complies with § 35.929-1(a). The Regional Administrator shall not pay more than 50 percent of the Federal share of any step 3 project unless the grantee has submitted adequate evidence of timely development of its system of user charges nor shall the Regional Administrator pay more than 80 percent of the Federal share unless he has approved the system.

(2) A grantee which desires approval of a user charge system based on ad valorem taxes in accordance with § 35.929-1(b) shall submit to the Regional Administrator by July 24, 1978, evidence of compliance of its system with the criteria in § 35.929-1 (b)(1) through (b)(3). As soon as possible, the Regional Administrator shall advise the grantee if the system complies with § 35.929-1 (b)(1). The Regional Administrator's determination may be appealed in accordance with Subpart J, "Disputes," of part 30 of this subchapter.

(i) *Grantees whose ad valorem tax systems meet the criteria of § 35.929-1 (b)(1) through (b)(3).* Any step 3 payments held by the Regional Administrator at 50 percent or 80 percent for failure to comply with the requirement for development of a user charge system shall be released. However, the grantee shall obtain approval of its user charge system by June 30, 1979 or no further payments will be made until the sytem is approved and the grants may be terminated or annulled.

(ii) *Grantees whose ad valorem tax systems do not meet the criteria of § 35.929-1 (b)(1) through (b)(3).* Step 3 grants will continue to be administered in accordance with paragraph (a)(1) of this section.

(b) *Step 3 grant assistance awarded after April 24, 1978, but before July 1, 1979.* The grantee must obtain approval of its user charge system based on actual use or ad valorem taxes before July 1, 1979. The Regional Administrator may not make any payments on these grants, may terminate or annul these grants, and may not award any new step 3 grants to the same grantee after June 30, 1979, if the user charge system has not been approved. The Regional Administrator shall approve the grantee's user charge or ad valorem tax rates and the ordinance required under § 35.929-2(e) and the grantee shall enact them before the treatment works constructed with the grant are placed in operation.

(c) *Step 3 grant assistance awarded after June 30, 1979.* The Regional Administrator may not award step 3 grant assistance unless he has approved the user charge system based on actual use or ad valorem taxes. The Regional Administrator shall approve the grantee's user charge or ad valorem tax rates and the ordinance required under § 35.929-2(e) and the grantee shall enact them before the treatment works constructed with the grant are placed in operation.

§ 35.935-14 Final inspection.

The grantee shall notify the Regional Administrator through the State agency of the completion of step 3 project construction. The Regional Administrator shall cause final inspection to be made within 60 days of the receipt of the notice. When final inspection is completed and the Regional Administrator determines that the treatment works have been satisfactorily constructed in accordance with the grant agreement, the grantee may make a request for final payment under § 35.945(e).

§ 35.935-15 Submission and approval of industrial cost recovery system.

The grantee shall obtain the approval of the Regional Administrator of its system of industrial cost recovery. (See also § 35.928 et seq.)

(a) *Step 3 grant assistance awarded under regulations promulgated on February 11, 1974.* (1) The grantee must obtain the approval of the Regional Administrator for the system of industrial cost recovery (see § 35.928 et seq). The Regional Administrator shall not pay more than 50 percent of the Federal share of any step 3 project unless the grantee has submitted adequate evidence of timely development of its system of industrial cost recovery nor shall the Regional Administrator pay more than 80 percent of the Federal share unless he has approved the system.

(2) Payments of grantees held under paragraph (a)(1) of this section shall be released after April 25, 1978. However, the grantee shall obtain approval of its industrial cost recovery system by June 30, 1979, or no further payments will be made until the system is approved.

(b) *Step 3 grant assistance awarded after April 24, 1978, but before July 1, 1979.* The grantee must obtain approval of its industrial cost recovery system under these regulations, except for the ordinance and rates, before July 1, 1979. The Regional Administrator shall not make any payments on these grants and shall not award any new step 3 grants to the same grantee after June 30, 1979, if the industrial cost recovery system, except for the ordinance and rates, has not been approved. The grantee shall enact the ordinance required under § 35.928-1(h) and submit the ordinance and industrial cost recovery system rates to the Regional Administrator who must approve the ordinance before the treatment works are placed in operation.

(c) *Step 3 grant assistance awarded after June 30, 1979.* The grantee must obtain the Regional Administrator's approval of the industrial cost recovery system under these regulations, except for the ordinance and rates, before grant award. The grantee shall enact the ordinance required under § 35.928-1(h) and submit the ordinance and industrial cost recovery system rates to the Regional Administrator who must approve the ordinance before the treatment works are placed in operation.

§ 35.935-16 Sewer use ordinance and evaluation/rehabilitation program.

(a) The grantee must obtain the approval of the Regional Administrator of its sewer use ordinance under § 35,927-4.

(b) Except as provided in paragraphs (c) and (d) of this section, the Regional Administrator shall not pay more than 80 percent of the Federal share of any step 3 project unless he has approved the grantee's sewer use ordinance, and the grantee is complying with the sewer system evaluation and rehabilitation schedule incorporated in the grant agreement under § 35.927-5.

(c) In projects where segmenting of an operable treatment works has occurred, the Regional Administrator shall not pay more than 80 percent of the Federal share of the total of all interdependent step 3 segments unless he has approved the grantee's sewer use ordinance and the grantee is complying with the sewer system evaluation and rehabilitation schedule incorporated in the grant agreement under § 35.927-5.

(d) In mulitple facility projects where an element or elements of the treatment works are operable components and have been completely constructed and placed in operation by the grantee, the Regional Administrator shall not make any additional step 3 payment unless he has approved the grantee's sewer use ordinance and the grantee is complying with the sewer system evaluation and rehabilitation schedule incorporated in the grant agreement under § 35.927-5.

§ 35.935-17 Training facility.

If assistance has been provided for the construction of a treatment works required to train and upgrade waste treatment personnel under §§ 35.930-1(b) and 35.920-3(e), the grantee must operate the treatment works as a training facility for a period of at least 10 years after construction is completed.

§ 35.935-18 Value engineering.

A grantee must comply with the applicable value engineering requirements of § 35.926.

§ 35.935-19 Municipal pretreatment program.

The grantee must obtain approval by the Regional Administrator of the municipal pretreatment program in accordance with part 403 of this chapter. Prior to granting such approval, the Regional Administrator shall not pay more than 90 percent of the Federal share of any step 3 project or cost of step 3 work under a step 2+3 project awarded after October 1, 1978, except that for any such grant assistance awarded before December 31, 1980, the Regional Administrator may continue grant payments if he determines that significant progress has been made (and is likely to continue) toward the development of an approvable pretreatment program and that withholding of grant payments would not be in the best interest of protecting the environment.

§ 35.935-20 Innovative processes and techniques.

If the grantee receives 85-percent grant assistance for innovative processes and techniques, the following conditions apply during the 5-year period following completion of construction:

(a) The grantee shall permit EPA personnel and EPA designated contractors to visit and inspect the treatment works at any reasonable time in order to review the operation of the innovative processes or techniques.

(b) If the Regional Administrator requests, the grantee will provide EPA with a brief written report on the construction, operation, and costs of operation of the innovative processes or techniques.

§ 35.936 Procurement.

(a) §§ 35.936 through 35.939 set forth policies and minimum standards for procurement of architectural or engineering services as defined in § 35.937 and construction contracts as described in § 35.938 by grantees under all steps of grants for construction of treatment works. Acquisition of real property shall be conducted in accordance with part 4 subpart F of this chapter. Other procurements of goods and services shall be conducted in accordance with the provisions of part 33 of this subchapter.

(b) This subpart does not apply to work beyond the scope of the project for which grant assistance is awarded (i.e., ineligible work).

§ 35.936-1 Definitions.

As used in §§ 35.936 through 35.939, the following words and terms shall have the meaning set forth below. All terms not defined herein shall have the meaning given to them in § 30.135 of this subchapter, and in § 35.905.

(a) *Grant agreement.* The written agreement and amendments thereto between EPA and a grantee in which the terms and conditions governing the grant are stated and agreed to by both parties under § 30.345 of this subchapter.

(b) *Subagreement.* A written agreement between an EPA grantee and another party (other than another public agency) and any tier of agreement thereunder for the furnishing of services, supplies, or equipment necessary to complete the project for which a grant was awarded, including contracts and subcontracts for personal and professional services, agreements with consultants and purchase orders, but excluding employment agreements subject to State or local personnel systems. (See §§ 35.937-12 and 35.938-9 regarding subcontracts of any tier under prime contracts for architectural or engineering services or construction awarded by the grantee—generally applicable only to subcontracts in excess of $10,000.)

(c) *Contractor.* A party to whom a subagreement is awarded.

(d) *Grantee.* Any municipality which has been awarded a grant for construction of a treatment works under this subpart. In addition, where appropriate in §§ 35.936 through 35.939, grantee may also refer to an applicant for a grant.

SEP 27 1978 LIMI

V 4 3 / 1 8 8
S E 2 7 7 8

§ 35.936–2 Grantee procurement systems; State or local law.

(a) *Grantee procurement systems.* Grantees may use their own procurement systems and procedures which meet applicable requirements of State, territorial, or local laws and ordinances to the extent that these systems and procedures do not conflict with the minimum requirements of this subchapter.

(b) *State or local law.* The Regional Administrator will generally rely on a grantee's determination regarding the application of State or local law to issues which are primarily determined by such law. The Regional Administrator may request the grantee to furnish a written legal opinion adequately addressing any such legal issues. The Regional Administrator will accept the grantee's determination unless he finds that it does not have a rational basis.

(c) *Preference.* State or local laws, ordinances, regulations or procedures which effectively give local or in-State bidders or proposers preference over other bidders or proposers shall not be employed in evaluating bids or proposals for subagreements under a grant.

§ 35.936–3 Competition.

EPA's policy is to encourage free and open competition appropriate to the type of project work to be performed.

§ 35.936–4 Profits.

Only fair and reasonable profits may be earned by contractors in subagreements under EPA grants. See § 35.937-7 for discussion of profits under negotiated subagreements for architectural or engineering services, and § 35.938-5(f) for discussion of profits under negotiated change orders to construction contracts. Profit included in a formally advertised, competitively bid, fixed price construction contract awarded under § 35.938 is presumed reasonable.

§ 35.936–5 Grantee responsibility.

(a) The grantee is responsible for the administration and successful accomplishment of the project for which EPA grant assistance is awarded. The grantee is responsible for the settlement and satisfaction of all contractual and administrative issues arising out of subagreements entered into under the grant (except as § 35.936-6 provides) in accordance with sound business judgment and good administrative practice. This includes issuance of invitations for bids or requests for proposals, selection of contractors, award of contracts, protests of award, claims, disputes, and other related procurement matters.

(b) With the prior written approval of the Regional Administrator, the grantee may retain an individual or firm to perform these functions. Such an agent acts for the grantee and is subject to the provisions of this subpart which apply to the grantee.

(c) In accordance with § 35.970, a grantee may request technical and legal assistance from the Regional Administrator for the administration and enforcement of any contract related to treatment works that are assisted by an EPA grant. The Regional Administrator's assistance does not release the grantee from those responsibilities identified in paragraph (a) of this section.

§ 35.936–6 EPA responsibility.

Generally, EPA will only review grantee compliance with Federal requirements applicable to a grantee's procurement. However, where specifically provided in this chapter (e.g., §§ 8.8(j) and 35.939), EPA is responsible for determining compliance with Federal requirements.

§ 35.936–7 Small and minority business.

Grantees shall make positive efforts to use small business and minority-owned business sources of supplies and services. Such efforts should allow these sources the maximum feasible opportunity to compete for subagreements to be performed using Federal grant funds.

§ 35.936–8 Privity of contract.

Neither EPA nor the United States shall be a party to any subagreement (including contracts or subcontracts), nor to any solicitation or request for proposals. (See §§ 35.937-9(a), 35.938-4(c)(5), and appendixes C-1 and C-2 to this subpart for the required solicitation statement and contract provisions.) However, in accordance with § 35.970 the Regional Administrator, if a grantee requests, may provide technical and legal assistance in the administration and enforcement of any contract related to treatment works for which an EPA grant was made.

§ 35.936–9 Disputes.

Only an EPA grantee may initiate and prosecute an appeal to the Administrator under the disputes provision of a grant with respect to its subagreements (see subpart J of part 30 of this subchapter). Neither a contractor nor a subcontractor may prosecute an appeal under the disputes provisions of a grant in its own name or interest.

§ 35.936–10 Federal procurement regulations.

Regulations applicable to direct Federal procurement shall not be applicable to subagreements under grants except as stated in this subchapter.

§ 35.936–11 General requirements for subagreements.

Subagreements must:

(a) Be necessary for and directly related to the accomplishment of the project work;

(b) Be in the form of a bilaterally executed written agreement (except for small purchases of $10,000 or less);

(c) Be for monetary or in-kind consideration; and

(d) Not be in the nature of a grant or gift.

§ 35.936–12 Documentation.

(a) Procurement records and files for purchases in excess of $10,000 shall include the following:

(1) Basis for contractor selection;

(2) Justification for lack of competition if competition appropriate to the type of project work to be performed is required but is not obtained; and

(3) Basis for award cost or price.

(b) The grantee or contractors of the grantee must retain procurement documentation required by § 30.805 of this subchapter and by this subpart, including a copy of each subagreement, for the period of time specified in § 30.805. The documentation is subject to all the requirements of § 30.805. A copy of each subagreement must be furnished to the project officer upon request.

§ 35.936–13 Specifications.

(a) *Nonrestrictive specifications.* (1) No specification for bids or statement of work in connection with such works shall be written in such a manner as to contain proprietary, exclusionary, or discriminatory requirements other than those based upon performance, unless such requirements are necessary to test or demonstrate a specific thing or to provide for necessary interchangeability of parts and equipment, or at least two brand names or trade names of comparable quality or utility are listed and are followed by the words "or equal." If brand or trade names are specified, the grantee must be prepared to identify to the Regional Administrator or in any protest action the salient requirements (relating to the minimum needs of the project) which must be met by any offeror. The single base bid method of solicitation for equipment and parts for determination of a low, responsive bidder may not be utilized. With regard to materials, if a single material is specified, the grantee must be prepared to substantiate the basis for the selection of the material.

(2) Project specifications shall, to the extent practicable, provide for maximum use of structures, machines, products, materials, construction methods, and equipment which are readily available through competitive procurement, or through standard or

proven production techniques, methods, and processes, except to the extent that innovative technologies may be used under § 35.908 of this subpart.

(b) *Sole source restriction.* A specification shall not require the use of structures, materials, equipment, or processes which are known to be available only from a sole source, unless the Regional Administrator determines that the grantee's engineer has adequately justified in writing that the proposed use meets the particular project's minimum needs or the Regional Administrator determines that use of a single source is necessary to promote innovation (see § 35.908). Sole source procurement must be negotiated under § 33.500 et seq., including full cost review.

(c) *Experience clause restriction.* The general use of experience clauses requiring equipment manufacturers to have a record of satisfactory operation for a specified period of time or of bonds or deposits to guarantee replacement in the event of failure is restricted to special cases where the grantee's engineer adequately justifies any such requirement in writing. Where such justification has been made, submission of a bond or deposit shall be permitted instead of a specified experience period. The period of time for which the bond or deposit is required should not exceed the experience period specified.

(d) *Buy American.* (1) *Definitions.* As used in this subpart, the following definitions apply:

(i) "Construction material" means any article, material, or supply brought to the construction site for incorporation in the building or work.

(ii) "Component" means any article, material, or supply directly incorporated in construction material.

(iii) "Domestic construction material" means an unmanufactured construction material which has been mined or produced in the United States, or a manufactured construction material which has been manufactured in the United States if the cost of its components which are mined, produced, or manufactured in the United States exceeds 50 percent of the cost of all its components.

(iv) "Nondomestic construction material" means a construction material other than a domestic construction material.

(2) *Domestic preference.* Domestic construction material may be used in preference to nondomestic materials if it is priced no more than 6 percent higher than the bid or offered price of the nondomestic materials including all costs of delivery to the construction site, any applicable duty, whether or not assessed. Computations will normally be based on costs on the date of opening of bids or proposals.

(3) *Waiver.* The Regional Administrator may waive the Buy American provision based upon those factors that he considers relevant, including:

(i) Such use is not in the public interest;

(ii) The cost is unreasonable;

(iii) The Agency's available resources are not sufficient to implement the provision, subject to the Deputy Administrator's concurrence;

(iv) The articles, materials, or supplies of the class or kind to be used or the articles, materials, or supplies from which they are manufactured are not mined, produced, or manufactured in the United States in sufficient and reasonably available commercial quantities or satisfactory quality for the particular project; or

(v) Application of this provision is contrary to multilateral government procurement agreements, subject to the Deputy Administrator's concurrence.

(4) *Contract provision.* Notwithstanding any other provision of this subpart, bidding documents and construction contracts for any step 3 project for which the Regional Administrator receives an application after February 1, 1978, shall contain the "Buy American" provision which requires use of domestic construction materials in preference to nondomestic construction materials.

(5) *Substitution.* If a nondomestic construction material or component is proposed for use, a bidder or contractor may substitute an approved domestic material or component (at no change in price), if necessary to comply with this subsection.

(6) *Procedures.* The Regional Administrator may use the appropriate procedures of § 35.939 in making the determinations with respect to this subsection. He shall generally observe the Buy American procedures, regulations, precedents, and requirements of other Federal departments and agencies.

§ 35.936–14 Force account work.

(a) A grantee must secure the project officer's prior written approval for use of the force account method for (1) any step 1 or step 2 work in excess of $10,000; (2) any sewer rehabilitation work in excess of $25,000 performed during step 1 (see § 35.927-3(a)); or (3) any step 3 work in excess of $25,000; unless the grant agreement stipulates the force account method.

(b) The project officer's approval shall be based on the grantee's demonstration that he possesses the necessary competence required to accomplish such work and that (1) the work can be accomplished more economically by the use of the force account method, or (2) emergency circumstances dictate its use.

(c) Use of the force account method for step 3 construction shall generally be limited to minor portions of a project.

§ 35.936–15 Limitations on subagreement award.

No subagreement shall be awarded:

(a) To any person or organization which does not meet the responsibility standards in § 30.340-2 (a) through (d) and (g) of this subchapter;

(b) If any portion of the contract work not exempted by § 30.420-3(b) of this subchapter will be performed at a facility listed by the Director, EPA Office of Federal Activities, in violation of the antipollution requirements of the Clean Air Act and the Clean Water Act, as set forth in § 30.420-3 of this subchapter and 40 CFR part 15 (Administration of the Clean Air Act and the Federal Water Pollution Control Act with respect to Federal contracts, grants, or loans); or

(c) To any person or organization which is ineligible under the conflict of interest requirements of § 30.420-4 of this subchapter.

§ 35.936–16 Code or standards of conduct.

(a) The grantee must maintain a code or standards of conduct which shall govern the performance of its officers, employees, or agents in the conduct of project work, including procurement and expenditure of project funds. The grantee's officers, employees, or agents shall neither solicit nor accept gratuities, favors, or anything of monetary value from contractors or potential contractors. The grantee must avoid personal or organizational conflicts of interest or noncompetitive procurement practices which restrict or eliminate competition or otherwise restrain trade.

(b) To the extent permissible by State or local law or formal institutional requirements and procedures, the standards shall provide for penalties, sanctions, or other adequate disciplinary actions to be instituted for project-related violations of law or of the code or standards of conduct by either the grantee officers, employees, or agents, or by contractors or their agents.

(c) The grantee must inform the project officer in writing of each serious allegation of a project-related violation and of each known or proven project-related violation of law or code or standards of conduct, by its officers, employees, contractors, or by their agents. The grantee must also inform the project officer of the prosecutive or disciplinary action the grantee takes, and must cooperate with Federal officials in any Federal prosecutive or disciplinary action. Under § 30.245

V 4 3 / 1 8 8

of this subchapter, the project officer must notify the Director, EPA Security and Inspection Division, of all notifications from the grantee.

(d) EPA shall cooperate with the grantee in its disciplinary or prosecutive actions taken for any apparent project-related violations of law or of the grantee's code or standards of conduct.

§ 35.936-17 Fraud and other unlawful or corrupt practices.

All procurements under grants are covered by the provisions of § 30.245 of this subchapter relating to fraud and other unlawful or corrupt practices.

§ 35.936-18 Negotiation of subagreements.

(a) Formal advertising, with adequate purchase descriptions, sealed bids, and public openings shall be the required method of procurement unless negotiation under paragraph (b) of this section is necessary to accomplish sound procurement.

(b) All negotiated procurement shall be conducted in a manner to provide to the maximum practicable extent open and free competition appropriate to the type of project work to be performed. The grantee is authorized to negotiate subagreements in accordance with the applicable procedures of this subchapter (see §§ 35.937 et seq. and 35.500 et seq.) if any of the following conditions exist:

(1) Public exigency will not permit the delay incident to formally advertised procurement (e.g., an emergency procurement).

(2) The aggregate amount involved does not exceed $10,000 (see § 35.936-19 for small purchases).

(3) The material or service to be procured is available from only one person or entity. If the procurement is expected to aggregate more than $10,000, the grantee must document its file with a justification of the need for noncompetitive procurement, and provide such documentation to the project officer on request.

(4) The procurement is for personal or professional services (including architectural or engineering services) or for any service that a university or other educational institution may render.

(5) No responsive, responsible bids at acceptable price levels have been received after formal advertising, and, with respect to procurement under § 35.938-4, the Regional Administrator's prior written approval has been obtained.

(6) The procurement is for materials or services where the prices are established by law.

(7) The procurement is for technical items or equipment requiring standardization and interchangeability of parts with existing equipment.

(8) The procurement is for experimental, developmental or research services.

§ 35.936-19 Small purchases.

(a) A small purchase is the procurement of materials, supplies, and services when the aggregate amount involved in any one transaction does not exceed $10,000. The small purchase limitation of $10,000 applies to the aggregate total of an order, including all estimated handling and freight charges, overhead, and profit to be paid under the order. In arriving at the aggregate amount involved in any one transaction, all items which should properly be grouped together must be included. Reasonable competition shall be obtained.

(b) Subagreements for small purchases need not be in the form of a bilaterally executed written agreement. Where appropriate, unilateral purchase orders, sales slips, memoranda of oral price quotations, and the like may be used to minimize paperwork. Retention in the purchase files of these documents and of written quotations received, or references to catalogs or printed price lists used, will suffice as the record supporting the price paid.

§ 35.936-20 Allowable costs.

(a) Incurring costs under subagreements which are not awarded or administered in compliance with this part or Part 33 of this subchapter, as appropriate, shall be cause for disallowance of those costs.

(b) Appropriate cost principles which apply to subagreements under EPA grants are identified in § 30.710 of this subchapter. Under that section, the contractor's actual costs, direct and indirect, eligible for Federal participation in a cost reimbursement contract shall be those allowable under the applicable provisions of 41 CFR 1-15.2 (Principles and Procedures for Use in Cost-Reimbursement Type Supply and Research Contracts With Commercial Organizations) and 1-15.4 (Construction and Architect-Engineer Contracts).

(c) Reasonable costs of compliance with the procurement and project management requirements of these regulations are allowable costs of administration under the grant. Costs of announcement, selection, negotiation, and cost review and analysis in connection with procurement of architectural or engineering services are allowable, even when conducted before award of the grant. Legal and engineering costs which a grantee is required to incur in a protest action under § 35.939 are allowable.

§ 35.936-21 Delegation to State agencies; certification of procurement systems.

(a) Under § 35.912 and subpart F of this part, the Regional Administrator may delegate authority to a State agency to review and certify the technical and administrative adequacy of procurement documentation required under these sections.

(b) If a State agency believes that State laws which govern municipal procurement include the same requirements or operate to provide the same protections as do §§ 35.936, 35.937 and 35.938, the State may request the Administrator to approve the State system instead of the procedures of these sections. EPA shall review the State system to determine its adequacy.

(c) If a State agency determines that an applicant's procurement ordinances or applicable statutes include the same requirements or operate to provide the same protections as do §§ 35.936, 35.937 and 35.938, the State may certify (accompanied by appropriate documentation) the adequacy of the municipality's ordinances and statutes and request the Administrator to approve the municipality's system instead of the procedures of these sections. EPA shall conduct or may request the State to conduct a review of the municipality's system to determine its adequacy.

§ 35.936-22 Bonding and insurance.

(a) On contracts for the building and erection of treatment works or contracts for sewer system rehabilitation exceeding $100,000, each bidder must furnish a bid guarantee equivalent to 5 percent of the bid price. In addition, the contractor awarded a construction contract for the building and erection of treatment works or sewer system rehabilitation must furnish performance and payment bonds, each of which shall be in an amount not less than 100 percent of the contract price. Construction contracts less than $100,000 shall be subject to State and local requirements for bid guarantees, performance bonds, and payment bonds. For contracts or subcontracts in excess of $100,000 the Regional Administrator may authorize the grantee to use its own bonding policies and requirements if he determines, in writing, that the Government's interest is adequately protected.

(b) Contractors should obtain such construction insurance (e.g., fire and extended coverage, workmen's compensation, public liability and property damage, and "all risk" builder's risk or installation floater coverage) as is required by State or local law or the grantee or as is customary and appropriate. Under the Flood Disaster Protection Act of 1973, a contractor must purchase flood insurance to cover his risk of loss if the grantee has not purchased the insurance (see § 30.405-10 of this subchapter).

§ 35.937 Subagreements for architectural or engineering services.

(a) *Applicability.* Except as § 35.937-2 otherwise provides, the provisions of §§ 35.937 through 35.937-11 apply to all subagreements of grantees for architectural or engineering services where the aggregate amount of services involved is expected to exceed $10,000. The provisions of §§ 35.937-2, 35.937-3, and 35.937-4 are not required, but may be followed, where the population of the grantee municipality is 25,000 or less according to the most recent U.S. census. When $10,000 or less of services (e.g., for consultant or consultant subcontract services) is required, the small purchase provisions of § 35.936-19 apply.

(b) *Policy.* Step 1, step 2, or administration or management of step 3 project work may be performed by negotiated procurement of architectural or engineering services. The Federal Government's policy is to encourage public announcement of the requirements for personal and professional services, including engineering services. Subagreements for engineering services shall be negotiated with candidates selected on the basis of demonstrated competence and qualifications for the type of professional services required and at fair and reasonable prices. All negotiated procurement shall be conducted in a manner that provides to the maximum practicable extent, open and free competition. Nothing in this subpart shall be construed as requiring competitive bids or price competition in the procurement of architectural or engineering services.

(c) *Definitions.* As used in §§ 35.937 through 35.937-11 the following words and terms mean:

(1) *Architectural or engineering services.* Those professional services associated with research, development, design and construction, alteration, or repair of real property, as well as incidental services that members of these professions and those in their employ may logically or justifiably perform, including studies, investigations, surveys, evaluations, consultations, planning, programing, conceptual designs, plans and specifications, cost estimates, inspections, shop drawing reviews, sample recommendations, preparation of operation and maintenance manuals, and other related services.

(2) *Engineer.* A professional firm or individual engaged to provide services as defined in paragraph (c)(1) of this section by subagreement under a grant.

§ 35.937-1 Type of contract (subagreement).

(a) *General.* Cost-plus-percentage-of-cost and percentage-of-construction-cost contracts are prohibited. Cost reimbursement, fixed price, or per diem contracts or combinations of these may be negotiated for architectural or engineering services. A fixed price contract is generally used only when the scope and extent of work to be performed is clearly defined. In most other cases, a cost reimbursement type of contract is more appropriate. A per diem contract may be used if no other type of contract is appropriate. An incentive fee may be used if the grantee submits an adequate independent cost estimate and price comparison under § 35.937-6.

(b) *Cost reimbursement contracts.* Each cost reimbursement contract must clearly establish a cost ceiling which the engineer may not exceed without formally amending the contract and a fixed dollar profit which may not be increased except in case of a contract amendment to increase the scope of work.

(c) *Fixed price contracts.* An acceptable fixed price contract is one which establishes a guaranteed maximum price which may not be increased unless a contract amendment increases the scope of work.

(d) *Compensation procedures.* If, under either a cost reimbursement or fixed price contract, the grantee desires to use a multiplier type of compensation, all of the following must apply:

(1) The multiplier and the portions of the multiplier allocable to overhead and allocable to profit have been specifically negotiated;

(2) The portion of the multiplier allocable to overhead includes only allowable items of cost under the cost principles of 41 CFR 1-15.2 and 1-15.4;

(3) The portions of the multiplier allocable to profit and allocable to overhead have been separately identified in the contract; and

(4) The fixed price contract includes a guaranteed maximum price for completion of the specifically defined scope of work; the cost reimbursement contract includes a fixed dollar profit which may not be increased except in case of a contract amendment which increases the scope of work.

(e) *Per diem contracts.* A per diem agreement expected to exceed $10,000 may be utilized only after a determination that a fixed price or cost reimbursement type contract is not appropriate. Per diem agreements should be used only to a limited extent, e.g., where the first task under a step 1 grant involves establishing the scope and cost of succeeding step 1 tasks, or for incidental services such as expert testimony or intermittent professional or testing services. (Resident engineer and resident inspection services should generally be compensated under paragraph (b) or (c) of this section.) Cost and profit included in the per diem rate must be specifically negotiated and displayed separately in the engineer's proposal. The contract must clearly establish a price ceiling which may not be exceeded without formally amending the contract.

§ 35.937-2 Public notice.

(a) *Requirement.* Adequate public notice as paragraphs (a)(1) or (a)(2) of this section provide, must be given of the requirement for architectural or engineering services for all subagreements with an anticipated price in excess of $25,000 except as paragraph (b) of this section provides. In providing public notice under paragraphs (a)(1) and (a)(2) of this section, grantees must comply with the policies in §§ 35.936-2(c), 35.936-3, and 35.936-7.

(1) *Public announcement.* A notice of request for qualifications should be published in professional journals, newspapers, or publications of general circulation over a reasonable area and, in addition, if desired, through posted public notices or written notification directed to interested person, firms, or professional organizations inviting the submission of statements of qualifications. The announcement must clearly state the deadline and place for submission of qualification statements.

(2) *Prequalified list.* As an alternative to publishing public notice as in paragraph (b) of this section, the grantee may secure or maintain a list of qualified candidates. The list must:

(i) Be developed with public notice procedures as in paragraph (a)(1) of this section;

(ii) Provide for continuous updating; and,

(iii) Be maintained by the grantee or secured from the State or from a nearby political subdivision.

(b) *Exceptions.* The public notice requirement of this section and the related requirements of §§ 35.937-3 and 35.937-4 are not applicable, but may be followed, in the cases described in paragraphs (b)(1) through (b)(3) of this section. All other appropriate provisions of this section, including cost review and negotiation of price, apply.

(1) Where the population of the grantee municipality is 25,000 or less according to the latest U.S. census.

(2) For step 2 or step 3 of a grant, if:

(i) The grantee is satisfied with the qualifications and performance of an engineer who performed all or any part of the step 1 or step 2 work;

(ii) The engineer has the capacity to perform the subsequent steps; and

(iii) The grantee desires the same engineer to provide architectural or

SEP 27 1978

V 4 3 / 1 8 8
SE 27 78

engineering services for the subsequent steps.

(3) For subsequent segments of design work under one grant if:

(i) A single treatment works is segmented into two or more step 3 projects;

(ii) The step 2 work is accordingly segmented so that the initial contract for preparation of construction drawings and specifications does not cover the entire treatment works to be built under one grant; and

(iii) The grantee desires to use the same engineering firm that was selected for the initial segment of step 2 work for subsequent segments.

§ 35.937-3 Evaluation of qualifications.

(a) The grantee shall review the qualifications of firms which responded to the announcement or were on the prequalified list and shall uniformly evaluate the firms.

(b) Qualifications shall be evaluated through an objective process (e.g., the appointment of a board or committee which, to the extent practicable, should include persons with technical skills).

(c) Criteria which should be considered in the evaluation of candidates for submission of proposals should include:

(1) Specialized experience and technical competence of the candidate or firm and its personnel (including a joint venture, association or professional subcontract), considering the type of services required and the complexity of the project;

(2) Past record of performance on contracts with the grantee, other government agencies or public bodies, and with private industry, including such factors as control of costs, quality of work, and ability to meet schedules;

(3) The candidate's capacity to perform the work (including any specialized services) within the time limitations, considering the firm's current and planned workload;

(4) The candidate's familiarity with types of problems applicable to the project; and

(5) Avoidance of personal and organizational conflicts of interest prohibited under State and local law and § 35.936-16.

§ 35.937-4 Solicitation and evaluation of proposals.

(a) Requests for professional services proposals must be sent to no fewer than three candidates who either responded to the announcement or who were selected from the prequalified list. If, after good faith effort to solicit qualifications in accordance with § 35.937-2, fewer than three qualified candidates respond, all qualified candidates must be provided requests for proposals.

(b) Requests for professional services proposals must be in writing and must contain the information necessary to enable a prospective offeror to prepare a proposal properly. The request for proposals must include the solicitation statement in § 35.937-9(a) and must inform offerors of the evaluation criteria, including all those in paragraph (c) of this section, and of the relative importance attached to each criterion (a numerical weighted formula need not be utilized).

(c) All proposals submitted in response to the request for professional services proposals must be uniformly evaluated. Evaluation criteria shall include, as a minimum, all criteria stated in § 35.937-3(c) of this subpart. The grantee shall also evaluate the candidate's proposed method to accomplish the work required, including, where appropriate, demonstrated capability to explore and develop innovative or advanced techniques and designs. The grantee's evaluation shall comply with § 35.936-7.

(d) Proposals shall be evaluated through an objective process (e.g., the appointment of a board or committee which, to the extent practicable, should include persons with technical skills. Oral (including telephone) or written interviews should be conducted with top rated proposers, and information derived therefrom shall be treated on a confidential basis, except as required to be disclosed under State or local law or to EPA under § 35.937-6.

(e) At no point during the procurement process shall information be conveyed to any candidate which would provide an unfair competitive advantage.

§ 35.937-5 Negotiation.

(a) Grantees are responsible for negotiation of their contracts for architectural or engineering services. Contract procurement including negotiation may be performed by the grantee directly or by another non-Federal governmental body, person or firm retained for the purpose. Contract negotiations may include the services of technical, legal, audit, or other specialists to the extent appropriate.

(b) Negotiations may be conducted in accordance with State or local requirements, as long as they meet the minimum requirements as set forth in this section. In the absence of State or local statutory or code requirements, negotiations may be conducted by the grantee under procedures it adopts based upon Pub. L. 92-582, 40 U.S.C. 541-544 (commonly known as the "Brooks Bill") or upon the negotiation procedures of 40 CFR 33.510-2.

(c) The object of negotiations with any candidate shall be to reach agreement on the provisions of the proposed contract. The grantee and the candidate shall discuss, as a minimum:

(1) The scope and extent of work and other essential requirements;

(2) Identification of the personnel and facilities necessary to accomplish the work within the required time, including where needed, employment of additional personnel, subcontracting, joint ventures, etc.;

(3) Provision of the required technical services in accordance with regulations and criteria established for the project; and

(4) A fair and reasonable price for the required work, to be determined in accordance with the cost and profit considerations set forth in §§ 35.937-6 and 35.937-7, and payment provisions.

§ 35.937-6 Cost and price considerations.

(a) *General.* EPA policy is that the cost or price of all subagreements and amendments to them must be considered. For each subagreement in excess of $10,000 but not greater than $100,000, grantees shall use the procedures described in paragraph (c) below or an equivalent process.

(b) *Subagreements over $100,000.* For each subagreement expected to exceed $100,000, or for two subagreements which aggregate more than $100,000 awarded to an engineer for work on one step, or where renegotiation or amendment of a subagreement will result in a contract price in excess of $100,000, or where the amendment itself is in excess of $100,000, the provisions of this paragraph (b) shall apply.

(1) The candidate(s) selected for negotiation shall submit to the grantee for review sufficient cost and pricing data as described in paragraph (c) of this section to enable the grantee to ascertain the necessity and reasonableness of costs and amounts proposed, and the allowability and eligibility of costs proposed.

(2) The grantee shall submit to the EPA Project Officer for review (i) documentation of the public notice of need for architectural or engineering services, and selection procedures used, in those cases where §§ 35.937-2, 35.937-3 and 35.937-4 are applicable; (ii) the cost and pricing data the selected engineer submitted; (iii) a certification of review and acceptance of the selected engineer's cost or price; and (iv) a copy of the proposed subagreement. The EPA Project Officer will review the complete subagreement action and approve the grantee's compliance with appropriate procedures before the grantee awards the subagreement. The grantee shall be notified upon completion of review.

(c) *Cost review.* (1) The grantee shall review proposed subagreement costs.

(2) As a minimum, proposed subagreement costs shall be presented on

EPA form 5700-41 on which the selected engineer shall certify that the proposed costs reflect complete, current, and accurate cost and pricing data applicable to the date of anticipated subagreement award.

(3) In addition to the specific elements of cost, the estimated amount of profit shall be set forth separately in the cost summary for fixed price contracts and a maximum total dollar amount of profit shall be set forth separately in the cost summary for cost reimbursement contracts.

(4) The grantee may require more detailed cost data than the form requires in order to substantiate the reasonableness of proposed subagreement costs. EPA normally requires more detailed documentation only when the selected engineer is unable to certify that the cost and pricing data used are complete, current, and accurate. EPA may, on a selected basis, perform a pre-award cost analysis on any subagreement. Normally, a provisional overhead rate will be agreed upon before contract award.

(5) Appropriate consideration should be given to § 30.710 of this subchapter which contains general cost principles which must be used to determine the allowability of costs under grants. The engineer's actual costs, direct and indirect, allowable for Federal participation shall be determined in accordance with the terms and conditions of the subagreement, this subpart and the cost principles included in 41 CFR 1-15.2 and 1-15.4. Examples of cost which are not allowable under those cost principles include entertainment, interest on borrowed capital and bad debts.

(6) The engineer shall have an accounting system which accounts for costs in accordance with generally accepted accounting principles. This system shall provide for the identification, accumulation, and segregation of allowable and unallowable project costs among projects. Allowable project costs shall be determined in accordance with paragraph (c)(5) of this section. The engineer must propose and account for costs in a manner consistent with his normal accounting procedures.

(7) Subagreements awarded on the basis of review of a cost element summary and a certification of complete, current, and accurate cost and pricing data shall be subject to downward renegotiation or recoupment of funds where the Regional Administrator determines that such certification was not based on complete, current, and accurate cost and pricing data or not based on costs allowable under the appropriate FPR cost principles (41 CFR 1-15.2 and 1-15.4) at the time of award.

§ 35.937-7 Profit.

The objective of negotiations shall be the exercise of sound business judgment and good administrative practice including the determination of a fair and reasonable profit based on the firm's assumption of risk and input to total performance and not merely the application of a predetermined percentage factor. For the purpose of subagreements under EPA grants, profit is defined as the net proceeds obtained by deducting all allowable costs (direct and indirect) from the price. (Because this definition of profit is based on Federal procurement principles, it may vary from the firm's definition of profit for other purposes.) Profit on a subagreement and each amendment to a subagreement under a grant should be sufficient to attract engineers who possess talents and skills necessary to the accomplishment of project objectives, and to stimulate efficient and expeditious completion of the project. Where cost review is performed, the grantee should review the estimate of profit as he reviews all other elements of price.

§ 35.937-8 Award of subagreement.

After the close of negotiations and after review and approval by the EPA Project Officer if required under § 35.937-6(b), the grantee may award the contract. Unsuccessful candidates should be notified promptly.

§ 35.937-9 Required solicitation and subagreement provisions.

(a) *Required solicitation statement.* Requests for qualifications or proposals must include the following statement, as well as the proposed terms of the subagreement.

> Any contract awarded under this request for (qualifications/professional proposals) is expected to be funded in part by a grant from the United States Environmental Protection Agency. This procurement will be subject to regulations contained in 40 CFR 35.936, 35.937, and 35.939. Neither the United States nor the United States Environmental Protection Agency is nor will be a party to this request for (qualifications/professional proposals) or any resulting contract.

(b) *Content of subagreement.* Each subagreement must adequately define:

(1) The scope and extent of project work;

(2) The time for performance and completion of the contract work, including where appropriate, dates for completion of significant project tasks;

(3) Personnel and facilities necessary to accomplish the work within the required time;

(4) The extent of subcontracting and consultant agreements; and

(5) Payment provisions in accordance with § 35.937-10.

If any of these elements cannot be defined adequately for later tasks or steps at the time of contract execution, the contract should not include the subsequent tasks or steps at that time.

(c) *Required subagreement provisions.* Each consulting engineering contract must include the provisions set forth in appendix C-1 to this subpart.

§ 35.937-10 Subagreement payments—architectural or engineering services.

The grantee shall make payment to the engineer in accordance with the payment schedule incorporated in the engineering agreement or in accordance with paragraph 7b of appendix C-1 to this subpart. Any retainage is at the option of the grantee. No payment request made by the Engineer under the agreement may exceed the estimated amount and value of the work and services performed.

§ 35.937-11 Applicability to existing contracts.

Some negotiated engineering subagreements already in existence may not comply with the requirements of §§ 35.936 and 35.937. Appendix D to this subpart contains EPA policy with respect to these subagreements and must be implemented before the grant award action for the next step under the grant.

§ 35.937-12 Subcontracts under subagreements for architectural or engineering services.

(a) Neither award and execution of subcontracts under a prime contract for architectural or engineering services, nor the procurement and negotiation procedures used by the engineer in awarding such subcontracts are required to comply with any of the provisions, selection procedures, policies or principles set forth in § 35.936 or § 35.937 except as provided in paragraphs (b), (c), and (d) of this section.

(b) The award or execution of subcontracts in excess of $10,000 under a prime contract for architectural or engineering services and the procurement procedures used by the engineer in awarding such subcontracts must comply with the following:

(1) § 35.936-2 (Grantee procurement systems; State or local law);

(2) § 35.936-7 (Small and minority business);

(3) § 35.936-15 (Limitations on subagreement award);

(4) § 35.936-17 (Fraud and other unlawful or corrupt practices);

(5) § 35.937-6 (Cost and price considerations);

(6) § 35.937-7 (Profit);

(7) Prohibition of percentage-of-construction-cost and cost-plus-percent-

V 4 3 / 1 8 8 SEP 27 78

age-of-cost contracts (see § 35.937-1); and

(8) Applicable subagreement clauses (see appendix C-1, clauses 9, 17, 18; note clause 10).

(c) The applicable provisions of this subpart shall apply to lower tier subagreements where an engineer acts as an agent for the grantee under a management subagreement (see § 35.936-5(b)).

(d) If an engineer procures items or services (other than architectural or engineering services) which are more appropriately procured by formal advertising or competitive negotiation procedures, the applicable procedures of § 35.938 or of Part 33 shall be observed.

§ 35.938 Construction contracts (subagreements) of grantees.

§ 35.938-1 Applicability.

This section applies to construction contracts (subagreements) in excess of $10,000 awarded by grantees for any step 3 project.

§ 35.938-2 Performance by contract.

The project work shall be performed under one or more contracts awarded by the grantee to private firms, except for force account work authorized by § 35.936-14.

§ 35.938-3 Type of contract.

Each contract shall be a fixed price (lump sum or unit price or a combination of the two) contract, unless the Regional Administrator gives advance written approval for the grantee to use some other acceptable type of contract. The cost-plus-percentage-of-cost contract shall not be used in any event.

§ 35.938-4 Formal advertising.

Each contract shall be awarded after formal advertising, unless negotiation is permitted in accordance with § 35.936-18. Formal advertising shall be in accordance with the following:

(a) *Adequate public notice.* The grantee will cause adequate notice to be given of the solicitation by publication in newspapers or journals of general circulation beyond the grantee's locality (statewide, generally), inviting bids on the project work, and stating the method by which bidding documents may be obtained or examined. Where the estimated cost of step 3 construction is $10 million or more, the grantee must generally publish the notice in trade journals of nationwide distribution. The grantee should, in addition, solicit bids directly from bidders if it maintains a bidders list.

(b) *Adequate time for preparing bids.* Adequate time, generally not less than 30 days, must be allowed between the date when public notice under paragraph (a) of this section is first published and the date by which bids must be submitted. Bidding documents (including specifications and drawings) shall be available to prospective bidders from the date when such notice is first published.

(c) *Adequate bidding documents.* The grantee shall prepare a reasonable number of bidding documents (invitations for bids) and shall furnish them upon request on a first-come, first-served basis. The grantee shall maintain a complete set of bidding documents and shall make them available for inspection and copying by any party. The bidding documents shall include:

(1) A complete statement of the work to be performed, including necessary drawings and specifications, and the required completion schedule. (Drawings and specifications may be made available for inspection and purchase, instead of being furnished.);

(2) The terms and conditions of the contract to be awarded;

(3) A clear explanation of the method of bidding and the method of evaluation of bid prices, and the basis and method for award of the contract;

(4) Responsibility requirements or criteria which will be employed in evaluating bidders;

(5) The following statement:

> Any contract or contracts awarded under this invitation for bids are expected to be funded in part by a grant from the U.S. Environmental Protection Agency. Neither the United States nor any of its departments, agencies or employees is or will be a party to this invitation for bids or any resulting contract. This procurement will be subject to regulations contained in 40 CFR 35.936, 35.938, and 35.939.;

and

(6) A copy of §§ 35.936, 35.938, and 35.939.

(d) *Sealed bids.* The grantee shall provide for bidding by sealed bid and for the safeguarding of bids received until public opening.

(e) *Addenda to bidding documents.* If a grantee desires to amend any part of the bidding documents (including drawings and specifications) during the period when bids are being prepared, the addenda shall be communicated in writing to all firms which have obtained bidding documents in time to be considered before the bid opening time.

(f) *Bid modifications.* A firm which has submitted a bid shall be allowed to modify or withdraw its bid before the time of bid opening.

(g) *Public opening of bids.* The grantee shall provide for a public opening of bids at the place, date and time announced in the bidding documents.

(h) *Award to the low, responsive, responsible bidder.* (1) After bids are opened, the grantee shall evaluate them in accordance with the methods and criteria set forth in the bidding documents.

(2) The grantee may reserve the right to reject all bids. Unless all bids are rejected for good cause, award shall be made to the low, responsive, responsible bidder.

(3) If the grantee intends to make the award to a firm which did not submit the lowest bid, he shall prepare a written statement before any award, explaining why each lower bidder was deemed nonresponsible or nonresponsive, and shall retain it in his files.

(4) State or local laws, ordinances, regulations or procedures which are designed or which operate to give local or in-State bidders preference over other bidders shall not be employed in evaluating bids.

(5) If an unresolved procurement review issue or a protest relates only to award of a subcontract or procurement of a subitem under the prime contract, and resolution of that issue or protest is unduly delaying performance of the prime contract, the Regional Administrator may authorize award and performance of the prime contract before resolution of the issue or protest, if the Regional Administrator determines that:

(i) Resolution of the protest—

(A) Will not affect the placement of the prime contract bidders; and

(B) Will not materially affect initial performance of the prime contract; and that

(ii) Award of the prime contract—

(A) Is in the Government's best interest;

(B) Will not materially affect resolution of the protest; and

(C) Is not barred by State law.

(6) The grantee shall not reject a bid as nonresponsive for failure to list or otherwise indicate the selection of a subcontractor(s) or equipment, unless the grantee has unambiguously stated in the solicitation documents that such failure to list shall render a bid nonresponsive and shall cause rejection of a bid.

§ 35.938-5 Negotiation of contract amendments (change orders).

(a) *Grantee responsibility.* Grantees are responsible for negotiation of construction contract change orders. This function may be performed by the grantee directly or, if authorized, by his engineer. During negotiations with the contractor the grantee shall:

(1) Make certain that the contractor has a clear understanding of the scope and extent of work and other essential requirements;

(2) Assure that the contractor demonstrates that he will make available or will obtain the necessary personnel, equipment and materials to accomplish the work within the required time; and

(3) Assure a fair and reasonable price for the required work.

(b) *Changes in contract price or time.* The contract price or time may be changed only by a change order. When negotiations are required, they shall be conducted in accordance with paragraph (c) or (d) of this section, as appropriate. The value of any work covered by a change order or of any claim for increase or decrease in the contract price shall be determined by the method set forth in paragraphs (b)(1) through (b)(3) of this section which is most advantageous to the grantee.

(1) Unit prices.

(i) Original bid items. Unit prices previously approved are acceptable for pricing changes of original bid items. However, when changes in quantities exceed 15 percent of the original bid quantity and the total dollar change of that bid item is significant, the grantee shall review the unit price to determine if a new unit price should be negotiated.

(ii) New items. Unit prices of new items shall be negotiated.

(2) A lump sum to be negotiated.

(3) Cost reimbursement—the actual cost for labor, direct overhead, materials, supplies, equipment, and other services necessary to complete the work plus an amount to be agreed upon to cover the cost of general overhead and profit to be negotiated.

(c) For each change order not in excess of $100,000 the contractor shall submit sufficient cost and pricing data to the grantee to enable the grantee to determine the necessity and reasonableness of costs and amounts proposed, and the allowability and eligibility of costs proposed.

(d) For each change order in excess of $100,000, the contractor shall submit to the grantee for review sufficient cost and pricing data as described in paragraphs (d)(1) through (d)(6) of this section to enable the grantee to ascertain the necessity and reasonableness of costs and amounts proposed, and the allowability and eligibility of costs proposed.

(1) As a minimum, proposed change order costs shall be presented on EPA Form 5700-41 on which the contractor shall certify that proposed costs reflect complete, current, and accurate cost and pricing data applicable to the date of the change order.

(2) In addition to the specific elements of cost, the estimated amount of profit shall be set forth separately in the cost summary for fixed price change orders and a specific total dollar amount of profit will be set forth separately in the cost summary for cost reimbursement change orders.

(3) The grantee may require more detailed cost data than the form requires in order to substantiate the reasonableness of proposed change order costs. EPA normally requires more detailed documentation only when the contractor is unable to certify that proposed change order cost data are complete, current, and accurate. EPA may, on a selected basis, perform a detailed cost analysis on any change order.

(4) Appropriate consideration should be given to § 30.710 of this subchapter which contains general cost principles which must be used for the determination and allowability of costs under grants. The contractor's actual costs, direct and indirect, allowable for Federal participation shall be determined in accordance with the terms and conditions of the contract, this subpart and the cost principles included in 41 CFR 1-15.2 and 1-15.4. Examples of costs which are not allowable under those cost principles include, but are not limited to, entertainment, interest on borrowed capital and bad debts.

(5) For costs under cost reimbursement change orders, the contractor shall have an accounting system which accounts for such costs in accordance with generally accepted accounting principles. This system shall provide for the identification, accumulation and segregation of allowable and unallowable change orders. Allowable change order costs shall be determined in accordance with paragraph (d)(4) of this section. The contractor must propose and account for such costs in a manner consistent with his normal accounting procedures.

(6) Change orders awarded on the basis of review of a cost element summary and a certification of complete, current, and accurate cost and pricing data shall be subject to downward renegotiation or recoupment of funds where subsequent audit substantiates that such certification was not based on complete, current and accurate cost and pricing data and on costs allowable under the appropriate FPR cost principles (41 CFR 1-15.2 and 1-15.4) at the time of change order execution.

(e) *EPA review.* In addition to the requirements of §§ 35.935-10 (copies of contract documents) and 35.935-11 (project changes), the grantee shall submit, before the execution of any change order in excess of $100,000, to the EPA Project Officer for review:

(1) The cost and pricing data the contractor submitted;

(2) A certification of review and acceptance of the contractor's cost or price; and

(3) A copy of the proposed change order.

(f) *Profit.* The objective of negotiations shall be the exercise of sound business judgment and good administrative practice including the determination of a fair and reasonable profit based on the contractor's assumption of risk and input to total performance and not merely the application of a predetermined percentage factor. For the purpose of negotiated change orders to construction contracts under EPA grants, profit is defined as the net proceeds obtained by deducting all allowable costs (direct and indirect) from the price. The grantee should review the estimate or profit as he reviews all other elements of price.

(g) *Related work.* Related work shall not be split into two amendments or change orders merely to keep it under $100,000 and thereby avoid the requirements of paragraph (d) of this section. For change orders which include both additive and deductive items:

(1) If any single item (additive or deductive) exceeds $100,000, the requirements of paragraph (d) of this section shall be applicable.

(2) If no single additive or deductive item has a value of $100,000, but the total price of the change order is over $100,000, the requirements of paragraph (d) of this section shall be applicable.

(3) If the total of additive items of work in the change order exceeds $100,000, or the total of deductive items of work in the change order exceeds $100,000, and the net price of the change order is less than $100,000, the requirements of paragraph (d) of this section shall apply.

§ 35.938-6 Progress payments to contractors.

(a) *Policy.* EPA policy is that, except as State law otherwise provides, grantees should make prompt progress payments to prime contractors and prime contractors should make prompt progress payment to subcontractors and suppliers for eligible construction, material, and equipment costs, including those of undelivered specifically manufactured equipment, incurred under a contract under an EPA construction grant.

(b) *Conditions of progress payments.* For purposes of this section, progress payments are defined as follows:

(1) Payments for work in place.

(2) Payments for materials or equipment which have been delivered to the construction site, or which are stockpiled in the vicinity of the construction site, in accordance with the terms of the contract, when conditional or final acceptance is made by or for the grantee. The grantee shall assure that items for which progress payments have been made are adequately insured and are protected through appropriate security measures. Costs of such insurance and security are al-

V 43/188 SE 27 78

lowable costs in accordance with § 35.940.

(3) Payments for undelivered specifically manufactured items or equipment (excluding off-the-shelf or catalog items), as work on them progresses. Such payments must be made if provisions therefor are included in the bid and contract documents. Such provisions may be included at the option of the grantee only when all of the following conditions exist:

(i) The equipment is so designated in the project specifications;

(ii) The equipment to be specifically manufactured for the project could not be readily utilized on nor diverted to another job; and

(iii) A fabrication period of more than 6 months is anticipated.

(c) *Protection of progress payments made for specifically manufactured equipment.* The grantee will assure protection of the Federal interest in progress payments made for items or equipment referred to in paragraph (b)(3) of this section. This protection must be acceptable to the grantee and must take the form of:

(1) Securities negotiable without recourse, condition or restrictions, a progress payment bond, or an irrevocable letter of credit provided to the grantee through the prime contractor by the subcontractor or supplier; and,

(2) For items or equipment in excess of $200,000 in value which are manufactured in a jurisdiction in which the Uniform Commercial Code is applicable, the creation and perfection of a security interest under the Uniform Commercial Code reasonably adequate to protect the interests of the grantee.

(d) *Limitations on progress payments for specifically manufactured equipment.* (1) Progress payments made for specifically manufactured equipment or items shall be limited to the following:

(i) A first payment upon submission by the prime contractor of shop drawings for the equipment or items in an amount not exceeding 15 percent of the contract or item price plus appropriate and allowable higher tier costs; and

(ii) Subsequent to the grantee's release or approval for manufacture, additional payments not more frequently than monthly thereafter up to 75 percent of the contract or item price plus appropriate and allowable higher tier costs. However, payment may also be made in accordance with the contract and grant terms and conditions for ancillary onsite work before delivery of the specifically manufactured equipment or items.

(2) In no case may progress payments for undelivered equipment or items under paragraph (d)(1)(i) or (d)(1)(ii) of this section be made in an amount greater than 75 percent of the cumulative incurred costs allocable to contract performance with respect to the equipment or items. Submission of a request for any such progress payments must be accompanied by a certification furnished by the fabricator of the equipment or item that the amount of progress payment claimed constitutes not more than 75 percent of cumulative incurred costs allocable to contract performance, and in addition, in the case of the first progress payment request, a certification that the amount claimed does not exceed 15 percent of the contract or item price quoted by the fabricator.

(3) As used in this section, the term "costs allocable to contract performance" with respect to undelivered equipment or items includes all expenses of contract performance which are reasonable, allocable to the contract, consistent with sound and generally accepted accounting principles and practices consistently applied, and which are not excluded by the contract.

(e) *Enforcement.* A subcontractor or supplier which is determined by the Regional Administrator to have frustrated the intent of the provisions regarding progress payments for major equipment or specifically manufactured equipment through intentional forfeiture of its bond or failure to deliver the equipment may be determined nonresponsible and ineligible for further work under EPA grants.

(f) *Contract provisions.* Where applicable, appropriate provisions regarding progress payments must be included in each contract and subcontract. Grantees must use clauses acceptable to the EPA Regional Administrator.

(g) *Implementation.* The foregoing progress payments policy should be implemented in invitations for bids under step 3 grants. If provision for progress payments is made after contract award, it must be for consideration that the grantee deems adequate.

§ 35.938-7 Retention from progress payments.

(a) The grantee may retain a portion of the amount otherwise due the contractor. Except as State law otherwise provides, the amount the grantee retains shall be limited to the following:

(1) Withholding of not more than 10 percent of the payment claimed until work is 50 percent complete;

(2) When work is 50 percent complete, reduction of the withholding to 5 percent of the dollar value of all work satisfactorily completed to date, provided that the contractor is making satisfactory progress and there is no specific cause for greater withholding;

(3) When the work is substantially complete (operational or beneficial occupancy), the withheld amount shall be further reduced below 5 percent to only that amount necessary to assure completion.

(4) The grantee may reinstate up to 10 percent withholding if the grantee determines, at its discretion, that the contractor is not making satisfactory progress or there is other specific cause for such withholding.

(5) The grantee may accept securities negotiable without recourse, condition or restrictions, a release of retainage bond, or an irrevocable letter of credit provided by the contractor instead of all or part of the cash retainage.

(b) The foregoing retention policy shall be implemented with respect to all step 3 projects for which plans and specifications are approved after March 1, 1976. Appropriate provision to assure compliance with this policy must be included in the bid documents for such projects initially or by addendum before the bid submission date, and as a special condition in the grant agreement or in a grant amendment. For all previous active projects, the grantee may implement the foregoing policy through contract amendment upon written request to the grantee by the contractor upon consideration that the grantee deems adequate.

(c) Under § 30.620-3 of this subchapter, a grantee who delays disbursement of grant funds will be required to credit to the United States all interest earned on those funds.

§ 35.938-8 Required construction contract provisions.

Each construction contract must include the "Supplemental General Conditions" set forth in appendix C-2 to this subpart.

§ 35.938-9 Subcontracts under construction contracts.

(a) The award or execution of subcontracts by a prime contractor under a construction contract awarded to the prime contractor by the grantee, and the procurement and negotiation procedures used by prime contractors in awarding or executing subcontracts are not required to comply with any of the provisions, selection procedures, policies or principles set forth in § 35.936 or § 35.938 except those specifically stated in this section. In addition, the bid protest procedures of § 35.939 are not available to parties executing subcontracts with prime contractors except as specifically provided in that section.

(b) The award or execution of subcontracts by a prime contractor under a formally advertised, competitively bid, fixed price construction contract awarded to the prime contractor by the grantee, and the procurement and negotiation procedures used by such prime contractors in awarding or executing such subcontracts must comply with the following:

(1) § 35.936-2 (Grantee procurement systems; State or local law);

(2) § 35.936-7 (Small and minority business);

(3) § 35.936-13 (Specifications);

(4) § 35.936-15 (Limitations on subagreement award);

(5) § 35.936-17 (Fraud and other unlawful or corrupt practices);

(6) § 35.938-5(d) (Negotiation of contract amendments); and

(7) Applicable subagreement clauses (see appendix C-2, clauses 8, 10, 14, 15, 16; note clause 11).

(c) The award of subcontracts under construction contracts not described above in paragraph (b) of this section and the procurement and negotiation procedures of prime contractors on contracts not meeting that description must comply with paragraphs (b)(1) through (b)(4) of this section as well as the principles of § 35.938-5.

§ 35.939 Protests.

(a) *General.* A protest based upon an alleged violation of the procurement requirements of §§ 35.936 through 35.938-9 of this subpart may be filed against a grantee's procurement action by a party with an adversely affected direct financial interest. Any such protest must be received by the grantee within the time period in paragraph (b)(1) of this section. The grantee is responsible for resolution of the protest before the taking of the protested action, in accordance with paragraph (d) of this section, except as otherwise provided by paragraph (j) or (k) or § 35.938-4(h)(5). The Regional Administrator will review grantee protest determinations in accordance with paragraph (e) of this section, if a timely request for such review is filed under paragraph (b)(2) of this section. In the case of protests which he determines are untimely, frivolous, or without merit, the Regional Administrator may take such actions as are described in paragraphs (f)(7), (i)(2), and (k) of this section.

(b) *Time limitations.* (1) A protest under paragraph (d) of this section should be made as early as possible during the procurement process (for example, immediately after issuance of a solicitation for bids) to avoid disruption of or unnecessary delay to the procurement process. A protest authorized by paragraph (d) of this section must be received by the grantee within 1 week after the basis for the protest is known or should have been known, whichever is earlier (generally, for formally advertised procurement, after bid opening, within 1 week after the basis for the protest is, or should have been, known).

(i) However, in the case of an alleged violation of the specification requirements of § 35.936-13 (e.g., that a product fails to qualify as an "or equal") or other specification requirements of this subpart, a protest need not be filed prior to the opening of bids. But the grantee may resolve the issue before receipt of bids or proposals through a written or other formal determination, after notice and opportunity to comment is afforded to any party with a direct financial interest.

(ii) In addition, where an alleged violation of the specification requirements of § 35.936-13 or other requirements of this subpart first arises subsequent to the receipt of bids or proposals, the grantee must decide the protest if the protest was received by the grantee within 1 week of the time that the grantee's written or other formal notice is first received.

(2) A protest appeal authorized by paragraph (e) of this section must be received by the Regional Administrator within 1 week after the complainant has received the grantee's determination.

(3) If a protest is mailed, the complaining party bears the risk of nondelivery within the required time period. It is suggested that all documents transmitted in accordance with this section be mailed by certified mail (return receipt requested) or otherwise delivered in a manner which will objectively establish the date of receipt. Initiation of protest actions under paragraphs (d) or (e) of this section may be made by brief telegraphic notice accompanied by prompt mailing or other delivery of a more detailed statement of the basis for the protest. Telephonic protests will not be considered.

(c) *Other initial requirements.* (1) The initial protest document must briefly state the basis for the protest, and should—

(i) Refer to the specific section(s) of this subpart which allegedly prohibit the procurement action;

(ii) Specifically request a determination pursuant to this section;

(iii) Identify the specific procurement document(s) or portion(s) of them in issue; and

(iv) Include the name, telephone number, and address of the person representing the protesting party.

(2) The party filing the protest must concurrently transmit a copy of the initial protest document and any attached documentation to all other parties with a direct financial interest which may be adversely affected by the determination of the protest (generally, all bidders or proposers who appear to have a substantial and reasonable prospect of receiving an award if the protest is denied or sustained) and to the appropriate EPA Regional Administrator.

(d) *Grantee determination.* (1) The grantee is responsible for the initial resolution of protests based upon alleged violations of the procurement requirements of this subpart.

(2) When the grantee receives a timely written protest, he must defer the protested procurement action (see paragraph (h) of this section) and:

(i) Afford the complaining party and interested parties an opportunity to present arguments in support of their views in writing or at a conference or other suitable meeting (such as a city council meeting),

(ii) Inform the complainant and other interested parties of the procedures which the grantee will observe for resolution of the protest;

(iii) Obtain an appropriate extension of the period for acceptance of the bid and bid bond(s) of each interested party, where applicable; failure to agree to a suitable extension of such bid and bid bond(s) by the party which initiated the protest shall be cause for summary dismissal of the protest by the grantee or the Regional Administrator; and

(iv) Promptly deliver (preferably by certified mail, return receipt requested, or by personal delivery) its written determination of the protest to the complaining party and to each other participating party.

(3) The grantee's determination must be accompanied by a legal opinion addressing issues arising under State, territorial, or local law (if any) and, where step 3 construction is involved, by an engineering report, if appropriate.

(4) The grantee should decide the protest as promptly as possible—generally within 3 weeks after receipt of a protest, unless extenuating circumstances require a longer period of time for proper resolution of the protest.

(e) *Regional Administrator review.* (1) A party with a direct financial interest adversely affected by a grantee determination made under paragraph (d) with respect to a procurement requirement of this subpart may submit a written request to the Regional Administrator for his review of such determination. Any such request must be in writing, must adequately state the basis for the protest (including reference to the specific section(s) of this subpart alleged to prohibit the procurement action), and must be received by the Regional Administrator within 1 week after the complaining party has received the grantee's determination of the protest. A copy of the grantee's determination and other documentation in support of the request for review shall be transmitted with the request.

(2) The Regional Counsel or his delegee will afford both the grantee and the complaining party, as well as any

UMI
V 4 3 / 1 8 8
S E 2 7 7 8
UMI

other party with a financial interest which may be adversely affected by determination of the protest, an opportunity to present arguments in support of their views in writing or at a conference at a time and place convenient to the parties as determined by the Regional Counsel or his delegee, and he shall thereafter promptly submit in writing his report and recommendations (or recommended determination) concerning the protest to the Regional Administrator.

(3) Any such conference should be held within not more than 10 days after receipt of the request for review and the report should be transmitted to the Regional Administrator within 10 days after the date set for receipt of the participants' written materials or for the conference. The Regional Administrator should transmit his determination of the protest with an adequate explanation thereof to the grantee and simultaneously to each participating party within 1 week after receipt of the report and recommendations. His determination shall constitute final agency action, from which there shall be no further administrative appeal. The Regional Counsel may extend these time limitations, where appropriate.

(4) The Regional Administrator may review the record considered by the grantee, and any other documents or arguments presented by the parties, to determine whether the grantee has complied with this subpart and has a rational basis for its determination.

(5) If a determination is made by the Regional Administrator which is favorable to the complainant, the grantee's procurement action (for example, contract award) must be taken in accordance with such determination.

(f) *Procedures.* (1) Where resolution of an issue properly raised with respect to a procurement requirement of this subpart requires prior or collateral resolution of a legal issue arising under State or local law, and such law is not clearly established in published legal decisions of the State or other relevant jurisdiction, the grantee or Regional Administrator may rely upon:

(i) An opinion of the grantee's legal counsel adequately addressing the issue (see § 35.936-2(b));

(ii) The established or consistent practice of the grantee, to the extent appropriate; or

(iii) The law of other States or local jurisdictions as established in published legal decisions; or

(iv) If none of the foregoing adequately resolve the issue, published decisions of the Comptroller General of the United States (U.S. General Accounting Office) or of the Federal courts addressing Federal requirements comparable to procurement requirements of this subpart.

(2) For the determination of Federal issues presented by the protest, the Regional Administrator may rely upon:

(i) Determinations of other protests decided under this section, unless such protests have been reversed; and

(ii) Decisions of the Comptroller General of the United States or of the Federal courts addressing Federal requirements comparable to procurement requirements of this subpart.

(3) The Regional Counsel may establish additional procedural requirements or deadlines for the submission of materials by parties or for the accomplishment of other procedures. Where time limitations are established by this section or by the Regional Counsel, participants must seek to accomplish the required action as promptly as possible in the interest of expediting the procurement action.

(4) A party who submits a document subsequent to initiation of a protest proceeding under paragraph (d) or (e) of this section must simultaneously furnish each other party with a copy of such document.

(5) The procedures established by this section are not intended to preclude informal resolution or voluntary withdrawal of protests. A complainant may withdraw its appeal at any time, and the protest proceeding shall thereupon be terminated.

(6) The Regional Administrator may utilize appropriate provisions of this section in the discharge of his responsibility to review grantee procurement under 40 CFR 35.935-2.

(7) A protest may be dismissed for failure to comply with procedural requirements of this section.

(g) *Burden of proof.* (1) In proceedings under paragraphs (d) and (e) of this section, if the grantee proposes to award a formally advertised, competitively bid, fixed price contract to a party who has submitted the apparent lowest price, the party initiating the protest will bear the burden of proof in the protest proceedings.

(2) In the proceedings under paragraph (e) of this section—

(i) If the grantee proposes to award a formally advertised, competitively bid, fixed-price contract to a bidder other than the bidder which submitted the apparent lowest price, the grantee will bear the burden of proving that its determination concerning responsiveness is in accordance with this subchapter; and

(ii) If the basis for the grantee's determination is a finding of nonresponsibility, the grantee must establish and substantiate the basis for its determination and must adequately establish that such determination has been made in good faith.

(h) *Deferral of procurement action.* Upon receipt of a protest under paragraph (d) of this section, the grantee must defer the protested procurement action (for example, defer the issuance of solicitations, contract award, or issuance of notice to proceed under a contract) until 10 days after delivery of its determination to the participating parties. (The grantee may receive or open bids at it own risk, if it considers this to be in its best interest; and see § 35.938-4(h)(5).) Where the Regional Administrator has received a written protest under paragraph (e) of this section, he must notify the grantee promptly to defer its protested procurement action until notified of the formal or informal resolution of the protest.

(i) *Enforcement.* (1) Noncompliance with the procurement provisions of this subchapter by the grantee shall be cause for enforcement action in accordance with one or more of the provisions of § 35.965 of this subpart.

(2) If the Regional Administrator determines that a protest prosecuted pursuant to this section is frivolous, he may determine the party which prosecuted such protest to be nonresponsible and ineligible for future contract award (see also paragraph (k) of this section).

(j) *Limitation.* A protest may not be filed under this section with respect to the following:

(1) Issues not arising under the procurement provisions of this subchapter; or

(2) Issues relating to the selection of a consulting engineer, provided that a protest may be filed only with respect to the mandatory procedural requirements of §§ 35.937 through 35.937-9;

(3) Issues primarily determined by State or local law or ordinances and as to which the Regional Administrator, upon review, determines that there is no contravening Federal requirement and that the grantee's action has a rational basis (see paragraph (e)(4) of this section).

(4) Provisions of Federal regulations applicable to direct Federal contracts, unless such provisions are explicitly referred to or incorporated in this subpart;

(5) Basic project design determinations (for example, the selection of incineration versus other methods of disposal of sludge);

(6) Award of subcontracts or issuance of purchase orders under a formally advertised, competitively bid, lump-sum construction contract. However, protest may be made with respect to alleged violation of the following:

(i) Specification requirements of § 35.936-13; or

(ii) Provisions of this subpart applicable to the procurement procedures,

negotiation or award of subcontracts or issuance of purchase orders under §§ 35.937-12 (subcontracts under subagreements for architectural or engineering services) or § 35.938-9 (subcontracts under construction contracts).

(k) *Summary disposition.* The Regional Administrator may summarily dismiss a protest, without proceedings under paragraphs (d) or (e) of this section, if he determines that the protest is untimely, frivolous or without merit—for example, that the protested action of the grantee primarily involves issues of State or local law. Any such determination shall refer briefly to the facts substantiating the basis for the determination.

(l) *Index.* The EPA General Counsel will publish periodically as a notice document in the FEDERAL REGISTER an index of Regional Administrator protest determinations. (See, e.g., 43 FR 29085, July 5, 1978.)

§ 35.940 Determination of allowable costs.

The grantee will be paid, upon request in accordance with § 35.945, for the Federal share of all necessary costs within the scope of the approved project and determined to be allowable in accordance with § 30.705 of this chapter, this subpart, and the grant agreement.

§ 35.940-1 Allowable project costs.

Allowable costs include:

(a) Costs of salaries, benefits, and expendable material the grantee incurs for the project, except as provided in § 35.940-2(g);

(b) Costs under construction contracts;

(c) Professional and consultant services;

(d) Facilities planning directly related to the treatment works;

(e) Sewer system evaluation (§ 35.927);

(f) Project feasibility and engineering reports;

(g) Costs required under the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4621 et seq., 4651 et seq.), and part 4 of this chapter;

(h) Costs of complying with the National Environmental Policy Act, including costs of public notices and hearings;

(i) Preparation of construction drawings, specifications, estimates, and construction contract documents;

(j) Landscaping;

(k) Removal and relocation or replacement of utilities, for which the grantee is legally obligated to pay;

(l) Materials acquired, consumed, or expended specifically for the project;

(m) A reasonable inventory of laboratory chemicals and supplies necessary to initiate plant operations;

(n) Development and preparation of an operation and maintenance manual;

(o) A plan of operation, in accordance with guidance issued by the Administrator;

(p) Start-up services for new treatment works, in accordance with guidance issued by the Administrator;

(q) Project identification signs (§ 30.625-3 of this chapter);

(r) Development of a municipal pretreatment program approvable under part 403 of this chapter, and purchase of monitoring equipment and construction of facilities to be used by the municipal treatment works in the pretreatment program;

(s) Costs of complying with the procurement requirements of these regulations (see § 35.936-20).

§ 35.940-2 Unallowable costs.

Costs which are not necessary for the construction of a treatment works project are unallowable. Such costs include, but are not limited to:

(a) Basin or areawide planning not directly related to the project;

(b) Bonus payments not legally required for completion of construction before a contractual completion date;

(c) Personal injury compensation or damages arising out of the project, whether determined by adjudication, arbitration, negotiation, or otherwise;

(d) Fines and penalties due to violations of, or failure to comply with, Federal, State, or local laws;

(e) Costs outside the scope of the approved project;

(f) Interest on bonds or any other form of indebtedness required to finance the project costs;

(g) Ordinary operating expenses of local government, such as salaries and expenses of a mayor, city council members, or city attorney, except as provided in § 35.940-4;

(h) Site acquisition (for example, sewer rights-of-way, sewage treatment plantsite, sanitary landfills and sludge disposal areas) except as otherwise provided in § 35.940-3(a);

(i) Costs for which payment has been or will be received under another Federal assistance program;

(j) Costs of equipment or material procured in violation of § 35.938-4(b);

(k) Costs of studies under § 35.907 (d)(6) and (d)(7) when performed solely for the purpose of seeking an allowance for removal of pollutants under part 403 of this chapter;

(l) Costs of monitoring equipment used by industry for sampling and analysis of industrial discharges to municipal treatment works;

(m) Construction of privately-owned treatment works, including pretreatment facilities, except as authorized by section 201(h) of the Act and § 35.918;

(n) Preparation of a grant application, including a plan of study.

§ 35.940-3 Costs allowable, if approved.

Certain direct costs are sometimes necessary for the construction of a treatment works. The following costs are allowable if reasonable and if the Regional Administrator approves them in the grant agreement.

(a) Land acquired after October 17, 1972, that will be an integral part of the treatment process, or that will be used for ultimate disposal of residues resulting from such treatment (for example, land for spray irrigation of sewage effluent).

(b) Land acquired after December 26, 1977, that will be used for storage of treated wastewater in land treatment systems before land application.

(c) Land acquired after December 26, 1977, that will be used for composting or temporary storage of compost residues which result from wastewater treatment, if EPA has approved a program for use of the compost.

(d) Acquisition of an operable portion of a treatment works. This type of acquisition is generally not allowable except when determined by the Regional Administrator in accordance with guidance issued by the Administrator.

(e) Rate determination studies required under § 35.925-11.

(f) A limited amount of end-of-pipe sampling and associated analysis of industrial discharges to municipal treatment works as provided in § 35.907(f).

§ 35.940-4 Indirect costs.

Indirect costs shall be allowable in accordance with an indirect cost agreement negotiated and incorporated in the grant agreement. An indirect cost agreement must identify those cost elements allowable under § 35.940-1. Where the benefits derived from indirect services cannot be readily determined, a lump sum for overhead may be negotiated if EPA determines that this amount will be approximately the same as the actual indirect costs.

§ 35.940-5 Disputes concerning allowable costs.

The grantee should seek to resolve any questions relating to cost allowability or allocation at its earliest opportunity (if possible, before execution of the grant agreement). Final determinations concerning the allowability of costs shall be conclusive unless appealed within 30 days in accordance with the "Disputes" provisions of part 30, subpart J, of this subchapter.

§ 35.945 Grant payments.

The grantee shall be paid the Federal share of allowable project costs incurred within the scope of an approved project and which are current-

ly due and payable from the grantee (i.e., not including withheld or deferred amounts), subject to the limitations of §§ 35.925-18, 35.930-5, 35.930-6, and 35.965 (b) and (c), up to the grant amount set forth in the grant agreement and any amendments thereto. Payments for engineering services for step 1, 2 or 3 shall be made in accordance with § 35.937-10 and payments for step 3 construction contracts shall be made in accordance with §§ 35.938-6 and 35.938-7. All allowable costs incurred before initiation of construction of the project must be claimed in the application for grant assistance for that project before the award of the assistance or no subsequent payment will be made for the costs.

(a) *Initial request for payment.* Upon award of grant assistance, the grantee may request payment for the unpaid Federal share of actual or estimated allowable project costs incurred before grant award subject to the limitations of § 35.925-18. Payment for such costs shall be made in accordance with the negotiated payment schedule included in the grant agreement.

(b) *Interim requests for payment.* The grantee may submit requests for payments for allowable costs in accordance with the negotiated payment schedule included in the grant agreement. Upon receipt of a request for payment, subject to the limitations set forth in § 30.615-3 of this subchapter and §§ 35.935-12, 35.935-13, and 35.935-16, the Regional Administrator shall cause to be disbursed from available appropriated funds such amounts as are necessary so that the total amount of Federal payments to the grantee for the project is equal to the Federal share of the actual or estimated allowable project costs incurred to date, as certified by the grantee in its most recent request for payment. Generally, payments will be made within 20 days after receipt of a request for payment.

(c) *Adjustment.* At any time before final payment under the grant, the Regional Administrator may cause any request(s) for payment to be reviewed or audited. Based on such review or audit, any payment may be reduced for prior overpayment or increased for prior underpayment.

(d) *Refunds, rebates, credits, etc.* The Federal share of any refunds, rebates, credits, or other amounts (including any interest) that accrue to or are received by the grantee for the project, and that are properly allocable to costs for which the grantee has been paid under a grant, must be credited to the current State allotment or paid to the United States. Reasonable expenses incurred by the grantee for the purpose of securing such refunds, rebates, credits, or other amounts shall be allowable under the grant when approved by the Regional Administrator.

(e) *Final payment.* After completion of final inspection under § 35.935-14, approval of the request for payment which the grantee designates as the "final payment request," and the grantee's compliance with all applicable requirements of this subchapter and the grant agreement, the Regional Administrator shall pay to the grantee any balance of the Federal share of allowable project costs which has not already been paid. The grantee must submit the final payment request promptly after final inspection.

(f) *Assignment and release.* By its acceptance of final payment, the grantee agrees to assign to the United States the Federal share of refunds, rebates, credits or other amounts (including any interest) properly allocable to costs for which the grantee has been paid by the Government under the grant. The grantee thereby also releases and discharges the United States, its officers, agents, and employees from all liabilities, obligations, and claims arising out of the project work or under the grant, subject only to exceptions previously specified in writing between the Regional Administrator and the grantee.

§ 35.950 Suspension, termination or annulment of grants.

Grants may be suspended under § 30.915, or terminated or annulled under § 30.920. The State agency shall be concurrently notified in writing of any such action.

§ 35.955 Grant amendments to increase grant amounts.

Grant agreements may be amended under § 30.900-1 of this chapter for project changes which have been approved under §§ 30.900 and 35.935-11 of this subchapter. However, no grant agreement may be amended to increase the amount of a grant unless the State agency has approved the grant increase from available State allotments and reallotments under § 35.915.

§ 35.960 Disputes.

(a) The Regional Administrator's final determination on the ineligibility of a project (see § 35.915(h)) or a grant applicant (see § 35.920-1), on the Federal share (see § 35.930-5(b)), or on any dispute arising under a grant shall be final and conclusive unless the applicant or grantee appeals within 30 days from the date of receipt of the final determination. (See Subpart J of Part 30 of this subchapter.)

(b) The EPA General Counsel will publish periodically as a Notice document in the FEDERAL REGISTER a digest of grant appeals decisions.

§ 35.965 Enforcement.

If the Regional Administrator determines that the grantee has failed to comply with any provision of this subpart, he may impose any of the following sanctions:

(a) The grant may be terminated or annulled under § 30.920 of this subchapter;

(b) Project costs directly related to the noncompliance may be disallowed;

(c) Payment otherwise due to the grantee of up to 10 percent may be withheld (see § 30.615-3 of this chapter);

(d) Project work may be suspended under § 30.915 of this subchapter;

(e) A noncomplying grantee may be found nonresponsible or ineligible for future Federal assistance or a noncomplying contractor may be found nonresponsible or ineligible for approval for future contract award under EPA grants;

(f) An injunction may be entered or other equitable relief afforded by a court of appropriate jurisdiction;

(g) Such other administrative or judicial action may be instituted if it is legally available and appropriate.

§ 35.970 Contract enforcement.

(a) *Regional Administrator authority.* At the request of a grantee, the Regional Administrator is authorized to provide technical and legal assistance in the administration and enforcement of any contract related to treatment works for which an EPA grant was made and to intervene in any civil action involving the enforcement of such contracts, including contract disputes which are the subject of either arbitration or court action. Any assistance is to be provided at the discretion of the Regional Administrator and in a manner determined to best serve the public interest. Factors which the Regional Administrator may consider in determining whether to provide assistance are:

(1) Available agency resources.

(2) Planned or ongoing enforcement action.

(3) The grantee's demonstration of good faith to resolve contract matters at issue.

(4) The grantee's adequate documentation.

(5) The Federal interest in the contract matters at issue.

(b) *Grantee request.* The grantee's request for technical or legal assistance should be submitted in writing and be accompained by documentation adequate to inform the Regional Administrator of the nature and necessity of the requested assistance. A grantee may orally request assistance from the Regional Administrator on an emergency basis.

(c) *Privity of contract.* The Regional Administrator's technical or legal involvement in any contract dispute will not make EPA a party to any contract entered into by the grantee. (See § 35.936-8.)

(d) *Delegation to States.* The authority to provide technical and legal assistance in the administration of contract matters described in this section may be delegated to a State agency under Subpart F of this part if the State agency can demonstrate that it has the appropriate legal authority to undertake such functions.

APPENDIX A

COST-EFFECTIVENESS ANALYSIS GUIDELINES

1. *Purpose.* These guidelines represent Agency policies and procedures for determining the most cost-effective waste treatment management system or component part.

2. *Authority.* These guidelines are provided under sections 212(2)(C) and 217 of the Clean Water Act.

3. *Applicability.* These guidelines, except as otherwise noted, apply to all facilities planning under step 1 grant assistance awarded after September 30, 1978. The guidelines also apply to State or locally financed facilities planning on which subsequent step 2 or step 3 Federal grant assistance is based.

4. *Definitions.* Terms used in these guidelines are defined as follows:

a. *Waste treatment management system.* Used synonymously with "complete waste treatment system" as defined in § 35.905 of this subpart.

b. *Cost-effectiveness analysis.* An analysis performed to determine which waste treatment management system or component part will result in the minimum total resources costs over time to meet Federal, State, or local requirements.

c. *Planning period.* The period over which a waste treatment management system is evaluated for cost-effectiveness. The planning period begins with the system's initial operation.

d. *Useful life.* The estimated period of time during which a treatment works or a component of a waste treatment management system will be operated.

e. *Disaggregation.* The process or result of breaking down a sum total of population or economic activity for a State or other jurisdiction (i.e., designated 208 area or SMSA) into smaller areas or jurisdictions.

5. *Identification, selection, and screening of alternatives.* a. *Identification of alternatives.* All feasible alternative waste management systems shall be initially identified. These alternatives should include systems discharging to receiving waters, land application systems, on-site and other non-centralized systems, including revenue generating applications, and systems employing the reuse of wastewater and recycling of pollutants. In identifying alternatives, the applicant shall consider the possibility of no action and staged development of the system.

b. *Screening of alternatives.* The identified alternatives shall be systematically screened to determine those capable of meeting the applicable Federal, State and local criteria.

c. *Selection of alternatives.* The identified alternatives shall be initially analyzed to determine which systems have cost-effective potential and which should be fully evaluated according to the cost-effectiveness analysis procedures established in the guidelines.

d. *Extent of effort.* The extent of effort and the level of sophistication used in the cost-effectiveness analysis should reflect the project's size and importance. Where processes or techniques are claimed to be innovative technology on the basis of the cost reduction criterion contained in paragraph 6e(1) of appendix E to this subpart, a sufficiently detailed cost analysis shall be included to substantiate the claim to the satisfaction of the Regional Administrator.

6. *Cost-effectiveness analysis procedures.*

a. *Method of analysis.* The resources costs shall be determined by evaluating opportunity costs. For resources that can be expressed in monetary terms, the analysis will use the interest (discount) rate established in paragraph 6e. Monetary costs shall be calculated in terms of present worth values or equivalent annual values over the planning period defined in section 6b. The analysis shall descriptively present nonmonetary factors (e.g., social and environmental) in order to determine their significance and impact. Nonmonetary factors include primary and secondary environmental effects, implementation capability, operability, performance reliability and flexibility. Although such factors as use and recovery of energy and scarce resources and recycling of nutrients are to be included in the monetary cost analysis, the non-monetary evaluation shall also include them. The most cost-effective alternative shall be the waste treatment management system which the analysis determines to have the lowest present worth or equivalent annual value unless nonmonetary costs are overriding. The most cost-effective alternative must also meet the minimum requirements of applicable effluent limitations, groundwater protection, or other applicable standards established under the Act.

b. *Planning period.* The planning period for the cost-effectiveness analysis shall be 20 years.

c. *Elements of monetary costs.* The monetary costs to be considered shall include the total value of the resources which are attributable to the waste treatment management system or to one of its component parts. To determine these values, all monies necessary for capital construction costs and operation and maintenance costs shall be identified.

(1) Capital construction costs used in a cost-effective analysis shall include all contractors' costs of construction including overhead and profit, costs of land, relocation, and right-of-way and easement acquisition; costs of design engineering, field exploration and engineering services during construction; costs of administrative and legal services including costs of bond sales; startup costs such as operator training; and interest during construction. Capital construction costs shall also include contingency allowances consistent with the cost estimate's level of precision and detail.

(2) The cost-effectiveness analysis shall include annual costs for operation and maintanance (including routine replacement of equipment and equipment parts). These costs shall be adequate to ensure effective and dependable operation during the system's planning period. Annual costs shall be divided between fixed annual costs and costs which would depend on the annual quantity of waste water collected and treated. Annual revenues generated by the waste treatment management system through energy recovery, crop production, or other outputs shall be deducted from the annual costs for operation and maintenance in accordance with guidance issued by the Administrator.

d. *Prices.* The applicant shall calculate the various components of costs on the basis of market prices prevailing at the time of the cost-effectiveness analysis. The analysis shall not allow for inflation of wages and prices, except those for land, as described in paragraph 6h(1) and for natural gas. This stipulation is based on the implied assumption that prices, other than the exceptions, for resources involved in treatment works construction and operation, will tend to change over time by approximately the same percentage. Changes in the general level of prices will not affect the results of the cost-effectiveness analysis. Natural gas prices shall be escalated at a compound rate of 4 percent annually over the planning period, unless the Regional Administrator determines that the grantee has justified use of a greater or lesser percentage based upon regional differentials between historical natural gas price escalation and construction cost escalation. Land prices shall be appreciated as provided in paragraph 6h(1). Both historical data and future projections support the gas and land price escalations relative to those for other goods and services related to waste water treatment. Price escalation rates may be updated periodically in accordance with Agency guidelines.

e. *Interest (discount) rate.* The rate which the Water Resources Council establishes annually for evaluation of water resource projects shall be used.

f. *Interest during construction.* (1) Where capital expenditures can be expected to be fairly uniform during the construction period, interest during construction may be calculated at $I = 1/2PCi$ where:

I = the interest accrued during the construction period,
P = the construction period in years,
C = the total capital expenditures,
i = the interest rate (discount rate in section 6e).

(2) Where expenditures will not be uniform, or when the construction period will be greater than 4 years, interest during construction shall be calculated on a year-by-year basis.

g. *Useful life.* (1) The treatment works' useful life for a cost-effectiveness analysis shall be as follows:

Land—permanent.
Waste water conveyance structures (includes collection systems, outfall pipes, interceptors, force mains, tunnels, etc.)—50 years.
Other structures (includes plant building, concrete process tankage, basins, lift stations structures, etc.)—30-50 years.
Process equipment—15-20 years.
Auxiliary equipment—10-15 years.

(2) Other useful life periods will be acceptable when sufficient justification can be provided. Where a system or a component is for interim service, the anticipated useful life shall be reduced to the period for interim service.

h. *Salvage value.* (1) Land purchased for treatment works, including land used as part of the treatment process or for ultimate disposal of residues, may be assumed

V 4 3 / 1 8 8
S E 2 7 7 8
UMI

to have a salvage value at the end of the planning period a least equal to its prevailing market value a the time of the analysis. In calculating the salvage value of land, the land value shall be appreciated at a compound rate of 3 percent annually over the planning period, unless the Regional Administrator determines that the grantee has justified the use of a greater or lesser percentage based upon historical differences between local land cost escalation and construction cost escalation. The land cost escalation rate may be updated periodically in accordance with Agency guidelines. Right-of-way easements shall be considered to have a salvage value not greater than the prevailing market value at the time of the analysis.

(2) Structures will be assumed to have a salvage value if there is a use for them at the end of the planning period. In this case, salvage value shall be estimated using straight line depreciation during the useful life of the treatment works.

(3) The method used in paragraph 6h(2) may be used to estimate salvage value at the end of the planning period for phased additions of process equipment and auxiliary equipment.

(4) When the anticipated useful life of a facility is less than 20 years (for analysis of interim facilities), salvage value can be claimed for equipment if it can be clearly demonstrated that a specific market or reuse opportunity will exist.

7. *Innovative and alternative wastewater treatment processes and techniques.*

a. Beginning October 1, 1978, the capital costs of publicly owned treatment works which use processes and techniques meeting the criteria of appendix E to this subpart and which have only a water pollution control function, may be eligible if the present worth cost of the treatment works is not more than 115 percent of the present worth cost of the most cost-effective pollution control system, exclusive of collection sewers and interceptors common to the two systems being compared, by 115 percent, except for the following situation.

b. Where innovative or alternative unit processes would serve in lieu of conventional unit processes in a conventional waste water treatment plant, and the present worth costs of the nonconventional unit processes are less than 50 percent of the present worth costs of the treatment plant, multiply the present worth costs of the replaced conventional processes by 115 percent, and add the cost of nonreplaced unit processes.

c. The eligibility of multipurpose projects which combine a water pollution control function with another function, and which use processes and techniques meeting the criteria of appendix E to this subpart, shall be determined in accordance with guidance issued by the Administrator.

d. The above provisions exclude individual systems under § 35.918. The regional Administrator may allow a grantee to apply the 15-percent preference authorized by this section to facility plans prepared under step 1 grant assistance awarded before October 1, 1978.

8. *Cost-effective staging and sizing of treatment works.*

a. *Population projections.* (1) The disaggregation of State projections of population shall be the basis for the population forecasts presented in individual facility plans, except as noted. These State projections shall be those developed in 1977 by the Bureau of Economic Analysis (BEA), Department of Commerce, unless, as of June 26, 1978, the State has already prepared projections. These State projections may be used instead of the BEA projections if the year 2000 State population does not exceed that of the BEA projection by more than 5 percent. If the difference exceeds this amount, the State must either justify or lower its projection. Justification must be based on the historical and current trends (e.g., energy and industrial development, military base openings) not taken into account in the BEA projections. The State must submit for approval to the Administrator the request and justification for use of State projections higher than the BEA projections. By that time, the State shall issue a public notice of the request. Before the Administrator's approval of the State projection, the Regional Administrator shall solicit public comments and hold a public hearing if important issues are raised about the State projection's validity. State projections and disaggregations may be updated periodically in accordance with Agency guidelines.

(2) Each State, working with designated 208 planning agencies, organizations certified by the Governor under section 174(a) of the Clean Air Act, as amended, and other regional planning agencies in the State's nondesignated areas, shall disaggregate the State population projection among its designated 208 areas, other standard metropolitan statistical areas (SMSA's) not included in the 208 area, and non-SMSA counties or other appropriate jurisdictions. States that had enacted laws, as of June 26, 1978, mandating disaggregation of State population totals to each county for areawide 208 planning may retain this requirement. When disaggregating the State population total, the State shall take into account the projected population and economic activities identified in facility plans, areawide 208 plans and municipal master plans. The sum of the disaggregated projections shall not exceed the State projection. Where a designated 208 area has, as of June 26, 1978, already prepared a population projection, it may be used if the year 2000 population does not exceed that of the disaggregated projection by more than 10 percent. The State may then increase its population projection to include all such variances rather than lower the population projection totals for the other areas. If the 208 area population forecast exceeds the 10 percent allowance, the 208 agency must lower its projection within the allowance and submit the revised projection for approval to the State and the Regional Administrator.

(3) The State projection totals and the disaggregations will be submitted as an output of the statewide water quality management process. The submission shall include a list of designated 208 areas, all SMSA's, and counties or other units outside the 208 areas. For each unit the disaggregated population shall be shown for the years 1980, 1990, and 2000. Each State will submit its projection totals and disaggregations for the Regional Administrator's approval before October 1, 1979. Before this submission, the State shall hold a public meeting on the disaggregations and shall provide public notice of the meeting consistent with part 25 of this chapter. (See § 35.917(e).)

(4) When the State projection totals and disaggregations are approved they shall be used thereafter for areawide water quality management planning as well as for facility planning and the needs surveys under section 516(b) of the Act. Within areawide 208 planning areas, the designated agencies, in consultation with the States, shall disaggregate the 208 area projections among the SMSA and non-SMSA areas and then disaggregate these SMSA and non-SMSA projections among the facility planning areas and the remaining areas. For those SMSA's not included within designated 208 planning areas, each State, with assistance from appropriate regional planning agencies, shall disaggregate the SMSA projection among the facility planning areas and the remaining areas within the SMSA. The State shall check the facility planning area forecasts to ensure reasonableness and consistency with the SMSA projections.

(5) For non-SMSA facility planning areas not included in designated areawide 208 areas, the State may disaggregate population projections for non-SMSA counties among facility planning areas and remaining areas. Otherwise, the grantee is to forecast future population growth for the facility planning area by linear extrapolation of the recent past (1960 to present) population trends for the planning area, use of correlations of planning area growth with population growth for the township, county or other larger parent area population, or another appropriate method. A population forecast may be raised above that indicated by the extension of past trends where likely impacts (e.g., significant new energy developments, large new industries, Federal installations, or institutions) justify the difference. The facilities plan must document the justification. These population forecasts should be based on estimates of new employment to be generated. The State shall check individual population forecasts to insure consistency with overall projections for non-SMSA counties and justification for any difference from past trends.

(6) Facilities plans prepared under step 1 grant assistance awarded later than 6 months after Agency approval of the State disaggregations shall follow population forecasts developed in accordance with these guidelines.

b. *Wastewater flow estimates.* (1) In determining total average daily flow for the design of treatment works, the flows to be considered include the average daily base flows (ADBF) expected from residential sources, commercial sources, institutional sources, and industries the works will serve plus allowances for future industries and nonexcessive infiltration/inflow. The amount of nonexcessive infiltration/inflow not included in the base flow estimates presented herein, is to be determined according to the Agency guidance for sewer system evaluation or Agency policy on treatment and control of combined sewer overflows (PRM 75-34).

(2) The estimation of existing and future ADBF, exclusive of flow reduction from combined residential, commercial and institutional sources, shall be based upon one of the following methods:

(a) *Preferred method.* Existing ADBF is estimated based upon a fully documented analysis of water use records adjusted for consumption and losses or on records of wastewater flows for extended dry periods less estimated dry weather infiltration. Future flows for the treatment works design should be estimated by determining the existing per capita flows based on existing sewered resident population and multiplying this figure by the future projected population to be served. Seasonal population can be converted to equivalent full time residents using the following multipliers:

Day-use visitor	0.1 to 0.2
Seasonal visitor	0.5 to 0.8

The preferred method shall be used wherever water supply records or wastewater flow data exist. Allowances for future increases of per capita flow over time will not be approved.

(b) *Optional method.* Where water supply and wastewater flow data are lacking, existing and future ADBF shall be estimated by multiplying a gallon per capita per day (gpcd) allowance not exceeding those in the following table, except as noted below, by the estimated total of the existing and future resident populations to be served. The tabulated ADBF allowances, based upon several studies of municipal water use, include estimates for commercial and institutional sources as well as residential sources. The Regional Administrator may approve exceptions to the tabulated allowances where large (more than 25 percent of total estimated ADBF) commercial and institutional flows are documented.

Description	Gallons per capita per day
Non-SMSA cities and towns with projected total 10-year populations of 5,000 or less	60 to 70
Other cities and towns	65 to 80

c. *Flow reduction.* The cost-effectiveness analysis for each facility planning area shall include an evaluation of the costs, cost savings, and effects of flow reduction measures unless the existing ADBF from the area is less than 70 gpcd, or the current population of the applicant municipality is under 10,000, or the Regional Administrator exempts the area for having an effective existing flow reduction program. Flow reduction measures include public education, pricing and regulatory approaches or a combination of these. In preparing the facilities plan and included cost effectiveness analysis, the grantee shall, as a minimum:

(1) Estimate the flow reductions implementable and cost effective when the treatment works become operational and after 10 and 20 years of operation. The measures to be evaluated shall include a public information program; pricing and regulatory approaches; installation of water meters, and retrofit of toilet dams and low-flow showerheads for existing homes and other habitations; and specific changes in local ordinances, building codes or plumbing codes requiring installations of water saving devices such as water meters, water conserving toilets, showerheads, lavatory faucets, and appliances in new homes, motels, hotels, institutions, and other establishments.

(2) Estimate the costs of the proposed flow reduction measures over the 20-year planning period, including costs of public information, administration, retrofit of existing buildings and the incremental costs, if any, of installing water conserving devices in new homes and establishments.

(3) Estimate the energy reductions; total cost savings for wastewater treatment, water supply and energy use; and the net cost savings (total savings minus total costs) attributable to the proposed flow reduction measures over the planning period. The estimated cost savings shall reflect reduced sizes of proposed wastewater treatment works plus reduced costs of future water supply facility expansions.

(4) Develop and provide for implementing a recommended flow reduction program. This shall include a public information program highlighting effective flow reduction measures, their costs, and the savings of water and costs for a typical household and for the community. In addition, the recommended program shall comprise those flow reduction measures which are cost effective, supported by the public and within the implementation authority of the grantee or another entity willing to cooperate with the grantee.

(5) Take into account in the design of the treatment works the flow reduction estimated for the recommended program.

d. *Industrial flows.* (1) The treatment works' total design flow capacity may include allowances for industrial flows. The allowances may include capacity needed for industrial flows which the existing treatment works presently serves. However, these flows shall be carefully reviewed and means of reducing them shall be considered. Letters of intent to the grantee are required to document capacity needs for existing flows from significant industrial users and for future flows from all industries intending to increase their flows or relocate in the area. Requirements for letters of intent from significant industrial dischargers are set forth in § 35.925-11(c).

(2) While many uncertainties accompany forecasting future industrial flows, there is still a need to allow for some unplanned future industrial growth. Thus, the cost-effective (grant eligible) design capacity and flow of the treatment works may include (in addition to the existing industrial flows and future industrial flows documented by letters of intent) a nominal flow allowance for future nonidentifiable industries or for unplanned industrial expansions, provided that 208 plans, land use plans and zoning provide for such industrial growth. This additional allowance for future unplanned industrial flow shall not exceed 5 percent (or 10 percent for towns with less than 10,000 population) of the total design flow of the treatment works exclusive of the allowance or 25 percent of the total industrial flow (existing plus documented future), whichever is greater.

e. *Staging of treatment plants.* (1) The capacity of treatment plants (i.e., new plants, upgraded plants, or expanded plants) to be funded under the construction grants program shall not exceed that necessary for wastewater flows projected during an initial staging period determined by one of the following methods:

(a) *First method.* The grantee shall analyze at least three alternative staging periods (10 years, 15 years, and 20 years). He shall select the least costly (i.e., total present worth or average annual cost) staging period.

(b) *Second method.* The staging period shall not exceed the period which is appropriate according to the following table.

STAGING PERIODS FOR TREATMENT PLANTS

Flow growth factors (20 years)*	Staging period † (years)
Less than 1.3	20
1.3 to 1.8	15
Greater than 1.8	10

*Ratio of wastewater flow expected at end of 20 year planning period to initial flow at the time the plant is expected to become operational.

†Maximum initial staging period.

(2) A municipality may stage the construction of a treatment plant for a shorter period than the maximum allowed under this policy. A shorter staging period might be based upon environmental factors (secondary impacts, compliance with other environmental laws under § 35.925-14, energy conservation, water supply), an objective concerning planned modular construction, the utilization of temporary treatment plants, or attainment of consistency with locally adopted plans including comprehensive and capital improvement plans. However, the staging period in no case may be less than 10 years, because of associated cost penalties and the time necessary to plan, apply for and receive funding, and construct later stages.

(3) The facilities plan shall present the design parameters for the proposed treatment plant. Whenever the proposed treatment plant components' size or capacity would exceed the minimum reliability requirements suggested in the EPA technical bulletin, "Design Criteria for Mechanical, Electric, and Fluid System and Component Reliability," a complete justification, including supporting data, shall be provided to the Regional Administrator for his approval.

f. *Staging of interceptors.* Since the location and length of interceptors will influence growth, interceptor routes and staging of construction shall be planned carefully. They shall be consistent with approved 208 plans, growth management plans and other environmental laws under § 35.925-14 and shall also be consistent with Executive orders for flood plains and wetlands.

(1) Interceptors may be allowable for construction grant funding if they eliminate existing point source discharges and accommodate flows from existing habitations that violate an enforceable requirement of the Act. Unless necessary to meet those objectives, interceptors should not be extended into environmentally sensitive areas, prime agricultural lands and other undeveloped areas (density less than one household per 2 acres). Where extension of an interceptor through such areas would be necessary to interconnect two or more communities, the grantee shall reassess the need for the interceptor by further consideration of alternative wastewater treatment systems. If the reassessment demonstrates a need for the interceptor, the grantee shall evaluate the interceptor's primary and secondary environmental impacts, and provide for appropriate mitigating measures such as rerouting the pipe to minimize adverse impacts or restricting future connections to the pipe. Appropriate and effective grant conditions (e.g., restricting sewer hookups) should be used where necessary to protect environmentally sensitive areas or prime agricultural lands from new development. NPDES permits shall include the conditions to insure implementation of the mitigating

V 43 / 188 SE 27 78

measures when new permits are issued to the affected treatment facilities in those cases where the measures are required to protect the treatment facilities against overloading.

(2) Interceptor pipe sizes (diameters for cylindrical pipes) allowable for construction grant funding shall be based on a staging period of 20 years. A larger pipe size corresponding to a longer staging period not to exceed 40 years may be allowed if the grantee can demonstrate, wherever water quality management plans or other plans developed for compliance with laws under § 35.925-14 have been approved, that the larger pipe would be consistent with projected land use patterns in such plans and that the larger pipe would reduce overall (primary plus secondary) environmental impacts. These environmental impacts include:

(a) *Primary impacts.* (i) Short-term disruption of traffic, business and other daily activities.

(ii) Destruction of flora and fauna, noise, erosion, and sedimentation.

(b) Secondary impacts. (i) Pressure to rezone or otherwise facilitate unplanned development.

(ii) Pressure to accelerate growth for quicker recovery of the non-Federal share of the interceptor investments.

(iii) Effects on air quality and environmentally sensitive areas by cultural changes.

(3) The estimation of peak flows in interceptors shall be based upon the following considerations:

(a) Daily and seasonal variations of pipe flows, the timing of flows from the various parts of the tributary area, and pipe storage effects.

(b) The feasibility of off-pipe storage to reduce peak flows.

(c) The use of an appropriate peak flow factor that decreases as the average daily flow to be conveyed increases.

9. *State guidelines.* If a State has developed or chooses to develop comprehensive guidelines on cost-effective sizing and staging of treatment works, the Regional Administrator may approve all or portions of the State guidance for application to step 1 facility plans. Approved State guidance may be used instead of corresponding portions of these guidelines, if the following conditions are met:

a. The State guidance must be at least as stringent as the provisions of these guidelines.

b. The State must have held at least one public hearing on proposed State guidance, under regulations in part 25 of this chapter, before submitting the guidance for Agency approval.

10. *Additional capacity beyond the cost-effective capacity.* Treatment works which propose to include additional capacity beyond the cost-effective capacity determined in accordance with these guidelines may receive Federal grant assistance if the following requirements are met:

a. The facilities plan shall determine the most cost-effective treatment works and its associated capacity in accordance with these guidelines. The facilities plan shall also determine the actual characteristics and total capacity of the treatment works to be built.

b. Only a portion of the cost of the entire proposed treatment works including the additional capacity shall be eligible for Federal funding. The portion of the cost of construction which shall be eligible for Federal funding under sections 203(a) and 202(a) of the Act shall be equivalent to the estimated construction costs of the most cost-effective treatment works. For the eligibility determination, the costs of construction of the actual treatment works and the most cost-effective treatment works must be estimated on a consistent basis. Up-to-date cost curves published by EPA's Office of Water Program Operations or other cost estimating guidance shall be used to determine the cost ratios between cost-effective project components and those of the actual project. These cost ratios shall be multiplied by the step 2 cost and step 3 contract costs of actual components to determine the eligible step 2 and step 3 costs.

c. The actual treatment works to be built shall be assessed. It must be determined that the actual treatment works meets the requirements of the National Environmental Policy Act and all applicable laws, regulations, and guidance, as required of all treatment works by §§ 35.925-8 and 35.925-14. Particular attention should be given to assessing the project's potential secondary environmental effects and to ensuring that air quality standards will not be violated. The actual treatment works' discharge must not cause violations of water quality standards.

d. The Regional Administrator shall approve the plans, specifications, and estimates for the actual treatment works under section 203(a) of the Act, even though EPA will be funding only a portion of its designed capacity.

e. The grantee shall satisfactorily assure the Agency that the funds for the construction costs due to the additional capacity beyond the cost-effective treatment works' capacity as determined by EPA (i.e., the ineligible portion of the treatment works), as well as the local share of the grant eligible portion of the construction costs will be available.

f. The grantee shall execute appropriate grant conditions or releases providing that the Federal Government is protected from any further claim by the grantee, the State, or any other party for any of the costs of construction due to the additional capacity.

g. Industrial cost recovery shall be based upon the portion of the Federal grant allocable to the treatment of industrial wastes.

h. The grantee must implement a user charge system which applies to the entire service area of the grantee, including any area served by the additional capacity.

APPENDIX B—FEDERAL GUIDELINES

USER CHARGES FOR OPERATION AND MAINTENANCE OF PUBLICLY OWNED TREATMENT WORKS

(a) *Purpose.* To set forth advisory information concerning user charges based on actual use pursuant to Section 204 of the Clean Water Act, hereinafter referred to as the Act. Applicable requirements are set forth in Subpart E (40 CFR Part 35).

(b) *Authority.* The authority for establishment of the user charge guidelines is contained in section 204(b)(2) of the Act.

(c) *Background.* Section 204(b)(1) of the Act provides that after March 1, 1973, Federal grant applicants shall be awarded grants only after the Regional Administrator has determined that the applicant has adopted or will adopt a system of charges to assure that each recipient of waste treatment services will pay its proportionate share of the costs of operation and maintenance, including replacement. The intent of the Act with respect to user charges is to distribute the cost of operation and maintenance of publicly owned treatment works to the pollutant source and to promote self-sufficiency of treatment works with respect to operation and maintenance costs. The 1977 Amendments amended Section 204(b) to allow grantees to establish user charge systems based on ad valorem taxes. This appendix does not apply to ad valorem user charge systems.

(d) *Definitions.*—(1) *Replacement.* Expenditures for obtaining and installing equipment, accessories, or appurtenances which are necessary to maintain the capacity and performance during the service life of the treatment works for which such works were designed and constructed. The term "operation and maintenance" includes replacement.

(2) *User charge.* A charge levied on users of treatment works for the cost of operation and maintenance of such works.

(e) *Classes of users.* At least two basic types of user charge systems are common. The first is to charge each user a share of the treatment works operation and maintenance costs based on his estimate of measured preportional contribution to the total treatment works loading. The second system establishes classes for users having similar flows and waste water characteristics; i.e., levels of biochemical oxygen demand, suspended solids, etc. Each class is then assigned its share of the waste treatment works operation and maintenance costs based on the proportional contribution of the class to the total treatment works loading. Either system is in compliance with these guidelines.

(f) *Criteria against which to determine the adequacy of user charges.* The user charge system shall be approved by the Regional Administrator and shall be maintained by the grantee in accordance with the following requirements:

(1) The user charge system must result in the distribution of the cost of operation and maintenance of treatment works within the grantee's jurisdiction to each user (or user class) in proportion to such user's contribution to the total wastewater loading of the treatment works. Factors such as strength, volume, and delivery flow rate characteristics shall be considered and included as the basis for the user's contribution to ensure a porportional distribution of operation and maintenance costs to each user (or user class).

(2) For the first year of operation, operation and maintenance costs shall be based upon past experience for existing treatment works or some other rational method that can be demonstrated to be applicable.

(3) The grantee shall review user charges annually and revise them periodically to reflect actual treatment works operation and maintenance costs.

(4) The user charge system must generate sufficient revenue to offset the cost of all treatment works operation and maintenance provided by the grantee.

(5) The user charge system must be incorporated in one or more municipal legislative enactments or other appropriate authority. If the project is a regional treatment works accepting wastewaters from treatment works owned by others, then the subscribers receiving waste treatment services from the grantee shall have adopted user charge systems in accordance with these guidelines. Such user charge systems shall also be incorporated in the appropriate municipal legislative enactments or other appropriate authority.

(g) *Model user charge systems.* The user charge system adopted by the applicant must result in the distribution of treatment works operation and maintenance costs to each user (or user class) in approximate proportion to his contribution to the total wastewater loading of the treatment works. The following user charge models can be used for this purpose; however, the applicant is not limited to their use. The symbols used in the models are as defined below:

C_T = Total operation and maintenance (O. & M.) costs per unit of time.
C_u = A user's charge for O. & M. per unit of time.
C_s = A surcharge for wastewaters of excessive strength.
V_T = O&M cost for transportation and treatment of a unit of wastewater volume.
V_u = Volume contribution from a user per unit of time.
V_T = Total volume contribution from all users per unit of time.
B_T = Total BOD contribution from all users per unit of time.
B_u = Total BOD contribution from a user per unit of time.
B = Concentration of BOD from a user above a base level.
S_T = O&M cost for treatment of a unit of suspended solids.
S_u = Total suspended solids contribution from a user per unit of time.
S = Concentration of SS from a user above a base level.
P_T = O&M cost for treatment of a unit of any pollutant.
P_u = Total contribution of any pollutant from a user per unit of time.
P_T = Total contribution of any pollutant from all users per unit of time.
P = Concentration of any pollutant from a user above a base level.

(1) *Model No. 1.* If the treatment works is primarily flow dependent or if the BOD, suspended solids, and other pollutant concentrations discharged by all users are approximately equal, then user charges can be developed on a volume basis in accordance with the model below:

$$C_u = C_T / V_T(V_u)$$

(2) *Model No. 2.*—When BOD, suspended solids, or other pollutant concentrations from a user exceed the range of concentration of these pollutants in normal domestic sewage, a surcharge added to a base charge, calculated by means of Model No. 1, can be levied. The surcharge can be computed by the model below:

$$C_u = [B_c(B) + S_c(S) + P_c(P)]V_u$$

(3) *Model No. 3.*—This model is commonly called the "quantity/quality formula":

$$C_u = V_c V_u + B_c B_u + S_c S_u + P_c P_u$$

(h) *Other considerations.*—(1) Quantity discounts to large volume users will not be acceptable. Savings resulting from economies of scale should be apportioned to all users or user classes.

(2) User charges may be established based on a percentage of the charge for water usage only in cases where the water charge is based on a constant cost per unit of consumption.

APPENDIX C-1—REQUIRED PROVISIONS—CONSULTING ENGINEERING AGREEMENTS

1. General
2. Responsibility of the Engineer
3. Scope of Work
4. Changes
5. Termination
6. Remedies
7. Payment
8. Project Design
9. Audit; Access to Records
10. Price Reduction for Defective Cost or Pricing Data
11. Subcontracts
12. Labor Standards
13. Equal Employment Opportunity
14. Utilization of Small or Minority Business
15. Covenant Against Contingent Fees
16. Gratuities
17. Patents
18. Copyrights and Rights in Data

1. GENERAL

(a) The owner and the engineer agree that the following provisions apply to the EPA grant-eligible work to be performed under this agreement and that such provisions supersede any conflicting provisions of this agreement.

(b) The work under this agreement is funded in part by a grant from the U.S. Environmental Protection Agency. Neither the United States nor the U.S. Environmental Protection Agency (hereinafter, "EPA") is a party to this agreement. This agreement which covers grant-eligible work is subject to regulations contained in 40 CFR 35.936, 35.937, and 35.939 in effect on the date of execution of this agreement. As used in these clauses, the words "the date of execution of this agreement" mean the date of execution of this agreement and any subsequent modification of the terms, compensation or scope of services pertinent to unperformed work.

(c) The owner's rights and remedies provided in these clauses are in addition to any other rights and remedies provided by law or this agreement.

2. RESPONSIBILITY OF THE ENGINEER

(a) The engineer shall be responsible for the professional quality, technical accuracy, timely completion, and the coordination of all designs, drawings, specifications, reports, and other services furnished by the engineer under this agreement. The engineer shall, without additional compensation, correct or revise any errors, omissions, or other deficiencies in his designs, drawings, specifications, reports, and other services.

(b) The engineer shall perform such professional services as may be necessary to accomplish the work required to be performed under this agreement, in accordance with this agreement and applicable EPA requirements in effect on the date of execution of this agreement.

(c) The owner's or EPA's approval of drawings, designs, specifications, reports, and incidental engineering work or materials furnished hereunder shall not in any way relieve the engineer of responsibility for the technical adequacy of his work. Neither the owner's nor EPA's review, approval or acceptance of, nor payment for, any of the services shall be construed to operate as a waiver of any rights under this agreement or of any cause of action arising out of the performance of this agreement.

(d) The engineer shall be and shall remain liable, in accordance with applicable law, for all damages to the owner or EPA caused by the engineer's negligent performance of any of the services furnished under this agreement, except for errors, omissions or other deficiencies to the extent attributable to the owner, owner-furnished data or any third party. The engineer shall not be responsible for any time delays in the project caused by circumstances beyond the engineeer's control. Where innovative processes or techniques (see 40 CFR 35.908) are recommended by the engineer and are used, the engineer shall be liable only for gross negligence to the extent of such use.

3. SCOPE OF WORK

The services to be performed by the engineer shall include all services required to complete the task or Step in accordance with applicable EPA regulations (40 CFR Part 35, Subpart E in effect on the date of execution of this agreement) to the extent of the scope of work as defined and set out in the engineering services agreement to which these provisions are attached.

4. CHANGES

(a) The owner may, at any time, by written order, make changes within the general scope of this agreement in the services or work to be performed. If such changes cause an increase or decrease in the engineer's cost of, or time required for, performance of any services under this agreement, whether or not changed by any order, an equitable adjustment shall be made and this agreement shall be modified in writing accordingly. The engineer must assert any claim for adjustment under this clause in writing within 30 days from the date of receipt by the engineer of the notification of change, unless the owner grants a further period of time before the date of final payment under this agreement.

(b) No services for which an additional compensation will be charged by the engineer shall be furnished without the written authorization of the owner.

(c) In the event that there is a modification of EPA requirements relating to the services to be performed under this agreement after the date of execution of this agreement, the increased or decreased cost of performance of the services provided for in this agreement shall be reflected in an appropriate modification of this agreement.

5. TERMINATION

(a) Either party may terminate this agreement, in whole or in part, in writing, if the other party substantially fails to fulfill its obligations under this agreement through no fault of the terminating party. However, no such termination may be effected unless the other party is given (1) not less than ten (10) calendar days written notice (delivered by certified mail, return receipt requested) of intent to terminate and (2) an opportunity for consultation with the terminating party before termination.

(b) The owner may terminate this agreement, in whole or in part, in writing, for its convenience, if the termination is for good cause (such as for legal or financial reasons, major changes in the work or program requirements, initiation of a new step) and the engineer is given (1) not less than ten (10) calendar days written notice (delivered by

V 4 3 / 1 8 8
S E 2 7 7 8

certified mail, return receipt requested) of intent to terminate, and (2) an opportunity for consultation with the terminating party before termination.

(c) If the owner terminates for default, an equitable adjustment in the price provided for in this agreement shall be made, but (1) no amount shall be allowed for anticipated profit on unperformed services or other work, and (2) any payment due to the engineer at the time of termination may be adjusted to the extent of any additional costs the owner incurs because of the engineer's default. If the engineer terminates for default or if the owner terminates for convenience, the equitable adjustment shall include a reasonable profit for services or other work performed. The equitable adjustment for any termination shall provide for payment to the engineer for services rendered and expenses incurred before the termination, in addition to termination settlement costs the engineer reasonably incurs relating to commitments which had become firm before the termination.

(d) Upon receipt of a termination action under paragraphs (a) or (b) above, the engineer shall (1) promptly discontinue all services affected (unless the notice directs otherwise), and (2) deliver or otherwise make available to the owner all data, drawings, specifications, reports, estimates, summaries, and such other information and materials as the engineer may have accumulated in performing this agreement, whether completed or in process.

(e) Upon termination under paragraphs (a) or (b) above, the owner may take over the work and prosecute the same to completion by agreement with another party or otherwise. Any work the owner takes over for completion will be completed at the owner's risk, and the owner will hold harmless the engineer from all claims and damages arising out of improper use of the engineer's work.

(f) If, after termination for failure of the engineer to fulfill contractual obligations, it is determined that the engineer had not so failed, the termination shall be deemed to have been effected for the convenience of the owner. In such event, adjustment of the price provided for in this agreement shall be made as paragraph (c) of this clause provides.

6. REMEDIES

Except as this agreement otherwise provides, all claims, counter-claims, disputes, and other matters in question between the owner and the engineer arising out of or relating to this agreement or the breach of it will be decided by arbitration if the parties hereto mutually agree, or in a court of competent jurisdiction within the State in which the owner is located.

7. PAYMENT

(a) Payment shall be made in accordance with the payment schedule incorporated in this agreement as soon as practicable upon submission of statements requesting payment by the engineer to the owner. If no such payment schedule is incorporated in this agreement, the payment provisions of paragraph (b) of this clause shall apply.

(b) The engineer may request monthly progress payments and the owner shall make them as soon as practicable upon submission of statements requesting payment by the engineer to the owner. When such progress payments are made, the owner may withhold up to ten (10) percent of the vouchered amount until satisfactory completion by the engineer of work and services within a step called for under this agreement. When the owner determines that the work under this agreement or any specified task hereunder is substantially complete and that the amount of retained percentages is in excess of the amount considered by him to be adequate for his protection, he shall release to the engineer such excess amount.

(c) No payment request made under paragraph (a) or (b) of this clause shall exceed the estimated amount and value of the work and services performed by the engineer under this agreement. The engineer shall prepare the estimates of work performed and shall supplement them with such supporting data as the owner may require.

(d) Upon satisfactory completion of the work performed under this agreement, as a condition precedent to final payment under this agreement or to settlement upon termination of the agreement, the engineer shall execute and deliver to the owner a release of all claims against the owner arising under or by virtue of this agreement, other than such claims, if any, as may be specifically exempted by the engineer from the operation of the release in stated amounts to be set forth therein.

8. PROJECT DESIGN

(a) In the performance of this agreement, the engineer shall, to the extent practicable, provide for maximum use of structures, machines, products, materials, construction methods, and equipment which are readily available through competitive procurement, or through standard or proven production techniques, methods, and processes, consistent with 40 CFR 35.936-3 and 35.936-13 in effect on the date of execution of this agreement, except to the extent to which innovative technology may be used under 40 CFR 35.908 in effect on the date of execution of this agreement.

(b) The engineer shall not, in the performance of the work under this agreement, produce a design or specification which would require the use of structures, machines, products, materials, construction methods, equipment, or processes which the engineer knows to be available only from a sole source, unless the engineer has adequately justified the use of a sole source in writing.

(c) The engineer shall not, in the performance of the work under this agreement, produce a design or specification which would be restrictive in violation of sec. 204(a)(6) of the Clean Water Act. This statute requires that no specification for bids or statement of work shall be written in such a manner as to contain proprietary, exclusionary, or discriminatory requirements other than those based upon performance, unless such requirements are necessary to test or demonstrate a specific thing, or to provide for necessary interchangeability of parts and equipment, or at least two brand names or trade names of comparable quality or utility are listed and are followed by the words "or equal." With regard to materials, if a single material is specified, the engineer must be prepared to substantiate the basis for the selection of the material.

(d) The engineer shall report to the owner any sole-source or restrictive design or specification giving the reason or reasons why it is necessary to restrict the design or specification.

(e) The engineer shall not knowingly specify or approve the performance of work at a facility which is in violation of clean air or water standards and which is listed by the Director of the EPA Office of Federal Activities under 40 CFR Part 15.

9. AUDIT; ACCESS TO RECORDS

(a) The engineer shall maintain books, records, documents, and other evidence directly pertinent to performance on EPA grant work under this agreement in accordance with generally accepted accounting principles and practices consistently applied, and 40 CFR 30.605, 30.805, and 35.935-7 in effect on the date of execution of this agreement. The engineer shall also maintain the financial information and data used by the engineer in the preparation or support of the cost submission required under 40 CFR 35.937-6(b) in effect on the date of execution of this agreement and a copy of the cost summary submitted to the owner. The U.S. Environmental Protection Agency, the Comptroller General of the United States, the U.S. Department of Labor, owner, and [the State water pollution control agency] or any of their duly authorized representatives shall have access to such books, records, documents, and other evidence for inspection, audit, and copying. The engineer will provide proper facilities for such access and inspection.

(b) The engineer agrees to include paragraphs (a) through (e) of this clause in all his contracts and all tier subcontracts directly related to project performance that are in excess of $10,000.

(c) Audits conducted under this provision shall be in accordance with generally accepted auditing standards and established procedures and guidelines of the reviewing or audit agency(ies).

(d) The engineer agrees to the disclosure of all information and reports resulting from access to records under paragraphs (a) and (b) of this clause, to any of the agencies referred to in paragraph (a), provided that the engineer is afforded the opportunity for an audit exit conference and an opportunity to comment and submit any supporting documentation on the pertinent portions of the draft audit report and that the final audit report will include written comments of reasonable length, if any, of the engineer.

(e) The engineer shall maintain and make available records under paragraphs (a) and (b) of this clause during performance on EPA grant work under this agreement and until 3 years from the date of final EPA grant payment for the project. In addition, those records which relate to any "Dispute" appeal under an EPA grant agreement, to litigation, to the settlement of claims arising out of such performance, or to costs or items to which an audit exception has been taken, shall be maintained and made available until 3 years after the date of resolution of such appeal, litigation, claim, or exception.

10. PRICE REDUCTION FOR DEFECTIVE COST OR PRICING DATA

(This clause is applicable if the amount of this agreement exceeds $100,000.)

(a) If the owner or EPA determines that any price, including profit, negotiated in connection with this agreement or any cost reimbursable under this agreement was increased by any significant sums because the engineer or any subcontractor furnished incomplete or inaccurate cost or pricing data or data not current as certified in his certification of current cost or pricing data (EPA form 5700-41), then such price, cost, or profit shall be reduced accordingly and the agreement shall be modified in writing to reflect such reduction.

(b) Failure to agree on a reduction shall be subject to the remedies clause of this agreement.

(Note.—Since the agreement is subject to reduction under this clause by reason of defective cost or pricing data submitted in connection with certain subcontracts, the engineer may wish to include a clause in each such subcontract requiring the subcontractor to appropriately indemnify the engineer. It is also expected that any subcontractor subject to such indemnification will generally require substantially similar indemnification for defective cost or pricing data required to be submitted by his lower tier subcontractors.)

11. SUBCONTRACTS

(a) Any subcontractors and outside associates or consultants required by the engineer in connection with services under this agreement will be limited to such individuals or firms as were specifically identified and agreed to during negotiations, or as the owner specifically authorizes during the performance of this agreement. The owner must give prior approval for any substitutions in or additions to such subcontractors, associates, or consultants.

(b) The engineer may not subcontract services in excess of thirty (30) percent (or ——— percent, if the owner and the engineer hereby agree) of the contract price to subcontractors or consultants without the owner's prior written approval.

12. LABOR STANDARDS

To the extent that this agreement involves "construction" (as defined by the Secretary of Labor), the engineer agrees that such construction work shall be subject to the following labor standards provisions, to the extent applicable:

(a) Davis-Bacon Act (40 U.S.C. 276a—276a-7);

(b) Contract Work Hours and Safety Standards Act (40 U.S.C. 327-333);

(c) Copeland Anti-Kickback Act (18 U.S.C. 874); and

(d) Executive Order 11246 (Equal Employment Opportunity);

and implementing rules, regulations, and relevant orders of the Secretary of Labor or EPA. The engineer further agrees that this agreement shall include and be subject to the "Labor Standards Provisions for Federally Assisted Construction Contracts" (EPA form 5720-4) in effect at the time of execution of this agreement.

13. EQUAL EMPLOYMENT OPPORTUNITY

In accordance with EPA policy as expressed in 40 CFR 30.420-5, the engineer agrees that he will not discriminate against any employee or applicant for employment because of race, religion, color, sex, age, or national origin.

14. UTILIZATION OF SMALL AND MINORITY BUSINESS

In accordance with EPA policy as expressed in 40 CFR 35.936-7, the engineer agrees that qualified small business and minority business enterprises shall have the maximum practicable opportunity to participate in the performance of EPA grant-assisted contracts and subcontracts.

15. COVENANT AGAINST CONTINGENT FEES

The engineer warrants that no person or selling agency has been employed or retained to solicit or secure this contract upon an agreement or understanding for a commission, percentage, brokerage, or contingent fee, excepting bona fide employees. For breach or violation of this warranty the owner shall have the right to annul this agreement without liability or in its discretion to deduct from the contract price or consideration, or otherwise recover, the full amount of such commission, percentage, brokerage, or contingent fee.

16. GRATUITIES

(a) If it is found, after notice and hearing, by the owner that the engineer, or any of the engineer's agents or representatives, offered or gave gratuities (in the form of entertainment, gifts, or otherwise), to any official, employee, or agent of the owner, of the State, or of EPA in an attempt to secure a contract or favorable treatment in awarding, amending, or making any determinations related to the performance of this agreement, the owner may, by written notice to the engineer, terminate the right of the engineer to proceed under this agreement. The owner may also pursue other rights and remedies that the law or this agreement provides. However, the existence of the facts upon which the owner bases such findings shall be in issue and may be reviewed in proceedings under the remedies clause of this agreement.

(b) In the event this agreement is terminated as provided in paragraph (a) hereof, the owner shall be entitled: (1) To pursue the same remedies against the engineer as it could pursue in the event of a breach of the contract by the engineer, and (2) as a penalty, in addition to any other damages to which it may be entitled by law, to exemplary damages in an amount (as determined by the owner) which shall be not less than 3 nor more than 10 times the costs the engineer incurs in providing any such gratuities to any such officer or employee.

17. PATENTS

If this agreement involves research, developmental, experimental, or demonstration work and any discovery or invention arises or is developed in the course of or under this agreement, such invention or discovery shall be subject to the reporting and rights provisions of subpart D of 40 CFR part 30, in effect on the date of execution of this agreement, including appendix B of part 30. In such case, the engineer shall report the discovery or invention to EPA directly or through the owner, and shall otherwise comply with the owner's responsibilities in accordance with subpart D of 40 CFR part 30. The engineer agrees that the disposition of rights to inventions made under this agreement shall be in accordance with the terms and conditions of appendix B. The engineer shall include appropriate patent provisions to achieve the purpose of this condition in all subcontracts involving research, developmental, experimental, or demonstration work.

18. COPYRIGHTS AND RIGHTS IN DATA

(a) The engineer agrees that any plans, drawings, designs, specifications, computer programs (which are substantially paid for with EPA grant funds), technical reports, operating manuals, and other work submitted with a step 1 facilities plan or with a step 2 or step 3 grant application or which are specified to be delivered under this agreement or which are developed or produced and paid for under this agreement (referred to in this clause as "Subject Data") are subject to the rights in the United States, as set forth in subpart D of 40 CFR part 30 and in appendix C to 40 CFR part 30, in effect on the date of execution of this agreement. These rights include the right to use, duplicate, and disclose such subject data, in whole or in part, in any manner for any purpose whatsoever, and to have others do so. For purposes of this clause, "grantee" as used in appendix C refers to the engineer. If the material is copyrightable, the engineer may copyright it, as appendix C permits, subject to the rights in the Government in appendix C, but the owner and the Federal Government reserve a royalty-free, nonexclusive, and irrevocable license to reproduce, publish, and use such materials, in whole or in part, and to authorize others to do so. The engineer shall include appropriate provisions to achieve the purpose of this condition in all subcontracts expected to produce copyrightable subject data.

(b) All such subject data furnished by the engineer pursuant to this agreement are instruments of his services in respect of the project. It is understood that the engineer does not represent such subject data to be suitable for reuse on any other project or for any other purpose. If the owner reuses the subject data without the engineer's specific written verification or adaptation, such reuse will be at the risk of the owner, without liability to the engineer. Any such verification or adaptation will entitle the engineer to further compensation at rates agreed upon by the owner and the engineer.

APPENDIX C-2—REQUIRED PROVISIONS—CONSTRUCTION CONTRACTS

SUPPLEMENTAL GENERAL CONDITIONS

1. General.
2. Changes.
3. Differing Site Conditions.
4. Suspension of Work.
5. Termination for Default; Damages for Delay; Time Extensions.
6. Termination for Convenience.
7. Remedies.
8. Labor Standards.
9. Utilization of Small or Minority Business.
10. Audit; Access to Records.
11. Price Reduction for Defective Cost or Pricing Data.
12. Covenant Against Contingent Fees.
13. Gratuities.
14. Patents.
15. Copyrights and Rights in Data.
16. Prohibition Against Listed Violating Facilities.
17. Buy American.

1. GENERAL

(a) The owner and the contractor agree that the following supplemental general provisions apply to the work to be performed under this contract and that these provisions supersede any conflicting provisions of this contract.

(b) This contract is funded in part by a grant from the U.S. Environmental Protec-

V 4 3 / 1 8 8

tion Agency. Neither the United States nor any of its departments, agencies or employees is a party to this contract. This contract is subject to regulations contained in 40 CFR 35.936, 35.938, and 35.939 in effect on the date of execution of this contract.

(c) The owner's rights and remedies provided in these clauses are in addition to any other rights and remedies provided by law or under this contract.

2. CHANGES

(a) The owner may, at any time, without notice to the sureties, by written order designated or indicated to be a change order, make any change in the work within the general scope of the contract, including but not limited to changes—

(1) In the specifications (including drawings and designs);

(2) In the method or manner of performance of the work;

(3) In the owner-furnished facilities, equipment, materials, services, or site; or

(4) Directing acceleration in the performance of the work.

(b) Any other written order or an oral order (which terms as used in this paragraph (b) shall include direction, instruction, interpretation, or determination) from the owner, which causes any such change, shall be treated as a change order under this clause, if the contractor gives the owner written notice stating the date, circumstances, and source of the order and if the contractor regards the order as a change order.

(c) Except as provided in this clause, no order, statement, or conduct of the owner shall be treated as a change under this clause or shall entitle the contractor to an equitable adjustment.

(d) If any change under this clause causes an increase or decrease in the contractor's cost of, or the time required for, the performance of any part of the work under this contract, whether or not changed by any order, an equitable adjustment shall be made and the contract modified in writing accordingly. However, except for claims based on defective specifications, no claim for any change under (b) above shall be allowed for any costs incurred more than 20 days before the contractor gives written notice as there required. Also, in the case of defective specifications for which the owner is responsible, the equitable adjustment shall include any increased cost reasonably incurred by the contractor in attempting to comply with such defective specifications.

(e) If the contractor intends to assert a claim for an equitable adjustment under this clause, he must, within 30 days after receipt of a written change order under (a) above or the furnishing of a written notice under (b) above, submit to the owner a written statement setting forth the general nature and monetary extent of such claim, unless the owner extends this period. The statement of claim hereunder may be included in the notice under (b) above.

(f) No claim by the contractor for an equitable adjustment hereunder shall be allowed if asserted after final payment under this contract.

3. DIFFERING SITE CONDITIONS

(a) The contractor shall promptly, and before such conditions are disturbed, notify the owner in writing of: (1) Subsurface or latent physical conditions at the site differing materially from those indicated in this contract, or (2) unknown physical conditions at the site, of an unusual nature, differing materially from those ordinarily encountered and generally recognized as inhering in work of the character provided for in this contract. The owner shall promptly investigate the conditions. If he finds that such conditions do materially differ and cause an increase or decrease in the contractor's cost of, or the time required for, performance of any part of the work under this contract, whether or not changed as a result of such conditions, an equitable adjustment shall be made and the contract modified in writing accordingly.

(b) No claim of the contractor under this clause shall be allowed unless the contractor has given the notice required in paragraph (a) of this clause, except that the owner may extend the prescribed time.

(c) No claim by the contractor for an equitable adjustment hereunder shall be allowed if asserted after final payment under this contract.

4. SUSPENSION OF WORK

(a) The owner may order the contractor in writing to suspend, delay, or interrupt all or any part of the work for such period of time as he may determine to be appropriate for the convenience of the owner.

(b) If the performance of all or any part of the work is, for an unreasonable period of time, suspended, delayed, or interrupted by an act of the owner in administration of this contract, or by his failure to act within the time specfied in this contract (or if no time is specified, within a reasonable time), an adjustment shall be made for any increase in the cost of performance of this contract (excluding profit) necessarily caused by such unreasonable suspension, delay, or interruption, and the contract modified in writing accordingly. However, no adjustment shall be made under this clause for any suspension, delay, or interruption to the extent (1) that performance would have been so suspended, delayed, or interrupted by any other cause, including the fault or negligence of the contractor or (2) for which an equitable adjustment is provided for or excluded under any other provision of this contract.

(c) No claim under this clause shall be allowed (1) for any costs incurred more than 20 days before the contractor shall have notified the owner in writing of the act or failure to act involved (but this requirement shall not apply as to a claim resulting from a suspension order), and (2) unless the claim, in an amount stated, is asserted in writing as soon as practicable after the termination of such suspension, delay, or interruption, but not later than the date of final payment under the contract.

5. TERMINATION FOR DEFAULT; DAMAGES FOR DELAY; TIME EXTENSIONS

(a) If the contractor refuses or fails to prosecute the work, or any separable part of the work, with such diligence as will insure its completion within the time specified in this contract, or any extension thereof, or fails to complete said work within such time, the owner may, by written notice to the contractor, terminate his right to proceed with the work or such part of the work as to which there has been delay. In such event the owner may take over the work and prosecute the same to completion, by contract or otherwise, and may take possession of and use in completing the work such materials, appliances, and plant as may be on the site of the work and necessary therefor. Whether or not the contractor's right to proceed with the work is terminated, he and his sureties shall be liable for any damage to the owner resulting from his refusal or failure to complete the work within the specified time.

(b) If the contract provides for liquidated damages, and if the owner terminates the contractor's right to proceed, the resulting damage will consist of such liquidated damages until such reasonable time as may be required for final completion of the work together with any increased costs the owner incurs in completing the work.

(c) If the contract provides for liquidated damages and if the owner does not terminate the contractor's right to proceed, the resulting damage will consist of such liquidated damages until the work is completed or accepted.

(d) The contractor's right to proceed shall not be terminated nor the contractor charged with resulting damage if:

(1) The delay in the completion of the work arises from causes other than normal weather beyond the control and without the fault or negligence of the contractor, including, but not restricted to, acts of God, acts of the public enemy, acts of the owner in either its sovereign or contractual capacity, acts of another contractor in the performance of a contract with the owner, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, unusually severe weather, or delays of subcontractors or suppliers arising from causes other than normal weather beyond the control and without the fault or negligence of both the contractor and such subcontractors or suppliers; and

(2) The contractor, within 10 days from the beginning of any such delay (unless the owner grants a further period of time before the date of final payment under the contract), notifies the owner in writing of the causes of delay. The owner shall ascertain the facts and the extent of the delay and extend the time for completing the work when, in his judgment, the findings of fact justify such an extension. His findings of fact shall be final and conclusive on the parties, subject only to appeal as the remedies clause of this contract provides.

(e) If, after notice of termination of the contractor's right to proceed under the provisions of this clause, it is determined for any reason that the contractor was not in default under this clause, or that the delay was excusable under this clause, the rights and obligations of the parties shall be the same as if the notice of termination has been issued under the clause providing for termination for convenience of the owner.

(f) The rights and remedies of the owner provided in this clause are in addition to any other rights and remedies provided by law or under this contract.

(g) As used in paragraph (d)(1) of this clause, the term "subcontractors or suppliers" means subcontractors or suppliers at any tier.

6. TERMINATION FOR CONVENIENCE

(a) The owner may terminate the performance of work under this contract in accordance with this clause in whole, or from time to time in part, whenever the owner shall determine that such termination is in the best interest of the owner. Any such termination shall be effected by delivery to the

contractor of a notice of termination specifying the extent to which performance of work under the contract is terminated, and the date upon which such termination becomes effective.

(b) After receipt of a notice of termination, and except as otherwise directed by the owner, the contractor shall:

(1) Stop work under the contract on the date and to the extent specified in the notice of termination;

(2) Place no further orders or subcontracts for materials, services, or facilities except as necessary to complete the portion of the work under the contract which is not terminated;

(3) Terminate all orders and subcontracts to the extent that they relate to the performance of work terminated by the notice of termination;

(4) Assign to the owner, in the manner, at the times, and to the extent directed by the owner, all of the right, title, and interest of the contractor under the orders and subcontracts so terminated. The owner shall have the right, in its discretion, to settle or pay any or all claims arising out of the termination of such orders and subcontracts;

(5) Settle all outstanding liabilities and all claims arising out of such termination of orders and subcontracts, with the approval or ratification of the owner to the extent he may require. His approval or ratification shall be final for all the purposes of this clause;

(6) Transfer title to the owner, and deliver in the manner, at the times, and to the extent, if any, directed by the owner, (i) the fabricated or unfabricated parts, work in process, completed work, supplies, and other material produced as a part of, or acquired in connection with the performance of, the work terminated by the notice of termination, and (ii) the completed or partially completed plans, drawings, information, and other property which, if the contract had been completed, would have been required to be furnished to the owner;

(7) Use his best efforts to sell, in the manner, at the times, to the extent, and at the price or prices that the owner directs or authorizes, any property of the types referred to in paragraph (b)(6) of this clause, but the contractor (i) shall not be required to extend credit to any purchaser, and (ii) may acquire any such property under the conditions prescribed and at a price or prices approved by the owner. The proceeds of any such transfer or disposition shall be applied in reduction of any payments to be made by the owner to the contractor under this contract or shall otherwise be credited to the price or cost of the work covered by this contract or paid in such other manner as the owner may direct;

(8) Complete performance of such part of the work as shall not have been terminated by the notice of termination; and

(9) Take such action as may be necessary, or as the owner may direct, for the protection and preservation of the property related to this contract which is in the possession of the contractor and in which the owner has or may acquire an interest.

(c) After receipt of a notice of termination, the contractor shall submit to the owner his termination claim, in the form and with the certification the owner prescribes. Such claim shall be submitted promptly but in no event later than 1 year from the effective date of termination, unless one or more extensions in writing are granted by the owner upon request of the contractor made in writing within such 1-year period or authorized extension. However, if the owner determines that the facts justify such action, he may receive and act upon any such termination claim at any time after such 1-year period or extension. If the contractor fails to submit his termination claim within the time allowed, the owner may determine, on the basis of information available to him, the amount, if any, due to the contractor because of the termination. The owner shall then pay to the contractor the amount so determined.

(d) Subject to the provisions of paragraph (c), the contractor and the owner may agree upon the whole or any part of the amount or amounts to be paid to the contractor because of the total or partial termination of work under this clause. The amount or amounts may include a reasonable allowance for profit on work done. However, such agreed amount or amounts, exclusive of settlement costs, shall not exceed the total contract price as reduced by the amount of payments otherwise made and as further reduced by the contract price of work not terminated. The contract shall be amended accordingly, and the contractor shall be paid the agreed amount. Nothing in paragraph (e) of this clause, prescribing the amount to be paid to the contractor in the event of failure of the contractor and the owner to agree upon the whole amount to be paid to the contractor because of the termination of work under this clause, shall be deemed to limit, restrict, or otherwise determine or affect the amount or amounts which may be agreed upon to be paid to the contractor pursuant to this paragraph (d).

(e) If the contractor and the owner fail to agree, as paragraph (d) provides, on the whole amount to be paid to the contractor because of the termination of work under this clause, the owner shall determine, on the basis of information available to him, the amount, if any, due to the contractor by reason of the termination and shall pay to the contractor the amounts determined as follows:

(1) For all contract work performed before the effective date of the notice of termination, the total (without duplication of any items) of—

(i) The cost of such work;

(ii) The cost of settling and paying claims arising out of the termination of work under subcontracts or orders as paragraph (b)(5) of this clause provides. This cost is exclusive of the amounts paid or payable on account of supplies or materials delivered or services furnished by the subcontractor before the effective date of the notice of termination. These amounts shall be included in the cost on account of which payment is made under (i) above; and

(iii) A sum, as profit on (i), above, that the owner determines to be fair and reasonable. But, if it appears that the contractor would have sustained a loss on the entire contract had it been completed, no profit shall be included or allowed under this subdivision (iii) and an appropriate adjustment shall be made reducing the amount of the settlement to reflect the indicated rate of loss; and

(2) The reasonable cost of the preservation and protection of property incurred under paragraph (b)(9) of this clause; and any other reasonable cost incidental to termination of work under this contract, including expense incidental to the determination of the amount due to the contractor as the result of the termination of work under this contract. The total sum to be paid to the contractor under paragraph (e)(1) of this clause shall not exceed the total contract price as reduced by the amount of payments otherwise made and as further reduced by the price of work not terminated. Except for normal spoilage, and except to the extent that the owner shall have otherwise expressly assumed the risk of loss, there shall be excluded from the amounts payable to the contractor under (1) above, the fair value, as determined by the owner of property which is destroyed, lost, stolen, or damaged, to the extent that it is undeliverable to the owner, or to a buyer under paragraph (b)(7) of this clause.

(f) The contractor shall have the right to dispute under the clause of this contract entitled "Remedies," from any determination the owner makes under paragraph (c) or (e) of this clause. But, if the contractor has failed to submit his claim within the time provided in paragraph (c) of this clause and has failed to request extension of such time, he shall have no such right of appeal. In any case where the owner has determined the amount due under paragraph (c) or (e) of this clause, the owner shall pay to the contractor the following: (1) If there is no right of appeal hereunder or if no timely appeal has been taken, the amount so determined by the owner or (2) if a "Remedies" proceeding is initiated, the amount finally determined in such "Remedies" proceeding.

(g) In arriving at the amount due the contractor under this clause there shall be deducted (1) all unliquidated advance or other payments on account theretofore made to the contractor, applicable to the terminated portion of this contract, (2) any claim which the owner may have against the contractor in connection with this contract, and (3) the agreed price for, or the proceeds of sale of, any materials, supplies, or other things kept by the contractor or sold, under the provisions of this clause, and not otherwise recovered by or credited to the owner.

(h) If the termination hereunder be partial; before the settlement of the terminated portion of this contract, the contractor may file with the owner a request in writing for an equitable adjustment of the price or prices specified in the contract relating to the continued portion of the contract (the portion not terminated by the notice of termination). Such equitable adjustment as may be agreed upon shall be made in the price or prices. Nothing contained herein shall limit the right of the owner and the contractor to agree upon the amount or amounts to be paid to the contractor for the completion of the continued portion of the contract when the contract does not contain an established contract price for the continued portion.

7. REMEDIES

Unless this contracts provides otherwise, all claims, counter-claims, disputes and other matters in question between the owner and the contractor arising out of or relating to this agreement or its breach will be decided by arbitration if the parties mutually agree, or in a court of competent jurisdiction within the State in which the owner is located.

SEP 27 1978

V 4 3 / 1 8 8 S E 2 7 7 8

8. LABOR STANDARDS

The contractor agrees that "construction" work (as defined by the Secretary of Labor) shall be subject to the following labor standards provisions, to the extent applicable:

(a) Davis-Bacon Act (40 U.S.C. 276a-276a-7);

(b) Contract Work Hours and Safety Standards Act (40 U.S.C. 327-33);

(c) Copeland Anti-Kickback Act (18 U.S.C. 874); and

(d) Executive Order 11246 (equal employment opportunity);

and implementing rules, regulations, and relevant orders of the Secretary of Labor or EPA. The contractor further agrees that this contract shall include and be subject to the "Labor Standards Provisions for Federally assisted Construction Contracts" (EPA form 5720-4) in effect at the time of execution of this agreement.

9. UTILIZATION OF SMALL AND MINORITY BUSINESS

In accordance with EPA policy as expressed in 40 CFR 35.936-7, the contractor agrees that small business and minority business enterprises shall have the maximum practicable opportunity to participate in the performance of EPA grant-assisted contracts and subcontracts.

10. AUDIT; ACCESS TO RECORDS

(a) The contractor shall maintain books, records, documents and other evidence directly pertinent to performance on EPA grant work under this contract in accordance with generally accepted accounting principles and practices consistently applied, and 40 CFR 30.605, 30.805, and 35.935-7 in effect on the date of execution of this contract. The contractor shall also maintain the financial information and data used by the contractor in the preparation or support of the cost submission required under 40 CFR 35.938-5 in effect on the date of execution of this contract for any negotiated contract or change order and a copy of the cost summary submitted to the owner. The U.S. Environmental Protection Agency, the Comptroller General of the United States, the U.S. Department of Labor, owner, and [the State water pollution control agency] or any of their authorized representatives shall have access to such books, records, documents and other evidence for the purpose of inspection, audit and copying. The contractor will provide proper facilities for such access and inspection.

(b) If this contract is a formally advertised, competitively awarded, fixed price contract, the contractor agrees to make paragraphs (a) through (f) of this clause applicable to all negotiated change orders and contract amendments affecting the contract price. In the case of all other types of prime contracts, the contractor agrees to include paragraphs (a) through (f) of this clause in all his contracts in excess of $10,000 and all tier subcontracts in excess of $10,000 and to make paragraphs (a) through (f) of this clause applicable to all change orders directly related to project performance.

(c) Audits conducted under this provision shall be in accordance with generally accepted auditing standards and established procedures and guidelines of the reviewing or audit agency(ies).

(d) The contractor agrees to the disclosure of all information and reports resulting from access to records under paragraphs (a) and (b) of this clause, to any of the agencies referred to in paragraph (a), provided that the contractor is afforded the opportunity for an audit exit conference, and an opportunity to comment and submit any supporting documentation on the pertinent portions of the draft audit report and that the final EPA audit report will include written comments of reasonable length, if any, of the contractor.

(e) Records under paragraphs (a) and (b) above, shall be maintained and made available during performance on EPA grant work under this contract and until 3 years from the date of final EPA grant payment for the project. In addition, those records which relate to any "Dispute" appeal under an EPA grant agreement, to litigation, to the settlement of claims arising out of such performance, or to costs or items to which an audit exception has been taken, shall be maintained and made available until three years after the date of resolution of such appeal, litigation, claim or exception.

(f) The right of access which this clause confers will generally be exercised (with respect to financial records) under (1) negotiated prime contracts, (2) negotiated change orders or contract amendments in excess of $10,000 affecting the price of any formally advertised, competitively awarded, fixed price contract, and (3) subcontracts or purchase orders under any contract other than a formally advertised, competitively awarded, fixed price contract. However, this right of access will generally not be exercised with respect to a prime contract, subcontract, or purchase order awarded after effective price competition. In any event, such right of access may be exercised under any type of contract or subcontract (1) with respect to records pertaining directly to contract performance, excluding any financial records of the contractor, (2) if there is any indication that fraud, gross abuse, or corrupt practices may be involved or (3) if the contract is terminated for default or for convenience.

11. PRICE REDUCTION FOR DEFECTIVE COST OR PRICING DATA

(This clause is applicable to (1) any negotiated prime contract in excess of $100,000; (2) negotiated contract amendments or change orders in excess of $100,000 affecting the price of a formally advertised, competitively awarded, fixed price contract; or (3) any subcontract or purchase order in excess of $100,000 under a prime contract other than a formally advertised, competitively awarded, fixed price contract. Change orders shall be determined to be in excess of $100,000 in accordance with 40 CFR 35.938-5(g). However, this clause is not applicable for contracts or subcontracts to the extent that they are awarded on the basis of effective price competition.)

(a) If the owner or EPA determines that any price (including profit) negotiated in connection with this contract, or any cost reimbursable under this contract, was increased by any significant sums because the contractor, or any subcontractor furnished incomplete or inaccurate cost or pricing data or data not current as certified in his certification of current cost or pricing data (EPA form 5700-41), then such price or cost or profit shall be reduced accordingly and the contract shall be modified in writing to reflect such reduction.

(b) Failure to agree on a reduction shall be subject to the Remedies clause of this contract.

(Note.—Since the contract is subject to reduction under this clause by reason of defective cost or pricing data submitted in connection with certain subcontracts, the contractor may wish to include a clause in each such subcontract requiring the subcontractor to appropriately indemnify the contractor. It is also expected that any subcontractor subject to such indemnification will generally require substantially similar indemnification for defective cost or pricing data required to be submitted by his lower tier subcontractors.)

12. COVENANT AGAINST CONTINGENT FEES

The contractor warrants that no person or selling agency has been employed or retained to solicit or secure this contract upon an agreement or understanding for a commission, percentage, brokerage, or contingent fee, excepting bona fide employees or bona fide established commercial or selling agencies maintained by the contractor for the purpose of securing business. For breach or violation of this warranty the owner shall have the right to annul this contract without liability or in its discretion to deduct from the contract price or consideration, or otherwise recover, the full amount of such commission, percentage, brokerage, or contingent fee.

13. GRATUITIES

(a) If the owner finds, after notice and hearing, that the contractor or any of the contractor's agents or representatives offered or gave gratuities (in the form of entertainment, gifts, or otherwise) to any official, employee or agent of the owner, of the State, or of EPA in an attempt to secure a contract or favorable treatment in the awarding, amending, or making any determinations related to the performance of this contract, the owner may, by written notice to the contractor, terminate the right of the contractor to proceed under this contract. The owner may also pursue other rights and remedies that the law or this contract provides. However, the existence of the facts upon which the owner makes such findings shall be in issue and may be reviewed in proceedings under the remedies clause of this contract.

(b) In the event this contract is terminated as provided in paragraph (a) of this clause, the owner shall be entitled (1) to pursue the same remedies against the contractor as it could pursue in the event of a breach of the contract by the contractor, and (2) as a penalty in addition to any other damages to which it may be entitled by law, to exemplary damages in an amount (as determined by the owner) which shall be not less than 3 nor more than 10 times the costs the contractor incurs in providing any such gratuities to any such officer or employee.

14. PATENTS

If this contract involves research, developmental, experimental, or demonstration work, and any discovery or invention arises or is developed in the course of or under this contract, such invention or discovery shall be subject to the reporting and rights provisions of subpart D of 40 CFR Part 30, in effect on the date of execution of this contract, including appendix B of part 30. In such case, the contractor shall report the discovery or invention to EPA directly or through the owner, and shall otherwise comply with the owner's responsibilities in accordance with subpart D of 40 CFR Part 30. The contractor agrees that the disposition of rights to inventions made under this contract shall be in accordance with the terms and conditions of appendix B. The contractor shall include appropriate patent provisions to achieve the intent of this condition in all subcontracts involving research, developmental, experimental, or demonstration work.

15. COPYRIGHTS AND RIGHTS IN DATA

The contractor agrees that any plans, drawings, designs, specifications, computer programs (which are substantially paid for with EPA grant funds), technical reports, operating manuals, and other work submitted with a proposal or grant application or which are specified to be delivered under this contract or which are developed or produced and paid for under this contract (referred to in this clause as "Subject Data") are subject to the rights in the United States, as set forth in subpart D of 40 CFR Part 30 and in appendix C to 40 CFR Part 30, in effect on the date of execution of this contract. These rights include the right to use, duplicate and disclose such Subject Data, in whole or in part, in any manner for any purpose whatsoever, and to have others do so. For purposes of this clause, "grantee" as used in appendix C refers to the contractor. If the material is copyrightable, the contractor may copyright it, as appendix C permits, subject to the rights in the Government as set forth in appendix C, but the owner and the Federal Government reserve a royalty-free, nonexclusive, and irrevocable license to reproduce, publish and use such materials, in whole or in part, and to authorize others to do so. The contractor shall include provisions appropriate to achieve the intent of this condition in all subcontracts expected to produce copyrightable Subject Data.

16. PROHIBITION-AGAINST LISTED VIOLATING FACILITIES

(Applicable only to a contract in excess of $100,000 and when otherwise applicable under 40 CFR Part 15.)

(a) The contractor agrees as follows:

(1) To comply with all the requirements of section 114 of the Clean Air Act, as amended (42 U.S.C. 1857, et seq., as amended by Pub. L. 92-604) and section 308 of the Clean Water Act (33 U.S.C. 1251, as amended), respectively, which relate to inspection, monitoring, entry, reports, and information, as well as other requirements specified in section 114 and section 308 of the Air Act and the Water Act, respectively, and all regulations and guidelines issued thereunder before the award of this contract.

(2) That no portion of the work required by this prime contract will be performed in a facility listed on the Environmental Protection Agency list of violating facilities on the date when this contract was awarded unless and until the EPA eliminates the name of such facility or facilities from the listing.

(3) To use his best efforts to comply with clean air and clean water standards at the facilities in which the contract is being performed.

(4) To insert the substance of the provisions of this clause, including this subparagraph (4), in any nonexempt subcontract.

(b) The terms used in this clause have the following meanings:

(1) The term "Air Act" means the Clean Air Act, as amended (42 U.S.C. 1857 et seq.).

(2) The term "Water Act" means the Clean Water Act, as amended (33 U.S.C. 1251 et seq.).

(3) The term "Clean Air Standards" means any enforceable rules, regulations, guidelines, standards, limitations, orders, controls, prohibitions, or other requirements which are contained in, issued under, or otherwise adopted under the Air Act or Executive Order 11738, an applicable implementation plan as described in section 110(d) of the Air Act (42 U.S.C. 1857c-5(d)), an approved implementation procedure or plan under section 111(c) or section 111(d), or an approved implementation procedure under section 112(d) of the Air Act (42 U.S.C. 1857c-7(d)).

(4) The term "Clean Water Standards" means any enforceable limitation, control, condition, prohibition, standard, or other requirement which is promulgated under the Water Act or contained in a permit issued to a discharger by the Environmental Protection Agency or by a State under an approved program, as authorized by section 402 of the Water Act (33 U.S.C. 1342), or by a local government to ensure compliance with pretreatment regulations as required by section 307 of the Water Act (33 U.S.C. 1317).

(5) The term "Compliance" means compliance with clean air or water standards. Compliance shall also mean compliance with a schedule or plan ordered or approved by a court of competent jurisdiction, the Environmental Protection Agency or an Air or Water Pollution Control Agency in accordance with the requirements of the Air Act or Water Act and regulations.

(6) The term "Facility" means any building, plant, installation, structure, mine, vessel, or other floating craft, location, or site of operations, owned, leased, or supervised by a contractor or subcontractor, to be used in the performance of a contract or subcontract. Where a location or site of operations contains or includes more than one building, plant, installation, or structure, the entire location or site shall be deemed to be a facility except where the Director, Office of Federal Activities, Environmental Protection Agency, determines that independent facilities are located in one geographical area.

17. BUY AMERICAN

In accordance with Section 215 of the Clean Water Act, and implementing EPA regulations and guidelines, the contractor agrees that preference will be given to domestic construction material by the contractor, subcontractors, materialmen, and suppliers in the performance of this contract.

APPENDIX D—EPA TRANSITION POLICY—EXISTING CONSULTING ENGINEERING AGREEMENTS

A. ACCESS TO RECORDS—AUDIT

1. *Access clause.* After June 30, 1975, a construction grant for Steps 1, 2 or 3 will not be awarded nor will initiation of Step 1 work be approved under 40 CFR 35.917(e) or 35.925-18(a)(3), unless an acceptable records and access clause is included in the consulting engineering subagreement. The clause contained in appendix C-1 shall be used on or after March 1, 1976. The clause required by former PG-53 or approved as an alternate thereto may be used for all contracts under grants awarded before March 1, 1976.

2. *EPA exercise of right of access to records.* Under applicable statutory and regulatory provisions, EPA has a broad right of access to grantees' consulting engineers' records pertinent to performance of EPA project work. The extent to which EPA will exercise this right of access will depend upon the nature of the records and upon the type of agreement.

a. In order to determine where EPA shall exercise its right of access, engineers' project-related records have been divided into three categories:

(1) Category A: Records that pertain directly to the professional, technical and other services performed, excluding any type of financial records of the consulting engineer.

(2) Category B: Financial records of the consulting engineer pertaining to the direct costs of professional, technical and other services performed, excluding financial records pertaining to profit and overhead or other indirect costs.

(3) Category C: Financial records of the consulting engineer excluded from category B.

b. In all cases, EPA will exercise its right of access to Category A records. Also, where there is an indication that fraud, gross abuse, or corrupt practices may be involved, EPA will exercise its right of access to records in all categories. Otherwise, access to consulting engineers' financial records (categories B and C) will depend principally upon the method(s) of compensation stipulated in the agreement:

(1) *Agreements based upon a percentage of construction cost.* Category B and C records will not be audited. However, terms of the agreement, including the total amount of compensation, will be evaluated for fairness, reasonableness, and consistency with historical and advisory guidelines in general use and acceptable locally. These guidelines include those in ASCE manual 45 or other analyses or data which the contracting parties relied on or used in negotiation of the agreement. Such evaluation shall also consider comparable contracts for which EPA grants have been awarded.

(2) *Agreements based upon salary cost times a multiplier including profit.* Category B records will be audited. Category C records will not be audited. However, terms of the agreement, including the total amount of compensation and the multiplier, will be evaluated for fairness and reasonableness and consistency with historical and advisory guidelines in general use and acceptable locally. These guidelines include those in ASCE manual 45 or other analyses or data which the contracting parties relied on or used in negotiation of the agreement. Such evaluation shall also consider comparable contracts for which EPA grants have been awarded. Items of overhead or other indirect costs will only be audited to the extent necessary to assure that types of costs found both in overhead and reimbursable direct costs, if any, are properly charged.

(3) *Per diem agreements.* Category B records will be audited. Category C records will not be audited. Audit will be performed to the extent necessary to determine that hours claimed and classes of personnel used were properly supported. The per diem rates will be evaluated according to the ap-

V 4 3 / 1 8 8

propriate portions of paragraphs A.2.b. (1) and (2) of this appendix.

(4) *Cost plus a fixed fee (profit).* All direct costs, overhead, and other indirect costs claimed will be audited to determine that they are reasonable, allowable, and properly supported by the consulting engineer's records. The amount of fixed fee will not be questioned unless the total compensation appears unreasonable when evaluated according to paragraphs A.2.b. (1) and (2) of this appendix.

(5) *Fixed price lump sum contracts.* Category B and C records will not be audited. The contract amount will not be questioned unless the total compensation appears unreasonable when evaluated in accordance with appropriate portions of paragraphs A.2.b. (1) and (2) of this appendix.

c. If an agreement covers both grant-eligible and ineligible work, access to records will be exercised to the extent necessary to allocate contract work or costs between work grant-eligible for title II construction grant assistance and ineligible work or costs.

d. Under agreements that use two or more methods of compensation, each part of the agreement will be separately audited according to the appropriate subparagraph of paragraph (b)(2) of this section.

e. Any audited firm and the grantee will be afforded opportunity for an audit exit conference and an opportunity to receive and comment upon the pertinent portions of each draft audit report. The final audit report will include the written comments, if any, of the audited parties in addition to those of the appropriate State and/or Federal agency(ies).

B. TYPE OF CONTRACT

1. The percentage-of-construction-cost type of contract, and the multiplier contract, where the multiplier includes profit, may not be used for step 1 or step 2 work initiated after June 30, 1975, when the step 1 or step 2 grant is awarded after June 30, 1975. (A multiplier type of compensation may be used only under acceptable types of contracts; see 40 CFR 35.937-1(d).)

2. Step 1 and step 2 work performed under the percentage-of-construction-cost type of contract and the multiplier contract, where the multiplier includes profit, will be reimbursed and such contracts will not be questioned where such costs are reimbursed in conjunction with a step 3 grant award within the scope of step 2 work contracted for prior to July 1, 1975. However, the current step 2 work will not be continued indefinitely for multiple, subsequent step 3 projects in order to avoid modifying the consultant agreement.

3. Where step 2 work is initiated after June 30, 1975, under contracts prohibited by paragraphs B.1. and B.2. of this appendix, EPA approval may not be given nor grant assistance awarded until the contract's terms of compensation have been renegotiated.

4. Establishing an "upset" figure (an upper limit which cannot be exceeded without a formal amendment to the agreement) under a multiplier contract, where the multiplier includes profit, is not acceptable where renegotiation of such contracts is required. In such renegotiation, the amount of profit must be specifically identified.

5. Total allowable contract costs for grant payment for a contract based on a percentage-of-construction-cost will be based on the following:

a. Where work for the design step is essentially continuous from start of design to bidding, and bid opening for step 3 construction occurs within 1 year after substantial completion of step 2 design work, the total allowable contract costs for grant payment may not exceed an amount based upon the low, responsive, responsible bid for construction.

b. Where work for the design step is not essentially continuous from start of design to bidding, or 1 year or more elapses between substantial completion of step 2 design work and bid opening for step 3 construction, the total allowable contract costs for grant payment may not exceed an amount based upon the lower of:

(1) The consulting engineer's construction cost estimate provided at the time of such substantial completion plus an escalation of this construction cost estimate of up to 5 percent, but not to exceed the consulting engineer's total compensation based on the low, responsive, responsible bid for construction, or

(2) The consulting engineer's construction cost estimate provided at the time of such substantial completion plus a consulting engineer's compensation esclation not to exceed $50,000, but not to exceed the consulting engineer's total compensation based upon the low, responsive, responsible bid for construction.

c. Where the low, responsive, responsible bid for construction would have resulted in a higher consulting engineer's total compensation than paragraph b provides, the Regional Administrator may also consider a reasonable additional compensation for updating the plans and specifications, revising cost estimates, or similar services.

d. The limitations of paragraph B5 apply to all grants awarded under subpart E except that—

(1) If the Regional Administrator had made final payment on a project before December 17, 1975, the limitations do not apply; and

(2) For other projects on which construction for the building and erection of a treatment works was initiated prior to December 17, 1975, the limitations do not apply to any request for engineering fee increases attributable to construction contract awards or change orders approved by the grantee prior to December 17, 1975.

6. Where renegotiation is required under this appendix D, such renegotiation is subject to 40 CFR 35.937-1, 35.937-6, 35.937-7, 35.937-9, and 35.937-10.

C. ANNOUNCEMENT AND SELECTION

The requirements of 40 CFR 35.937-2 through 35.937-4 shall not apply to step 1 work where the step 1 grant was awarded or the initiation of step 1 work was approved by EPA (under 40 CFR 35.917(e)) before March 1, 1976, nor to subsequent step 2 and step 3 work in accordance with 40 CFR 35.937-2(d), if the grantee is satisfied with the qualifications and performance of the engineer employed.

D. REQUIRED CONSULTING ENGINEERING PROVISIONS

Effective March 1, 1976, the subagreement clauses required under appendix C-1 must be included in the consulting engineering subagreement before grant assistance for step 1, 2 or 3 will be awarded and before initiation of step 1 work will be approved under 40 CFR 35.917(e) or 35.925-18(a) 3.

E. ENFORCEMENT

1. Refusal by a consulting engineer to insert the required access clause, or to allow access to its records, or to renegotiate a consulting engineering contract according to the foregoing requirements, will render costs incurred under such contract unallowable. Accordingly, all such costs will be questioned and disallowed pending compliance with this appendix.

2. Where the Regional Administrator determines that the time required to comply with the access to records and type of contract provisions of this appendix will unduly delay award of grant assistance, he may award the grant assistance conditioned upon compliance with this appendix within a specified period of time. In such event, no grant payments for the affected engineering work may be made until such compliance has been obtained.

APPENDIX E.—INNOVATIVE AND ALTERNATIVE TECHNOLOGY GUIDELINES

1. *Purpose.* These guidelines provide the criteria for identifying and evaluating innovative and alternative waste water treatment processes and techniques. The Administrator may publish additional information.

2. *Authority.* These guidelines are provided under section 304(d)(3) of the Clean Water Act.

3. *Applicability.* These guidelines apply to:

a. The analysis of innovative and alternative treatment processes and techniques under § 35.917-1(d)(8);

b. Increased grants for eligible treatment works under §§ 35.930-6 (b) and (c) and 35.908(b)(1);

c. The funding available for innovative and alternative processes and techniques under § 35.915-1(b);

d. The funding available for alternatives to conventional treatment works for small communities under § 35.915-1(e);

e. The cost-effectiveness preference given innovative and alternative processes and techniques in section 7 of appendix A to this subpart;

f. The treatment works that may be given higher priority on State project priority lists under § 35.915(a)(1)(iii);

g. Alternative and innovative treatment systems in connection with Federal facilities;

h. Individual systems authorized by § 35.918, as modified in that section to include unconventional or innovative sewers;

i. The access and reports conditions in § 35.935-20.

4. *Alternative processes and techniques.* Alternative waste water treatment processes and techniques are proven methods which provide for the reclaiming and reuse of water, productively recycle waste water constituents or otherwise eliminate the discharge of pollutants, or recover energy.

a. In the case of processes and techniques for the treatment of effluents, these include land treatment, aquifer recharge, aquaculture, silviculture, and direct reuse for industrial and other nonpotable purposes, horticulture and revegetation of disturbed land. Total containment ponds and ponds for the treatment and storage of waste water prior to land application and other processes necessary to provide minimum levels of preapplication treatment are considered to be part of alternative technology systems for the purpose of this section.

b. For sludges, these include land application for horticultural, silvicultural, or agricultural purposes (including supplemental processing by means such as composting or drying), and revegetation of disturbed lands.

c. Energy recovery facilities include codisposal measures for sludge and refuse which produce energy; anaerobic digestion facilities (*Provided*, That more than 90 percent of the methane gas is recovered and used as fuel); and equipment which provides for the use of digester gas within the treatment works. Self-sustaining incineration may also be included provided that the energy recovered and productively used is greater than the energy consumed to dewater the sludge to an autogenous state.

d. Also included are individual and other onsite treatment systems with subsurface or other means of effluent disposal and facilities constructed for the specific purpose of septage treatment.

e. The term "alternative" as used in these guidelines includes the terms "unconventional" and "alternative to conventional" as used in the Act.

f. The term "alternative" does not include collector sewers, interceptors, storm or sanitary sewers or the separation thereof; or major sewer rehabilitation, except insofar as they are alternatives to conventional treatment works for small communities under § 35.915-1(e) or part of individual systems under § 35.918.

5. *Innovative processes and techniques.* Innovative waste water treatment processes and techniques are developed methods which have not been fully proven under the circumstances of their contemplated use and which represent a significant advancement over the state of the art in terms of meeting the national goals of cost reduction, increased energy conservation or recovery, greater recycling and conservation of water resources (including preventing the mixing of pollutants with water), reclamation or reuse of effluents and resources (including increased productivity of arid lands), improved efficiency and/or reliability, the beneficial use of sludges or effluent constituents, better management of toxic materials or increased environmental benefits. For the purpose of these guidelines, innovative waste water treatment processes and techniques are generally limited to new and improved applications of those alternative processes and techniques identified in accordance with paragraph 4 of these guidelines, including both treatment at centralized facilities and individual and other onsite treatment. Treatment processes based on the conventional concept of treatment (by means of biological or physical/chemical unit processes) and discharge to surface waters shall not be considered innovative waste water treatment processes and techniques except where it is demonstrated that these processes and techniques, as a minimum, meet either the cost-reduction or energy-reduction criterion described in section 6 of these guidelines. Treatment and discharge systems include primary treatment, suspended-growth or fixed-growth biological systems for secondary or advance waste water treatment, physical/chemical treatment, disinfection, and sludge processing. The term "innovative" does not include collector sewers, interceptors, storm or sanitary sewers or the separation of them, or major sewer rehabilitation, except insofar as they meet the criteria in paragraph 6 of these guidelines and are alternatives to conventional treatment works for small communities under § 35.915-1(e) or part of individual systems under § 35.918.

6. *Criteria for determining innovative processes and techniques.* a. The Regional Administrator will use the following criteria in determining whether a waste water treatment process or technique is innovative. The criteria should be read in the context of paragraph 5. These criteria do not necessarily preclude a determination by the Regional Administrator that a treatment system is innovative because of local variations in geographic or climatic conditions which affect treatment plant design and operation or because it achieves significant public benefits through the advancement of technology which would otherwise not be possible. The Regional Administrator should consult with EPA headquarters about determinations made in other EPA regions on similar processes and techniques.

b. New or improved applications of alternative waste water treatment processes and techniques may be innovative for the purposes of this regulation if they meet one or more of the criteria in paragraphs e(1) through e(6) of this paragraph. Treatment and discharge systems (i.e., systems which are not new or improved applications of alternative waste water treatment processes and techniques in accordance with paragraph 4 of these guidelines) must meet the criteria of either paragraph 6e(1) or 6e(2), as a minimum, in order to be innovative for the purposes of these guidelines.

c. These six criteria are essentially the same as those used to evaluate any project proposed for grant assistance. The principal difference is that some newly developed processes and techniques may have the potential to provide significant advancements in the state of the art with respect to one or more of these criteria. Inherent in the concept of advancement of technology is a degree of risk which is necessary to initially demonstrate a method on a full, operational scale under the circumstances of its contemplated use. This risk, while recognized to be a necessary element in the implementation of innovative technology, must be minimized by limiting the projects funded to those which have been fully developed and shown to be feasible through operation on a smaller scale. The risk must also be commensurate with the potential benefits (i.e., greater potential benefits must be possible in the case of innovative technology projects where greater risk is involved).

d. Increased Federal funding under 35.908(b) may be made only from the reserve in § 35.915-1(b). The Regional Administrator may fund a number of projects using the same type of innovative technology if he desires to encourage certain innovative processes and techniques because the potential benefits are great in comparison to the risks, or if operation under differing conditions of climatic, geology, etc., is desirable to demonstrate the technology.

e. The Regional Administrator will use the following criteria to determine whether waste water treatment processes and techniques are innovative:

(1) The life cycle cost of the treatment works is at least 15 percent less than that for the most cost-effective alternative which does not incorporate innovative waste water treatment processes and techniques (i.e., is no more than 85 percent of the life cycle cost of the most cost-effective noninnovative alternative).

(2) The net primary energy requirements for the operation of the treatment works are at least 20 percent less than the net energy requirements of the least net energy alternative which does not incorporate innovative waste water treatment processes and techniques (i.e., the net energy requirements are no more than 80 percent of those for the least net energy noninnovative alternative). The least net energy noninnovative alternative must be one of the alternatives selected for analysis under section 5 of appendix A.

(3) The operational reliability of the treatment works is improved in terms of decreased susceptibility to upsets or interference, reduced occurrence of inadequately treated discharges and decreased levels of operator attention and skills required.

(4) The treatment works provides for better management of toxic materials which would otherwise result in greater environmental hazards.

(5) The treatment works results in increased environmental benefits such as water conservation, more effective land use, improved air quality, improved ground water quality, and reduced resource requirements for the construction and operation of the works.

(6) The treatment works provide for new or improved methods of joint treatment and management of municipal and industrial wastes that are discharged into municipal systems.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of the Secretary

PRIVACY ACT OF 1974

Systems of Records; Annual Publication

Agency: Department of Health, Education, and Welfare (HEW), Office of the Secretary

Action: Annual republication of notices of systems of records

Summary: This document is published to meet the requirements of 5 U.S.C. 552a(e)(4). This is the annual republication of the Department of Health, Education, and Welfare's notices of systems of records. The listing of notices is complete as of September 20, 1978, and does not contain any material which would require a new or altered system report as described in OMB Circular A-108. The notices do not contain any new routine uses. Nonetheless, these notices do include modifications for the purposes of completeness, clarity, timeliness and correctness. The Department published a summary of modifications on September 20, 1978. Additionally, the Department published new or altered system notices as well as new routine use notices in the Federal Register (FR) when required during the year. If any errors appear because of inadvertant oversight, we will publish additional modifications, additions and deletions in later issues of the Federal Register to correct such errors.

We note that there are certain routine uses that apply to a substantial number of HEW systems of records and we have set forth such uses in Appendix B preceding the notices. In the notices of systems of records, we refer to this appendix by the following name: Appendix B of the Departmental regulations (45CFR5b). When we cite a specific routine use in Appendix B, that routine use supplements other routine uses already mentioned in the text of the individual notices.

Dated: August 16, 1978.

Leonard D. Schaeffer,
Assistant Secretary for Management and Budget.

APPENDIX B OF DEPARTMENTAL REGULATIONS (45 CFR Part 5b)

Routine Uses Applicable To More Than One System of Records Maintained by HEW

(1) In the event that a system of records maintained by this agency to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether federal, or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

(2) Referrals may be made of assignments of research investigators and project monitors to specific research projects to the Smithsonian Institution to contribute to the Smithsonian Science Information Exchange, Inc.

(3) In the event the Department deems it desirable or necessary, in determining whether particular records are required to be disclosed under the Freedom of Information Act, disclosure may be made to the Department of Justice for the purpose of obtaining its advice.

(4) A record from this system of records may be disclosed as a 'routine use' to a federal, state or local agency maintaining civil, criminal or other relevant enforcement records or other pertinent records, such as current licenses, if necessary to obtain a record relevant to an agency decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant or other benefit.

A record from this system of records may be disclosed to a federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the record is relevant and necessary to the requesting agency's decision on the matter.

(5) In the event that a system of records maintained by this agency to carry out its function indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether state or local charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

(6) Where federal agencies having the power to subpoena other federal agencies' records, such as the Internal Revenue Service or the Civil Rights Commission, issue a subpoena to the Department for records in this system of records, the Department will make such records available.

(7) Where a contract between a component of the Department and a labor organization recognized under E.O. 11491 provides that the agency will disclose personal records relevant to the organization's mission, records in this system of records may be disclosed to such organization.

(8) Where the appropriate official of the Department, pursuant to the Department's Freedom of Information Regulation determines that it is in the public interest to disclose a record which is otherwise exempt from mandatory disclosure, disclosure may be made from this system of records.

(9) The Department contemplates that it will contract with a private firm for the purpose of collating, analyzing, aggregating or otherwise refining records in this system. Relevant records will be disclosed to such a contractor. The contractor shall be required to maintain Privacy Act safeguards with respect to such reeords.

(10)-(99) (reserved)

(100) To the Department of Justice or other appropriate Federal agencies in defending claims against the United States when the claim is based upon an individual's mental or physical condition and is alleged to have arisen because of activities of the Public Health Service in connection with such individual.

(101) To individuals and organizations, deemed qualified by the Secretary to carry out specific research solely for the purpose of carrying out such research.

(102) To organizations deemed qualified by the Secretary to carry out quality assessment, medical audits or utilization review.

(103) Disclosures in the course of employee discipline or competence determination proceedings.

V 43 / 188

09-90-0001

System name: HEW-09-90/0001 Telephone Directory/Locator System HEW-OS-ASMB-OMAS

Security classification: None

System location: Operating offices and Facility Complexes of the Department—Employee Locators and Offices of Administative or Management Services.

Categories of individuals covered by the system: Current employees of the Department and vendor or other Federal employees located in Department operating offices and facility complexes.

Categories of records in the system: Name, title, agency office address, agency mailing address telephone number, standard administrative code, and social security number.

Authority for maintenance of the system: 5 USC 301, 40 USC 486 (c).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Records are used to develop and maintain current employee locator and director listings. The locator listings are use by the HEW information centers, mail rooms, and other specifically for the purpose of locating employees and for routing of mail. The directory listings are used to produce departmental telephone directories on an as needed basis. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her offical capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Variously stored in card files, computer printouts, paper forms, magnetic tape.

Retrievability: Alphabetically by employee name, in certain instances also by agency and/or title. Some large systems use the SSN as control to update, change or delete information on individuals no longer within this system of Records.

Safeguards: Only authorized personnel have access to master lists which contain social security numbers.

Retention and disposal: Retained as long as individual is employed by or associated with the Department, then information deleted from files by appropriate method.

System manager(s) and address: Telecommunications management officials of the Departement—See Appendix

Notification procedure: Direct inquiries to the appropriate systems manager identified in Appendix.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Individual employee

09-90-0002

System name: Investigatory Material Compiled for Security and Suitability Purposes System, HEW/OS/ASPER

Security classification: None for the system; however, a portion of the records within the system are classified at the level of Confidential, Secret, and Top Secret.

System location:
Division of Security
Room 523B, Humphrey Building
U.S. Department of Health, Education, and Welfare
200 Independence Avenue, S.W.
Washington, DC 20201
Regional Federal Record Center

Categories of individuals covered by the system: Applicants, employees, former employees and others doing business with the Department.

Categories of records in the system: Security investigations case index card file.

Authority for maintenance of the system: Executive Orders 10450 and 11652.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: These records may be used as follows:

a. See Appendix B Departmental Regulations (45 CFR Part 5b) Items 1, 4, 5.

b. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

c. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

V 4 3 / 1 8 8

Storage: The records are maintained in security type vaults or safes or lock bar file cabinets with manipulation proof combination locks.

Retrievability: The records are alphabetically indexed by name and date of birth of the individual subject of the file or by cross reference to another file. Access within HEW is limited to the Secretary, and on a need-to-know basis other officials having the program management responsibility.

Safeguards: Direct access is restricted to authorized Division of Security staff. Access to the safes in which the records are stored is limited to those Division of Security employees with appropriate security clearances and the lock combination.

Retention and disposal: Security investigative records on individuals who occupy sensitive positions are maintained during the term of their employment. Other security investigative records are maintained for ten years if subject to EO 10450. All other files are destroyed after three years.

System manager(s) and address:

Director, Division of Security
Room 523B, Humphrey Bldg.
U.S. Department of Health, Education, and Welfare
200 Independence Avenue, S.W.
Washington, D.C. 20201

Notification procedure: System Manager; for general inquiries, include name, date of birth, and employment or other affiliation with the Department.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Federal, state or local agencies maintaining civil, criminal, suitability, or other relevant enforcement information or other pertinent information, correspondence and material or data obtained during the course of the conduct of the investigations.

Systems exempted from certain provisions of the act: Individuals will be provided information from this record system except when in accordance with the provisions of 5 USC 552a(k)(5): 1. disclosure of such information would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence, or 2. if the information was obtained prior to September 27, 1975, disclosure of such information would reveal the identity of a source who provided information under an implied promise that the identity of the source would be held in confidence. (45 CFR 5b.11).

09-90-0003

System name: Investigative Files of the Inspector General, HEW/OS/OIG

Security classification: None.

System location:

Office of Inspector General, DHEW
Room 5246, North Bldg.
330 Independence Ave. SW.
Washington, D.C. 20201
Office of the Inspector General, DHEW
Room 4044, ROB 3
7th & D Streets SW.
Washington, D.C. 20201

Categories of individuals covered by the system: Employees, former employees, grantees, contractors, sub-contractors, carriers, State agencies, State employees, providers and recipients under DHEW programs, providers and recipients under State programs funded by the Department and others doing business with the Department.

Categories of records in the system: Criminal Investigation Files.

Authority for maintenance of the system: 28 U.S.C. 535(b); 18 U.S.C.; P.L. 94-505, Oct. 15, 1976.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See Appendix B Departmental regulations (45 CFR Part 5b), Items (l)(4), (5). Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of the individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected. A record from this system of records may be disclosed as a "routine use" to a Federal, State, or local agency maintaining pertinent records, if necessary to obtain a record relevant to a Department decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant, or other benefit.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: The records, which take the form of index cards, computer tape files, and computer printed listings, are maintained in security type safes or lock bar file cabinets with manipulation proof combination locks.

Retrievability: The records are retrieved by manual search of alphabetical index and cross-index cards listing individuals, companies and organizations.

Safeguards: Direct access is restricted to authorized staff members of the Office of Inspector General. Access within DHEW is limited to the Secretary, Under-Secretary, Inspector General and other officials and employees on a need-to-know basis. Intra-agency transfers are made in accordance with the statement of Organization, Functions and Delegations of Authority as set out in a notice concerning the Office of Inspector General (42 F.R. 17531, April 1, 1977). All computer files and printed listings are safeguarded in accordance with the provisions of the National Bureau of Standards Federal Information Processing Standards 41 and 31, and the HEW Information Processing Standards, HEW ADP Systems Manual, A5-10-3.

Retention and disposal: Investigative files are retained for 5 years after completion of the investigation and/or actions based thereon. Index and cross-reference cards are retained permanently. In instances of computer matching of files, only those records which meet predetermined criteria for investigation are maintained. All records which do not meet these criteria are destroyed. All original source computer tapes are returned or destroyed once computer matching has been accomplished.

System manager(s) and address:

Inspector General/Deputy Inspector General
Room 5262, North Building
U.S. Department of Health, Education, and Welfare
330 Independence Avenue S.W.
Washington, D.C. 20201

Notification procedure: Exempt, however consideration will be given requests addressed to the system manager. For general inquiries include the name and date of birth of the individual.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sught. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Departmental and other federal, state and local government records; intervierws of witnesses; documents and other material furnished by non-government sources. Souces may include confidential sources.

Systems exempted from certain provisions of the act: General exemption (j)(2), this system was formerly known as the Investigatory materials compiles for Law Enforcement Purposes system. Pursuant to 45 C.F.R. 5b.11, (b)(2)(i)(B), 40 F.R. 47413 (Oct. 8, 1975) this system is exempt from the following subsections of the Act (c)(3), (d)(1)-(4), (e)(3), and (e)(4) (G) (H).

S E 2 7 7 8 DM

09-90-0005

System name: Safety Management Information System (HEW Accident, Injury and Illness Reporting System). HEW/OS/ASMB/OFE/OSOH

Security classification: None.

System location: At Departmental Regional and Headquarters facilities (see Appendix 1).

Categories of individuals covered by the system:

1. HEW Employees, including both civilian and commissioned corps personnel, who are involved in an accident which arises out of and in the course of their employment whether occurring on HEW premises or not and results in:
   a. A fatality.
   b. Lost workdays beyond the day in which the accident occurred.
   c. Nonfatal injuries which result in transfer to another job, termination of employment, medical treatment other than first aid, loss of consciousness or restriction of work or motion.
   d. A possible tort claim.
   e. A claim for compensation.
   f. Property damage in excess of 50.00.
   g. Interrupts or interferes with the orderly progress of work of other employees.
   h. Radiation over exposure.
   i. Biological exposure resulting in lost time or accidental release of biologicals where the public may be over-exposed.
2. Visting scientists, contractor personnel, hospitalized patients, out-patients, employees of other Federal agencies, state or local governments or members of the public who suffer injury, illness or property damage on or in HEW premises or as a result of HEW activities.

Categories of records in the system: This system consists of a variety of information and supporting documentation resulting from the reporting and investigation of accidents which have resulted in injury, illness, property damage or the interruption or interference with the orderly progress of work. The records contain information about individuals involved in or experiencing accidents including but not limited to the severity of the injury, whether consciousness was lost, the type of injury, culmination of any injury, days lost from work if any, the nature of the injury, illness or disease, the body part affected, causal factors, weather factors, agency of accident, whether unsafe mechanical, physical, or personal acts or factors were involved, the accidents area of origin and if fire was involved, the type and form of materials involved. Property damage (both public and private) is noted through the property sequency number, who owned the property involved, property damaged and actual or estimated monetary loss, the HEW installation number if appropriate and the year of manufacture or construction if appropriate. Identifiers relating to a particular accident include the organization, case number assigned, date and time of occurrence, state or territory, site, type and classification of accident, estimated amount of tort claims if appropriate, name of individual(s) involved, the social security number, sex, age, grade series and level, CSC series, address, other Departments notified of accident, duty status, activity at time of accident and time on duty before accident. Management's evaluation and corrective action taken or proposed is also noted.

Authority for maintenance of the system: Section 19 of the Occupational Safety and Health Act of 1970 (PL 91-596); 5 U.S.C. 7902; 29 CFR Part 1960; Executive Order No. 11807

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

a. See Appendix B, Departmental Regulations (45 CFR Part 5b) Items 01,5
b. To request from a Federal, state, local agency or private sources information relevant to the investigation of an accident and/or corrective action.
c. To respond to an inquiry from a member of Congress made on behalf of a constituent.
d. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Records are or may be maintained on magnetic tapes, punchcards, lists, forms, discs, computer storage, in file folders, binders and index cards.

Retrievability:

1. At the Departmental level, the system is completely computerized with no other records normally maintained or retained in the Office of Safety and Occupational Health. While individual identifiers such as name, case number, and social security number are within the computer storage banks, special programming would be required to extract individual records. Normal output consists of statistical reports and surveys including those required by the Department of Labor and Statistical Analysis in support of the Departmental occupational safety and health program for dissemination to the Principal Operating Components, Regions and Staff Offices.
2. The Principal Operating Components of the Department, their sub-components, Regional Offices and Staff Offices may maintain original or copies of the accident reports and supporting documentation by name, social security number, case number or cross reference.
3. Establish a written record of the causes of accidents.
4. Provide information to initiate and support corrective or preventive action.
5. Provide statistical information relating to accidents resulting in occupational injuries, illnesses, and/or property damage.
6. Provide management with information with which to evaluate the effectiveness of safety management programs.
7. Provide the means for complying with the reporting requirements of Section 19 of the Occupational Safety and Health Act of 1970 and such other reporting requirements as may be required by legislative or regulative requirements.
8. Provide such other summary descriptive statistics and analytical studies as necessary in support of the function for which the records are collected and maintained including general requests for statistical information without personal identification of individuals.
9. Information in these records is used by or may be disclosed to: a. The Office of Safety Management, Office of the Secretary, HEW in the review of accident experience data to determine the adequacy of corrective actions, the effect of codes, standards and guides, the consolidation, summarization and dissemination of accident experience data throughout HEW and other Government Departments and agencies as needed or required. b. The supervisor, administrative officer or other official initiating an accident report, including each succeeding reviewing official in the chain of command through which the report passes to insure that corrective action, as needed and appropriate, is taken. c. Appropriately appointed Safety Directors, Officers, or others with safety responsibilities within the Department in the verifying, assembling, analyzing, summarizing and disseminating data concerning the accident experience in their areas of responsibility and the initiation of appropriate corrective action.

Safeguards: Access to and use of these records is made available to those personnel having a legitimate need for the information (those whose duties require review or access) including inspecting or evaluating personnel. Records, which under the law, may not be disclosed such as information pertinent to national security or trade secrets are maintained separately, adequately safeguarded and released only in accordance with the law. When there is doubt regarding the release

V 43/188 SE 27 78

of information, the matter will be referred, in advance of release, to the Office of the General Counsel, HEW.

Retention and disposal: All accident reports, records, logs, and other information relating to an accident are retained by the Principal Operating Components and their agencies, the Regional Offices and the Office of the Secretary for at least five years following the end of the calendar year in which the accident occurred. Specific occupational safety and health standards (such as the standards covering the handling of carcinogenic chemicals) may be required to be kept for up to twenty years. Records may be retained indefinitely.

System manager(s) and address:

Director
Office of Safety and Occupational Health
Department of Health, Education, and Welfare
330 Independence Avenue, S.W.
Washington, D.C. 20201

Notification procedure: Individuals wishing to inquire whether this system of records contains information about them should address their inquiries to one of the following as appropriate:

1. If employed or formerly employed in HEW Regional Office, the Regional Occupational Safety and Health Manager of the Region involved (see list and addresses under appendix).
2. If employed or formerly employed in a HEW Principal Operating Component or sub-agency, a staff office or the Office of the Secretary, the Occupational Safety and Health Manager of the component where employed with the exception of the Food and Drug Administration (see list and addresses under appendix). The contact for the Food and Drug Administration is:

Privacy Act Coordinator
Food and Drug Administration
5600 Fishers Lane
Rockville, Maryland 20852 Individuals requesting information about this system of records should provide their full name, social security number, name and address of office and agency in which currently or formerly employed and the accident(s) case number if known.

Record access procedures: Individuals wishing to gain access to or contest their records should contact the following in person or writing as appropriate; with the exception of Food and Drug Administration, See "Notification" above. 1. If employed or formerly employed in a HEW Regional Office, the Regional Occupational Safety and Health Manager of the Region involved (see list and addresses under appendix). 2. If employed or formerly employed in a HEW Principal Operating Component or sub-agency, a staff office or the Office of the Secretary, the Occupational Safety and Health Manager of the component where employed. (see list and addresses under appendix). Individuals requesting information in this system of records should provide their full name, social security number (on a purely voluntary basis), case number if known, time and brief description of the accident in which they were involved and the name and address of office in which employed.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: The information in this system is obtained from the following sources: 1) the individual to whom the record pertains; 2) witnesses to the accident; 3) investigating officials (Federal, state, local); 4) medical personnel seeing the individual as a result of the accident; 5) supervisory personnel; 6) reviewing officials; 7) personnel offices; 8) investigative material furnished by Federal, state, or local agencies; 9) on site observations.

System name: Applicants for Employment Records. HEW/OS/ASPER.

Security classification: None.

System location: This system is located in personnel offices and other offices of the Department authorized to receive applications for employment. See Appendix 1.

Categories of individuals covered by the system: Persons who have applied for Federal employment or are employed in the Federal service.

Categories of records in the system: These records contain information relating to the education and training; employment history and earnings; appraisal of past performance; convictions and offenses against the law; results of written tests; appraisal of potential; honors, awards or fellowships; military service; veteran preference, birthplace; birth date; social security number; and home address of persons who have applied for Federal employment or are employed in the Federal service; and correspondence related thereto. These records may also include information concerning the date of application, qualification status, employment consideration, priority grouping, and

other information relating to the consideration of the individual for employment.

Authority for maintenance of the system: 5 U.S.C. 1302, 3301, 3302, Executive Order 10577.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: These records may be used: 1) to respond to requests for information from the Civil Service Commission, Members of Congress, or other inquirers from outside the Department, to the extent their request is compatible with the purpose for which the records are maintained; 2) See Appendix B Departmental Regulations (45 CFR Part 5b), Items 01,3,4,5,6,7,8,9; 3) Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

4) In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Records are maintained on magnetic tapes, discs, drums, punched cards, microfiche, cards, lists, and forms.

Retrievability: Records are indexed by any combination of name, birth date, social security number and identification number. Records are used to refer applicants to officials of the Department for placement in positions for which applicant has applied and is qualified.

Safeguards: Access to and use of these records are limited to those persons whose official duties require such access. Personnel screening is employed to prevent unauthorized disclosure.

Retention and disposal: Records are retained until the applicant is selected for a position, or for two years. After the applicant is selected for a position, the records are filed in the Official Personnel Folder which is retained until the employee leaves the Department. If the applicant is not selected for a position within two years, the records are destroyed. (See HEW Personnel Instruction 293-1, Exhibit X293-1-1, item 15.)

System manager(s) and address: Personnel Officers of the Department. See Appendix 1.

Notification procedure: Personnel office to which application is made (see Appendix 1). Individual should provide name, date of birth, social security number, approximate date of record and title of position for which application was made.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.)

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.)

Record source categories: Information in this system of records is provided by the individual to whom it applies; is derived from information he or she supplied; or is obtained from information supplied by others.

Systems exempted from certain provisions of the act: None.

System name: Complaints and Inquiries Records—Miscellaneous. HEW/OS/ASPER.

Security classification: None.

System location: Personnel offices shown in Applicants for Employment Records, HEW System 09900006, Appendix 1 and offices of operating officials in organizational units serviced by those personnel offices, in which employees are employed.

Categories of individuals covered by the system: Current and former employees of the Department.

Categories of records in the system: This system consists of records relating to an individual's employment status or conduct while employed by the Department. Examples of these records include: correspondence from employees, Members of Congress, and members of the public alleging misconduct by an employee of the Department, miscellaneous complaints not covered by the Department's formal or informal grievance procedure, informal complaints handled by labor union officials, and miscellaneous debt correspondence received from creditors.

Authority for maintenance of the system: Executive Orders 11222, 10561 and 11491.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information in these records may be used: a) In accordance with Appendix B Departmental Regulations (45 CFR Part 5b) Items 01,3,4,5,6,7,8,9; b) by the Civil Service Commission in carrying out its functions; c) to respond to Members of Congress and members of the public with regard to complaints or inquiries presented by them; d) Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual; e) In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Filed in folders and index cards.

Retrievability: Records are filed by name. Records are used to take action on and respond to a complaint about a HEW employee; to produce summary descriptive statistics and analytical studies in support of the functions for which the records are collected and maintained and for related personnel management functions or pay studies; and for other purposes compatible with the intent for which the records system was created.

Safeguards: Access to and use of these records are limited to those persons whose official duties require such access.

Retention and disposal: Records are retained until there is no further administrative need for them, the individual leaves the Department, or one year has elapsed, and are then destroyed. (See HEW Personnel Instruction 293-1, Exhibit X293-1-2, item 7.)

System manager(s) and address: Personnel Officers shown in Appendix 1 to Applicants for Employment Records, HEW System 09900006, who service organizational units in which individuals are employed.

Notification procedure: Operating officials in organizational unit in which employee is employed or personnel offices shown as systems managers in Appendix 1 Applicants for Employment Records, HEW System 09900006,. Individuals should provide name, organization in which employed, and date of birth.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Information in this system of records is obtained: 1) directly from the individual, or 2) derived from information supplied by the individual, or 3) from information supplied by members of the public, other employees, Members of Congress, Department management officials, or 4) from police and court records relevant to the complaint about the employee.

09-90-0008

System name: Conflict of Interest Records System. HEW/OS/ASPER.

Security classification: None.

System location: Personnel Offices of the Department (See Applicants for Employment Records, HEW System 09900006, Appendix 1) or levels of approving officials to be identified by those Personnel Offices.

Categories of individuals covered by the system: Incumbents of Department positions the duties of which are of such a nature that incumbent's outside activities may come in conflict with the incumbent's official duties.

Categories of records in the system: The Conflict of Interest Records System consists of a variety of records relating to an employee's conduct and outside activities. In addition to the name of the employee, position title, grade, salary, pay plan, and employing organization, the system includes information about outside employment, outside compensation and related information.

Authority for maintenance of the system: Executive Order 11222.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information in this system of records may be used: a) by the Civil Service Commission in carrying out its functions; b) In accordance with Appendix B of the Departmental regulations (45 CFR Part 5b), Item 1,4,5,6,9; c) Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

SEP 27 1978

d) In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Conflict of Interest Records are maintained in file folders.

Retrievability: Records are retrievable by name. They are used for the purpose of determining whether an employee's financial interest, conduct or outside activities are in conflict with the employee's duties as a Federal official. They also may be used for production of summary descriptive statistics and analytical studies in support of the functions for which the records are collected and maintained and for other purposes compatible with the intent for which the records system was created.

Safeguards: These records are treated as controlled for Official Use Only and made available only to persons specifically authorized to receive them.

Retention and disposal: Records are retained until 2 years after the individual discontinues the activity for which approval was required, or until the individual leaves the Department, and are then destroyed. (See HEW Personnel Instruction 293-1, Exhibit X293-1-1, item 25.)

System manager(s) and address: Personnel Offices of the Department shown in Appendix 1 to Applicants for Employment Records, HEW System 09900006.

Notification procedure: For incumbents who are in position under the Executive Schedule; Office of the Secretary Staff Office Heads; or Principal Regional Officials, contact:

Deputy Assistant Secretary for Personnel and Training
Office of Personnel and Training
Department of Health, Education, and Welfare
330 Independence Avenue, SW.
Washington, D.C. 20201

For incumbents of positions in the Food and Drug Administration, contact:

Director, Policy Management Staff, HFA-20
Food and Drug Administration
5600 Fishers Lane
Rockville, Maryland 20857

For incumbents of other positions included in this records system, contact the Personnel Office shown in Appendix 1 to Applicants for Employment Records, HEW System 09900006, which services the organizational units in which the individual is employed. The individual should indicate name, position title, grade and series, and organization in which located.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Information in this system of records is: 1) supplied directly by the individual, or 2) derived from information supplied by the individual, or 3) supplied by Department officials or other persons such as trustee, attorney, accountant, relative.

09-90-0009

System name: Discrimination Complaints Records System. HEW/OS/ASPER.

Security classification: None.

System location:

Office of Equal Employment Opportunity, HEW
330 Independence Avenue, S.W.
Washington, D.C. 20201

Offices of designated EEO Officers in Principal Operating Components, Office of the Secretary, Health Agencies, Education Agencies and Regional Offices. See Appendix 1 for exact locations.

Categories of individuals covered by the system: Individuals or organizations which have consulted an EEO Counselor regarding discrimination on the basis of race, color, religion, sex, national origin or age because of a determination or decision made by a Department official or which have filed a third-party allegation of discrimination.

Categories of records in the system: This system of records contains information or documents concerning pre-complaint processing and third-party allegations of discrimination. The records consist of counselors' reports, the initial allegations, letters or notices to the individual or organization, materials placed into the record to support or refute the decision or determination, statements of witnesses, investigative reports, instructions about action to be taken to comply with decisions, and related correspondence, opinions and recommendations.

Authority for maintenance of the system: Executive Order 11478, 42 USC 2000e and 29 USC 633a.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: These records and information in the records may be used:

a. To respond to a request from a Member of Congress regarding the status of an appeal, complaint or grievance;
b. To refer to CSC in connection with an appeal or review;
c. In accordance with Appendix B Departmental Regulations (45 CFR Part 5b) Items 01, 3, 4, 5, 6, 7, 8, 9.
d. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.
e. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: These records are maintained in file folders, binders, and index cards.

Retrievability: These records are indexed by the names of the individuals or organizations on whom they are maintained. They may be used: to adjudicate an appeal, complaint, or grievance; to provide a basis for a corrective action related to the discrimination situation; as a data source for management information for production of summary descriptive statistics and analytical studies in support of the function for which the records are collected and maintained, or for related personnel management functions or manpower studies; and to locate specific individuals for personnel research or other personnel management functions.

Safeguards: Access to and use of these records are limited to those persons whose official duties require such access.

Retention and disposal: The records on third-party allegations of discrimination are retained for four years after final disposition, and are then destroyed. (See HEW Personnel Instruction 293-1, Exhibit X293-1-1, item 26a(1).)

System manager(s) and address: See Appendix 1 for General Coordinator and appropriate Immediate System Manager.

Notification procedure: Individuals and organizations which consulted an EEO counselor or filed a third-party allegation of discrimination are aware of that fact. They may write the appropriate immediate system manager indicated above, or the general coordinator if the immediate system manager is unknown, regarding the existence of such records pertaining to them. The inquirers, as appropriate, should provide their name, date of birth, agency in which employed

or agency in which the situation arose if different from employing agency, the approximate date, and the kind of action taken, when making inquiries about records.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories:

a. Individual to whom the record pertains
b. Department or other officials
c. Statements from employees or other witnesses
d. Official documents relating to the counseling or third-party allegation
e. Correspondence from specific organizations or persons.

09-90-0010

System name: Employee Alcoholism, Drug Abuse and Emotional Problem Counseling and Referral Records. HEW/OS/ASPER.

Security classification: None.

System location: Personnel offices shown in Applicants for Employment Records, HEW System 09900006, Appendix 1 or designated offices performing counseling functions for employees in organizational units serviced by those personnel offices, including the Public Health Employee Assistance Program offices listed in Appendix 1 of this notice.

Categories of individuals covered by the system: Department employees who have been counseled for work adjustment, personal or emotional health problems and/or the abuse of alcohol or drugs.

Categories of records in the system: This system contains records of employees who have been referred but not counseled; records of employees who have been counseled for work adjustment, personal or emotional problems, and/or alcohol or drug abuse; and records of members of employees' families who have been counseled. Examples of information which may be found in this record system include the employee's name, SSN, date of birth, grade, job series, job title, leave record, service computation date, home address, home phone number, supervisor's name, name and address of the individual's personal physician, social history, educational background, and performance appraisals. Other documents which may also be found in the counselor's file are notes made by the counselor, copies of admonishments and reprimands received by the employee and a record of the supervisor's referral (if the employee was referred by the supervisor).

Authority for maintenance of the system: 44 U.S.C. 3101, 42 U.S.C. 4561, 21 U.S.C. 1180, and 5 U.S.C. 7901.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: In unusual circumstances, it may be appropriate to disclose information from this system of records: 1) In accordance with Appendix B Departmental Regulations (45 CFR Part 5b), Items 9, 101, 102; 2) To the Department of Justice or other appropriate Federal agencies in defending claims against the United States when the claim is based upon an individual's mental or physical condition and is alleged to have arisen because of activities of components of the Department in connection with such individual. 3) In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected. Such disclosures will be restrictively made; in particular, disclosures of information pertaining to an individual with a history of alcohol or drug abuse will be limited in compliance with the restrictions of the Confidentiality of Alcohol and Drug Abuse Patient Records regulations, 42 CFR Part 2.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Employee records are maintained in file folders and on index cards.

Retrievability: Records are filed by name or by case number cross indexed with the employee's name. The records are used to document the nature of the individual's problem and progress and when necessary to refer individuals to appropriate community or private resources for treatment or rehabilitation. Anonymous information from these records may also be used to produce summary descriptive statistics and analytical studies in support of the functions for which the records are collected and maintained.

Safeguards: During the employment of the individual, records are maintained in confidential files separate from the Official Personnel Folder and are located in lockable metal containers or in secured rooms with access limited to those whose official duties require access. Disclosure of the contents of records which pertain to an individual's alcohol or drug abuse is restricted under the provisions of the Confidentiality of Alcohol and Drug Abuse Patient Records regulations, 42 CFR, Part 2, as authorized by 21 U.S.C. 1175 and 42 U.S.C. 4582, as amended by P.L. 93-282. To the extent possible, identical restrictions will be applied to the disclosure of the contents of records pertaining to individuals with other problems who are participating in the Public Health Employee Assistance Program.

Retention and disposal: Records are retained until three years after the individual has ceased contact with the counselor, or until the individual leaves the Department, and are then destroyed. (See HEW Personnel Instruction 293-1, Exhibit X293-1-1, item 27a.)

System manager(s) and address: For records of individuals participating in the Public Health Employee Assistance Program conducted by the Public Health Service: The responsible administrator shown in Appendix 1 below. For other individuals' records: The Personnel Officer servicing the installation in which counseling was provided,

as shown in Applicants for Employment Records, HEW System 09900006, Appendix 1.

Notification procedure: Inquiries should be addressed to the system manager at the office where counseling was provided. Individual should provide name, grade, organization in which employed, date of birth, and location and approximate date of counseling. When applicable, the special procedures for access to medical records will be followed. An individual who requests notification of or access to a medical/dental record shall, at the time the request is made, designate in writing a responsible representative who will be willing to review the record and inform the subject individual of its contents at the representative's discretion. (These notification and access procedures are in accordance with Department Regulations (45 CFR, Section 5b.6) Federal Register, October 8, 1975, page 47411.). When the records pertain to an individual's alcohol or drug use, the procedures in 42 CFR 2.40 will also be followed.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Information in this system of records is: 1) supplied directly by the individual, or 2) supplied by a member of the individual's family, or 3) derived from information supplied by the individual, or 4) supplied by sources to whom the employee has been referred for assistance, or 5) supplied by Department officials, or 6) supplied by program counselors.

Systems exempted from certain provisions of the act: None.

System name: Employee Appraisal Program Records. HEW/OS/ASPER.

Security classification: None.

System location: Personnel offices shown in Applicants for Employment Records, HEW System 09900006, Appendix 1 and operating offices in organizational units serviced by those personnel offices.

Categories of individuals covered by the system: Current Federal employees of the Department.

Categories of records in the system: This system contains information which includes employee's name, SSN, employing organization, grade, title, series, and materials relating to the evaluations of employee's performance. For purposes of the annual performance rating required by law and for promotion consideration purposes.

Authority for maintenance of the system: 5 U.S.C. 4302, 5 U.S.C. 3301, 5 U.S.C. 3302, Executive Order 10577.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information in these records may be used:

1. By the Civil Service Commission in carrying out its functions.
2. In accordance with Items 1,3,4,5,6,7,8,9 of Appendix B of the Departmental Regulations (45 CFR, Part 5b).
3. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.
4. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Records are maintained in file folders, on magnetic tape, and on punch cards.

Retrievability: Records are retrievable by name or social security number. They may be used as a basis for reduction-in-force, adverse actions, decisions regarding retention of employees during probationary period, recognition, promotions, reassignments and other personnel actions compatible with the purpose for which the record was collected.

Safeguards: Access to and use of these records are limited to those persons whose official duties require such access.

Retention and disposal: Appraisals and satisfactory ratings are retained until a new appraisal or rating is issued, 2 years have elaped, or the individual leaves the Department, and are then destroyed. Unsatisfactory and outstanding ratings are filed in the Official Personnel Folder which is retained until the individual leaves the Department. (See HEW Personnel Instruction 293-1, Exhibit X293-1-2, item 10.)

System manager(s) and address: Personnel Officers shown in Applicants for Employment Records, HEW System 09900006, Appendix 1.

Notification procedure: Same as above. Employee should provide name, social security number and organization in which employed.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.)

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These

V 43 / 188 SE 27 78 LIMI

procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.)

Record source categories: Information in this system of records is provided by the individual, derived from information supplied by the individual or supplied by Department officials.

09-90-0012

System name: Executive Development Records System. HEW/OS/ASPER.

Security classification: None.

System location: Personnel offices shown in Applicants for Employment Records, HEW System 09900006, Appendix 1.

Categories of individuals covered by the system: All supergrade employees (GS-16-18) and equivalents, incumbents of managerial positions and employees in grade GS-13-15 designated as high potential employees.

Categories of records in the system: The Executive Development Records System consists of a variety of records relating to an employee's application for, and participation in, the executive development program. In addition to the employee's name, the system contains the employee's title, grade and salary, Social Security Account Number, organization in which employed, date of entry into the Executive Development Program, training needs while participating in the program, individual's development plan, basis for participation in the Executive Development Program.

Authority for maintenance of the system: 5 U.S.C. 4101 et. seq.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information in this system of records is used:

a. In accordance with Appendix B Departmental Regulations (45 CFR Part 5b) Items 01, 3, 4, 5, 6, 7, 8, 9.

b. By the Civil Service Commission in the performance of its functions.

c. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

d. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Information in this system of records is maintained in file folders, magnetic tape, punch cards, and forms.

Retrievability: Records are indexed by name and Social Security Account Number. Records are used by operating officials in carrying out their personnel management responsibilities. They may be used by those officials in connection with promotions, transfer or reassignment of the individual and as base for preparing management, budgetary or statistical reports to support organizational planning or manpower utilization studies.

Safeguards: Access to and use of these records are limited to those persons whose official duties require such access. Personnel screening is employed to prevent unauthorized disclosure.

Retention and disposal: Records of an unsuccessful applicant are retained for 60 days after notification that he or she was not selected for participation, and are then destroyed. Records of a participant are retained for 5 years after the individual has ceased to participate in the program, and are then destroyed.

System manager(s) and address: Heads of personnel offices which service the organizational unit in which the individual is employed. See Applicants for Employment Records, HEW System 09900006, Appendix 1.

Notification procedure: Same as Above. Individuals should include their name, grade, title, and organization when contacting the system manager.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Information in this system of records is: 1) supplied directly by the individual, or 2) derived from information supplied by the individual, or 3) supplied by Department officials.

09-90-0013

System name: Federal Employees Occupational Health Program Records. HEW/OS/ASPER.

Security classification: None.

System location: Personnel offices shown in Applicants for Employment Records, HEW System 09900006, Appendix 1 and designated offices performing occupational health services for employees in organizations serviced by those personnel offices.

Categories of individuals covered by the system: Current Federal employees of the Department.

Categories of records in the system: This system consists of a variety of records relating to an employee's participation in the Federal Occupational Health Program at units other than those operated by the Division of Federal Employee Health, Public Health Service. Examples of information which may be included in this system are the employee's name, SSN, date of birth, weight, height, medical history, blood type, nature of injury or complaint, type of treatment/medication received, examination findings, and laboratory results.

Authority for maintenance of the system: 5 U.S.C. 7901 et. seq., P. L. 79-658.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information in this system of records may be used:

1. By authorized medical personnel in connection with the performance of their official duties.
2. By the Civil Service Commission in connection with the performance of its functions.
3. By the Department of Labor in connection with a claim filed by an employee for compensation for a job-related injury or disease.
4. By private contractors engaged in providing medical services under Federal contract.
5. In accordance with Items 1,3,4,5,6,7,8,9 of the Departmental Regulations (45 CFR part 5b), Appendix B.
6. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.
7. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Stored in file folders, punch cards and data tape.

Retrievability: Records are retrievable by name, date of birth, and SSN. They are used to document an employee's visit to a health unit and contain information such as a summary of the nature of a complaint, a record of the employee's participation in a voluntary screening program, a record of an employee's participation in a voluntary blood donor program, and a record of any treatment administered by the health unit. Information from this system may be used by Department officials in connection with fitness for duty examinations and

for preparing statistical or summary reports about the employee participation in the Federal Occupational Health Program.

Safeguards: During the employment of the individual, medical records are maintained in files separate from the Official Personnel Folder and are located in lockable metal containers or in secured rooms with access limited to those whose official duties require access.

Retention and disposal: Records are retained until the individual leaves the Department. If they have no long-term value they are destroyed at this time. If they have continuing value they may be combined with the Official Personnel Folder which is forwarded to the Federal Personnel Records Center or to the new employing agency, as appropriate.

System manager(s) and address: Personnel Officers shown in Applicants for Employment Records, HEW System 09900006, Appendix 1. who service organizational units in which the individual is employed.

Notification procedure: Same as above. The individual should include name, SSN, title and organization. An individual who requests notification of or access to a medical record shall, at the time the request is made, designate in writing a responsible representative who will be willing to review the record and inform the subject individual of its contents at the representative's discretion. (These notification and access procedures are in accordance with Department Regulations (45 CFR, Section 5b.6) Federal Register, October 8, 1975, page 47411.).

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Information in this system of records is: 1) supplied directly by the individual, or 2) derived from information supplied by the individual or 3) supplied by the medical officer or nurse providing treatment or medication, or 4) supplied by the individual's private physician.

09-90-0014

System name: Grievances Filed Under the Informal Grievance Procedures. HEW/OS/ASPER.

Security classification: None.

System location: Personnel offices, or offices of the immediate supervisors and the first officials within the Department excluding the immediate supervisor, with line authority to decide on the matter grieved. Such offices are located within the organizational units serviced by personnel offices shown in Applicants For Employment Records, HEW System 09900006, Appendix 1.

Categories of individuals covered by the system: Department employees individually or as a group who have requested personal relief in a matter of concern or dissatisfaction which is subject to the control of Department management.

Categories of records in the system: Information or documents relating to the grievance and personal relief sought; documented materials used in consideration of the grievance, and correspondence related to disposition of the grievance.

Authority for maintenance of the system: 5 U.S.C. 1302, 3301, 3302; Executive Order 10577.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information in this system of records may be used:

a. In accordance with Appendix B Departmental Regulations (45 CFR Part 5b) Items 01,3,4,5,6,7,8,9.

b. By the Civil Service Commission in carrying out its functions.

c. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

d. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: The records are maintained in file folders, binders and index cards.

Retrievability: Records are indexed by name of individual filing the grievance. Records are used to consider and resolve informal grievances and to provide background data to further consideration of grievances if later pursued through formal grievance procedures.

Safeguards: Access to and use of these records are limited to those persons whose official duties require such access. Personnel screening is employed to prevent unauthorized disclosure.

Retention and disposal: Records are retained for 3 years after the grievance case is closed, and are then destroyed. (See HEW Personnel Instruction 293-1, Exhibit X293-1-1, item 31a.)

System manager(s) and address: Heads of personnel offices which service organizational units in which employees who submit informal grievances are located. See Applicants for Employment Records, HEW System 09900006, Appendix 1.

Notification procedure: Individuals who have filed grievances are aware of that fact and have been provided information in writing concerning the disposition of the grievance. They may contact the official who signed the written notice, or the System Manager indicated above. They should provide their name, organization in which employed and date of birth and approximate date of the filing of the informal grievance.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Information in this system of records is: 1) supplied directly by the individual, or 2) derived from information supplied by the individual, or 3) supplied by Department officials.

09-90-0015

System name: Grievance Records Filed Under Procedures Established by Labor-Management Negotiations. HEW/OS/ASPER.

Security classification: None.

System location: Personnel offices shown in Applicants for Employment Records, HEW System 09900006, Appendix 1 and offices of operating officials in organizational units serviced by those personnel offices.

Categories of individuals covered by the system: Current Federal employees of the Department covered by a collective bargaining agreement.

Categories of records in the system: This system of records consists of a variety of records relating to an employee's grievance filed under procedures established by labor-management negotiations. Examples of information which may be included in this system of records are the employee's name, SSN, grade, job title, testimony of witnesses, material placed into the record to support the decision, the arbitrator's decision, the arbitrator's report, and a record of an appeal to the Federal Labor Relations Council.

Authority for maintenance of the system: Executive Order 11491 as amended.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information in this system may be released to:

1. The Civil Service Commission in carrying out its functions.
2. In accordance with Departmental Regulations, (45 CFR Part 5b), Appendix B. See Items 01,3,4,5,6,7,8,9.

V 43 / 188

3. The Department of Labor.
4. The Federal Labor Relations Council.
5. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.
6. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Records are maintained in file folders.

Retrievability: Records are retrievable by name. They are used to make a determination on and to document a decision made on a grievance filed by an employee under the negotiated grievance procedures. Information from this system may be used by Department officials for preparing statistical, summary or management reports.

Safeguards: Records maintained by management are stored in secured rooms with access limited to those whose official duties require access.

Retention and disposal: As negotiated by the local parties to the contract.

System manager(s) and address: Personnel Officers shown in Applicants for Employment Records, HEW System 09900006, Appendix I who service the organizational unit in which the individual is employed.

Notification procedure: Same as above. Individuals should include their name, grade, title and organizational unit when contacting the system manager.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Information in this system of records is: 1) supplied directly by the individual, or 2) derived from information supplied by the individual, or 3) supplied by testimony of witnesses, or 4) supplied by union officials, or 5) supplied by Department officials.

Systems exempted from certain provisions of the act: None.

09-90-0016

System name: HEW Motor Vehicle Operator Records. HEW/OS/ASPER.

Security classification: None.

System location: Personnel offices of the Department shown in Applicants For Employment Records, HEW System 09900006, Appendix I. Issuing Officers for Motor Vehicle Operator Identification Cards within the organizations serviced by the above personnel offices.

Categories of individuals covered by the system: All Department employees who are required to operate motor vehicles regularly or incidentally in carrying out their official duties.

Categories of records in the system: The HEW Motor Vehicle Operator Records system consists of a variety of records related to the issuance of a Government Motor Vehicle Operator's permit. In addition to the name of the employee, the system includes information about the employee's birthplace, SSN, employing organization, number of years driven, type of vehicles operated, current driver's license number, state issuing driver's license, date license expires, restrictions on state license, sex, date of birth, color of hair, color of eyes, weight, height, record of arrests, and record of accidents. These records also include expiration dates of Motor Vehicle Operator permit, any limitations imposed on its use and the results of the annual review of each driving record.

Authority for maintenance of the system: 40 U.S.C. 471.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information in this system of records may be used:

a. In accordance with Appendix B Departmental Regulations (45 CFR Part 5b) Items 01,3,4,5,6,7,8,9.
b. By the Civil Service Commission in carrying out its functions.
c. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.
d. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Stored in Official Personnel Folder and in file folders and index cards.

Retrievability: Records are retrievable by name. Information is used as a basis for issuing a SF-46 "U.S. Government Motor Vehicle Operator's Identification Card" and evaluating its use. It may also be used for production of summary descriptive statistics and analytical studies in support of the functions for which the records are collected and maintained and for related personnel management functions.

Safeguards: Access to and use of these records are limited to personnel whose official duties require such access. Personnel screening is employed to prevent unauthorized disclosure.

Retention and disposal: Records are retained for three years after the individual's government motor vehicle operator's permit expires, or the individual leaves the Department, and are then destroyed. (See HEW Personnel Instruction 293-1, Exhibit X293-1-1, item 24.)

System manager(s) and address: Personnel Officers of the Department shown in Applicants for Employment Records, HEW System 09900006, Appendix I.

Notification procedure: Issuing officers in organizational units in which employed or systems managers shown above. Individual should provide name and organization in which employed.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Information contained in this system of records is obtained: 1) from information supplied by the individual, or 2) derived from information supplied by the individual, or 3) from information supplied by officials of the Department.

Systems exempted from certain provisions of the act: None.

09-90-0017

System name: Pay, Leave and Attendance Records. HEW/OS/ASPER.

Security classification: None.

System location:

Division of Central Payroll and Reports Processing
Department of Health, Education, and Welfare
330 Independence Avenue, SW.
Washington, D.C. 20201

Payroll Liaison Representatives. See Appendix 1. Timekeepers in organizational units serviced by Payroll Liaison Representatives shown in Appendix 1. Personnel offices shown in HEW System 09900006, Applicants for Employment Records, Appendix 1.

Categories of individuals covered by the system: All paid employees of the Department of Health, Education, and Welfare including PHS Commissioned Corps Personnel.

Categories of records in the system: This system consists of a variety of records relating to pay and leave determinations made about each employee of the Department of Health, Education, and Welfare. In addition to the name of the employee, the system includes information such as the employee's date of birth, social security number, home address, grade or rank, employing organization, timekeeper number, salary, Civil Service Commission retirement fund contributions, pay plan, number of hours worked, annual and sick leave accrual rate and usage, annual and sick leave balance, FICA withholdings, Federal, state and city tax withholdings, Federal Employees Government Life Insurance withholdings, Federal Employees Health Benefits withholdings, garnishment documents, savings allotments, union and management association dues withholdings allotments, savings bonds allotments, and combined Federal Campaign allotments; for Commissioned Corps personnel, information such as the following is included: years of service, payroll number, base pay, incentive pay, hazardous pay, allowances and Servicemen's Group Life Insurance.

Authority for maintenance of the system: 5 U.S.C. 5501 et seq., 5525 et seq., 6301 et seq.; 42 U.S.C. 201 et seq.; and P.L. 90-83.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information in this system of records is used or may be used:

a. To prepare W-2 Forms to submit to the Internal Revenue Service and to disclose to state and local government agencies having taxing authority pertinent records relating to employees, including name, home address, social security number (in accordance with Section 7 of Public Law 93-579), earned income, and amount of taxes withheld.
b. In accordance with Appendix B Departmental Regulations (45 CFR Part 5b) Items 01, 3, 4, 5, 6, 7, 8, 9.
c. By the Civil Service Commission in the performance of its functions.
d. By the Department of Labor to make compensation determination in connection with a claim filed by the employee for compensation on account of a job-connected injury or disease.
e. To respond to court orders for garnishment of an employee's pay for alimony or child support.
f. To respond to orders from IRS for garnishment of an employee's pay for Federal income tax purposes.
g. To the Department of Treasury for the purposes of preparing and issuing employee salary and compensation checks and U.S. Savings Bonds.
h. By state offices of unemployment compensation in connection with claims filed by former HEW employees for unemployment compensation.
i. When an individual to whom a record pertains dies, to disclose information in the individual's record to heirs, executors and legal representatives of beneficiaries.
j. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.
k. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Magnetic tape, microfilm, punch cards and forms.

Retrievability: Records are maintained by pay period and are retrievable by name, SSN and Timekeeper number within each pay period. They are used to insure that each employee receives the proper pay and allowances; that proper deductions and authorized allotments are made from the employee's salary; that the employee is credited and charged with the proper amount of sick and annual leave. Records are also used to produce summary descriptive statistics and analytical studies in support of the functions for which the records are collected and maintained and for related personnel management functions or pay studies, and for other purposes compatible with the intent for which the records system was created.

Safeguards: Access to and use of these records are limited to personnel whose official duties require such access. Personnel screening is employed to prevent unauthorized disclosure.

Retention and disposal: Records submitted by the individual, such as allotment authorization forms, home address forms, and tax withholding forms, are retained until superseded by new forms or until the individual leaves the Department. Most of these records are then destroyed. Some of these records must be retained for an additional period, or forwarded to the new employing agency. Time and attendance records are retained for five years and are then destroyed. The automated payroll master record, established when the individual is first employed and continually updated throughout the period of his or her employment, is retained until the individual leaves the Department.

System manager(s) and address:

Director, Division of Central Payroll and Reports Processing
P. O. Box 1825
Washington, D.C. 20013

Notification procedure: An individual may contact the system manager. An individual also may contact, as appropriate, Payroll Liaison Representatives in Appendix 1 or Personnel Officers shown in HEW System 09900006, Applicants for Employment Records, Appendix 1. Provide name, social security number, timekeeper number and pay period about which inquiring.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Information in this system of records is 1) supplied directly by the individual, or 2) derived from information supplied by the individual, or 3) supplied by timekeepers and other Department officials.

Systems exempted from certain provisions of the act: None.

System name: Personnel Records in Operating Offices. HEW/OS/ASPER.

Security classification: None.

System location: Operating Offices of the Department at the organizational level of the individual's employment. Such offices are located within organizational components serviced by personnel offices shown in Applicants for Employment Records, HEW System 09900006, Appendix 1.

Categories of individuals covered by the system: Current employees of the Department.

Categories of records in the system: This system consists of a variety of records relating to personnel actions and determinations made about an individual while employed. These records may contain information about an individual relating to name; birth date; home address; telephone number; emergency addressee; social security number; veterans preference; tenure; work connected injuries; handicap code; employment history; qualifications background; past and present salaries, grades and position titles; training; awards and other recognition; counseling; performance appraisal; conduct; pay and leave; and data documenting reasons for personnel actions, decisions or recommendations made about an employee; and background data and documentation leading to an adverse action being taken against an employee.

Authority for maintenance of the system: 5 U.S.C. 1302, 2951, 4118, 4308, 4506, 7501, 7511, 7521 and Executive Order 10561.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information in these records may be used:

1. By an agency of the Federal Government having oversight or review with regard to Civil Service Commission activities.
2. In the event an appeal is made outside the Department, records which are relevant may be referred to the appropriate agency charged with rendering a decision on the appeal.
3. In accordance with Appendix B of the Departmental Regulations (45 CFR, Part 5b) Items 1, 3, 4, 5, 6, 7, 8, 9.
4. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.
5. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Records are maintained in file folders, magnetic tape, and index cards.

Retrievability: Records are indexed by any combination of name, birth date, social security number, or identification number. Records are used by operating officials in carrying out their personnel management responsibilities. They may be used in this connection in recommending or taking personnel actions such as are related to appointments, transfers, promotions, reassignments, adverse actions; as a base for employee development, training, recognition, reprimands, and disciplinary actions; for making decisions on employee complaints; and as a base for staffing and budgetary planning and control, organizational planning, and for manpower utilization purposes, and for preparing statistical or summary reports. They may also be used by appropriate officials in making decisions on grievances, appeals and adverse actions.

Safeguards: Access to and use of these records are limited to those persons whose official duties require such access.

Retention and disposal: Records are retained until there is no further administrative need to retain them, or the individual leaves the Department, and are then either destroyed, or, if appropriate, are combined with the Official Personnel Folder, which is forwarded to the National Personnel Records Center.

System manager(s) and address: Personnel Officers of the Department. See Applicants for Employment Records, HEW System 09900006, Appendix 1.

Notification procedure: Immediate supervisors of individuals or the administrative offices of the organizational units in which employed. The system manager shown above may also provide further information concerning the existence of this system of records. Individuals should provide their name, social security number, and organization in which employed.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Information in this system of records either comes from the individual to whom it applies, is derived from information supplied by the individual, or is provided by Department officials.

Systems exempted from certain provisions of the act: None.

09-90-0019

System name: Special Employment Programs. HEW/OS/ASPER.

Security classification: None.

System location: Personnel Offices shown in Applicants for Employment Records, HEW System 09900006, Appendix 1 and operating offices in organizational units serviced by those personnel offices, in which employees are employed.

Categories of individuals covered by the system: Current Federal employees of the Department who are participating in special employment programs.

Categories of records in the system: This system consists of a variety of records relating to an employee's participation in special

V 4 3 / 1 8 8 SE 27 78

V 43/188 SE 27 78

employment programs such as the Upward Mobility College, START, STRIDE, ACCESS, Worker Trainee Opportunity, Junior Fellows, Management Intern, Personnel Intern and the HEW Fellows Program. Examples of information which this records system may contain include the employee's name, SSN, program enrolled in, employing agency, grade, job title, job series, sex, date of birth, status, educational background, handicap code, application for employment, position description, assignment evaluations, Veterans preference, job counselling records, and letters of reference and recommendations.

Authority for maintenance of the system: 5 U.S.C. 1301, 3301, and 7151 et. seq., Executive Order 11813.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information in this system may be used:

1. By the Civil Service Commission in carrying out its functions.
2. In accordance with Items 1, 3, 4, 5, 6, 7, 8, 9 of the Departmental Regulations, (45 CFR Part 5b), Appendix B.
3. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.
4. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Information in this system of records is maintained in file folders, data tape and punch cards.

Retrievability: Records are retrievable by name and SSN. Records are used by personnel offices and operating officials to monitor the progress of the individual in the special program, for career planning, and for taking personnel actions.

Safeguards: Access and use of these records are limited to those persons whose official duties require such access.

Retention and disposal: Records are retained for two years after the individual's participation in a special placement program ends, and are then destroyed. (See HEW Personnel Instruction 293-1, Exhibit X293-1-2, item 9.)

System manager(s) and address: Personnel Officers shown in Applicants for Employment Records, HEW System 09900006, Appendix 1, who service organizational units in which the participant is employed.

Notification procedure: Same as above. Individuals should include their name, SSN, grade, title and organization when contacting the system manager.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Information in this system of records is: 1) supplied directly by the individual, or 2) derived from information supplied by the individual, or 3) supplied by Department officials.

Systems exempted from certain provisions of the act: None.

09-90-0020

System name: Suitability for Employment Records. HEW/OS/ASPER.

Security classification: None.

System location: Personnel Offices shown in Applicants for Employment Records, HEW System 09900006, Appendix 1.

Categories of individuals covered by the system: Federal employees of the Department, and applicants for employment.

Categories of records in the system: This system consists of a variety of records relating to an individual's suitability for employment in terms of character, reputation and fitness, including letters of reference, responses to pre-employment inquiries, National Agency Checks and Inquiries material received from the Civil Service Commission relating to non-sensitive positions, qualifications and character investigations, and other information which may relate to the suitability of the individual for the position.

Authority for maintenance of the system: 5 U.S.C. 3301, 3302, 7301; Executive Order 10577; Executive Order 11222.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information in these records may be used:

a. By the Civil Service Commission in carrying out its functions.
b. In accordance with Appendix B, Departmental Regulations (45 CFR Part 5b) Items 01, 3, 4, 5, 6, 8, 9.
c. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.
d. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Records are maintained in file folders.

Retrievability: Records are indexed by any combination of name, birth date, Social Security Number, or identification number. Information in these records is used by designated appointing and selecting authorities to determine an individual's suitability for employment by consideration of factors present in such records.

Safeguards: Records are maintained in confidential files and are located in lockable metal file cabinets or in metal file cabinets in secured rooms with access limited to those whose official duties require access.

Retention and disposal: Records from the Civil Service Commission concerning applicants for or incumbents of non-sensitive positions, are retained until a decision is reached on whether to hire or retain the applicant or incumbent, and are then destroyed. Other records in this system are retained until there is no further administrative need for them, the individual leaves the Department, or one year has elapsed, and are then destroyed. (See HEW Personnel Instruction 293-1, Exhibit X293-1-2, items 1 and 2.)

System manager(s) and address: Heads of personnel offices which service organizational units in which individual is employed or in which he/she applied for employment. See Applicants For Employment Records, HEW, System 09900006, Appendix 1.

Notification procedure: Same as above. Individuals should indicate name, Social Security Number, date of birth, and organization in which employed, or to which they applied for employment.

Record access procedures: Current Department employees or applicants should contact the appropriate system manager shown above. Former Department employees who are employed by the Federal Government who wish to gain access or contest the records maintained on them while employed by the Department should contact the appropriate official of their current employing agency in accordance with the appropriate records system notice of that agency. Former Department employees who have separated from Federal service should direct a request to:

National Personnel Records Center
General Services Administration
111 Winnebago Street
St. Louis, Missouri 63118

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being

sought. (There access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Information contained in the system is obtained from the categories of sources:

Applications and other personnel and security forms furnished by the individual.
Information furnished by other Federal agencies.
Information provided by sources such as employers, schools, references, former employers.

Systems exempted from certain provisions of the act: Individuals will be provided information from the above record system except when in accordance with the provisions of 5 U.S.C. 552a(k)(5); 1. disclosure of such information would reveal the identity of a source who furnished information to the Government under a express promise that the identity of the source would be held in confidence, or 2. if the information was obtained prior to the effective date of Section 3, P. L. 93-579, disclosure of such information would reveal the identity of a source who provided information under an implied promise that the identity of the source would be held in confidence. (45 CFR 5b.11)

09-90-0021

System name: Training Management Information System. HEW/OS/ASPER

Security classification: None.

System location:

Office of Personnel and Training
Department of Health, Education, and Welfare
330 Independence Avenue, S.W.
Washington, D. C. 20201
Personnel offices shown in Applicants for Employment Records, HEW System 09900006, Appendix 1.

Categories of individuals covered by the system: All employees who receive training in a course which was more than 8 hours in length and which was authorized under the authority of the Government Employees Training Act.

Categories of records in the system: The Training Management Information System consists of a variety of records relating to training received by an employee. In addition to the name of the employee, the system includes information about the employee's Social Security Account Number, position title, grade, salary, pay plan, series, tenure, years of continuous service, nature of training taken, cost of training and dates of training.

Authority for maintenance of the system: 5 U.S.C. 4101 et. seq.; Executive Order 11348.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information in this system of records is used:

a. In accordance with Appendix B Departmental Regulations (45 CFR Part 5b) Items 01, 3, 4, 5, 6, 7, 8, 9.
b. By the Civil Service Commission in carrying out its functions.
c. To other Federal agencies or private organizations to authorize training.
d. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.
e. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Data tape.

Retrievability: Records are indexed by any combination of name, birth date, SSN or transaction number. Information is used to maintain a history of training of the individual during his employment with the Department, as a basis for determining future training needs of the individual, for evaluating the Department's training program, for auditing and budgetary planning purposes and for related analytical and operational personnel management functions.

Safeguards: The information is available only to authorized personnel. Personnel screening is used to prevent unauthorized disclosure.

Retention and disposal: Records are retained in the automated data file until the individual leaves the Department.

System manager(s) and address:

Deputy Assistant Secretary for Personnel and Training
Office of Personnel and Training
Department of Health, Education, and Welfare
330 Independence Avenue, S.W.
Washington, D.C. 20201

Notification procedure: Contact the Deputy Assistant Secretary for Personnel and Training or the personnel office shown in Applicants for Employment Records, HEW System 09900006, Appendix 1, which services the organizational unit in which the individual is employed. The individual should indicate name, position title, grade and series and organization in which located.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Information in this system of record is: 1) supplied directly by the individual, or 2) derived from information supplied by the individual, or 3) supplied by Department or by source of training officials.

Systems exempted from certain provisions of the act: None.

09-90-0022

System name: Volunteer EEO Support Personnel Records. HEW/OS/ASPER.

Security classification: None.

System location:

Office of Equal Employment Opportunity, HEW
330 Independence Avenue, S.W.
Washington, D.C. 20201
Offices of the designated EEO Officers in Principal Operating Components, Office of the Secretary, Health Agencies, Education Agencies and Regional Offices. See Discrimination Complaints Records System, HEW System 09900009, Appendix 01 for exact locations.

Categories of individuals covered by the system: Individuals who have volunteered or have been proposed for duty as EEO Counselors and discrimination complaint investigators on a part-time basis.

Categories of records in the system: This system of records contains information or documents concerning personal characteristics of EEO counselors and investigators. The records consist of the name and other identifying data, title, location, training received, information concerning qualifying background, case assignments, and evaluations of EEO counselors and investigators serving on a part-time basis, and related information.

Authority for maintenance of the system: Executive Order 11478, P. L. 92-261, P. L. 93-259.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: These records and information in the records may be used:

a. To provide resource to another Federal agency, in response to its request for loan of investigators or counselors.
b. In accordance with Appendix B Departmental Regulations (45 CFR Part 5b), Items 01, 3, 4, 5, 6, 7, 8, 9.

V 4 3 / 1 8 8

c. By the Civil Service Commission in carrying out its functions.

d. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

e. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: These records are maintained in file folders, binders and index cards.

Retrievability: These records are indexed by the names of the individuals on whom they are maintained. They may be used: for identification, location and determination of availability of volunteer counselors and investigators for assignment to counsel complainants and to investigate complaints; to respond to inquiries regarding availability of counselor resources or determination regarding location and the jurisdictional propriety of an investigator resource; for determining training needs of EEO counselors and investigators; to provide information for production of summary descriptive statistics and analytical studies in support of the function for which the records are collected and maintained, or for related personnel management functions or manpower studies; and to locate specific individuals for personnel research or other personnel management functions.

Safeguards: Access to and use of these records are limited to those persons whose official duties require access.

Retention and disposal: The records are maintained up to one year after volunteer has terminated his services, at which time they are destroyed.

System manager(s) and address: See Discrimination Complaints Records System, HEW System 09900009, Appendix 1 for General Coordinator and appropriate Immediate System Manager.

Notification procedure: Individuals who have volunteered or been proposed as counselors or investigators are aware of that fact and the information contained in the record. They may, however, write the immediate system manager or coordinator indicated above regarding the existence of such records pertaining to them. The inquirers, as appropriate, should provide to the immediate system manager or coordinator, their name, agency in which they were proposed or served when making inquiries about records.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories:

a. Individuals to whom the record pertains

b. Department or other officials

c. Official documents relating to appointments and case assignments as counselors and investigators

d. Correspondence for specific persons or organizations

e. Formal reports submitted by the individual in the performance of official volunteer work.

Systems exempted from certain provisions of the act: None.

09-90-0023

System name: Departmental Parking Control Policy. HEW/OS/ASMB/FE

Security classification: None.

System location:

Director, Office of Facilities Engineering and Property Management
Room 4193 North Building
HEW/Office of the Secretary
330 Independence Ave., S.W.
Washington, D.C. 20201

Offices of Manager for Parking Control at HEW facilities where HEW parking is provided.

Categories of individuals covered by the system: All HEW employees as well as any carpool member utilizing DHEW parking facilities.

Categories of records in the system: This system includes the following information on all persons applying for a parking permit: Name, office room number, office phone number, agency, home address, and automobile license number.

Authority for maintenance of the system: 63 Stat. 377;41 CFR 101-20.111

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Records are stored in binders in file cabinets.

Retrievability: Records are filed alphabetically. The purpose of the Departmental Parking Policy is to provide standards for apportionment and assignment of parking spaces on Department-managed and Department-controlled property and on property assigned to the Department by GSA or any other Agency and to allocate and check parking spaces assigned to government vehicles, visitors, handicapped personnel, key personnel, car-pools, and others.

Safeguards: Access to and use of these records are limited to personnel whose official duties require such access.

Retention and disposal: Superseded policy materials are maintained by the Director, Office of Facilities Engineering and Property Management for historical purposes; Records at other HEW locations are maintained until the Parking Control purpose has been met, and the records are then destroyed.

System manager(s) and address:

Director, Office of Facilities Engineering and Property Management
Room 4193 North Building
HEW/Office of the Secretary
330 Independence Avenue, S.W.
Washington, D.C. 20201

Notification procedure: Access to these records may be obtained by request in writing to:

Office of Manager for Parking Control at HEW facility where HEW parking is provided.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Information in this system comes from reports from OS Staff, POC's and Regions, GSA-Federal Management circulars and Federal Property Management Regulations.

Systems exempted from certain provisions of the act: None.

S E 2 7 7 8

09-90-0024

System name: Accounting records of Payments to Individuals from Agency and Regional Financial Management and Disbursing Offices. HEW OS ASMB 1.

Security classification: None.

System location: See appendix 1.

Categories of individuals covered by the system: Persons authorized to travel on official HEW business; persons awarded an HEW grant, contract or loan; persons authorized emergency salary advances; and consultants furnishing administrative and miscellaneous services.

Categories of records in the system: Name, identification number, address, purpose of payment, accounting classification and amount paid.

Authority for maintenance of the system: Budget and Accounting Act of 1950 (P.L. 81-784).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: To the Treasury Department for check preparation; to members of Congress on behalf of a constituent or concerning a federal financial assistance program; See Departmental Regulations (45 CFR Part 5b), Appendix B, 3, 4, 6, 7, 8. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected. Disclosure may be made to a congressional office made from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Hard copy documents are manually filed at agency and regional office sites; and on disc pack and magnetic tape at central computer sites.

Retrievability: This varies according to the particular operating accounting system within the Agency and Regional Office. Usually the hard copy document is filed by name within accounting classification. Computer records may be indexed by social security number and voucher number. Intra-departmental uses and transfers concern the validation and certification for payment, and for HEW internal audits.

Safeguards: Minimum safeguards to insure integrity of records, and that required to provide protection against loss by accident of carelessness; these records are classified as public information and are available through the Freedom of Information Act.

Retention and disposal: Records are purged from automated files once the accounting purpose has been served; printed copy and manual documents are retained and disposed of in accord with General Accounting Office principles and standards.

System manager(s) and address: See appendix 2.

Notification procedure: Inquiries are to be made, either in writing or in person, to the organizations listed under 'Location' in appendix 1, with the exception of Food and Drug Administration contact:

FDA Privacy Coordinator (HF-50)
Food and Drug Administration
5600 Fishers Lane
Rockville, Md. 20852

Give name and social security number, purpose of payment (travel, grant, etc.) and, if possible, the agency accounting classification.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are i accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Travel vouchers submitted by the individual; grant, contract or loan award document; consultant invoice of services rendered; and application for travel advance.

Systems exempted from certain provisions of the act: None.

Washington, DC 20201

09-90-0025

System name: Central Registry of Individuals Doing Business With HEW. HEW OS ASMB 2.

Security classification: None.

System location:
Division of Financial Operations and Fiscal Procedures
Room 739D1, Humphrey Building
200 Independence Avenue, S.W.
Washington, DC 20201

Categories of individuals covered by the system: Individuals who are the recipients of Federal Domestic Assistance Grants, or of contracts awarded by HEW.

Categories of records in the system: An index of names, addresses and identification number (SSN) of the individual doing business with HEW. No other personally identifiable data are maintained. The index is termed public information since data relative to Federal Domestic Assistance and Contracts are public information.

Authority for maintenance of the system: 5 U.S.C. 301.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See Departmental Regulations (45 CFR Part 5b), Appendix B, 3, 4, 6, 7, 8. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Hard copy code booklets are manually filed at agency and regional office sites; and on disc pack and magnetic tape at central computer sites.

Retrievability: Record may be found in the Code Book by either name or social security number; record in disc pack and on magnetic tape is indexed by social security number. The Code Book provides a listing of data processing numbers for grant, contract and financial transactions. These numbers are used to access the name and address of the individual in the Automated Library (Central Registry). The information is used for check preparation, reports, mailings, etc.

Safeguards: Minimum safeguards to insure integrity of records, and that required to provide protection against loss by accident or carelessness.

Retention and disposal: Records are purged from the automated file each two years; only persons actively dealing with HEW remain on file. Code Books are replaced each year. Inactive books are destroyed.

System manager(s) and address:
Deputy Assistant Secretary, Finance
Department of HEW, Office of the Secretary
Room 705D1, Humphrey Building
330 Independence Avenue, S.W.
Washington, D.C. 20201

Notification procedure: Inquiries are to be made, either in writing or in person, to the organization listed under 'location'. Give name and social security number.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Grant and Contract documents. Names, social security numbers and addresses are provided by the individual when applying for a grant or contract from the Department.

09-90-0026

System name: Congressional Biographies HEW/OS/ASL

Security classification: None.

System location:
Room 425H Humphrey Building
200 Independence Avenue, S.W.
Washington, D.C. 20201

Categories of individuals covered by the system: Members of Congress indexed by name.

Categories of records in the system: Personal biographies supplied by Members' offices and picture.

Authority for maintenance of the system: 5 U.S.C. 301.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the department may disclose such records as it deems desirable or necessary to the department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Biographies are maintained in ring-binders.

Retrievability: Biographies are indexed alphabetically by Member's name. Information is used for briefing Agency officials prior to meetings with respective Members of Congress or prior to giving testimony before Congressional Committees.

Safeguards: These biographies are public information, provided by the Members' offices.

Retention and disposal: Biographies are updated after each Congressional election.

System manager(s) and address:
Director, Congressional Liaison Office
Office of the Assistant Secretary for Legislation
Room 425H South Portal Bldg.
200 Independence Avenue, S.W.
Washington, D.C. 20201

Notification procedure: Same as above.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Offices of the Members of Congress.

Systems exempted from certain provisions of the act: None.

09-90-0027

System name: Congressional Correspondence Unit. HEW/OS/ASL

Security classification: None.

System location:
Room 435G Humphrey Building
200 Independence Avenue, S.W.
Washington, D.C. 20201

Categories of individuals covered by the system: Members of Congress indexed by name.

Categories of records in the system: Correspondence copies of direct inquiries and referrals of constituents' inquiries from Members of Congress, and responses to those inquiries, regarding the Department's activities, including, but not necessarily limited to: a. general program activities of the Department; b. individual case problems of named persons, families or institutions; c. employment or appointment interests. Control slips identifying the correspondent, the constituent on whose behalf the inquiry is made, the constituent's social security number if inquiry relates to a social security case, and a summary of the subject matter of the inquiry.

Authority for maintenance of the system: 5 USC 301.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Inquiries which do not pertain to HEW, but fall under the jurisdiction of another Federal Agency, are transferred to that Agency with a request that a direct response be provided to the correspondent. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the department may disclose such records as it deems desirable or necessary to the department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper files are maintained in standard file cabinets.

Retrievability: Records are indexed alphabetically by name of the Members of Congress. Inquiries are forwarded to the HEW Agency which has jurisdiction over the subject matter for preparation of a response.

Safeguards: Records are kept in lockable metal file cabinets with access limited to those whose official duties require access.

Retention and disposal: Records are reviewed biannually. Correspondence which reflects final disposition of an inquiry dated one year previous is discarded. Control slip files for intra-Agency transfers are discarded after two calendar years. Control slip files for inter-Agency transfers are discarded after five years.

System manager(s) and address:
Director, Congressional Liaison Office
Office of the Assistant Secretary for Legislation
Room 435G South Portal Bldg.
200 Independence Avenue, S.W.
Washington, D.C. 20201

Notification procedure: System Manager; address same as above. The name of the person who corresponded with the Department with reference to the constituent and the approximate date of that correspondence must be provided.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: The information in CCU files is provided by the correspondent and by the agency which prepares the final response.

Systems exempted from certain provisions of the act: None.

09-90-0028

System name: Biographies and Photographs of HEW Officials HEW/OS/ASPA

Security classification: None.

V 4 3 / 1 8 8
S E 2 7 7 8

System location:

Office of the Assistant Secretary for Public Affairs
Public Information Division
Room 638E, Humphrey Building
200 Independence Avenue, S.W.
Washington, D.C. 20201 (See Appendix 1 following).

Categories of individuals covered by the system: HEW employees in key management and technical positions, such as the Secretary, Under Secretary, Assistant Secretaries, Deputy Assistant Secretaries, Commissioners, Regional Directors, Deputy Regional Directors, Agency Heads, Unit Managers.

Categories of records in the system: Biographical files consist of approved, printed personal and professional resumes and standard portrait pictures and biographical and professional questionnaires providing name, title, office location, telephone number, date of appointment to HEW, home address, home telephone, date of birth, place of birth, marital status, spouse's name, children's names, children's date of birth, education, military service, professional career data, professional affiliations, publications and articles authored, awards, citations, prizes and honors received, civic, social and fraternal associations, outside interests, such as hobbies, sports, recreation.

Authority for maintenance of the system: 5 U.S.C. 301.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Records are maintained in individual and combined files and stored in standard five-drawer file cabinets in the offices listed under System Location.

Retrievability: Records are indexed by the name, in alphabetical order, of those in higher management and technical positions with the remainder combined in a 'miscellaneous' folder or folders. Made available to staff of the Department who have a need for photos or background information on these officials.

Safeguards: Files are maintained in the offices of Public Affairs and requests are honored on a 'need to know' basis only.

Retention and disposal: Records are periodically updated as circumstances warrant relative to promotions, reassignment, resignations, death.

System manager(s) and address: Same as in Location above and Appendix 1.

Notification procedure: Contact System Managers in areas where individual is employed. Addresses same as above, with the exception of Food and Drug Administration, contact:

FDA Privacy Coordinator (HF-50)
Food and Drug Administration
5600 Fishers Lane
Rockville, Md. 20857

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Information contained in the biographies comes from the individuals whose biographies they form and from other material furnished by agency public information offices. The biographies are cleared with the individuals whose biography they represent prior to release to the public and the news media.

Systems exempted from certain provisions of the act: None.

System name: Employee Suggestion System. HEW/OS/ASPER

Security classification: None.

System location: This system is located in employee suggestion offices at the Department. See Appendix 1 for exact locations.

Categories of individuals covered by the system: Individuals who have made suggestions in OS and in Principal Operating Components of the Department; and/or suggestions made by individuals in other Federal Departments requiring an HEW evaluation.

Categories of records in the system: Evaluations of suggestions, name and address of individuals submitting suggestions, other identifying information such as salary and grade, including position title, and, optionally, a social security account number.

Authority for maintenance of the system: 5 U.S.C. 4501 et seq.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: To CSC for information, possible award. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: The records are maintained in standard sized file cabinets.

Retrievability: The records are indexed in alphabetical order by the name of the employee submitting the suggestion. Records are available to Suggestion Coordinator's Staff having as part of their duties processing of suggestions. Control records are used by staff to log in suggestions, route suggestions, follow-up suggestions, and to adjudicate suggestions receiving awards. In addition, control cards are used to facilitate preparation of the annual report for the Department. Records may be disclosed for evaluation purposes to officials in program areas affected by the suggestions.

Safeguards: Direct access restricted to authorized staff.

Retention and disposal: Suggestions records are maintained for two years, and sent to Federal Record Center.

System manager(s) and address: See Appendix 1 for overall system manager and immediate system managers.

Notification procedure: Contact the appropriate system manager indicated in Appendix 1.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Incoming suggestions, responses and other material obtained during course of adjudication.

Appendix 1

List of System Managers and Locations for Employee Suggestion Matters.

Overal System Manger:

Employee Suggestion Officer
Room B428, Trans Point Building
330 Independence Avenue, S.W.
Washington, D.C. 10101

Immediate System Managers:

Employee Suggestion Officer
Social Security Administration
Annex Building, Room 3-N-6
Baltimore, Maryland

Employee Suggestion Officer
Health Care Financing Administration
Room 2500
300 C Street
Washington, D.C. 20201

Employee Suggestion Officer
Office of Education
400 Maryland Ave. SW., Room 1167
Washington, D.C., 20201

Employee Suggestion Officer
National Institute of Education
Brown Building, Room 642B
1200 19th Street NW.
Washington, D.C. 20208

Employee Suggestion Officer
Office of Human Development Services
Humphrey Building, Room 345D
200 Independence Ave. SW.
Washington, D.C. 20201

OASH Employee Suggestion Officer
17-18 Parklawn Building
Rockville, Maryland 20857

CDC Employee Suggestion Officer
1600 Clifton Road NE.
Building 1, 6062
Atlanta, Georgia 30333

FDA Employee Suggestion Officer
5600 Fishers Lane, Room 957
Rockville, Maryland 20857

HRA Employee Suggestion Officer
Center Building, Room 927
3700 East-West Highway
Hyattsville, Maryland 20782

HSA Employee Suggestion Officer
Room 14A.40 Parklawn Building
5600 Fishers Lane
Rockville, Maryland 20857

ADAMHA Employee Suggestion Officer
12C-15 Parklawn Building
5600 Fishers Lane
Rockville, Maryland 20857

NIH Employee Suggestion Officer
Building 31, Room 3-B-07
Bethesda, Maryland 20014

Regional Employee Suggestion Officer
Region I
Department of Health, Education, and Welfare
John F. Kennedy Federal Building
Government Center—Room 1503
Boston, Massachusetts 02203

Regional Employee Suggestion Officer
Region II
Department of Health, Education, and Welfare
Federal Building, Room 3838-H
26 Federal Plaza
New York, New York 10007

Employee Suggestion Officer
Region III

3535 Market Street, Room 9400
Philadelphia, Pennsylvania 19101

Employee Suggestion Officer
Region IV
Department of Health, Education, and Welfare
101 Marietta Towers, Room 1601
Atlanta, Georgia

Employee Suggestion Officer
Region V
Department of Health, Education and Welfare
27th Floor
300 S. Wacker Drive
Chicago, Illinois 60606

Employee Suggestion Officer
Region VI
Department of Health, Education, and Welfare
1200 Main Towers, Room 1000
Dallas, Texas 75202

Employee Suggestion Officer
Region VII
Department of Health, Education, and Welfare
Room 468
601 E. 12th Street
Kansas City, Missouri 64106

Employee Suggestion Officer
Region VIII
Department of Health, Education, and Welfare
Federal Office Building, Room 419
1961 Stout Street
Denver, Colorado 80294

Employee Suggestion Officer
Region IX
Department of Health, Education, and Welfare
Federal Office Building, Room 419
50 Fulton Street
San Francisco, California 94102

Employee Suggestion Officer
Region X
Department of Health, Education, and Welfare
Arcade Plaza, Room 6039
1321 Second Avenue
Seattle, Washington 98101

09-90-0037

System name: Secretariat Correspondence Control System. HEW/OS/ES

Security classification: None.

System location:
Room 602C Humphrey Building
200 Independence Avenue SW.
Washington, D.C. 20201

Categories of individuals covered by the system: Individuals who have contacted the Secretary or the Under Secretary or who have been contacted in writing by them.

Categories of records in the system: Hard Copies of the Secretary's and Under Secretary's correspondence computer printout, tape, and interactive control system of records of that correspondence.

Authority for maintenance of the system: 5 U.S.C. 301.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the department may disclose such records as it deems desirable or necessary to the department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: The records are maintained in hard-copy filed in standard file cabinets. The control records are maintained in hard copy, computer tape and computer disk files for on-line interactive processing.

Retrievability: Records are indexed chronologically by date of correspondence and also by name, subject and numerical control number. Records are available to staff responsible for preparation of responses to inquiries and to the staff of the Executive Secretariat. Records are used for control and reference purposes in staffing out issues and correspondence of concern to the Secretary or the Under Secretary.

Safeguards: Direct access is limited to the staff of the Executive Secretariat and POC staff (05) control personnel. Access to the records is limited during non-working hours to individuals with keys to both the file cabinets and to the room in which the records and/or computer terminals are located.

Retention and disposal: Hard Copy records are retired to the National Archives after two years. Control records are maintained indefinitely. Computer records are purged after correspondence is finalized for 60 days.

System manager(s) and address:
Executive Secretary to the Department
Room 636G, South Portal Bldg.
200 Independence Avenue, S.W.
Washington, D.C. 20201

Notification procedure: Inquiries should be addressed to the System Manager. The inquirer should indicate the individual with whom the Secretary or Under Secretary corresponded, the date of the incoming correspondence and the date of the outgoing correspondence from the Secretary or the Under Secretary. Address is same as above.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Computer records are derived from the incoming correspondence for the Secretary and the Under Secretary.

09-90-0038

System name: Secretary's Official Files. HEW/OS/ES

Security classification: None.

System location:
Room 636G, Humphrey Building
200 Independence Avenue S.W.
Washington, D.C. 20201

Categories of individuals covered by the system: Individuals who have contacted the Secretary or the Under Secretary or who have been contacted in writing by them.

Categories of records in the system: Hard copies of documents signed or initialed by the Secretary or the Under Secretary.

Authority for maintenance of the system: 5 U.S.C. 301.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: The records are maintained in hard copy filed in standard file cabinets.

Retrievability: Records are indexed by subject, name and organization. Records are available to the staff of the Executive Secretariat for reference purposes in staffing out issues of concern to the Secretary or the Under Secretary.

Safeguards: Direct access is limited to the staff of the Executive Secretariat. Access is limited during non-working hours to individuals with keys to the file room.

Retention and disposal: Records are maintained for two years and are then sent to the National Archives.

System manager(s) and address:
Executive Secretary to the Department
Room 636G, Humphrey Building
200 Independence Avenue, S.W.
Washington, D.C. 20201

Notification procedure: Inquiries should be addressed to the system manager at the above address. The inquirer should indicate the subject matter of the issue involved, the date of the subject documents, and the author and/or addressees.

Record access procedures: Same as above.

Contesting record procedures: Same as above.

Record source categories: Records are derived from documents signed or initialed by the Secretary or the Under Secretary.

09-90-0039

System name: Family Educational Rights and Privacy Act—School Recordkeeping Practices Correspondence and Complaint System. HEW/OS/ASMB/FERPA.

Security classification: None.

System location:
Room 526F Humphrey Building
200 Independence Avenue, S.W.
Washington, D.C. 20201

Categories of individuals covered by the system: Individuals who have made inquiries or who have filed complaints alleging violations of the provisions of the Family Educational Rights and Privacy Act of 1974; and those who have commented to the Department on its proposed rules and practices.

Categories of records in the system: Name and address of individuals submitting correspondence, responses and exchanges of material associated with investigations of complaints.

Authority for maintenance of the system: The Family Educational Rights and Privacy Act of 1974 (20 U.S.C. 123g(g)).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: To Members of Congress who inquire on behalf of a constituent; to an educational agency or institution against which a complaint has been made. See Appendix B of Departmental Regulations (45 CFR Part 5b), Items: 1, 3, 8. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: The records are maintained in hard-copy filed in standard lockable file cabinets.

Retrievability: For the most part records are indexed by name of individual signing incoming correspondence; when indexed chronologically, or by organization, they are cross-indexed by name of individual signer. Records are available to FERPA staff involved in correspondence and investigative processes, including members of the Office of General Counsel. Occasionally, personnel with special expertise in other program areas may be given records for the purpose of assisting FERPA staff in resolution of issues.

Safeguards: Direct access is restricted to authorized FERPA staff; access to rooms in which files are maintained is limited during nonworking hours to those with keys to rooms and the main files are left in local file cabinets when not in use.

Retention and disposal: Inquiry records are maintained a minimum of three years; complaint and investigative records are maintained a minimum of five years past date of case closing.

System manager(s) and address:
Head, FERPA Office
Room 526F Humphrey Building
200 Independence Avenue, S.W.
Washington, D.C. 20201

Notification procedure: System manager; for general inquiries, name and date of previous correspondence, if known; for complaint/inves-

V 4 3 / 1 8 8 S E 2 7 7 8 UMI

tigative material, name and any I.D. number assigned. Address is same as above.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Incoming correspondence, responses and material obtained during course of any investigation.

Systems exempted from certain provisions of the act: None.

09-90-0041

System name: Consumer Mailing Lists. HEW/OS/OCA

Security classification: None.

System location:

624 Reporters Bldg.
7th and D Sts., S.W.
Washington, D. C. 20201

Categories of individuals covered by the system: Individual consumers, business and government officials.

Categories of records in the system: Names and addresses of individuals requesting consumer information.

Authority for maintenance of the system: Executive Order 011583 of February 24, 1971 and Reorganization Plan 01 of 1953.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Used by the OCA Public Affairs staff to distribute information on current consumer topics to consumers, business, government and the media. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Conventional file cabinets, addressograph plates, and computers.

Retrievability: By name.

Safeguards: Personnel screening during working hours and secured building after working hours.

Retention and disposal: Files are updated quarterly and disposed of through normal trash and erasure of computer tapes.

System manager(s) and address:

Director, Public Affairs
624 Reporters Bldg.
7th and D Sts., S.W.
Washington, D.C. 20201

Notification procedure:

Director, Administrative Management & Finance
626 Reporters Bldg.
7th and D Sts., S.W.
Washington, D.C. 20201

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Correspondence and telephone calls from individual consumers, business and government officials.

Systems exempted from certain provisions of the act: None.

09-90-0046

System name: Consumer Complaint Correspondence System HEW/OS/OCA

Security classification: None.

System location:

Room 612 Reporters Building
7th and D Sts., S.W.
Washington, D.C. 20201

Categories of individuals covered by the system: Individual Consumers.

Categories of records in the system: Correspondence concerning consumer complaints.

Authority for maintenance of the system: Executive Order 011583, February 24, 1971; Reorganization Plan 01 of 1953.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Resolution of individual citizen complaints through referral to other Federal agencies, non-Federal governments, voluntary groups and private business firms; to meet requests for specific statistical data on consumer complaints requested by the Congress and the Office of Management and Budget, White House Office, and from other Federal agencies as well as the media (e.g. requests for information on availability of canning jar lids); and to make records available when discovery service incident to a regular action is presented to the Office of Consumer Affairs. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Individual files in cabinets, and statistical information maintained in computer system.

Retrievability: Data acquired through sequential identification numbers. Primary usage is development of internal statistical data for office management purposes particularly in identifying trends in consumer complaints.

Safeguards: Personnel screening during working hours and secured building after working hours.

Retention and disposal: Records prior to August 1, 1974 have been shipped to the Presidential Library System for permanent retention. Records received subsequent to August 1, 1974 are retained for not less than one nor more than two fiscal years. Computerized records limited to six-month period.

System manager(s) and address:

Director, Administrative Management & Finance
626 Reporters Bldg.
7th and D Sts., S.W.
Washington, D.C. 20201

Notification procedure: System manager. Address is same as above.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These

procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Correspondence and telephone calls from individual consumers.

Systems exempted from certain provisions of the act: None.

09-90-0047

System name: Directory, Federal, State, County and City Government Consumer HEW/OS/OCA Offices.

Security classification: None.

System location:

600 Reporters Bldg.
7th and D Sts., S.W.
Washington, D.C. 20201

Categories of individuals covered by the system: List of Federal agency consumer liaison contacts, directors of state, county, and city government consumer offices and branch offices, plus office addresses and phone numbers.

Categories of records in the system: Names, addresses, office telephone numbers; correspondence, publications, copies of speeches, and reports from the offices.

Authority for maintenance of the system: Executive Order 011583 of February 24, 1971; Reorganization Plan 01 of 1953.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected. Serves as source basis for annual Office of Consumer Affairs publication of Directory, Federal, State, County and City Government Consumer Offices which is for sale by the Superintendent of Documents to the general public.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Correspondence file in file folders; names of office directors, office addresses and office phone numbers on card file; addresses on addressograph plates also.

Retrievability: Indexed by state, county, and city; by office title. Used by OCA staff for general information and update compilations of Directory annually; serves as communication link with these offices and as source material for semi-annual publication of State Consumer Action, which reports activities of these offices.

Safeguards: Routine office personnel screening; names, addresses, and office phone numbers are published annually as a free access government document unless specifically requested not to publish by office and/or individual involved. Correspondence not revealed unless requesting party can adequately prove identity as sender, need for data and intended use are valid, and sender provides OCA with verbal or written approval.

Retention and disposal: Records maintained as long as information is valid; destroyed periodically through regular disposal channels.

System manager(s) and address:

Director, External Liaison
600 Reporters Bldg.
7th and D Sts., S.W.
Washington, D.C. 20201

Notification procedure:

Director, Administrative Management & Finance
626 Reporters Bldg.
7th and D Sts., S.W.
Washington, D.C. 20201

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Information comes from the offices concerned or from other public documents.

Systems exempted from certain provisions of the act: None.

09-90-0048

System name: Consumer Liaison Contacts. HEW/OS/OCA

Security classification: None.

System location:

600 Reporters Bldg.
7th and D Sts., S.W.
Washington, D.C. 20201

Categories of individuals covered by the system: Governmental and non-governmental consumer leaders.

Categories of records in the system: Names, addresses, telephone numbers and other pertinent background information relating to individual participation in consumer activities.

Authority for maintenance of the system: Executive Order 011583, February 24, 1971; Reorganization Plan 01 of 1953.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Used by OCA staff as resource list to insure input from consumer leaders in significant consumer issues and in development of and recommendations for appointments to advisory bodies and other consumer related positions. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Maintained in paper files in standard file cabinets.

Retrievability: Alphabetical listing by name and by geographical locations.

Safeguards: Personnel screening during working hours and secured building after working hours.

Retention and disposal: Files screened not less than annually and disposed of by common office trash.

System manager(s) and address:

Director, External Liaison
600 Reporters Bldg.
7th and D Sts., S.W.
Washington, D.C. 20201

Notification procedure:

Director, Administrative Management & Finance
626 Reporters Bldg.
7th and D Sts., S.W.
Washington, D.C. 20201

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Information supplied from leaders directly, upon request by OCA staff, or memoranda and letters submitted by others suggesting individuals for consideration.

Systems exempted from certain provisions of the act: None.

09-90-0049

System name: Office of External Liaison—Consumer Correspondence Files. HEW/OS/OCA

Security classification: None.

System location:
600 Reporters Bldg.
7th and D Sts., S.W.
Washington, D.C. 20201

Categories of individuals covered by the system: Individual consumer educators and consumer leaders.

Categories of records in the system: Inquiries and correspondence files relating to consumer issues.

Authority for maintenance of the system: Executive Order 011583 of February 24, 1971; Reorganization Plan 01 of 1953.

Routine uses of records maintained in the system, including categories of usera and the purposes of such uses: Internal reference and resource for sharing information on consumer issues with individual consumers and consumer leaders. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the department may disclose such records as it deems desirable or necessary to the department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Conventional file cabinets.

Retrievability: Alphabetically by name.

Safeguards: Personnel screening during working hours and secured building after working hours.

Retention and disposal: Files screened annually and retained not more than three years. Disposed of with common office trash.

System manager(s) and address:
Director, External Liaison
600 Reporters Bldg.
7th and D Sts., S.W.
Washington, D.C. 20201

Notification procedure:
Director, Administrative Management & Finance
626 Reporters Bldg.
7th and D Sts., S.W.
Washington, D.C. 20201

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: The bulk of the information contained in these files consists of letters and memoranda sent to or received from individual consumers and consumer leaders.

Systems exempted from certain provisions of the act: None.

09-90-0050

System name: Case Following System HEW OS/OCR.

Security classification: None.

System location: See Appendix 1.

Categories of individuals covered by the system: Persons filing complaints with the Office of Civil Rights.

Categories of records in the system: Name, characteristics of the complaint and critical events in OCR's processing of the complaints.

Authority for maintenance of the system: Title VI of the Civil Rights Act of 1964, Title IX and VII of the Education Amendments of 1972, Sections 799A and 845 of the Public Health Services Act, Executive Order 11246, Section 504 of the Rehabilitation Act of 1973.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Report on current status of complaint processing. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Magnetic disc and tape.

Retrievability: Records are indexed by case or complaint number, but may be recalled by name, address, or any other characteristic by OCR staff engaged in compliance activities.

Safeguards: The physical data processing storage is controlled by a private company under a GSA contract which includes appropriate security measures. This agency references data through communication terminals with access controlled by passwords.

Retention and disposal: Indefinite retention. Disposal by electronic erasure.

System manager(s) and address:
Assistant Director (Administration and Management)
Office for Civil Rights
330 Independence Ave., S.W.
Room 5460 - North Building
Washington, D.C. 20201

Notification procedure: System Manager (above). Provide name, address, and name of institution, contractor, or HEW program with which individual has contact.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Information in complaint investigation files.

Systems exempted from certain provisions of the act: None.

Appendix Number 1 System Locations

This system is located at HEW offices in the following cities:

HEW, Office for Civil Rights
330 Independence Avenue, S.W.
Washington, D.C. 20201

Region I, Regional CR Director
140 Federal Street
Boston, Massachusetts 02110

Region II, Regional CR Director
26 Federal Plaza
New York, New York 10007

Region III, Regional CR Director
3535 Market Street, Post Office Box 13716
Philadelphia, Pennsylvania 19101

Region IV, Regional CR Director
101 Marietta Street
Atlanta, Georgia 30303

Region V, Regional CR Director
300 South Wacker Drive, 8th Floor
Chicago, Illinois 60606

Region V, Regional CR Director
Plaza Nine Building, 55 Erieview Plaza
Cleveland, Ohio 44114

Region VI, Regional CR Director
1200 Main Tower Building
Dallas, Texas 75202

Region VII, Regional CR Director
12 Grand Building, 1150 Grand Avenue
Kansas City, Missouri 64106

Region VIII, Regional CR Director
Federal Building, 1961 Stout Street
Denver, Colorado 80294

Region IX, Regional CR Director
100 Van Ness Ave.
San Francisco, California 94102

Region X, Regional CR Director
1321 Second Avenue, MS/508
Seattle, Washington 98101

09-90-0051

System name: Complaint Files and Log, Office of Compliance and Enforcement, HEW-OS-OCR-C&E.

Security classification: None.

System location: See Appendix 1 to Case Following System HEW. OS/OCR SYSTEM 01.

Categories of individuals covered by the system: Individuals who file complaints with the Department concerning discrimination under Executive Order 11246, Title VI, Title IX, PHSA, and Section 504.

Categories of records in the system: Complaint allegation, results of investigation of the allegation, correspondence related to the complaint.

Authority for maintenance of the system: Executive Order 11246 as amended; Title VI of the 1964 Civil Rights Act; Title IX of the Education Amendments of 1972; Emergency School Assistance Act; Titles VII & VIII of the Public Health Service Act; Section 504 of the 1973 Rehabilitation Act.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Files are maintained to record the results of the investigation so that OCR can determine if there was discrimination as charged in the original complaint. Files are routinely reviewed by the Office of General Counsel, HEW, and may be referred, as necessary, for similar purposes to the Departments of Justice, and Labor or the Equal Employment Opportunity Commission. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected. Categories of users include OCR investigators, team leaders, branch chiefs, division directors, PRMs unit staff, Office of Compliance and Enforcement staff.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: File folders and file cards.

Retrievability: By name, for use by OCR staff in complaint investigations.

Safeguards: Printed materials are filed in lockable cabinets. The Department's Regulations (IPS PUB 3) govern the control.

Retention and disposal:
Director, Division of Operational Planning and Support
Office for Civil Rights
330 Independence Avenue, SW.
Room 5460, North Building
Washington, D.C. 20201

Notification procedure: System manager (above). Include name and address of complainant, a copy or summary of allegations contained in the original complaint, name of the institution against which the allegation was filed, and the date of the original allegation.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Complaint information filed with the Department by or on behalf of the individual complainant, also data provided by the alleged discriminator and other parties.

Systems exempted from certain provisions of the act: None.

09-90-0056

System name: New Orleans Louisiana Review, HEW OS-OCR-C & E-H.

Security classification: None.

System location: See Appendix 1 To Case Following System HEW, OS, OCR-01.

Categories of individuals covered by the system: Physicians in New Orleans referring patients to hospitals.

Categories of records in the system: Individual physician's name and address.

Authority for maintenance of the system: Title VI of the Civil Rights Act of 1964 (42 USC 2000d, 45 CRF Part 80), under court order.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See Departmental Regulations (45 CFR Part 5b) Appendix B. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Cards in Room 4528-G HEW North.

Retrievability: Card file is used in data processing.

Safeguards: Card file is in locked room.

Retention and disposal: Indeterminate.

System manager(s) and address:
Director Division of Operational Planning and Support
Office for Civil Rights
330 Independence Avenue, S.W.
Room 5460 - North Building
Washington, D.C. 20201

Notification procedure: System Manager (above).

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Data were provided by New Orleans, Louisiana Hospitals.

Systems exempted from certain provisions of the act: None.

09-90-0058

System name: Freedom of Information Case File and Correspondence Control Index. HEW OS-ASPA-FOIA.

Security classification: None.

System location:
Room 118F Humphrey Building
200 Independence Avenue, S.W.
Washington, D.C. 20201
(See Appendix 1 following)

Categories of individuals covered by the system: Individuals or organizations requesting access to inspect and/or copy records of the Department under provisions of the Freedom of Information Act.

Categories of records in the system: Name, address, and other individually identifying information about the requestor and the records sought.

Authority for maintenance of the system: Freedom of Information Act, P.L. 93-502 (5 U.S.C. 552) HEW Public Information Regulation (45 CFR, 5).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information will be released for the purposes cited in HEW proposed regulations, Appendix B, parts 3, 8, and 9. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Original or copy of incoming request and written response maintained in case file jackets and corresponding control log.

Retrievability: For the most part records are indexed by name of individual requestor. Records are available to FOI staff involved in correspondence and investigative processes, including appeals officials and members of the of the Office of General Counsel.

Safeguards: Records are maintained in Conserva-File cabinets in the offices of the Freedom of Information Officers and public affairs officers throughout the Department with limited access.

Retention and disposal: Individual case files are maintained for two years and then disposed of.

System manager(s) and address:
Freedom of Information Officer, PA
Room 118F, Humphrey Building
200 Independence Avenue, S.W.
Washington, D.C. 20201
(See Appendix 1 following)

Notification procedure: System Managers. Addresses same as above with the exception of Food and Drug Administration, contact:
FDA Privacy Coordinator (HF-50)
Food and Drug Administration
5600 Fishers Lane
Rockville, Md. 20857

Record access procedures: Access to these records may be obtained by request in writing or in person to FOI Officer and public affairs officers throughout the Department, addresses same as above.

Contesting record procedures: Same as above.

Record source categories: Individuals and organizations making requests under the Freedom of Information Act or from components of the Department reporting on the handling of such requests for inclusion in the annual report to Congress.

Systems exempted from certain provisions of the act: None.

System name: Federal Advisory Committee Membership Files, HEW. OS-ASPER-DCMO.

Security classification: None.

System location: System location is determined by nature of advisory committee. See Appendix 1.

Categories of individuals covered by the system: Individuals who have been or are presently members of or are being considered for membership on advisory committees within the jurisdiction of the Department of Health, Education, and Welfare. Additionally the system of records contains information about members of the public who have requested that they receive various publications through the inclusion of their names and addresses on various mailing lists.

Categories of records in the system: Information maintained on those individuals who have requested participation on mailing lists is limited to name and mailing address. Information maintained on individuals who are past, present, or recommended members of advisory committees subject to this notice consists of one or more of the following: name, title, sex, place and date of birth, home address, business address, organizational affiliation, phone number, degrees held, general educational background, ethnic background, resume, curriculum vitae, dates of term on advisory committee, status on advisory committee, reason for leaving advisory committee, previous or current membership on other advisory committees, special qualifications of the individual for the advisory committee membership, source who recommended the individual for membership on advisory committee and miscellaneous correspondence. Additionally, memoranda justifying the individual's selection are included in the file in cases in which the individual has served repetitively on advisory committees, has not had a one-year break in service on advisory committees, or where various statutory or other requirements for advisory committee membership cannot be met.

Authority for maintenance of the system: Federal Advisory Committee Act (5 U.S.C. App. I et seq.).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Annual Report to the President; administrative reports to OMB and GSA. In accordance with Appendix B Departmental Regulations (45 CFR Part 5b) Items 01, 3. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Records are maintained in hard-copy filed in file cabinets, on index cards, on magnetic tape, or in computer storage.

Retrievability: For the most part records are maintained in an alphabetical index by name of the individual. Certain files are based on other factors, e.g. Advisory Committee name, with a cross index based on an alphabetical listing of individuals. Certain other records are retrievable by individually identifiable computer identification codes. Certain of the mailing lists which are maintained are indexed by ZIP Code and within zone by alphabetical listing by name of the individual. Records from the system are available to the staffs of the respective Advisory Committees, the Committee Management Officers, the Departmental Committee Management Officer and other Departmental staff on a need-to-know basis. Uses include special administrative reports; quarterly alphabetical listings of past, present, and recommended members of Advisory Committees; computer lists of vacancies, acceptances, separations, active members, statistical reports by sex, youth, geographic location, etc; documentation of nominations; and other administrative needs.

Safeguards: Direct access to records is restricted to authorized personnel through locked files, rooms, and buildings as well as building pass and security guard sign-in systems. Certain facilities are also protected by closed circuit television systems. Computer systems are secured through locked magnetic tape libraries as well as lockword-password computer access systems.

Retention and disposal: Retention is variable from one year to permanent retention depending upon the type of record, e.g., names of former members of advisory committees are retained permanently. Certain records are disposed of by referral to the Federal Records Center. Others are disposed of as trash by the system manager or office of security depending upon the confidentiality of the information contained on the record.

V 4 3 / 1 8 8

System manager(s) and address: See Appendix 1. Federal Advisory Committee Membership Files.

Notification procedure: Same as above with the exception of Food and Drug Administration, contact:

FDA Privacy Coordinator (HF-50)
Food and Drug Administration
5600 Fishers Lane
Rockville, Md. 20852

Verification of identification of individuals inquiring as to information contained in this System of Record shall be in accordance with the procedures outlined in regulations published by the Department of Health, Education, and Welfare to implement the Privacy Act.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: The vast majority of information contained in records on individuals is obtained directly from the individual. Other information in the form of references and recommendations is obtained from other private individuals, program personnel, biographical reference books, private organizations, former employers, regional offices of HEW, Members of Congress, and other government sources.

09-90-0061

System name: Claims for Damage, Injury, or Death. HEW/RO3/ASD

Security classification: None.

System location:

Department of Health, Education, and Welfare
Regional III
Room 3300
3535 Market Street
Philadelphia, Pennsylvania 19104

Categories of individuals covered by the system: Federal employees and non-Federally employed individuals submitting claims for financial remuneration due to damage, injury or death which are Government related.

Categories of records in the system: 1. Personal information about claimant: name, address, age, marital status, name and address of spouse, insurance coverage. 2. Data relative to incident generating claim: date, time and place of occurrence. Type of incident (property damage, personal injury). Name of witnesses and other information relating to the case.

Authority for maintenance of the system: E.O. 11807, 11654, P.L. 91-596, Section 19(a), Section 7902, Title 5 U.S.C.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: To claimant's insurance representative and/or legal counsel. In accordance with Appendix B Departmental Regulations (45 CFR Part 5b) Item 1. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Records are maintained in file folders.

Retrievability: Records are indexed by the name of the individual claimant. Records may be accessed by Regional Claims Officer and Office of General Counsel.

Safeguards: Maintained in a locked metal cabinet.

Retention and disposal: Records are destroyed after a five (5) year retention period.

System manager(s) and address:

Regional Engineer
HEW/Region III
Room 5400, Gateway Bldg.
3535 Market Street
Philadelphia, Pa. 19104

Notification procedure: For inquiries: system manager and address as above. Identification needed. For retrieval: name, relationship to claim/claimant.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Claimant, investigative reports and statement of witnesses.

Systems exempted from certain provisions of the act: None.

09-90-0062

System name: Administrative Claims. HEW/OS/OGC.

Security classification: None.

System location: See Appendix.

Categories of individuals covered by the system: HEW employees; recipients of Federal assistance under HEW funded programs, and members of the public who have a claim against HEW or against whom HEW has a claim—Federal Torts Claims Act, Military Personnel and Civilian Employees Claims Act, Federal Claims Collection Act, Federal Medical Care Recovery Act, Act for Waiver of Overpayment of Pay.

Categories of records in the system: Information that is pertinent to the particular claim being asserted, including accident reports, hospital records, charges for medical services; certifications of overpayments, audits of payroll accounts during periods of overpayments, earning and leave statements; claims officers memorandum, final determinations made on claims, identity of debtors and information pertaining to how debts arose.

Authority for maintenance of the system: Federal Tort Claims Act, 28 U.S.C. 2671-2680, 1346(b); Waiver of Overpayment of Pay Act, 5 U.S.C. 5584; Military Personnel and Civilian Employees Claims Act, 31 U.S.C. 240 et seq.; Federal Claims Collection Act, 31 U.S.C. 951-953; Federal Medical Care Recovery Act, 42 U.S.C. 2651-2653.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Routine uses of these records are primarily for adjudicating claims between the U.S. and private parties. Records are used in communicating with, among others, Federal, State, and local law enforcement agencies, private individuals, private and public hospitals, allegedly negligent parties, private attorneys, insurance companies, the United States Attorney and other Federal officials and agencies, individual law enforcement officers, and tribal officials. These communications are all for the purpose of investigating, settling, or litigating claims. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected. See also Appendix B, of Departmental Regulations, (45 CFR Part 5b), items: (1), (3), (4), (5), (8), (100).

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Legal size files in filing cabinets.

Retrievability: Retrieved by name of the non-Government party, whether claimant, plaintiff, or alleged debtor. In some instances, these records are retrievable by cross reference to index cards, containing name of the party involved and the subject matter.

Safeguards: Office buildings in which files are kept are locked after the close of the business day. These files are only accessible to General Counsel staff.

Retention and disposal: The records are maintained for an indefinite duration.

System manager(s) and address: The agency official responsible for the system policies and practices outlined above is:

The General Counsel
Department of Health, Education, and Welfare
Office of the General Counsel
Room 722A, Humphrey Building
200 Independence Avenue, S.W.
Washington, D.C. 20201

Notification procedure: Any inquiries regarding these systems of records should be addressed to the System Manager. An individual who requests notification of or access to a medical record shall, at the time the request is made, designate in writing a responsible representative who will be willing to review the record and inform the subject individual of its contents at the representative's discretion. (These notification and access procedures are in accordance with Department Regulations (45 CFR, Section 5b.6) Federal Register, October 8, 1975, page 47411.).

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: The information in this system comes from a number of sources including private individuals, private and

SE 27 78 LIMI

public hospitals, doctors, law enforcement agencies and officials, private attorneys, accident reports, third parties, claimants or beneficiaries and their relatives, other Federal agencies, State and local governments, agencies and instrumentalities.

09-90-0064

System name: Litigation Files, Administrative Complaints, and Adverse Personnel Actions. HEW/OS/OGC

Security classification: None.

System location: See Appendix on the Administrative Claims system, 09900062.

Categories of individuals covered by the system: The individuals on whom records are maintained in this system are individuals who are involved in litigation with the Department or the United States (regarding matters within the jurisdiction of the Department) either as plaintiffs or as defendants in both civil and criminal matters, and individuals who either file administrative complaints with the Department or are the subjects of administrative complaints initiated by the Department, except claims which are the subjects of records maintained in the Administrative Claims System, 09900062.

Categories of records in the system: These records contain information pertaining to the subject matter of the litigation, administrative complaint, or adverse personnel action. Such records would include complaints, litigation reports, administrative transcripts, various litigation documents, investigative materials, correspondence, briefs, court orders and judgments, and in cases where personnel injury is involved, principally malpractice cases, evaluations by physician specialists (Public Health Service, Armed Forces, Institute of Pathology).

Authority for maintenance of the system: The authority for maintaining this system are the various statutes, regulations, rules or orders pertaining to the subject matter of the litigation, administrative complaint or adverse personnel action, (e.g., Public Health Service Act, Social Security Act, Civil Rights Act, Federal Food, Drug and Cosmetic Act).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected. See Appendix B, Departmental Regulations, (45 CFR Part 5b), items: (1), (3), (4), (5), (8), (100).

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: These records consist of legal size files stored in file cabinets.

Retrievability: These records are retrievable by name of the plaintiff or the first plaintiff if there is more than one, or by the name of the first defendant if the plaintiff is the United States. In the case of adverse personnel actions, records are retrievable by name of the individual involved.

Safeguards: Office buildings in which these records are maintained are locked after the close of the business day. These records are only accessible by General Counsel staff.

Retention and disposal: These records are maintained for an indefinite duration.

System manager(s) and address: The agency official responsible for the system policies and practices outlined above is:

The General Counsel
Department of Health, Education, and Welfare
Office of the General Counsel
South Portal Building, Room 722A
200 Independence Avenue, S. W.
Washington, D. C. 20201

Notification procedure: Any inquiries regarding these systems of records should be addressed to the System Manager. An individual who requests notification of or access to a medical record shall, at the time the request is made, designate in writing a responsible representative who will be willing to review the record and inform the subject individual of its contents at the representative's discretion. (These notification and access procedures are in accordance with Department Regulations (45 CFR, Section 5b.6) Federal Register, October 8, 1975, page 47411.).

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: The information for this system is obtained through a number of sources including the exchange of legal pleadings, documents, formal and informal discovery, program offices and component agencies, private attorneys, State and local governments, their agencies and instrumentalities, and officers of other Federal agencies and the individuals involved.

09-90-0065

System name: Conflict of Interest - Standards of Conduct Records. HEW/OS/OGC

Security classification: None.

System location: See Appendix on the Administrative Claims system— 09900062.

Categories of individuals covered by the system: Information about current and past HEW employees who are or have been the subject of conflict of interest or standards of conduct inquiries or determinations.

Categories of records in the system: These records include information relating to acceptance or offer of gifts, entertainment and favors, outside employment; financial interests; use of government funds, property or official information; partisan political activity; or other matters relating to ethical standards of conduct.

Authority for maintenance of the system: 18 U.S.C. 202, 203, 205, 207, 208, 209; Executive Order 11222; and, 5 CFR 735.104, 45 CFR Part 73.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected. See Appendix B, Departmental Regulations (45 CFR Part 5b) items: (1), (3), (4), (5), (8), (100).

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: These records are kept in legal size files in filing cabinets.

Retrievability: These records are retrievable by name in most cases. In some instances, these records are retrievable by cross reference to index cards containing the name of the party involved and the subject matter.

Safeguards: These records are only accessible to General Counsel staff. Office buildings in which these records are maintained are locked after the close of the business day.

Retention and disposal: The records are maintained for an indefinite duration.

System manager(s) and address: The agency official responsible for the systems policies and practices outlined above is:

The General Counsel
Department of Health, Education, and Welfare
Office of the General Counsel
Humphrey Building, Room 722A
200 Independence Ave., S.W.
Washington, D.C. 20201

Notification procedure: Any inquiries regarding these systems of records should be addressed to the System Manager.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: The information contained in this system comes from the individuals involved and from appropriate Department officials.

09-90-0066

System name: OGC-Attorney Applicant Files HEW-OS-OGC.

Security classification: None.

System location: See Appendix on the Administrative Claims System - 09900062

Categories of individuals covered by the system: Current Attorney Applicants for positions in the Office of the General Counsel.

Categories of records in the system: The Attorney Applicant system consists of a variety of records relating to persons applying for attorney positions. These records contain information about an individual's birth date; home address; telephone number; social security number; educational background (e.g., law schools attended and grades); past work experience; writing samples furnished on request; recommendations from past employers and academic officials.

Authority for maintenance of the system: 5 U.S.C. 3301 et seq.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: These records are maintained in file folders, alphabetized by name, and in some cases the records are separated by individual law school affiliation and by the date the application is received. In some instances records are located in lockable conserva-file cabinets and in a locked secured room with access limited to those officials whose duties require access. In other instances records are maintained in file rooms or with other Office of the General Counsel files.

Retrievability: These records are retrievable by name.

Safeguards: Access is limited to those HEW officials whose duties require access.

Retention and disposal: These records are retained in a current system for one year, and in some instances two years, after which time they are discarded.

System manager(s) and address: The agency official responsible for the systems policies and practices outlined above is:

The General Counsel
Department of Health, Education, and Welfare
Office of the General Counsel
Humphrey Building, Room 722A
200 Independence Avenue, S.W.
Washington, D.C. 20201

Notification procedure: Any inquiries regarding these systems of records should be addressed to the System Manager.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Information in this system of records comes from the individual to whom it applies, law school officials and past employers.

09-90-0067

System name: Invention reports submitted to the Department of Health, Education, and Welfare by its employees, grantees, fellowship recipients, and contractors. HEW-OS-OGC.

Security classification: None.

System location:

Office of the General Counsel
Patent Branch
Westwood Building - Room 5A03
5333 Westbard Avenue
Bethesda, Maryland 20016

Categories of individuals covered by the system: Department employees, investigators funded under HEW research grants, fellowship awardees, investigators funded under HEW research contracts.

Categories of records in the system: Invention reports.

Authority for maintenance of the system: 45 CFR Parts 6-8.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Department of Justice Claims Section for purpose of defending the Government in ligitation.

Scientific personnel, both in this agency, and other Government agencies, and in non-Governmental organizations (such as Universities), who possess the expertise to understand the invention and evaluate its importance as a scientific advance.

Contract patent counsel and their employees and foreign contract personnel retained by the Department for patent searching and prosecution in both the United States and foreign Patent Offices.

All other Government agencies whom we contact regarding possible use, interest in, or ownership rights in our inventions.

Prospective licensees or technology finders who may further make the invention available to the public through sale, use or publication.

Parties, such as supervisors of inventors, whom we contact to determine ownership rights, and those parties contacting us to determine the Government's ownership.

The United States and foreign Patent Offices for our filing of patent applications. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: These records are kept in individual file folders.

Retrievability: Indexed by both inventor's name and case identification number.

Safeguards: During normal business hours a member of the staff of the Patent Section regulates the availability of the files. During evening and weekend hours, the building is closed, with a guard at the front entrance, and only personnel authorized to be in the building are permitted entry.

Retention and disposal: The records are maintained here for the life of any patent issued (seventeen years), for seven years for any invention which is not patented, and they are sent to the Federal Records Center for retention when they are no longer required here.

System manager(s) and address:

Patent Counsel
Department of Health, Education, and Welfare
Westwood Building - Room 5A03
5333 Westbard Avenue
Bethesda, Maryland 20016

Notification procedure: An individual is required to provide his own name together with that of any other individual who contributed to the making of an invention, on which the system contains a record. Any inquiries regarding these systems of records should be addressed to the System Manager.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: The information comes from the inventors, their supervisors, other scientists with expertise in the particular area of the invention, scientific publications, newspapers, contract patent counsel who have searched and/or prosecuted the invention, and commercial organizations.

09-90-0068

System name: Federal Private Relief Legislation. HEW/OS/OGC.

Security classification: None.

System location: This system is located in the:

Division of Legislation
Office of the General Counsel
Office of the Secretary
Room 427 D, Humphrey Building
Department of Health, Education, and Welfare
200 Independence Ave., S.W.
Washington, D.C. 20201

Categories of individuals covered by the system: Private individuals, groups, or institutions for whom a United States Congressman or Senator has introduced a private relief bill.

Categories of records in the system: Background which gives rise to the individual's, group's, or institution's claim for private relief legislation.

Authority for maintenance of the system: 5 U.S.C. 301; OMB Circular A-19.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: The information is used to prepare reports to the Congress, most commonly to the Judiciary Committees of the Senate and the House of Representatives, which reports are thereafter made available to the public under the provisions of 5 U.S.C. 552. In connection with the preparation of those

reports, the information contained in this system of records will, as a routine use, be disclosed to officers and employees of the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular No. A-19 at various stages of the legislative coordination and clearance process as set forth in that Circular, and may, as a routine use, be disclosed to officers or employees of agencies (as defined in 5 U.S.C. 551(i) and 552(e)) other than the agency that maintains the record. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper records in file folders kept in legal size filing cabinets.

Retrievability: By bill number using card systems maintained by name and by subject.

Safeguards: Immediate access to these records are only by authorized staff. Building is locked at close of business.

Retention and disposal: Retained indefinitely either at System Location or at Federal Record Center where files are sent on a regular, predetermined schedule.

System manager(s) and address:

Chief, Legislative Reference and Control Service
Division of Legislation
Office of the General Counsel
Department of Health, Education, and Welfare
Room 427 D, Humphrey Building
200 Independence Avenue, S.W.
Washington, D.C. 20201

Notification procedure: Any inquiries regarding the records in question should be made to the System Manager.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: The information in this system comes from the principal operating components of the Department, the Public Health Service Agencies, the Education Agencies, the Office of the Secretary, Congressional Committees, individual Congressmen and Senators, and, in some cases, the subject individual, group, or institution.

Systems exempted from certain provisions of the act: None.

09-90-0069

System name: Unfair Labor Practice Records. HEW/OS/ASPER.

Security classification: None.

System location: Personnel Offices of the Department shown in Applicants for Employment Records, HEW System 09900006, Appendix 1 and offices of operating officials in organizational units serviced by those Personnel Offices.

Categories of individuals covered by the system: Current HEW employees and union officials.

Categories of records in the system: This system of records consists of a variety of records relating to an unfair labor practice charge. Examples of information which may be included in this system are the employee's name, Social Security Number, grade, job title, employment history and a variety of work and personnel records associated with the charges and required under proceedings established by Executive Order 11491 and Department of Labor Regulations.

Authority for maintenance of the system: Executive Order 11491, as amended.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Information in this system may be released to:

1. The Department of Labor.
2. In accordance with Items 1,3,4,5,6,7,8,9 of Departmental Regulations, (45 CFR Part 5b), Appendix B.
3. The Federal Labor Relations Council.
4. To the Civil Service Commission in carrying out its functions under Executive Order 11491.
5. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.
6. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Records are maintained in file folders.

Retrievability: Records are retrievable by name. They are used to make a determination on and to document a decision made on an unfair labor practice charge filed by an employee or union official. Information from this system may be used by Department officials for preparing statistical summary or management reports.

Safeguards: When not in use by authorized persons, these records are stored in lockable metal file cabinets. Access to and use of these records are limited to personnel who have a need for the records in performance of official duties.

Retention and disposal: The case files are maintained as long as they may be pertinent for purposes of precedent or as management information devices. When no longer useful for such purposes, they are destroyed.

System manager(s) and address: Personnel Officer shown in Appendix 1 of Applicants for Employment Records, HEW System 09900006, who services the organizational unit in which the individual is employed.

Notification procedure: Contact the systems manager and provide name, approximate date of record, the unfair labor practice charge as specified by the complainant, and management component in which the charge was filed.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Information in this system of records is:

1. Supplied directly by the individual, or
2. Derived from information supplied by the individual, or
3. Supplied by testimony of witnesses, or
4. Supplied by union officials, or
5. Supplied by Department officials.

Systems exempted from certain provisions of the act: None.

09-90-0070

System name: Motor Vehicle Accident Reports - HEW/OS/OGC.

Security classification: None.

System location:

Office of the Regional Attorney
Department of Health, Education, and Welfare
19th and Stout Streets
Denver, Colorado 80294

Categories of individuals covered by the system: Individuals involved in automobile accidents concerning Federal motor vehicles or while on Federal business; this includes both Federal and non-Federal employees.

Categories of records in the system: The information in this record relates to the circumstances of the accident.

Authority for maintenance of the system: 44 U.S.C. Section 3101.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Routine uses include requests to law enforcement agencies and officers for accident reports, to public or private hospitals, to private attorneys and insurance companies, to private citizens involved in the accident, to other Federal agencies, to State and local governments, their agencies and instrumentalities, all for purposes incident to resolution of responsibility for the accident. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: These records are kept in legal size files in filing cabinets.

Retrievability: Retrievable by name. Records are used to determine the appropriate cause of action in ascertaining the responsibility and liability for the accident in question.

Safeguards: Offices in which these files are kept are locked after the close of the business day.

Retention and disposal: Retained indefinitely at system location or at Federal Records Center where files are sent on a regular predetermined schedule.

System manager(s) and address: The agency official responsible for the system policies and practices outlined above is:

Regional Attorney
Department of HEW
19th and Stout Streets
Denver, Colorado 80294

Notification procedure: Any inquiries regarding the records in question should be made at the above address where the records are kept. Required identifying information will be in keeping with Department requirements.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Federal Motor Vehicle Accident Reports, accident reports from law enforcement agencies and officers, hospital and insurance company reports, statements from employees and private parties.

Systems exempted from certain provisions of the act: None.

09-90-0071

System name: Social Security Code Cards. HEW/OS/OGC.

Security classification: None.

System location:

Office of the Regional Attorney
Department of Health, Education, and Welfare
19th and Stout Streets
Denver, Colorado 80294

Categories of individuals covered by the system: Individuals referred to in this system are Social Security claimants or wage-earners who have been the subject of Social Security precedent opinions.

Categories of records in the system: The information in this system consists of the name of the individual on a 3 x 5 card and a code which cross-references to the location of the actual opinion. These cards are separate and distinct from the digest cards which are distributed nationally by the Office of the General Counsel.

Authority for maintenance of the system: 44 U.S.C. Section 3101.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: The subject information is kept on 3 x 5 cards which are kept in an office locked after the close of the business day. The opinions which are cross-referenced by the cards are kept in the files in the same office.

Retrievability: Retrievable by name. These cards are used to enable the researcher to obtain the appropriate social security precedent opinion which may then be cited in subsequent opinions distributed within OGC and SSA.

Safeguards: Office locked at the close of the business day.

Retention and disposal: Retained indefinitely at system location or at Federal Records Center where files are sent on a regular predetermined schedule.

System manager(s) and address: The agency official responsible for the system policies and practices outlined above is:

Regional Attorney
Department of HEW
19th and Stout Streets
Denver, Colorado 80294

Notification procedure: Any inquiries regarding the records in question should be made at the above address where the records are kept. Required identifying information will be in keeping with Departmental requirements.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: The information on the cards is gleaned from precedent opinions nationwide as well as those issued from Region VIII.

Systems exempted from certain provisions of the act: None.

09-90-0072

System name: Congressional Grants Notification Unit. HEW/OS/ASL

Security classification: None.

System location:

Room 435G Humphrey Building
200 Independence Avenue, S.W.
Washington, D.C. 20201

Categories of individuals covered by the system: Members of Congress.

Categories of records in the system: Notification form of grants or contract awards made by HEW. The form contains the name and address of the project director, the purpose of the grant or contract, and the HEW program involved.

Authority for maintenance of the system: 5 U.S.C. 301.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper files are maintained in standard file cabinets.

Retrievability: Files are indexed by State Congressional Districts with the name of the Congressional Representative of that District on the file. Records are retrieved by name, The staff uses this system for the following purposes: 1) To answer questions in the short term about amounts of HEW grant funds going into areas of the country according to congressional districts. 2) To verify that actual notification to members offices of awards has been made.

Safeguards: These records are public information and available on request.

Retention and disposal: Grant notification files are discarded after two calendar years.

System manager(s) and address:

Director, Congressional Liaison
Office of the Assistant Secretary for Legislation
Room 435G South Portal Bldg. Building
200 Independence Avenue, S.W.
Washington, D.C. 20201

Notification procedure: Same as above. The Congressional District or name of the Congressional Representative of that district and the approximate date of the award must be provided.

Record access procedures: Address same as above.

Contesting record procedures: Address same as above.

Record source categories: Agencies within the Department making the grant/contract awards.

Systems exempted from certain provisions of the act: None.

09-90-0074

System name: Federal Parent Locator System. HEW OCSE.

Security classification: None.

System location:

Office of Child Support Enforcement
Department of Health, Education, and Welfare
330 C. Street, S.W.
Washington, D.C. 20201

Categories of individuals covered by the system: Records are maintained on parents being sought for the purpose of establishing or enforcing support obligations against such a parent.

Categories of records in the system: Name of Absent Parent, Social Security Number (when available), date of birth, place of birth, mother's maiden name, father's full name, State case identification number, local identification number (State use only), State originating request, date of origination, type of case (AFDC, non-AFDC full service, non-AFDC locate only), type of military service (Army, Navy, Marines, Air Force, Coast Guard, not in service), retired military (yes or no), Veteran's Benefits (yes or no), Federal employee (yes or no), court order (yes or no), recent employer's address, known alias (last name only), date requests sent to Federal departments (SSA, IRS, DOD, NPRC, VA), date of Federal departments' responses, and indication of the type of information received; such as last home or employer address was returned, and/or a Social Security Number was returned from the Social Security Administration, or no address information was returned. The actual information returned pursuant to a request retained in a separate file long enough to communicate that information to the State. (See Retention and Disposal section below).

Authority for maintenance of the system: Public Law 93-647.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: The Federal Parent Locator Service will use the records maintained in the system to: (1) Request the most recent home address and/or place of employment from any department, agency, or instrumentality of the Federal government or State which might have such records in its files; (2) Provide the most recent home address, most recent place of employment, and Social Security Number to the appropriate IV-D agency for its use in locating absent parents to establish or enforce a child support obligation.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: PLS records are maintained on disk and magnetic tape, and hard copy. The record is defined as a request for address information.

Retrievability: System records can be accessed by either a State assigned case identification number or Social Security Number.

Safeguards: All requests must be certified by the State IV-D Agency such that: (1) they are being made to locate an absent parent for the purpose of establishing paternity or securing child support and for no other purpose; (2) the State IV-D agency has made diligent and reasonable efforts to find the absent parent and cannot locate the person. (See 45 CFR 303.3); (3) the State IV-D agency has in effect protective measures to safeguard the personal information being transferred and received from the Federal Parent Locator Service; and (4) the State IV-D agency will use or disclose this information for the purposes prescribed in 45 CFR 302.18. All personnel, Federal employees and contractor, are required to take a nondisclosure of information oath. All input documents will be inventoried and accounted for. All inputs and outputs will be stored in a locked receptacle in a locked room. All outputs will be labeled 'For Official Use Only' and treated accordingly. Operations control will be vested under a single system manager. Every State using the system will be verified via three levels of user ID's. All data files will be protected by unique passwords and security codes. Remote users have 'read only' system access capabilities. They cannot read any master file or perform any other function on the system. The system complies with the security measures in IPS PUB 3 and has been reviewed by the HEW ADP Systems Security Task Force.

Retention and disposal: Records of address information provided in response to requests from IV-D agencies are maintained only long enough to communicate them to the State. After this time they are destroyed. A record of the request only which includes information provided by the State, Federal agencies contacted, and an indication of the type of information so returned is stored on a history tape and hardcopy. All history data will be retained for five years.

System manager(s) and address:

Director, Parent Locator Service Division
Office of Child Support Enforcement
Department of Health, Education, and Welfare
330 C. Street, S.W.
Washington, D.C. 20201

Notification procedure: Contact the system manager in writing at the above address and provide your name and address. Additional information, such as your Social Security Number, date of birth or mother's maiden name, may be requested by the system manager in order to distinguish between individuals having the same or similar names.

Record access procedures: Same as above.

Contesting record procedures: Individuals that feel the information provided through the above procedures is inaccurate should inform the Federal Parent Locator Service at the address listed for Notification Procedures. The Federal Parent Locator Service will acknowledge this request within ten (10) work days and indicate one of the following: a) the error has been corrected; b) the State child support agency that submitted the original information; c) other steps the individual must follow to correct the inaccuracy.

V 43 / 188 SE 27 78

Record source categories: Information is obtained from departments, agencies, or instrumentalities of the United States or of any State.

Systems exempted from certain provisions of the act: None.

09-90-0075

System name: MBTA Prepaid Pass Program Participants. HEW-ROI-ARD.

Security classification: None.

System location:

HEW, Office of Director for Administrative Support Center
Room 2411, JFK Federal Building
Boston, Massachusetts 02203

Categories of individuals covered by the system: Any HEW employee who is participating in the MBTA Pass Program.

Categories of records in the system: Name, Department, SSN, Credit Union Account Number, Type of Plan, Sex, Signature of Employee, and Pass Number.

Authority for maintenance of the system: Executive Order 011491.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. Used as basis of requesting MBTA Pass and as a control of Pass numbers in case of replacement by Massachusetts Bay Transportation Authority, Forrest Hills Station, Boston, Massachusetts. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Storage—3x5 cards in file box.

Retrievability: Retrievability—By name.

Safeguards: Safeguards—Office doors locked during non-working hours.

Retention and disposal: Retention and disposal—Kept as long as employee is a participant in the Program. Cancellation cards are kept for six months after month cancelled; then destroyed.

System manager(s) and address:

Secretary to Director for Administrative Support Center
HEW, Room 2411, JFK Federal Building
Boston, Massachusetts 02203

Notification procedure: Address: Same as above. Identifying Information: Name, Social Security Number (on a purely voluntary basis).

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Supplied by employee.

Systems exempted from certain provisions of the act: None.

09-80-0002

System name: Developmental Disabilites Complaints and Correspondence Files HEW HDS RSA DDO RO7.

Security classification: None.

System location:

Room 384
601 East 12th Street
Kansas City, Missouri 64106

Categories of individuals covered by the system: Individuals who have made inquiries regarding complaints or requested information regarding services from Developmental Disabilities program; and those who have commented to the Department on its proposed rules and practices.

Categories of records in the system: Name and address of individuals submitting correspondence, responses and exchanges of material associated with investigations of complaints or relaying information to appropriate State or local Developmental Disabilities agencies.

Authority for maintenance of the system: Developmental Disabilities Services and Construction Act (P.L. 94-103).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: To members of Congress who inquire on behalf of a constitutent; to a State or local agency or institution against which a complaint has been made; See Departmental Regulations, (45 CFR Part 5b) Appendix B Items 1,8. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: The records are maintained in hard-copy filed in standard file cabinets.

Retrievability: For the most part records are indexed according to State and within each State by alphabetical name of inquirer. Records are available to DDO staff involved in correspondence and investigative processes, including members of the Office of General Counsel. Occasionally, personnel with special expertise in other programmatic areas or responsible persons at State or local agencies may be given records for the purpose of assisting DDO staff in resolution of issues.

Safeguards: Direct access is restricted to authorized DDO staff; access to room in which file cabinets are maintained is limited during non-working hours to those with keys to room.

Retention and disposal: Inquiry records are maintained three years; complaint and investigative records are maintained five years past date of case closing and then sent to Federal Records Center.

System manager(s) and address:

Director, Developmental Disabilities Office
601 East 12th Street, 3rd Floor
Kansas City, Missouri 64106

Notification procedure: Any inquiries regarding these systems of records should be in writing and should be addressed to the System Manager.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations, (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Incoming correspondence, responses and material obtained during course of any investigation, individuals themselves.

Systems exempted from certain provisions of the act: None.

09-80-0006

System name: National Center on Child Abuse and Neglect Mailing list. HEW HDS ACYF CB.

Security classification: None.

System location:

Room 5564
400 - 6th Street, S.W.
Washington, D. C. 20201

Categories of individuals covered by the system: Persons interested in the National Centers publications, interested in making grant applications, project directors, social workers and others interested in information on child abuse and neglect.

Categories of records in the system: Names, titles, addresses.

Authority for maintenance of the system: P.L. 95-266, The Child Abuse Prevention and Treatment Act.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Addressograph plates, paper files.

Retrievability: Indexed alphabetically. Various categories of institutions, agencies, organizations are cross-indexed.

Safeguards: Available only to authorized personnel.

Retention and disposal: Names are kept indefinitely; may be removed on request.

System manager(s) and address:

Communications Specialist
Room 5564
400 - 6th Street, S.W.
Washington, D.C. 20201

Notification procedure: Any inquiries regarding these systems of records should be in writing and should be addressed to the System Manager.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations, (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Grant applications, letters, telephone calls, other OCD mailing lists, individuals themselves.

Systems exempted from certain provisions of the act: None.

09-80-0007

System name: National Center for Child Advocacy Mailing list. HEW HDS ACYF CB.

Security classification: None.

System location:

Room 5819
400 - 6th Street, S.W.
Washington, D.C. 20201

Categories of individuals covered by the system: Persons interested in Child Advocacy activities including social workers, foster parents, juvenile court judges, Community Coordinated Child Care program directors, various Federal staff and members of the general public who have requested information.

Categories of records in the system: Names, titles, addresses.

Authority for maintenance of the system: Childrens' Bureau Act of 1912.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Addressograph plate, paper file.

Retrievability: Indexed alphabetically, cross-indexed by area of subject interest.

Safeguards: Available only to authorized personnel.

Retention and disposal: Names kept on file indefinitely; may be removed on request.

System manager(s) and address:

Chief, Program Development & Innovation Division
Room 5819
400 - 6th Street, S.W.
Washington, D. C. 20201

Notification procedure: Any inquiries regarding these systems of records should be in writing and should be addressed to the System Manager.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations, (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: Other ACYF mailing lists grant applications, letters, telephone calls, individuals themselves.

Systems exempted from certain provisions of the act: None.

09-80-0009

System name: ACYF Mailing List HEW HDS ACYF R10.

Security classification: None.

System location:

Administration for Children, Youth & Families
1921 2nd Avenue, MS 622
Seattle, Washington 98101

Categories of individuals covered by the system: ACYF grantees, affiliates, persons requesting information on ACYF programs.

Categories of records in the system: Mailing Key contains persons' names, titles, and addresses only.

Authority for maintenance of the system: Community Services Act of 1974 (42 U.S.C. 2701).

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: On 3 x 5 index cards and metal plates.

V 43 / 188 SE 27 78

Retrievability: Indexed by code using letters and numbers; used for correspondence, to distribute program information.

Safeguards: Access by authorized personnel only.

Retention and disposal: List is continually updated. Information is kept as long as accurate and persons are still interested in receiving information, then they are destroyed.

System manager(s) and address:
Head, ACYF
Region X
1921 2nd Avenue, MS 622
Seattle, Washington 98101

Notification procedure: Any inquiry regarding these systems of records should be in writing and should be addressed to the System Manager.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register. October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Contesting record procedures: Contact the officials at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: From individuals requesting by phone or letter to be placed on list.

Systems exempted from certain provisions of the act: None.

09-80-0015

System name: National Clearinghouse on Aging-Mailing Keys HDS AOA NCA.

Security classification: None.

System location:
4553 North Building
330 Independence Avenue, S.W.
Washington, D. C. 20201

Categories of individuals covered by the system: Individuals interested in the field of aging.

Categories of records in the system: Name, title, and address of individual or organization.

Authority for maintenance of the system: Older Americans Act of 1965, as amended.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual. In the event of litigation where one of the parties is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in

S E 2 7 7 8

his or her individual capacity where the Justice Department has agreed to represent such employee, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that Department to effectively represent such party, provided such disclosure is compatible with the purpose for which the records were collected.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: The records are maintained in a card index file and computer storage. A listing of the various lists by type of organization or purpose and the number of addresses on each list, plus the number of copies to be distributed, is maintained.

Retrievability: Indexed by name of individual or organization used by staff for mailing AOA publications, fact sheets, and press releases.

Safeguards: Card index may be inspected on demand but general use restricted to authorized personnel.

Retention and disposal: Lists are circularized yearly as required by the Joint Committee on Printing, and individuals not responding are dropped from list.

System manager(s) and address:
Director, Office of Public Information
4553 North Building
330 Independence Avenue, S.W.
Washington, D.C. 20201

Notification procedure: Any inquiries regarding these systems of records should be in writing and should be addressed to the System Manager.

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought. (These access procedures are in accordance with Department Regulations (45 CFR, Section 5b.5(a)(2)) Federal Register, October 8, 1975, page 47410.).

Contesting record procedures: Contact the official at the address specified under notification procedures above, and reasonably identify the record and specify the information to be contested. (These procedures are in accordance with Department Regulations (45 CFR, Section 5b.7) Federal Register, October 8, 1975, page 47411.).

Record source categories: From Individuals themselves, professional directories, grant files.

Systems exempted from certain provisions of the act: None.
